Heritage Signature® Auction #1300

# U.S. Coins

October 17-19, 2019 | Dallas

## FLOOR Signature® Sessions 1-3

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Heritage Auctions, Dallas • 1st Floor Auction Room  
3500 Maple Avenue • Dallas, TX 75219

### Session 1 – PREMIER

Thursday, October 17 • 6:00 PM CT • Lots 3001–3376

### Session 2

Friday, October 18 • 2:00 PM CT • Lots 3377–3904

### Session 3

Friday, October 18 • 6:00 PM CT • Lots 3905–4225

## ONLINE ONLY Signature® Session 4

(HERITAGELive!®, Internet, Fax, & Mail only Session)

### Session 4

Saturday, October 19 • 2:00 PM CT • Lots 7001–7885

## LOT SETTLEMENT AND PICK-UP

Weekdays starting Friday, October 18th 10:00 AM –  
1:00 PM CT by appointment only.

Extended Payment Terms available. Email: [Credit@HA.com](mailto:Credit@HA.com)

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

### Buyer's Premium Per Lot:

This auction is subject to a Buyer's Premium of 20% (minimum \$19) per lot.

TX Auctioneer Licenses: Teia Baber 16624; Ed Beardsley 16632; Sarah Davies 17505; Nicholas Dawes 16784; Sophie Duncan 17901; Christopher Dykstra 16601; Fiona Elias 17126; Francesca Felgar 17902; Samuel Foote 11727; Alissa Ford 17104; Kathleen Guzman 16142; Emily Hartman 17922; Gregory Holman 17653; Roberta Kramer 17439; Brent Randall Lewis 17881; Jennifer Jayne Marsh 17105; Marina Medina 17512; Bob Merrill 13408; Paul Minshull 16591; Rochelle Mortenson 17898; Scott Peterson 13256; Michael Provenzale 17157; Michael Sadler 16129; Barry Sandoval 17649; Martin Scammel, Jr. 17659; Nathan Schar 17365; Kimberly Serrano 17657; Anthony Singleton 17507; Andrea Voss 16406; Jacob Walker 16413; Rachel Weathers 17907; Brian Wiedman 17894; Adam Williams 17893; Phillip Wooten 17656.

## BIDDING METHODS

### HERITAGE Live!®<sup>1</sup> Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at [HA.com/Live](http://HA.com/Live)

### Live Floor Bidding

Bid in person during the floor sessions.

### Live Telephone Bidding (Floor Sessions Only)

Phone bidding must be arranged 24 hours before your session begins. Client Service: 866-835-3243

### Internet Absentee Bidding

Proxy bidding ends ten minutes prior to the session start time. Live Proxy bidding continues through the session. [HA.com/1300](http://HA.com/1300)

### Fax Bidding

Fax bids must be received 24 hours before your session begins. Fax: 214-409-1425

Phone: 214-528-3500 • 877-HERITAGE (437-4824)

Fax: 214-409-1425

Dear Bidder,

August and September have come and gone -- always two important months in the coin business, for both dealers and collectors. The August ANA World's Fair of Money Convention in Chicago was followed closely by September's Long Beach Expo in California, where Heritage's official Signature® auctions did exceptionally well at both events. Auction proceeds grossed more than \$46 million at the ANA, and over \$31 million at Long Beach, based on combined prices realized from U.S. Coins, World & Ancient Coins, plus World and U.S. Currency. U.S. coins alone accounted for more than \$50.7 million from the two auctions, with a sell-through rate exceeding 99%.

As always, there are strengths and weaknesses in the market. Gold is going great guns, while Colonial and early copper issues were slightly less robust. Across the board, rarity is the most important factor regardless of type or denomination.

Our current Dallas Signature auction will build on momentum from the ANA and Long Beach, with an impressive Premier Session on Thursday evening, October 17, plus two floor sessions on Friday – one in the afternoon, followed by an evening session. Our online-only Internet Signature® Session is on Saturday afternoon, October 19.

Highlights stand out through all categories of U.S. coinage, from early type to a host of modern rarities. More than 2,100 lots comprise the full Dallas event, evenly dispersed throughout collectible copper, silver, and gold issues. Some notable lots include:

- 28 Colonial lots, including a Gem Continental dollar – the EG FECIT Newman 3-D variety struck in pewter – certified MS65 NGC. High-quality surfaces are lustrous and brightly attractive for a pewter piece. It ranks solidly among Condition Census examples of the EG FECIT type. Heritage cataloger David Stone's description of the Continental dollar provides an excellent perspective about the importance of the Continental dollar, and its controversial origins.

- Seven great Territorial gold lots are led by a Mint State 1849 Norris, Gregg, & Norris five dollar gold piece, Kagin-2, certified MS61 NGC. This rare issue is among the first of all Territorial gold pieces struck by Norris, Gregg, & Norris, thought to be the earliest of California Gold Rush private minters.

- A five-piece Pan-Pac set (offered as five separate lots) includes fifty dollar Round and Octagonal pieces in attractive Mint State.

- A 1901-S Barber quarter, luxuriously toned, is certified MS65 PCGS.

- 22 Franklin half dollars, which have been unusually absent from recent auctions. Two conditionally rare proofs highlight the offering -- a superb 1950 PR67+ Cameo NGC, and an equally fantastic 1951 PR67+ Ultra Cameo NGC.

- 18 proof Trade dollars, including a remarkable 1880 PR68 Cameo; also 14 proof Shield nickels, plus two Mint State 1885 Liberty nickels graded MS67 (one by NGC, the other by PCGS). Each is tied for finest- certified of the series-key date.
- 885 lots in the online-only Saturday Internet Signature® Session, where sharp-eyed buyers never fail to find outstanding value at market-driven prices.

We wish all of our friends, clients, and dealer associates a warm welcome to our World Headquarters in Dallas. This is our opportunity to meet and serve you, and we look forward to assisting you with lot viewing, buying, selling, consigning, or simply answering any questions you might have. We hope you can attend the auction in person. If unable to attend, you can always bid through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding, and online bids with HERITAGELive!®.

Good luck and -- once again -- welcome to the Big D!

Sincerely,

Greg Rohan  
President

Todd Imhof  
Executive Vice-President

## SESSION ONE

## COLONIALS

1652 Oak Tree Threepence, VF35  
Noe-28, W-310

**3001** 1652 Oak Tree Threepence VF35 PCGS. Noe-28, W-310, Salmon 6-B, R.4. No IN on Obverse. The central devices are bold, as are most of the peripheral letters on this well-centered Choice VF Oak Tree threepence. Olive and stone-gray surfaces are smooth with rose and golden accents. Listed on page 40 of the 2020 *Guide Book*. NGC ID# 2ARH, PCGS# 18

1776 Continental Dollar, MS65  
CURRENCY, EG FECIT, W-8460  
Rarely Seen This Fine

**3002 1776 Continental Dollar, CURRENCY, Pewter, EG FECIT, MS65 NGC. Newman 3-D, W-8460, R.4.** Despite a documented history dating back more than 235 years, the 1776 Continental dollar remains an enigmatic issue to numismatists today. The coins have been studied by some of the greatest numismatic researchers of all time, but opinions about the origin and intended purpose of the coins remain divided. Regardless of their controversial nature, the coins remain elusive, valuable, and historic relics of our numismatic past. Heritage Auctions is pleased to present this spectacular Gem representative in this important offering.

The 1776 Continental dollar was first illustrated in a German book by Matthias Christian Sprengel called *Historical and Genealogical Almanac, or Yearbook of the Most Remarkable New World Events for 1784*, published in 1783. The coin's legends were translated into German in the illustration, for the benefit of its intended readership and its publisher actually wrote to Benjamin Franklin asking for illustrations to use in the book, but there is no record of Franklin's reply. The Continental dollar was also mentioned in Bishop Richard Watkins' *Chemical Essays* (Volume IV), first published in 1786. After discussing the "gun money" issues of King James III, Watkins notes:

"The Congress in America had recourse to the same expedient; they coined several pieces of about an inch and a half in diameter, and of 240 grains in weight; on one side of which was inscribed in a circular ring near the edge - Continental Currency, 1776 - and within the ring a rising sun, with - fugio - at the side of it, shining upon a dial, under which was - Mind your business. - On the reverse were thirteen small circles joined together like the rings of a chain, on each of which was inscribed the name of some one of the thirteen states; on another circular ring, within these, was inscribed - American Congress - and in the central space - We are One."

Despite these early mentions in popular publications, and the obvious belief on the part of the authors that the 1776 Continental dollars were American coins, no documentary evidence authorizing the issue of these pieces has ever been found in Congressional records.

The traditional theory of the origin of the Continental dollar was developed by Eric P. Newman in the 1940s. Most of the Continental dollars were struck in pewter, but a few examples are known in brass and silver. Seven different die varieties have been identified. Newman believed the Continental dollars were intended as a type of fiat money, created as a substitute for the paper money issued by the Continental Congress to pay government obligations during the Revolutionary War. In February and May of 1776, the Continental Congress passed resolutions issuing various denominations of paper money, including the dollar bill. However, similar resolutions passed in July and November of that year authorized the printing of many other denominations, but omitted the dollar note. Newman believed the Continental dollar coins were struck to take the place of less durable paper dollars in the last half of 1776. Newman's theory was convincing and widely accepted, but the lack of official documentation always bothered rigorous numismatic researchers. Recent discoveries suggest the origin of the Continental dollar may have been quite different.

In their groundbreaking article in the January 2018 issue of *The Numismatist* titled "The Myth of the Continental Dollar", Eric Goldstein and David McCarthy presented evidence suggesting the Continental dollars were struck privately in London in 1783, for sale as medals, rather than circulating coins. They quoted prominent 18th century Philadelphia coin collector Pierre Eugene Du Simitierre's notes on the Continental dollar, "... a coin the size of a crown, with devices and Mottos, taken from the continental money, struck't in London on Type-Metal and dated 1776." Du Simitierre was a student of Congress, as well as numismatics, and was particularly well-placed to understand the history of the Continental dollar. Other contemporary Americans, including Paul Revere and Josiah Meigs, disputed that the Continental dollar was ever a circulating American coin in their correspondence, but perhaps the most convincing evidence of the foreign origin of the Continental dollar comes from abroad.

Lady Sarah Sophia Banks preserved a remarkable specimen of the Continental dollar in her coin collection, which was bequeathed to the British Museum. She kept a detailed inventory of her collection, which has also been preserved. Her notes on the Continental dollar read, "Continental Dollar. 1776. never current, struck on speculation in Europe, for sale in America." She also kept a simple handbill that accompanied the Continental dollar advertising the sale of "These American MEDALS at/Six-Pence Each/N.B. Representing the Paper Currency of a/Dollar, which goes for/Four Shillings and Six-pence in that country." The flyer then gives a detailed description of a Newman 3-D EG FECIT Continental dollar under the heading EXPLANATION. Similar explanatory handbills were issued with contemporary medals that depict American themes, like the Libertas Americana medal and the Treaty of Paris medal, Betts-610. From these documentary sources, Goldstein and McCarthy concluded that the Continental dollars were struck in London, circa 1783, as a commemorative medal, rather than a coin.

Regardless of which theory you subscribe to, and we expect the last word has not been heard yet, the 1776 Continental dollar remains an important numismatic link with the early history of this country. Whether it was produced to serve as a medium of exchange during the hard times of the Revolution, or struck to commemorate those struggles a few years later, like the Libertas Americana medal, it occupies a unique and storied position in our American numismatic heritage. The present coin is a delightful Gem, with bright silver-gray fields and darker medium gray devices. The design elements are sharply detailed throughout, with the usual long reverse die crack that starts in the GEORGIA ring and travels clockwise through the other rings to DELAWARE. The well-preserved surfaces are mostly smooth, with some slight granularity around the sundial and some light freckling in the ring, between FUGIO and EG FECIT. The overall presentation is most attractive. Listed on page 87 of the 2020 *Guide Book*. Census: 2 in 65 (1 in 65★), 3 finer (9/19).

Ex: The Amherst & Waccabuc Collections (Stack's, 11/2007), lot 242. NGC ID# 2AYU, PCGS# 795

1786 Vermont Landscape, AU50  
VERMONTENSIMUM, Ryder-6, W-2020

- 3003** 1786 Vermont Copper, VERMONTENSIMUM, RR-6, B. 4-D, W-2020, R.2, AU50 PCGS. The obverse is struck approximately 5% off-center south with a minor planchet streak above the plow at the handle. Otherwise, the well-struck obverse exhibits bold legends and the seven trees fully brought-up. The reverse is more properly centered with the lower half of the dentilation visible and the legend full. Struck from a late state of the reverse die, showing the diagnostic eyebrow crack under the QU of QUARTA forming an inverted V at the upright of T. Glossy, medium chocolate-brown color covers both sides of this attractive Landscape copper. Listed on pages 73-74 of the 2020 *Guide Book*.

Ex: Beverly Hills Signature (Heritage, 11/2014), lot 3007; Central States Signature (Heritage, 4/2017), lot 3031. PCGS# 800826 Base PCGS# 545

1787 Fugio Cent, MS65+ Brown  
UNITED STATES, W-6740, N. 8-B

- 3004** 1787 Fugio Cent, UNITED STATES, 4 Cinquefoils, MS65+ Brown PCGS. N. 8-B, W-6740, R.3. This Pointed Rays, UNITED STATES Fugio variety features the N in MIND over the upright of the U in BUSINESS, and the R in ARE closely centered above the N below. Glossy steel and reddish-brown surfaces are heavily clashed with copper-orange color glowing around the devices. The lower obverse and upper reverse are soft, but the rest of the design is strong. Listed on page 89 of the 2020 *Guide Book*. NGC ID# 2B8F, PCGS# 889

1783 Chalmers Threepence, W-1760, XF40  
Seldom-Encountered Denomination

- 3005** 1783 Chalmers Threepence XF40 PCGS. Breen-1018, W-1760, R.5. Annapolis, Maryland silversmith John Chalmers issued small silver coins in 1783, denominated as threepence, sixpence, and shillings. His shillings are the most frequently encountered today, and his sixpence are least as frequently seen. Although Chalmers earned a profit from his silver coins, they were well-respected and filled a void in commerce in the late 18th century. This attractive example has delicate rose and champagne toning over pleasing blue-steel surfaces. A well-centered impression shows full border details on the obverse and partial border details on the reverse. Listed on page 53 of the 2020 *Guide Book*. Population: 3 in 40, 12 finer (9/19). NGC ID# 2AUP, PCGS# 592

1783 Chalmers Threepence, AU53+  
Important Colonial-Era Issue  
W-1760, Strong Definition

**3006** 1783 Chalmers Threepence AU53+ PCGS. CAC. Breen-1018, W-1760, R.5. The coinage conditions of the period were such that John Chalmers, a silversmith in Annapolis, Maryland, felt compelled to strike his own coins. Chalmers was upset by the lack of circulating change in general and the preponderance of unscrupulously cut Spanish fractionals. He struck threepence, sixpence, and shilling coins in 1783 to remedy the situation, with multiple varieties known for the sixpence and shilling.

This lovely, high-end threepence in AU53+ displays antique golden-gray patina with lavender and peach-orange accents. The legends and motifs are strong with minimal trace of rub. Struck slightly off-center toward 11 o'clock on the obverse (the coin is upside down in the holder). Listed on page 53 of the 2020 *Guide Book*. Population: 2 in 53 (2 in 53+), 8 finer. CAC: 1 in 53, 2 finer (9/19). NGC ID# 2AUR, PCGS# 592

1783 Chalmers Sixpence, XF40  
W-1770, Large Date

**3007** 1783 Chalmers Sixpence, Large Date XF40 PCGS. Breen-1014, W-1770, R.6. There are four varieties of Chalmers sixpence listed in the *Whitman Encyclopedia of Colonial and Early American Coins*, and these varieties rank among the hardest of all colonial American coins to properly attribute. Examination of the various listing in the *Whitman Encyclopedia* and Walter Breen's *Complete Encyclopedia* suggest that one of the varieties may not exist. Differentiating the Small Date and Large Date dies provides a significant challenge. As is often the case, this pleasing Chalmers sixpence is unevenly struck with weak details at the lower obverse and left side of the reverse. A few old scratches are blended with the surrounding surfaces that exhibit trivial handling marks. A trace of mint luster remains. Listed on page 53 of the 2020 *Guide Book*. Population: 2 in 40, 2 finer (9/19). NGC ID# 2AUS, PCGS# 594

## HALF CENT

1796 C-2, B-2 Half Cent, VF Details  
Key Liberty Cap Issue

**3008** 1796 With Pole, C-2, B-2, High R.4 — Corrosion — NGC Details. VF. The mintage of 1796 half cents is divided between two varieties — the scarce-but-available With Pole variety (C-2, such as the present coin), and the rare No Pole variety (C-1). While the exact mintage is unknown, an estimated total of just 1,390 pieces were struck. The surviving With Pole coins outnumber the No Pole pieces by a factor of about 4 to 1 — together, they represent the lowest circulation strike mintage among all half cents, and the two varieties are the undisputed keys to the Liberty Cap series.

This example shows light-to-moderate corrosion evenly dispersed throughout each side. Liberty's portrait is strong for the noted VF sharpness, with several hair strands defined and fully legible devices on both obverse and reverse. HALF CENT is only slightly weak compared to its surrounding wreath and legend. Semi-glossy steel-brown surfaces retain positive eye appeal. The coin is struck marginally northeast of center, with the rim and dentils somewhat weak at the upper-right quadrant. Our EAC grade VG8.

## LARGE CENTS

1793 Wreath Cent, Choice XF  
Vine and Bars Edge  
S-9, B-12

**3009** 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2, XF45 PCGS. The horizontal branch stem above the famous 1793 date and the diagonal spray of berries below ST in STATES are diagnostic for the Sheldon-9 variety. This represents the most often seen die marriage for any 1793 Large cent, making high-grade examples popular targets among collectors searching for a singular coin to represent the first year of production at the Philadelphia Mint.

This is a moderately glossy steel and mahogany-brown offering with generally smooth surfaces and strong remaining detail on the portrait, date, dentils, wreath, and legends. The highest points of the curls and leaves are lightly worn. A mark in the obverse field at 8:30 is the only one of note. Our EAC grade VF35. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

1796 Reverse of '95 NC-4, B-23 Cent, VF30  
The Finest Known

- 3010** 1796 Reverse of 1795, NC-4, B-23, High R.5, VF30 NGC. Breen Die State I, with no reverse die crack. The sharpness is about VF25 with light roughness on both sides, showing splashes of maroon corrosion on the reverse. Trivial circulation marks on the obverse are only visible with a loupe. Attractive olive-brown with dark brown devices. Unlisted in Bland or Noyes, and finer than any example in either census. Our EAC grade Fine 15.  
Ex: From an old date set (*Superior*, 2/2003), lot 181; W.M. Wadlington (via Bob Grellman and Chris McCawley, 6/30/2005); Dan Holmes (*Goldberg Coins*, 9/2009), lot 169; Adam Mervis Collection (*Heritage*, 1/2014), lot 2563; FUN Signature (*Heritage*, 1/2019), lot 3875. 1813 Cent, MS61 Brown  
S-292, B-2, Glossy Surfaces

- 3011** 1813 S-292, B-2, R.2, MS61 Brown NGC. Breen Die State V, which he describes as: "Flow lines are stronger in the field. Reverse dentils are gone. Tops of TATES OF merge with inner ridge." The 1813 S-292 cent is a conditionally rare Classic Head variety. This example features glossy steel-brown surfaces with reddish-violet and olive accents. Significant evidence of die erosion, but still well-detailed. Our EAC grade AU50. NGC ID# 224X, PCGS# 36511 Base PCGS# 1570

PROOF LARGE CENT

1844 Cent, PR64 Brown  
Extremely Rare Proof N-1 Example  
Ex: Twin Leaf, Naftzger, Loring

- 3012** 1844 N-1, R.8 as Proof, PR64 Brown PCGS. Ex: Twin Leaf Collection. Grellman Die State a. The reflective fields exhibit ruby-red, aquamarine, and autumn-gold toning. The motifs are chocolate-brown. Identified by small spots near star 2 and the T in UNITED. Slight die misalignment causes a sharper strike on the upper obverse and lower reverse than on the lower obverse and upper reverse. Nearly all proof 1844 cents are Newcomb-8 with tines from the dentils near stars 1 to 2. Newcomb-1, with blatant repunching near the base of the 1 in the date, is plentiful as a business strike but extremely rare in proof format. Just two examples have been certified as proof by the leading services, this PR64 Brown PCGS coin and another graded PR63 Brown, also by PCGS. The other piece appeared as lot 71 in the January 2011 Ira & Larry Goldberg auction of the Dan Holmes Collection. The same two coins are listed as proofs in the Grellman and Loring censuses for N-1. Our EAC grade PR60.  
Ex: Charles F. Heining Collection (*Stack's*, 10/1978), lot 922; Denis Loring; Roy E. Naftzger, Jr, 11/1980.; Eric Streiner; Denis Loring, 8/1994; Twin Leaf Collection, Part I (*Stack's-Bowers*, 7/2015), lot 2372, which realized \$8,812.50; FUN Signature (*Heritage*, 1/2019), lot 3928, which realized \$9,000. PCGS# 397602 Base PCGS# 1961

## FLYING EAGLE CENTS

1858/7 Flying Eagle Cent, MS63  
Large Letters, Snow-1, FS-301

- 3013 1858/7 Large Letters, Snow-1, FS-301, MS63 PCGS. High Leaves, Closed E in ONE. The right ear of a 7 is visible near the upper right corner of the final 8 in the date, and there is a die lump in the field above the 85. This is a pleasing, satiny Select example with olive-gold patina and luminous fields. Abrasions are minimal. The usual strike weakness is seen on the eagle's tailfeathers and the corresponding right-hand portion of the wreath. Snow-1 is an important *Guide Book* variety, sought-after in all grades. Population (Snow-1): 3 in 63, 2 finer (8/19).

From *The Jona Collection, Part II*. NGC ID# 2277, PCGS# 37383 Base PCGS# 2022

1858 Small Letters Flying Eagle Cent  
Colorful MS66

- 3014 1858 Small Letters MS66 PCGS. The finest Small Letters 1858 Flying Eagle cents certified are Premium Gems. This example is conditionally rare and delightfully attractive. Copper-orange hues around the margins frame lilac and golden color in the centers, without any distracting abrasions. An interesting die crack runs vertically at 8 o'clock on the obverse from the rim through the eagle's beak to the wing. No mentionable strike weakness is observed. Population: 18 in 66 (6 in 66+), 0 finer (9/19). NGC ID# 2279, PCGS# 2020

## PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent, PR64  
Snow-3, Famous Key Date

- 3015 1856 Snow-3 PR64 PCGS. The repunched 5 in the date and the die scratch below the right ribbon end confirm the Snow-3 attribution. Rick Snow writes in his series reference: "By correlating the surviving population of this issue [about 500 pieces] with the historical record, it is nearly certain that this issue makes up most or all of the 634 specimens originally distributed to Congress to help promote passage of the pending coinage bill." This satiny bronze-gold near-Gem displays a needle-sharp impression. Carbon and contact are minimal. A fantastic example of the famous Flying Eagle cent key date. NGC ID# 227A, PCGS# 47058 Base PCGS# 2037

1856 Proof Flying Eagle Cent  
Snow-9, Fine Details

- 3016 1856 Snow-9 — Scratched — PCGS Genuine. Proof, Fine Details. The attribution pick-up points are faint due to the extent of wear on this circulated proof, although the absence of prominent die markers for other varieties confirms that this piece is a Snow-9 representative. Wear is even and each side displays original olive-tan patina. Scattered light abrasions are typical of the grade, although a thin pinscratch from the rim through the O in OF and down across the eagle prevents a numeric grade from PCGS. A collectible 1856 Flying Eagle cent.

## INDIAN CENTS

1860 Cent, MS66+  
Pointed Bust, FS-401

- 3017** 1860 Pointed Bust, FS-401, MS66+ PCGS. CAC. The Pointed Bust variant among 1860 Indian cents, which is listed separately in the annual *Guide Book*, is elusive, especially in upper Uncirculated grades. This Premium Gem exhibits delightful coppery-gold surfaces with reflective fields that frame the sharply defined relief elements. Vibrant mint luster is distinctly satiny. Abrasions are scant, with the only one of note being a minuscule tick on Liberty's neck. An impressive piece for an advanced collection or Registry Set. Population: 14 in 66 (4 in 66+), 2 finer. CAC: 8 in 66, 1 finer (9/19). NGC ID# 227F, PCGS# 37393 Base PCGS# 2056

1877 Indian Cent, MS64 Brown  
Choice Collector Coin

- 3018** 1877 MS64 Brown NGC. The shallow N in ONE identifies this near-Gem 1877 cent as a business strike. There are minimal abrasions for the grade, and satiny luster takes on a glossy appearance at certain angles. Other than some minor weakness on the top three headdress feathers, little strike weakness is evident. Both sides have deep burgundy-brown color with subtle tinges of coppery-orange emerging in the fields.  
*From The Jona Collection, Part II.* NGC ID# 2284, PCGS# 2127

1887 Cent, Satiny MS66 Red  
Rarely Offered This Fine

- 3019** 1887 MS66 Red PCGS. Red examples of the 1887 Indian cent are rare finer than MS65, and only a handful of pieces exist at the Superb Gem level. This Premium Gem displays satiny golden-orange luster and a pleasantly sharp strike. No abrasions are seen, and only a few microscopic pepper specks are discernible with a loupe. Housed in a green label holder. Population: 29 in 66 (6 in 66+) Red, 3 finer (8/19). NGC ID# 228F, PCGS# 2159

## PROOF INDIAN CENT

1877 Cent, PR65+ Red and Brown  
Sharp and Reflective

- 3020** 1877 PR65+ Red and Brown PCGS. CAC. Scrutiny of this high-end Gem proof fails to reveal a single point of strike softness, and the fields are deeply reflective. About half of each side displays bright copper-gold color, with a balance of burgundy and olive toning. The Plus designation and CAC endorsement earn this coin high marks for collector appeal. Proof 1877 Indian cents are often acquired as alternatives to the conditionally scarce, key-date circulation strike. CAC: 33 in 65, 6 finer (9/19). NGC ID# 229W, PCGS# 2319

## LINCOLN CENTS

1909-S VDB Cent, MS66 Red and Brown  
Key First-Year Lincoln Issue

- 3021** 1909-S VDB MS66 Red and Brown PCGS. Graded Red and Brown by PCGS but clearly leaning toward the Red and of the color spectrum. Only faint chestnut wisps over each side prevent a full Red designation. This key-date Lincoln cent is well-struck and satiny. Much of each side is golden-orange in color and free of abrasions and carbon spotting. Eye appeal is excellent for the grade. Population: 87 in 66 (1 in 66+) Red and Brown, 1 finer (8/19). NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS66 Red  
Capstone Issue in the Series

- 3022 1909-S VDB MS66 Red PCGS.** Arguably one of the most well-recognized issues in American numismatics, the 1909-S VDB cent sustains ever-strong demand from collectors of all pursuits. The present Premium Gem features glowing luster and warm amber-red coloration. A small area of lighter toning occurs in the left obverse field. The designer's initials are clearly visible on the lower reverse, and all other motifs are equally sharp. The surfaces lack any mentionable abrasions. PCGS reports only 15 Red coins in higher numeric grades (8/19).

Ex: *Dallas Signature* (Heritage, 2/2015), lot 3021, which realized \$8,900.

From *The Jona Collection, Part II*. NGC ID# 22B2, PCGS# 2428

1914-D Cent, MS64 Red  
Key Denver Issue

- 3023 1914-D MS64 Red PCGS. CAC.** The key-date 1914-D Lincoln cent needs no introduction among numismatists. Produced to the extent of less than 1.2 million pieces, this issue was not saved from circulation in as significant numbers as the lower mintage 1909-S VDB. This important near-Gem is awash in full, medium red luster. The strike is sharp, and were it not for a scattering of microscopic pepper specks on the obverse, a finer grade might have been achieved. Higher-grade Red 1914-D cents are seldom available.

Ex: *Santa Clara Bullet Sale* (Heritage, 11/2002), lot 147, which realized \$3,335; *Long Beach Signature* (Heritage, 6/2004), lot 5278, which realized \$4,830.

From *The Jona Collection, Part II*. NGC ID# 22BH, PCGS# 2473

1917-D Cent, MS66 Red  
Unsurpassed Technical Quality

- 3024 1917-D MS66 Red PCGS.** This Premium Gem 1917-D cent exhibits a nearly unmarked obverse and just some light chatter at the upper reverse with an identifying tick on the O in ONE. Coppery-gold surfaces are smooth and satiny with razor-sharp detail on the portrait, wheat stalks, and legends. Housed in a green label holder. Population: 7 in 66 Red, 0 finer (9/19). NGC ID# 22BT, PCGS# 2500

1922 No D Cent, AU58  
Strong Reverse, FS-401

- 3025 1922 No D, Strong Reverse, FS-401, AU58 PCGS. CAC.** FS-401 is the variety collectors desire, with the Strong Reverse and missing mintmark. This borderline-Uncirculated key date is glossy and largely deep chocolate-brown with copper accents on Lincoln's cheek and a few diagonal wisps of the same across the right side of the reverse. Abrasions are scant. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

1969-S FS-101 Cent, AU53  
Doubled Die Obverse

- 3026** 1969-S Doubled Die Obverse, FS-101, AU53 PCGS. The 1955 Doubled Die Obverse cent may have the edge when it comes to fame among the general public, but the 1969-S DDO is renowned among Lincoln cent specialists and coin roll hunters as the holy grail in the series. Broad doubling is strongest on the date, LIBERTY, and the motto. Lightly circulated chocolate-brown surfaces show coppery accents over the high points. A few carbon spots are noted, and the only singular mark is a diagonal tick in the field just right of the president's chin. There is also a small mark on the rim at 4 o'clock. This coin is sure to hold a place of significance in any Lincoln cent set. Population: 5 in 53, 29 finer (9/19). PCGS# 37994 Base PCGS# 2921

1969-S Doubled Die Cent, MS63 Brown  
Among the 100 Greatest U.S. Modern Coins

- 3027** 1969-S Doubled Die Obverse, FS-101, MS63 Brown NGC. Die doubling is plainly visible on the date, LIBERTY, and IN GOD WE TRUST. PCGS estimates that only about 30 examples of this variety are known, and it is ranked second in Schechter and Garrett's *100 Greatest U.S. Modern Coins*, third edition, surpassed in importance only by the 1975 No S proof dime. They write: "It is definitely the most valuable Lincoln cent variety and among the most rare." Discovered in 1970, the variety was initially declared a counterfeit by the U.S. Secret Service, however, the Service later reversed its position when it was confirmed that the variety was a genuine Mint error. In the decades since, the Doubled Die's popularity has ballooned among collectors, compounded by the fact that few additional examples have ever been discovered.

This unworn piece displays satiny chestnut-brown surfaces with deep copper-orange undertones. There are no significant abrasions, although the rich patina slightly subdues the luster, preventing a finer numeric grade in the eyes of NGC. A pleasing example of this important modern rarity. PCGS# 37994 Base PCGS# 2921

## PROOF LINCOLN CENTS

1911 Cent, PR67 Brown  
A Major Registry Set Rarity

- 3028** 1911 PR67 Brown NGC. Needle-sharp detail and rich matte luster characterize this Superb Gem Brown 1911 proof. Both sides display deep burgundy and copper-orange hues, although not enough "red" is evident to warrant a Red and Brown designation. Eye appeal is outstanding. Only a couple of tiny specks are visible with a loupe, on the reverse. The 1911 matte proof cent is rarely offered in any PR66 category, and just three pieces are graded PR67 at NGC, including one Red and Brown coin. Census: 2 in 67 Brown, 0 finer; 1 in 67 Red and Brown, 0 finer (9/19). NGC ID# 22KU, PCGS# 3309

1938 Cent, PR67 Red Cameo  
Beautiful Deep-Mirror Fields

- 3029** 1938 PR67 Red Cameo PCGS. PCGS has certified only 40 proof 1938 cents as Cameos, and this Superb Gem is among the finest of them. Just four Red Cameos are this fine at PCGS, and NGC lists only four more in this grade (8/19). The coin is boldly struck and deeply reflective, with modest contrast on the Lincoln portrait. Copper-pink color characterizes the obverse, while the reverse displays richer orange-gold and lilac hues. Population: 4 in 67 Red Cameo, 0 finer (8/19). NGC ID# 22L5, PCGS# 83341

1941 Cent, PR67 Red  
One of the Best-Preserved Examples

- 3030** 1941 PR67 Red PCGS. Proof production continued its ascent in 1941, with the Mint striking 21,100 pieces in this format. The issue is surprisingly scarce in this grade, with none finer, although Premium Gems are available. Each side displays flashy, mirrorlike fields and brick-red color. Minor carbon appears on the obverse. Population: 13 in 67 Red, 0 finer (9/19). NGC ID# 3H34, PCGS# 3350

## PROOF THREE CENT NICKEL

1882 Three Cent Nickel, PR68 Cameo  
Among Finest Certified

- 3031** 1882 PR68 Cameo NGC. Unlike 1881, 1882 was a low mintage date for the three cent nickel. Only 3,100 proofs and 22,200 commercial pieces were struck. In typical proof condition, the 1882 can be obtained readily, but PR68 specimens that demonstrate pleasing white-on-black contrast are undeniably rare. The pristine surfaces show only a whisper of golden toning, along with a horizontal die crack on the reverse at 9 o'clock. Census: 5 in 68 Cameo (1 in 68+), 0 finer (9/19). NGC ID# 2765, PCGS# 83778

## PROOF SHIELD NICKELS

1867 No Rays Nickel, PR66 Cameo  
Pattern Reverse, FS-1902

- 3032** 1867 No Rays, Pattern Reverse, FS-1902, PR66 Cameo PCGS. The star points to the first A in AMERICA, as opposed to between AM. Although PCGS has certified more than 200 submissions of the 1867 No Rays proof nickels, it shows only 14 certified with the Pattern Reverse. Probably two dozen exist, according to USPatterns.com. This brilliant Premium Gem Cameo example features watery, finely textured mirrors and full design detail. PCGS# 519407 Base PCGS# 519406

1873 Nickel, PR67 Cameo  
Closed 3, None Finer

- 3033** 1873 Closed 3 PR67 Cameo PCGS. At least 1,100 proof Shield nickels were struck in 1873, all of them early in the year with a Closed 3 in the date. This is one of the top examples from that production. It displays jet-black fields, frosty relief elements, and tremendous cameo contrast. Population: 4 in 67 (1 in 67+) Cameo, 0 finer (9/19). NGC ID# 276P, PCGS# 83827

1874 Nickel, PR67+ Cameo  
One of the Finest Survivors

- 3034** 1874 PR67+ Cameo PCGS. CAC. The *Guide Book* reports an estimated mintage of 700+ pieces for the proof 1874 Shield nickel, which were struck alongside more than 3.5 million business strikes that year. Most collectors will have little trouble locating a high-end proof with Cameo contrast. However, only a single PR66 Deep Cameo coin is graded at PCGS, and this is technically one of the two finest examples at that service. Black-and-white surfaces boast dramatic contrast and appear flawless to the unaided eye. Population: 8 in 67 (2 in 67+) Cameo, 0 finer in this category. CAC: 4 in 67, 0 finer (9/19). NGC ID# 276R, PCGS# 83828

1877 Shield Nickel, PR66 Ultra Cameo  
Just One Ultra Cameo Finer at NGC

- 3035** 1877 PR66 Ultra Cameo NGC. The exact mintage of 1877 proofs is a matter of debate. The *Guide Book* mintage of 900 pieces is often thought to be too low, and that perhaps as many as 1,250 or 1,500 proofs were struck. In any case, the 1877 Shield nickel is far and away the rarest of all regular issue nickels to the present day. It is much rarer than the 1878 proof only nickel, which had close to double the mintage. This Premium Gem Ultra Cameo 1877 is brightly mirrored and boldly contrasted. The brilliant surfaces show brief golden gray toning accents a few pinpoint flecks. Eye appeal is terrific. Census: 1 in 66 Ultra Cameo, 1 finer (9/19). NGC ID# 4YTA, PCGS# 93831

## LIBERTY NICKELS

1885 Liberty Nickel, MS67  
Tied for Finest Certified

- 3036** 1885 MS67 PCGS. The 1885 has been recognized for more than a century as the coin to have, the key to the set of Liberty nickels. Only about 1.4 million pieces were struck and examples were set aside shortly after this tiny mintage became known; although by the time the general public was aware of it most coins of this date had been in circulation for some time. The availability of the 1885 shows a typical bell curve. At PCGS, the MS60 grade shows only five pieces certified; numbers gradually increase to the MS64 grade level with 113 graded, then quickly taper off to the ultimate grade of MS67 with only six pieces (9/19). Struck from a late state of the dies, this is an untoned, satiny example that is fully struck throughout. NGC ID# 2773, PCGS# 3846

1885 Liberty Nickel, Luminous MS67  
Condition Census Registry Coin

**3037 1885 MS67 NGC.** Not only the accepted key date in the series, the 1885 Liberty nickel is also a major condition rarity. The date, with a mintage of little more than 1.4 million coins, is scarce in MS66, and Superb Gems are of the utmost rarity. NGC lists only two such coins — this piece, and one in MS67+; PCGS reports six submissions in MS67, also with none finer (9/19). These top Registry coins are mostly likely to change hands at auction, and yet, auction appearances of them are few and far between. Since our Permanent Auction Archives began in 1993, we have handled a Superb Gem 1885 Liberty nickel on only three occasions. Prices realized have ranged from \$18,000 to \$43,200.

This softly frosted example is fresh to our auctions. Delicate lilac iridescence adorns the luminous surfaces and cartwheel effect, while the design elements showcase tremendous sharpness. Neither side has a single mentionable abrasion. NGC ID# 2773, PCGS# 3846

1886 Liberty Nickel, MS66  
Series Key in High Grade

**3038 1886 MS66 PCGS.** From a modest business-strike mintage of 3.3 million pieces, the 1886 Liberty nickel is usually regarded as the second-rarest issue of the series. In terms of high-grade rarity, the 1886 is actually number one, narrowly eclipsing its 1885 counterpart. It seems the coins were all released into circulation at the time of issue and circulated heavily for decades, before collector interest developed enough to cull them out of circulation in the 1930s. The 1886 is rare in MS66 condition today, and finer coins are virtually unobtainable.

This spectacular Premium Gem exhibits sharply detailed design elements in most areas, with just a touch of the usual softness on the lower wreath. The well-preserved surfaces radiate satiny mint luster, under shades of lavender-gray and pale gold toning. Population: 16 in 66 (2 in 66+), 3 finer (9/19). NGC ID# 277U, PCGS# 3847

PROOF LIBERTY NICKEL

1892 Nickel, Delicately Toned PR68  
Finest Proof Certified, Top of the Census

**3039 1892 PR68 NGC.** This is the sole-finest proof 1892 Liberty nickel at NGC by two grades, nor has PCGS certified any 1892 proof nickel at the PR68 level or finer. Befitting the unsurpassed grade, a ringing-sharp strike delivers full details and the fields are deeply mirrored. Both sides exhibit delicate, iridescent pastel toning with outstanding eye appeal and no blemishes. Modest contrast is seen on each side, falling just short of a Cameo designation. Unequalled in any proof format, this splendid example is sure to become the showpiece in one of the finest Liberty nickel collections. NGC ID# 2782, PCGS# 3890

## BUFFALO NICKELS

1916 FS-101 Nickel, AU53  
Doubled Die Obverse  
Scarce *Guide Book* Variety

- 3040** 1916 Doubled Die Obverse, FS-101, AU53 NGC. Not only is the 1916 Doubled Die Obverse nickel a widely recognized and highly sought-after *Guide Book* variety, it is genuinely scarce at any grade level. The combined certification totals at NGC and PCGS, factoring in some unknown number of resubmissions, suggest that roughly 250 to 350 examples survive. Die doubling is most dramatic on the date, but the spread also appears on the chin, feathers, and ribbon. Definition remains strong throughout with minimal friction. Only the middle part of the braid is trivially soft. This is a pleasing, high-end example with attractive olive-gold accents that should impress any discerning collector. Census: 4 in 53, 37 finer (9/19). NGC ID# 2TSS, PCGS# 145628 Base PCGS# 3931

1920 Nickel, MS67  
Destined for a Top Registry Set

- 3041** 1920 MS67 PCGS. This is a well-struck Philadelphia Buffalo nickel in an essentially unsurpassed state of preservation. Aside from a single Plus-graded MS67 at PCGS, there are no finer examples at either service. Each side is softly lustrous and fully brilliant without any marks to mention. Destined for a top-tier Registry set. Population: 20 in 67 (1 in 67+), 0 finer (9/19). NGC ID# 22RP, PCGS# 3944

1920-S Nickel, MS65  
One Coin Graded Finer at PCGS

- 3042** 1920-S MS65 PCGS. Writing for PCGS CoinFacts, David Hall once called the 1920-S Buffalo nickel the second rarest issue in the series in Gem condition or finer after the 1926-S. This Registry-worthy representative ranks among the finest collectible examples at PCGS and should generate considerable excitement. It boasts softly frosted mint luster and finely textured, carefully preserved surfaces with little more than a few microscopic ticks on the portrait and date. Strike definition is far above-average. Population: 33 in 65 (2 in 65+), 1 finer (9/19). NGC ID# 22RS, PCGS# 3946

1920-S Buffalo Nickel, MS65  
Pristine, Shimmering Mint Luster

- 3043** 1920-S MS65 PCGS. The 1920-S is one of many Buffalo nickel strike rarities from the 1920s. David W. Lange wrote, "The worst ones look like wax coins left to melt in the sun." This example is one of the few Gem 1920-S examples at either service. While most 1920-S nickels have subpar luster and eye appeal, this bluish-gray coin displays attractive pale-lavender highlights and strong mint luster throughout both sides. The strike is sharp on the Indian's hair, weakening only slightly at the braid knot. Eye appeal is exceptional for a 1920-S. Population: 33 in 65 (2 in 65+), 1 finer (9/19). NGC ID# 22RS, PCGS# 3946

1921-S Buffalo Nickel, MS65  
Better San Francisco Issue

- 3044 1921-S MS65 PCGS.** This is a sharp Gem example of one of what can be a challenging issue in the Buffalo nickel series. The coin shows none of the usual distractions that seem to plague 1921-S nickels. There are no planchet laminations, grease stains, or metal flow from die erosion present. The strike is sharp — struck from properly spaced dies, with attractive toning that intermixes sunset-gold with magenta, lemon-yellow, and silver-gray on the highpoints. A faint die crack runs through the Indian's hair, from near the large rear feather about halfway to the temple. PCGS has graded few finer examples. Population: 84 in 65 (9 in 65+), 11 finer (9/19). NGC ID# 22RU, PCGS# 3948

1926-D Nickel, MS67  
Among the Finest Examples  
Strong Strike, Beautiful Patina

- 3045 1926-D MS67 NGC.** No other issue in the series has quite the same reputation as the 1926-D. That reputation is one for poor production quality, lackluster surfaces, and incomplete detail. While strike alone was not the culprit, the Denver Mint did use dies well past their normal life as a cost-cutting measure. This 1926-D is simply exceptional. The design, while not entirely complete, is as strong as one could ever hope to find. The usual problem areas show traces of softness, but nothing significant. The coin is richly toned with golden centers surrounded by rings of multicolor pastel patina. Satiny and immaculately preserved. Census: 6 in 67 (1 in 67+), 0 finer (9/19). NGC ID# 22S6, PCGS# 3958

1930 Nickel, MS67+  
Top-Certified Registry Coin

- 3046 1930 MS67+ PCGS. CAC.** The 1930 nickel is scarce in MS67 despite a mintage approaching 23 million coins. This is one of only three Plus-graded Superb Gems at PCGS (another example resides in an NGC holder) with none finer at both grading companies. Original mint brilliance gives way to occasional splashes of pale golden color. The surfaces remain brightly frosted and showcase pinpoint definition everywhere except the Indian's braid and the bison's shoulder. A not-to-be-missed opportunity for the dedicated Buffalo nickel enthusiast. Population: 44 in 67 (3 in 67+), 0 finer. CAC: 9 in 67, 0 finer (9/19). NGC ID# 22SH, PCGS# 3969

1934 Buffalo Nickel, MS67+  
None Numerically Finer

- 3047 1934 MS67+ PCGS. CAC.** The upper portion of the braid and the top of STATES are the only devices that are overtly soft on this otherwise boldly struck Superb Gem nickel. Both sides are brilliant and highly lustrous with tinges of rose-gold and powder-blue. Population: 43 in 67 (5 in 67+), 0 finer. CAC: 7 in 67, 0 finer (9/19). NGC ID# 22SL, PCGS# 3972

1937-D Three-Legged Nickel, MS64+  
FS-901, Famous Guide Book Variety  
High End for the Grade, CAC

**3048** 1937-D Three-Legged, FS-901, MS64+ PCGS. CAC. One of the great 20th century numismatic curiosities and a transcendent variety that appeals to collectors of many specialties, the 1937-D Three-Legged nickel helped inspire one of the greatest influxes of new collectors to the hobby, the likes of which has not been repeated to this day, except (perhaps) by the 1955 doubled die cent and the 1943 bronze planchet off-metal cent errors.

This is a resplendent, high-end example, with the bison's missing foreleg glaringly obvious, and diagnostic weakness at its hind leg as well. The strike is characteristically sharp despite numerous areas of die erosion typical of the variety. Gold and lilac shades shine, illuminated by bright mint luster that gives this near-Gem excellent eye appeal. The coin's CAC endorsement is key for the issue in high grades. Population: 15 in 64+, 77 finer. CAC: 53 in 64, 39 finer (9/19). NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1937-D Three-Legged Nickel, MS65  
Rare and In Demand in Gem Condition

**3049** 1937-D Three-Legged, FS-901, MS65 PCGS. CAC. It is interesting to note that the *Cherrypickers' Guide* gives its highest rating of 5 for both Interest Factor and Liquidity Factor for each of the three popular Buffalo nickel varieties, the 1916 Doubled Die Obverse, the 1918/7-D, and the 1937-D Three-Legged. This seems to be out of kilter, as there are many collectors, even type collectors, who would likely consider the purchase of a 1937-D Three-Legged Buffalo in preference to the other rarer varieties; thus, we believe its Interest Factor should be even higher. The demand especially for Gem examples of the Three-Legged 1937-D can never approach the limited supply. The surfaces of this piece are bright and satiny, and each side has a layer of muted reddish-golden patina. There are no mentionable abrasions on either side, and the strike is above-average for this normally weak issue. Population: 64 in 65 (10 in 65+), 13 finer. CAC: 33 in 65, 6 finer (9/19). NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1937-S Buffalo Nickel, MS67+  
Attractively Toned Registry Candidate

- 3050** 1937-S MS67+ PCGS. A satiny example, well-struck even in the centers, with no discernible abrasions. The obverse displays bright lemon-gold toning, accented with lilac in the Indian's hair. Delicate pastel iridescence graces the reverse. Only a dozen 1937-S Buffalo nickels at PCGS in MS67 are Plus-graded, and finer pieces are prohibitively rare. PCGS lists only two higher-grade examples (9/19). NGC ID# 22SY, PCGS# 3983

PROOF BUFFALO NICKELS

1916 Buffalo Nickel, PR67  
Low Mintage of 600 Matte Proofs

- 3051** 1916 PR67 NGC. Only 600 proof Buffalo nickels were struck in 1916, marking the lowest mintage in the short-lived matte proof series. Superb Gem survivors from this mintage are scarce, and only a handful are finer than the present PR67 coin. Luster is satiny beautifully preserved. A trace of light champagne toning graces each side, slightly warming the surfaces. Census: 25 in 67 (1 in 67+, 1 in 67★), 2 finer (9/19). NGC ID# 278V, PCGS# 39931936 Brilliant Finish Nickel, PR68 Among the Finest at NGC

- 3052** 1936 Type Two — Brilliant Finish PR68 NGC. This incredible Superb Gem Brilliant Finish proof is among the finest certified at NGC, a distinction that makes it conditionally rare and of the utmost importance to Registry Set collectors. The faintest trace of lilac and champagne toning graces each side, and the strike is full throughout. The mirroring in the fields is remarkably deep. Census: 23 in 68 (1 in 68+), 0 finer (9/19). NGC ID# 278Y, PCGS# 3995

JEFFERSON NICKEL

1953-D Nickel, MS67 Full Steps  
None Graded Finer

- 3053** 1953-D MS67 Full Steps NGC. Seldom does the 1953-D nickel come with Full Steps, and only a handful of examples are graded at this unsurpassed level. Satiny nickel-gray surfaces present blushes of thin golden color over each side. Sharply struck with five clearly defined steps. Registry collectors should bid accordingly. Census: 5 in 67 Full Steps, 0 finer (9/19). NGC ID# 22UP, PCGS# 84050

## EARLY HALF DIMES

1797 16 Stars Half Dime, MS66  
One of the Finest V-3, LM-3 Examples Known

**3054** 1797 16 Stars, V-3, LM-3, R.5, MS66 PCGS. The 16 Stars was the second of three types to be produced in 1797; after the 15 Stars and prior to the 13 Stars variant. Of the two 16 Stars varieties, this one has a leaf distant from the first T in STATES, while LM-2 has a leaf nearly touching the first T in STATES.

Logan and McCloskey call this a scarce die marriage that is difficult to locate in Mint State. Currently, NGC reports that they have graded six examples of this variety in Mint State, including one at MS66. PCGS has seen 14 Uncirculated examples of the 16 Stars type, including two Premium Gems; but those numbers are not broken down to distinguish between the LM-2 and LM-3 varieties (9/19).

This impressive, conditionally rare specimen is sharply struck on the obverse, except for a few of the star centers. A pair of short, thick die cracks extend out from the rim: one to star 8, and another between stars 7 and 8. Faint die rust is evident near and among the date digits, and scattered at random in other areas. Die lines are seen beneath stars 10, 11, and 12; and star 13 is broadly recut. Die clash marks are evident in the right obverse field.

The reverse is just as fully lustrous as the obverse, but shows deeper patina, especially near the peripheries where shades of deep-purple, golden-brown and yellow-gold are apparent. The astonishingly clean surfaces of this remarkable coin ensure its impressive high grade, which ranks it among the finest-known examples of this date, denomination, and die variety. Population: 2 in 66, 0 finer (9/19).

Ex: Oliver Jung; *Chicago Signature* (Heritage, 8/2014), lot 5549, realized \$141,000. NGC ID# 22ZZ, PCGS# 38599 Base PCGS# 4259

1803 Large 8 Half Dime, AU50  
V-1, LM-2, Draped Bust Type Coin

- 3055** 1803 Large 8, V-1, LM-2, R.4, AU50 NGC. This About Uncirculated Draped Bust type coin is well-detailed across the interiors, with little high-point wear. Slight strike weakness around the upper reverse margin does not detract. Deep, olive-gray patina covers each side, and the surfaces are devoid of bothersome abrasions. Half dime coinage was minimal during the early years of the Mint. In 1803, one of the higher mintages was produced, yet this still amounted to only 37,850 coins. Census: 2 in 50, 14 finer (9/19). NGC ID# 2329, PCGS# 38608 Base PCGS# 4269

### SEATED HALF DIME

1840-O Half Dime, AU58  
With Drapery Design, CAC

- 3056** 1840-O Drapery AU58 PCGS. CAC. Small O Mintmark. Weakly struck at the head and at star 8, this near-Mint With Drapery is otherwise well-struck. Finely granular, frosted surfaces display light, silver-gray toning with areas of medium gray accents. Plentiful mint luster remains. The 1840-O With Drapery is scarce in all grades, and seldom seen any finer. This example earns CAC endorsement, with attractive surfaces and undeniable eye appeal. Population: 4 in 58, 4 finer. CAC: 3 in 58, 4 finer (9/19). NGC ID# 232X, PCGS# 4327

### EARLY DIME

1796 JR-1 Dime, Choice XF  
Rich Original Patina

- 3057** 1796 JR-1, R.3, XF45 PCGS. The cud below star 1 and a die crack below the right (facing) wing confirm status as JR-1, the first dime die variety coined at the First Philadelphia Mint. This is a well-defined gunmetal-gray, steel-blue, and wheat-gold example that boasts exemplary surfaces for the XF45 level. A narrow horizontal line beneath the second S in STATES is mentioned strictly as an identifier. NGC ID# 236B, PCGS# 38742 Base PCGS# 4461

### BUST DIME

1829 Capped Bust Dime, MS65  
JR-6, Small 10C, Two-Sided Toning

- 3058** 1829 Small 10C, JR-6, R.3, MS65 NGC. A Gem Capped Bust type coin, sharply struck around the borders and just a trifle weak on the highest hair curls around Liberty's face. Both sides feature blue and violet border toning, with deep sun-gold and orange interiors. Satiny luster is devoid of bothersome abrasions. All varieties considered, the 1829 Capped Bust dime is scarce in Gem condition and rare finer. Census (all varieties included): 24 in 65, 10 finer (9/19). NGC ID# 2378, PCGS# 38831 Base PCGS# 4511

## SEATED DIMES

1872-CC Dime, Choice VF  
Elusive Carson City Issue

- 3059** 1872-CC F-101, Low R.4 — Struck Through Obverse — VF35 PCGS. The only set of dies used to strike 35,480 dimes at the Carson City branch mint in 1872. In fact, the reverse die was used from 1871 through 1874. This Choice VF example is at the upper end of the collectible grade range for this challenging issue. The obverse is a slightly deeper shade of gray than the reverse, with a notable strike-through from right of Liberty's head curving to downward, obliterating most of the cap and AME. Detail is otherwise strong for the VF level. Population: 16 in 35, 20 finer (9/19). NGC ID# 23A8, PCGS# 538286 Base PCGS# 4657

1872-CC Dime, XF40  
Elusive in All Grades

- 3060** 1872-CC F-101, Low R.4, XF40 NGC. Granular surfaces host a few light marks, although this rare 1872-CC is sharper than most known survivors from a small Carson City mintage of 35,480 pieces. Silver-gray surfaces lighten on the high points, while deep-gray build-up lingers among the raised devices. Nearly the entire mintage circulated in the rough and tumble Nevada Territory, and few pieces survive in any grade. Census: 5 in 40, 8 finer (9/19). NGC ID# 23A8, PCGS# 538286 Base PCGS# 4657

## BARBER DIMES

1895-O Barber Dime, MS65  
Purchased Directly From the New Orleans Mint  
Ex: Clapp-Eliasberg

- 3061** 1895-O MS65 PCGS. This 1895-O dime was sold two lots after Louis Eliasberg's 1894-S dime. Aside from being one of the best-preserved examples of this conditionally challenging New Orleans issue, it enjoys an illustrious pedigree that can be traced directly to its production at the Louisiana branch mint. Splashes of iridescence are intermixed with the dominant golden patina that gently complements the satiny surfaces of this spectacular near-Gem dime. The corn kernels and upper-left wheat stalks are boldly struck. Minor marks are noted on the obverse, as is a clash mark in the field right of the neck. Population: 9 in 65, 4 finer (9/19).  
Ex: Purchased directly from the New Orleans Mint by John M. Clapp (10/1905); John H. Clapp; Clapp Estate; Louis E. Eliasberg, Sr. via Stack's (1942); Eliasberg Collection (Bowers and Merena, 5/1996), lot 1252; FUN Signature (Heritage, 1/2019), lot 4404. NGC ID# C4KL, PCGS# 4807

1914-S Dime, Superb Gem  
Dramatic Multicolor Toning

- 3062** 1914-S MS67 NGC. Not only is the present Superb Gem tied with two other examples as the finest NGC-certified 1914-S dime, it exhibits remarkably attractive fire-red, orange-gold, olive-green, and plum-purple patina. The centers are lightly toned. The sharply struck and unabraded surfaces are lustrous and practically pristine. Census: 3 in 67, 0 finer (9/19). NGC ID# 23FV, PCGS# 4867

# MERCURY DIMES

1920-D Dime, MS67+ Full Bands  
Tied for Second Finest Certified

**3063 1920-D MS67+ Full Bands NGC.** The 1920-D dime is relatively available in lower grades, and even Full Bands examples can be located for a price. But when the availability of high grade is combined with Full Bands, the number of known pieces is very small. NGC has only certified five coins in MS67 Full Bands, and PCGS has graded eight with one example finer (9/19). One of the often-seen production problems for the 1920-D dime is the prevalence of die cracks. Their absence on this coin suggests it was struck from a fresh pair of dies, and the completeness of strike indicates the dies were set close enough together to give a full strike. Most of each side is brilliant, but there is a long arc of golden-russet and sea-green toning seen along the peripheries. NGC ID# 23HC, PCGS# 4931

1928-S Dime, MS67 Full Bands  
Only One Other FB Coin This Fine at NGC

**3065 1928-S MS67 Full Bands NGC.** This Superb Gem is among the finest 1928-S dimes certified, with or without Full Bands. Sharp in the centers, it is one of only two Full Bands representatives in this grade at NGC. Satiny luster displays olive-gold toning over boldly rendered design elements. Neither side has mentionable abrasions. A premier Registry candidate for the NGC specialist. Census: 2 in 67 Full Bands, 0 finer (9/19). NGC ID# 23HZ, PCGS# 4971

1921 Dime, MS66 Full Bands  
Registry Set Quality

**3064 1921 MS66 Full Bands PCGS.** Frosty original mint luster shows no significant abrasions on this Premium Gem Full Bands 1921 Mercury dime. A trace of delicate champagne toning adds just a touch of warmth to each side, although the coin presents as brilliant from most angles. Central strike sharpness is outstanding despite some incompleteness around the upper rims. Finer Full Bands representatives are uncollectible for most Mercury dime enthusiasts. Population: 54 in 66 (4 in 66+) Full Bands, 4 finer (9/19). NGC ID# 23HE, PCGS# 4935

## PROOF ROOSEVELT DIME

1968 No S Roosevelt Dime, PR68  
Premier Modern Proof Rarity

**3066** 1968 No S, FS-501, PR68 PCGS. All proof coin varieties with missing mintmarks are highly sought-after, but the 1968 No S proof Roosevelt dime is one of the rarest of all. During this period, working dies were made in Philadelphia and shipped to the branch mints, where their respective mintmarks were later added before coinage. The 1968 No S proof dime was created when the mintmark was omitted from a proof die. It is apparent that mint personnel quickly realized the error and changed out the die, as few examples of the No S dime are known to exist in any grade. PCGS and NGC combined have certified only 54 pieces (8/19), and even this low figure likely includes a number of resubmissions. In their *100 Greatest U.S. Modern Coins (Third Edition)*, where the 1968 No S dime is ranked as number seven, Scott Schechter and Jeff Garrett suggest as few as a few dozen examples are in the hands of collectors.

This piece is boldly struck, with deeply mirrored fields and outstanding preservation. A faint blush of pale reddish-gold toning adds a degree of warmth to each side. Population: 18 in 68 (2 in 68+), 1 finer (8/19).

Ex: Beverly Hills Signature (Heritage, 11/2014), lot 3667; FUN Signature (Heritage, 7/2015), lot 3088, which realized \$21,150.

From *The Jona Collection, Part II*. PCGS# 395116 Base PCGS# 5245

## TWENTY CENT PIECE

1875-S/S Twenty Cent, MS67  
FS-302, Misplaced Date  
Remarkable Condition Census Type Coin

**3067** 1875-S/S Misplaced Date, FS-302, BF-16, R.1, MS67 NGC. The 1875-S is everyone's favorite type coin within the twenty cent series, boasting a mintage of more than 1.1 million pieces. This issue has the highest number of die pairs known. BF-16, better-known as FS-302, shows the top of a misplaced 7 in the dentils below the primary numeral.

As a date, the 1875-S is the most available twenty cent piece in Superb Gem condition, although pieces in this grade are decidedly rare. The present coin displays blazing frost-white luster and a bold strike, complemented by virtually flawless preservation. Eye appeal easily matches the technical excellence of this twenty cent type coin. Census: 8 in 67, 1 finer (9/19). NGC ID# 23R7, PCGS# 145009 Base PCGS# 5298

## PROOF TWENTY CENT PIECE

1877 Twenty Cent, Toned PR62

**3068** 1877 PR62 PCGS. CAC. BF-1, R.3. Typical of proof issues from the period, the 1877 twenty cent piece is collectible despite a trivial mintage of only 510 coins. Many examples were saved by contemporary collectors, but today a number of pieces have been dipped or otherwise cleaned. This piece is sharp and reflective with deep original toning. Carbon-blue, deep-green, and burgundy-russet hues cover each side, masking scattered contact marks that define the grade. NGC ID# 27H4, PCGS# 5305

## PROOF BUST QUARTER

1831 Capped Bust Quarter, B-5, PR64  
Rare Early Proof, Large Letters Reverse

**3069** 1831 Large Letters PR64 PCGS. B-5, R.7 as a proof. Struck on reduced-diameter planchets in 1831, the Capped Bust design was modified by Chief Engraver William Kneass. Multiple varieties exist for the date, including four Small Letters varieties and three with Large Letters. The change in dimensions and design increase the likelihood of proofs being struck, and Walter Breen suggested 10 specimens were sent to President Andrew Jackson and another 20 proofs were delivered to Treasury Secretary S.D. Ingram, although it is unsure all of those were proofs. Breen thought 8 to 10 proofs were known, while PCGS CoinFacts currently estimates 10 to 15 pieces known.

This example is graded PR64. A faint dappling of golden-tan toning drifts across glassy, reflective surfaces. A dot of deep toning exists between E and S in STATES. Razor-sharp central devices offer stark silver contrast against the lightly toned fields. Struck from Browning-5 dies, the date shows recutting on on all four digits, most visible beneath the flags of each 1. It is worth noting that David Akers believed the only true 1831 proof quarters were of the B-5 variety. NGC ID# 23SB, PCGS# 5378

## SEATED QUARTERS

1842-O Quarter, Choice XF  
Elusive Small Date Variant

- 3070** 1842-O Small Date XF45 PCGS. Briggs 1-A. The scarce Small Date variant of an otherwise plentiful early New Orleans issue. Most examples of this variety are in VF or lower grades, while AU coins are major rarities. The present Choice XF representative displays bold detail and attractively smooth surfaces. Both sides have deep olive-gray toning. Population: 2 in 45, 8 finer (9/19).  
Ex: *Dallas Signature* (Heritage, 4/2015), lot 15709. NGC ID# 23SN, PCGS# 5403

1854 Arrows Quarter, MS65+  
'Compass Point' Reverse

- 3071** 1854 Arrows MS65+ PCGS. Briggs 2-B. Larry Briggs' "Compass Point" reverse with a small circular area absent from the shield near the top of the first vertical stripe. A similar mint-made central feature is also seen on other denominations from the era. Also worthy of mention, the left arrow is repunched south. Arrows were added to the quarter in 1853 to signify a reduction in weight. The Arrows, No Rays, No Motto subtype was coined for only two years, 1854 and 1855. The 1854 has a high mintage and is common in circulated grades and appears regularly at auction in Mint State, but Gems are very elusive. This lustrous example is well struck except for the obverse dentils between 6 and 9 o'clock. The smooth surfaces display light to moderate tan-brown toning that is more prevalent on the reverse. Population: 17 in 65 (4 in 65+), 18 finer (9/19). NGC ID# 23U6, PCGS# 5432

1874 Arrows Quarter, MS66  
Tied for Finest at PCGS

- 3072** 1874 Arrows MS66 PCGS. Briggs 4-C. Produced for two years in 1873 and 1874, the With Arrows type is always popular among collectors. This fully brilliant example radiates thick mint frost from wonderfully preserved surfaces. A well-struck Premium Gem with faint cracking and clashing. Population: 8 in 66, 0 finer (9/19). NGC ID# 23VX, PCGS# 5494

## PROOF SEATED QUARTERS

1865 Seated Quarter, PR66 Cameo  
Vibrant Toning, Immaculate Fields

- 3073** 1865 PR66 Cameo NGC. For practical purposes, 1865 is the final-year No Motto proof, although a single 1866 No Motto proof is reported. This colorfully toned example earns the Cameo designation from NGC, with richly frosted devices that distance themselves from the surrounding mirrored fields. A window of pale-gold patina sits at the center of concentric orange-gold, blue, and sea-green shades on the obverse, while the reverse is evenly covered by a thin veil of translucent, ivory-gold hues. The strike is razor-sharp throughout, and the eye appeal is spectacular. Census: 6 in 66 Cameo (1 in 66★), 5 finer (9/19). NGC ID# 23WT, PCGS# 85561

1865 Seated Quarter, PR66★ Cameo  
Excellent Contrast

- 3074** 1865 PR66★ Cameo NGC. Only 500 proof Seated Liberty quarters were struck in 1865, the small mintage probably due to the financial stresses of the last year of the Civil War. The present coin offers needle-sharp frosty devices that contrast boldly with the brilliant mirrored fields. Census: 6 in 66 Cameo (1 in 66★), 5 finer (9/19).  
Ex: *Central States Signature* (Heritage, 4/2011), lot 3445. NGC ID# 23WT, PCGS# 85561

1874 Arrows Quarter, PR67 Cameo  
Tied for Finest at Both Services

*Chief Engraver Charles Barber*

**3075** 1874 Arrows PR67 Cameo PCGS. Briggs 5-D. The addition of arrows left and right of the date in 1873 and 1874 signified an effectively meaningless weight increase from 6.22 grams to 6.25 grams. More importantly, it produced a two-year type that collectors gravitate toward. The 1874 Arrows quarter claims a mintage of 700 proofs — slightly higher than its 1873 counterpart (500 specimens).

This spectacular Superb Gem enjoys ice-blue, magenta, and orange patina around dusky golden centers on the obverse. The reverse is richly toned in blue and green hues. Stark field-device contrast remains unaffected by the lovely coloration. The surfaces are beautifully preserved with just a small partial print in the left obverse field. Population: 3 in 67 (1 in 67+) Cameo, 0 finer in this category (9/19). NGC ID# 23XS, PCGS# 85575

## BARBER QUARTERS

# 1901-S Quarter, MS65

## Extremely Rare at the Gem Level

**3076 1901-S MS65 PCGS.** Three dates in the Barber quarter series stand out as rarities: the 1896-S (188,039 pieces struck), 1901-S (mintage 72,664 pieces), and 1913-S (40,000 coins minted). Interestingly, the most plentiful of these three in Mint State is 1913-S. The two higher-mintage keys are rarer.

PCGS shows 932 submissions in all grades for the 1901-S quarter (9/19). Most of those pieces grade Good 4 or lower. In fact, there are more coins certified AG3 than any other grade. This preponderance of heavily circulated coins to higher-grade pieces is true of all three Barber quarter keys in comparison to other dates in the series. All three rarities are San Francisco issues, and Western citizens tended to prefer coins rather than paper notes for private transactions. Perhaps with relatively few coins to start with, the quarters kept moving from pocket to cash drawer and back again, and were simply used up. Whatever the reason, a Mint State 1901-S quarter is rare, and a Gem example extremely rare.

The history surrounding the Barber design is enlivened by events of intrigue and self-interest, not surprising for the era. The Seated Liberty quarter design had been around since the late 1830s, and some thought it time for a change. Either because of legitimate confusion over past legislative intent, or perhaps due to other motives, Mint Director James P. Kimball worked with Senator Justin Morrill to have a bill introduced that would simplify the approval process for new coin designs. The resultant Act of September 26, 1890, allowed the Treasury to change coin designs, without Congressional approval, after an existing motif had been in use for 25 years.

Walter Breen (1988) colorfully describes what happened next: "Implementing Kimball's eccentric idea, the Treasury shortly afterward announced a competition among 10 of the best-known American artists for new coin designs — only to find that they jointly rejected the terms ... the Treasury's riposte was to throw the competition open to the public ... [Mint Chief Engraver Charles Barber's] presence among the judges was the kiss of death. The Treasury circular of April 4, 1891, giving details of the competition, elicited about 300 entries. Of these 300, only two were thought worth even an honorable mention; Barber made certain that no prize would be awarded. The new Mint Director, Edward O. Leech, called the contest 'too wretched a failure' ever to be tried again, and ordered Barber to prepare the designs himself — which is exactly what Barber had wanted all along."

Director Leech was more magnanimous toward Barber. In a letter to art critic R.W. Gilder, Leech noted that "Mr. Barber comes from three generations of mint engravers and designers, and has done excellent work in coin designing, and is in every way equipped for this important duty." Perhaps anticipating further concern about Barber, he added "artistic designs for coins, which would meet the ideas of an art critic like yourself, and artists generally, are not always adapted for practical coinage." (Don Taxay, *The U.S. Mint and Coinage*, 1966). Even today Barber's artistic abilities are debated, but nonetheless the coins bearing his designs are avidly collected.

For Barber quarter enthusiasts, the 1901-S is the premium issue of the series. The surfaces of this example are lustrous and well struck, though slightly soft at the hairline of Liberty and on the right edge of the reverse shield and nearby wing. The surfaces boast pleasing rose and cinnamon toning, accented with lilac and silver highlights (including a lilac blush on Liberty's cheek). There are no distracting marks or spots. Many collectors are happy to find a 1901-S quarter in any grade, but a Gem example such as this with such a remarkable appearance is a rare opportunity. This coin is sure to stand out in an advanced collection, admired and appreciated for years to come. Population: 8 in 65, 9 finer (9/19).

Ex: FUN Auction (Heritage, 1/2009), lot 3782; New York Signature (Heritage, 10-11/2016), lot 5244. NGC ID# 23YR, PCGS# 5630

### 1913-S Barber Quarter, Unc Details Challenging Key Issue

- 3077 1913-S — Questionable Color — PCGS Genuine. Unc Details.** The 1913-S Barber quarter is one of the three key issues in the series, from a tiny mintage of 40,000 pieces. Collectors prize examples in all grades and conditions. This impressive example exhibits sharply detailed design elements, with no actual wear, and lightly marked surfaces with a flat aspect and questionable shades of lavender and pale jade toning.

### PROOF BARBER QUARTER

#### 1910 Quarter, PR66 Ultra Cameo White on Black Contrast

- 3078 1910 PR66 Ultra Cameo NGC.** The 1910 has one of the lowest proof Barber quarter mintages. Just 551 proofs were produced. As of (9/19), NGC has certified a mere eight pieces as Ultra Cameo. The well struck devices are icy and exhibit prominent contrast with glassy fields. The brilliant and beautiful surfaces lack any mentionable detractors. NGC ID# 242S, PCGS# 95696

### STANDING LIBERTY QUARTERS

#### 1916 Standing Liberty Quarter, VF35 Collector-Grade Example

- 3079 1916 VF35 PCGS.** The 1916 Standing Liberty quarter is sought-after in all grades, being the longest-recognized key date in the series. Only 52,000 pieces were struck, late in 1916. This Choice VF example displays good detail for the grade with uniform slate-gray surfaces. Wear is light and there are no major abrasions. NGC ID# 43XR, PCGS# 5704

### 1916 Standing Liberty Quarter, AU58 Significant Mint Luster Remains

- 3080 1916 AU58 NGC.** Only 52,000 pieces were struck of the newly designed quarter, and all were produced in late-1916. Many were mixed in with Type One 1917s that were released early in 1917, thus confusing the two issues in the general public's mind. This is an attractive example of this first-year issue. Most of the original mint luster remains with just the slightest trace of high-point friction. There are no obvious abrasions, and both obverse and reverse have taken on a light golden-brown patina. An attractive example of this scarce issue. NGC ID# 43XR, PCGS# 5704

### 1917-D Quarter, MS67 Full Head Type One, Richly Toned

- 3081 1917-D Type One MS67 Full Head PCGS.** This Type One Denver Mint quarter is strongly defined with Full Head detail, razor-sharp shield and rivets, a bold date, and well-delineated feathers. Beautifully preserved and satiny surfaces are richly toned in gunmetal-blue, violet, orange, and lemon-gold patina with an area of brilliance at the central reverse. Population: 31 in 67 (4 in 67+) Full Head, 1 finer (9/19). NGC ID# 2432, PCGS# 5709

### 1919-D Quarter, MS64 Lower Mintage Issue

- 3082 1919-D MS64 PCGS.** This is one of the slightly better dates in the series with a relatively small production of 1.9 million coins. Each side of this near-Gem Standing Liberty quarter is brilliant with satiny mint luster. The chainmail and shield stripes are strong, while Liberty's head, rivets 2 through 4, and the date are incomplete. A die crack passes through the tops of the digits, adding an element of interest to this impressive Denver semikey. NGC ID# 243C, PCGS# 5730

## WASHINGTON QUARTERS

1932 Quarter, MS67  
Tied for Finest Certified

- 3083** 1932 MS67 NGC. The 1932 is key to a date set of Washington quarters. Nonetheless, it is plentiful in most Mint State grades. The issue becomes scarce as a Gem, and Superb Gems are important conditional rarities. The present Registry candidate displays booming luster, a good strike, and uncommonly smooth surfaces. Light golden-brown toning visits selected portions of both sides. Census: 7 in 67, 0 finer (9/19). NGC ID# 2447, PCGS# 5790

1948-S Washington Quarter, MS67+  
Sharp Strike, Vivid Toning

- 3084** 1948-S MS67+ PCGS. CAC. The obverse is magnificently patinated in bands of cherry-red, forest-green, and sun-gold. The reverse shows only a hint of tan toning. A lustrous and pristine Superb Gem, high-end for its lofty grade and endorsed by CAC. Although readily available at the Gem level, few pieces can match the superb eye appeal and extra-sharp strike of this dazzling, rainbow-toned quarter. Population: 21 in 67+, 2 finer. CAC: 59 in 67, 2 finer (9/19). NGC ID# 245N, PCGS# 5838

1950-S/D Quarter, MS67  
FS-601, Tied Finest at PCGS

- 3085** 1950-S/D FS-601 MS67 PCGS. This popular *Guide Book* variety clearly shows both mintmarks. A serif of the D is noted near the upper left of the S, and the curve of the D dominates the right border of the overmintmark. As one might expect, the variety is scarce in Mint State, and very rare as a Superb Gem. Well struck and immaculate with dramatic sea-green, tan, and rose-gold obverse toning. PCGS reports no finer certifications, while NGC lists a single MS67+ coin. Population: 8 in 67, 0 finer (9/19). NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

## EARLY HALF DOLLAR

1801 O-101 Half Dollar, AU58  
Always Challenging in High Grade

- 3086** 1801 O-101, T-2, R.3, AU58 NGC. Tompkins Die State 3/4. After striking the 1797 Draped Bust Small Eagle halves, no further half dollars were minted until 1801. A small production of 30,289 pieces paired the existing Draped Bust obverse with the more recent Heraldic Eagle reverse. The Mint settled on "elements of 13" as part of the Heraldic Eagle design — 13 field stars, 13 feathers in each of the eagle's wings, 13 arrows in the eagle's claw, and a combined total of 13 vertical elements in the shield (six stripes plus seven recesses). Coincidence or not, there are 13 letters in E PLURIBUS UNUM. All coincide with the 13 original colonies.

This near-Mint State 1801 half shows tiny marks and a bit of high-point rub that suggest brief circulation. The coin is sharply struck with considerable mint luster throughout both sides. Two die pairs were required for the small 1801 mintage: Reverse die lumps and die clashing on both sides, with the first A in AMERICA free of the eagle's wing feathers, confirm this is the O-101 (T-2) variety. Dappled slate-blue and golden-gray toning provides strong eye appeal. Census (Both 1801 varieties combined): 5 in 58 (1 in 58+), 2 finer (9/19). NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

## BUST HALF DOLLARS

1810 Half Dollar, MS64  
Condition Census O-110

- 3087** 1810 O-110, R.2, MS64 NGC. A Condition Census example of Overton-110. The AM in AMERICA touch, and diagonal die lines are present above the eagle's left (facing) shoulder. This near-Gem exhibits multiple sets of clash marks, but the only reportable imperfection is a subtle line across Liberty's cheek and jaw. The strike is crisp aside from the right-side obverse border. Russet toning outlines protected areas, though the fields and high points are cream-gray. NGC ID# 24ET, PCGS# 39420 Base PCGS# 6095

1823 O-105 Half Dollar, MS65  
Ex: Eliasberg, Tied Atop the Condition Census

- 3088** 1823 O-105, R.1, MS65 NGC. Ex: Eliasberg. Tied for top spot on the Condition Census. A horizontal toning streak across the portrait identifies this coin. The centers are mostly brilliant with tan-gold patina around the edges. Highly lustrous and well-defined. This impressively pedigreed O-105 half dollar should occupy a place of prominence in any Bust half set.  
Ex: Louis E. Eliasberg, Sr. Collection, Part II (Bowers and Merena, 4/1997), lot 1793; Baltimore Auction (Bowers and Merena, 7/2003), lot 1471. NGC ID# 24FJ, PCGS# 39608 Base PCGS# 6131

1826 Half Dollar, O-118a, MS65+  
CAC Endorsed, Cracked Die State

- 3089** 1826 O-118a, R.1, MS65+ PCGS. CAC. The stars are quite close to the milling, and the date is compact and evenly spaced. The reverse shows A higher than M in AMERICA. The O-118a state, as here, has a die crack joining NITED STATES and ERICA. The surfaces of this piece are silvery with a dusting of cinnamon patina. The strike is bold, if not quite absolute on the high points of a few of the hair curls, and complements a notable absence of abrasions. The green CAC label indicates that that firm considers this piece high-end for the grade, and indeed PCGS has awarded this coin a Plus designation. Population: 46 in 65 (6 in 65+), 13 finer (9/19). NGC ID# 24FM, PCGS# 39692 Base PCGS# 6143

1828 Half Dollar, MS64+  
Attractive Original Toning  
O-108, Square Base Two Variety

- 3090** 1828 Square Base 2, Large 8s, O-108, R.3, MS64+ PCGS. CAC. One of two Overton varieties comprising the Square Base 2, Large 8s *Guide Book* listing. This high-end near-Gem displays a sharp strike across the central devices, although there is weakness on some of the peripheral stars and around the PLUR in PLURIBUS. Attractive olive-gold, amber, and lilac-gray toning on each side complements minimal abrasions. The surfaces have an attractive glow when tilted beneath a light. NGC ID# 24FR, PCGS# 39762 Base PCGS# 6150

1830 Half Dollar, MS65  
O-101, Small 0

- 3091** 1830 Small 0, O-101, R.1, MS65 NGC. Luster abounds on this Gem O-101 half dollar, illuminating attractive toning and boldly rendered design elements. The obverse is more deeply toned — orange-gold interior color cedes to lavender and blue borders. The reverse has a light russet-gold hue overall. A few faint marks on Liberty's cheek are all that prevent an even finer grade. NGC ID# 24FU, PCGS# 39810 Base PCGS# 6156

1831 Half Dollar, O-103, MS65+  
Colorfully Toned Type Coin

- 3092** 1831 O-103, R.1, MS65+ NGC. With a mintage of more than 5.8 million pieces, the 1831 half dollar is an available date, ideal for type purposes. While Choice examples are obtainable, Gems are scarce, and anything finer is out of reach for most collectors. This MS65+ coin provides a tremendous opportunity for the type collector or Overton specialist. Satiny luster highlights pale champagne toning that deepens to copper-orange around the peripheries. The design elements are well-defined, and grade-limiting abrasions are primarily limited to a few light, scattered ticks on the obverse portrait. There is a die crack along the base of the date and the upright of the 5 in 50 C. is recut. Census: 50 in 65 (3 in 65+), 17 finer (9/19).

Ex: Douglas L. Noblet Collection; Rarities Sale (Bowers and Merena, 1/1999), lot 48; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98635. NGC ID# 24FV, PCGS# 39839 Base PCGS# 6159

REEDED EDGE HALF DOLLAR

1837 GR-15 Reeded Edge Half, MS65  
Important Capped Bust Type Coin

- 3093** 1837 GR-15, R.3, MS65 NGC. GR-15 distinctively shows die cracks threading through the right-hand obverse stars, with light clash marks on both sides. However, for type collectors, the variety of this piece is less important than the grade — MS65. Reeded Edge half dollars in general are scarce in this grade and rare finer, posing a challenge for collectors seeking a single exceptional piece for their collections. This example is brilliant and vibrantly lustrous. Slight strike weakness occurs on select border stars and the eagle's left (facing) talons, although the devices are otherwise well-defined. Only a few minute ticks are visible under a loupe. Census (all varieties included): 45 in 65 (1 in 65+, 3 in 65★), 12 finer (9/19). PCGS# 531061 Base PCGS# 6176

## SEATED HALF DOLLAR

1847/6 Seated Dollar, XF40  
*Guide Book* Overdate, FS-301

- 3094** 1847/6 WB-102, Die Pair 9, R.5, FS-301, XF40 NGC. Remnants of 1 46 appear in the field below the date. The reverse is heavily cracked and a slanted die line occurs in the space between the first and second shield stripes. This rare *Guide Book* semikey is always popular with Seated Liberty specialists, and the present XF40 example would make a fantastic addition to any advanced set. It features lightly circulated but still-smooth surfaces with stone-gray patina and golden accents. The first few stars are nearly indistinguishable, but the rest of the design is bold, especially on the reverse. Census: 2 in 40, 2 finer (9/19). NGC ID# 24HA, PCGS# 147889 Base PCGS# 6258

## PROOF SEATED HALF DOLLAR

1863 Half Dollar, PR65 Cameo  
 Splendid Peripheral Patina

- 3095** 1863 PR65 Cameo PCGS. A scarce No Motto proof issue. Struck during the Civil War, the mintage was only 460 pieces. Few have been certified as Cameo, but the present Gem displays noticeable frost throughout the motifs. The most eye-catching feature, though, is the multicolor navy-blue, russet-brown, and sun-gold toning throughout the peripheries. The strike is crisp save for slight blending on the eagle's left (facing) ankle. Population: 6 in 65 (1 in 65+) Cameo, 2 finer (9/19). NGC ID# 27TP, PCGS# 86417

## BARBER HALF DOLLARS

1897-S Barber Half Dollar, MS66  
 Rare This Fine

- 3096** 1897-S MS66 PCGS. The 1897-S Barber half dollar claims a small mintage of 933,900 pieces, making it a better date in all grades. Augustus Heaton's ground breaking treatise on mintmarks had been recently published (in 1893), but collecting branch mint issues was still in its infancy in 1897, so few high-quality examples were saved for numismatic purposes. Today, the 1897-S is a condition rarity in MS66.

This is a delightful Premium Gem with sharply detailed design elements and vibrant, satiny mint luster on both sides. The impeccably preserved surfaces are visited by attractive shades of lavender, cerulean-blue, and golden-tan toning. Overall eye appeal is outstanding. Population: 5 in 66 (1 in 66+), 5 finer (9/19). NGC ID# 24M2, PCGS# 6479

1913 Half Dollar, Richly Toned MS66  
Low-Mintage Condition Rarity

- 3097 1913 MS66 PCGS.** The circulation strike mintage of just 188,000 pieces is one of the three-lowest of the entire Barber half series — only the 1914 and 1915 issues have slightly lower mintages. Collectors were aware of the sparse mintages in the 1930s and 1940s, and some coins were saved, but just a few Premium Gems exist. This is a richly toned example, with a sharp strike beneath reddish-gold, slate-blue, and pearlescent-gray toning. A dot of deep toning is seen between A and M in AMERICA, yet there are no individual marks or abrasions to disturb the smooth and lustrous surfaces. No 1913 coins exceed the Premium Gem level at either PCGS or NGC, with two PCGS-graded pieces at MS66+. Population: 9 in 66 (2 in 66+), 0 finer (9/19). NGC ID# 24NK, PCGS# 6527

WALKING LIBERTY HALF DOLLARS

1917-D Walking Liberty Half Dollar, MS65  
Low-Mintage Obverse Mintmark Variant

- 3098 1917-D Obverse MS65 PCGS.** From a mintage of 765,400 pieces, this issue is always popular with type collectors because of the prominent obverse mintmark. The present coin is an impressive Gem with well-detailed design elements and well-preserved, lustrous surfaces under shades of golden-tan and lavender-gray toning. Finer examples of the date are rare. Population: 77 in 65 (2 in 65+), 6 finer (8/19).  
*Ex: ANA Signature (Heritage, 8/2016), lot 4840, which realized \$4,708.23. NGC ID# 24PR, PCGS# 6570*

1917-D Reverse Mintmark Half, MS65  
Scarce Early Date in Gem Condition

- 3099 1917-D Reverse Mintmark MS65 PCGS.** The combination of artistic excellence in the designs and a numismatic challenge in the date and mintmark set draws a significant number of collectors to pursue the dime, quarter, and half dollar series designed by Adolph Weinman and Hermon MacNeil, each debuting in 1916. As a result, dates that would typically be considered only “slightly better” are, in practice, conditionally rare, as the collector demand far outweighs the supply of high-grade coins. In the Walking Liberty half dollar series, the 1917-D is one of these issues. It was produced with the mintmark on both the obverse and later the reverse. Despite having a significantly higher mintage (nearly 2 million coins), the Reverse Mintmark variant is actually scarcer in high grade. The issue is scarce in MS65 and rare finer. This Gem example displays glowing golden luster and lovely preservation. Pleasing detail appears in the centers. Population: 51 in 65 (2 in 65+), 5 finer (8/19).  
*Ex: FUN Signature (Heritage, 1/2016), lot 5426, which realized \$11,750. NGC ID# 24PS, PCGS# 6571*

1917-S Half Dollar, MS64  
Obverse Mintmark

- 3100 1917-S Obverse Mintmark MS64 PCGS.** The always-popular 1917-S Walking Liberty half dollar with the Obverse Mintmark placement is scarce in this state of preservation, and rarely are finer examples offered. Frosty luster shines through a thin coating of golden color that accents this near-Gem. Well-struck on the usual trouble spots with one noteworthy reeding mark above the motto. Ex: ANA Signature (Heritage, 8/2017), lot 5148, which realized \$8,812.50. NGC ID# 26G7, PCGS# 6572

1918-S Half Dollar, MS65  
Satiny and Delicately Toned

- 3101 1918-S MS65 PCGS.** A satiny example of this early San Francisco issue, showing light golden toning with delicate iridescence throughout. Liberty's head and the central high points of the devices are considerably weak, although the outstanding preservation of this coin still earns it a Gem designation. The 1918-S Walking Liberty half is scarce in this grade, and only a handful of finer pieces are known. We have handled only two numerically finer coins, both in MS66 PCGS, which realized \$64,000 and \$57,600 in 2016 and 2019, respectively. This MS65 coin is more economical, and it still maintains a degree of conditional rarity. Population: 35 in 65 (4 in 65+), 4 finer (9/19). NGC ID# 24PX, PCGS# 6576

1919 Half Dollar, MS65  
Border Toning

- 3102 1919 MS65 NGC.** Peripheral cobalt-blue, violet-amber, and subtle multicolor hues frame brilliant interiors on this Gem example, while both sides have satiny luster and a lack of major abrasions. Liberty's head is a trifle soft, by the branch hand and the eagle's trailing leg are well-defined. Higher-grade 1919 Walkers are rarely seen. Even in this grade, the date is conditionally challenging. Census: 33 in 65, 12 finer (8/19). NGC ID# 24PY, PCGS# 6577

1919-D Half Dollar, MS64  
Rarest Issue in High Grades

- 3103 1919-D MS64 PCGS.** The 1919-D ranks among the top condition rarities in the entire Walking Liberty half dollar series. Writing for PCGS CoinFacts, David Hall explains: "There are just a dozen or so MS65 examples known and anything higher than MS65 is almost unknown. This is a rare coin in all grades and a major 20th century condition rarity in Gem condition."

Here is a slightly more collectible near-Gem with pale golden toning over satiny, well-preserved surfaces. The branch hand is notably strong, and the other motifs are similarly crisp. PCGS reports 12 numerically higher grading events (9/19). NGC ID# 24PZ, PCGS# 6578

**1919-S Half Dollar, MS63  
Sharp and Brilliant**

- 3104 1919-S MS63 PCGS.** Although the 1919-D is significantly rarer in Gem condition, the '19-D and '19-S Walking Liberty half dollar issues have similar overall Mint State populations. In fact, it is the San Francisco issue that is less often seen in MS63 and MS64. This Select representative displays impressively sharp motifs and bright, untuned satin luster. The obverse fields are well-preserved, although light marks on the high points of the devices determine the grade.  
*Ex: Dallas Signature (Heritage, 10/2016), lot 3165, which realized \$10,575. NGC ID# 24R2, PCGS# 6579*

**1920-D Half Dollar, MS64  
Rich Border Toning**

- 3105 1920-D MS64 PCGS.** High-grade Mint State examples of the 1920-D are scarce, particularly above MS64. This near-Gem displays satiny luster and a bold strike that is sharp on Liberty's head but slightly soft on the branch hand. Warm gold, olive, and sea-green border toning around each side represents a dramatic departure from the near-brilliant, washed-out appearance of most 1920-D half dollars seen. No major abrasions are observed.  
*Ex: FUN Signature (Heritage, 1/2017), lot 4838, which realized \$6,462.50. NGC ID# 24R4, PCGS# 6581*

**1921 Walking Liberty Half, MS63  
Golden and Russet Toning**

- 3106 1921 MS63 PCGS.** A well-struck example of this key Philadelphia issue, showing original satin luster and golden toning. Additional burgundy-russet color clings to the peripheral crevices. There are minimal abrasions for the grade, although a small mark is noted on Liberty's cheek. The 1921 comes from a famously low mintage of 246,000 pieces. Uncirculated examples are sought-after in all grades. NGC ID# 24R6, PCGS# 6583

**1921 Half Dollar, MS64  
Glowing Luster Beneath Golden Patina**

- 3107 1921 MS64 PCGS.** This key date Walking Liberty half dollar from a low mintage of 246,000 coins glows softly beneath a veil of golden patina that deepens to chestnut and gunmetal-blue toning at the rims. The thumb on the branch hand shows good separation, though the skirt lines below are somewhat softer. Generally clean fields, seldom seen finer. NGC ID# 24R6, PCGS# 6583

**1921-D Walker, MS61  
Lowest Mintage of the Series**

- 3108 1921-D MS61 NGC.** At 208,000 coins, the 1921-D Walker boasts the lowest mintage in the series. This is a satiny Mint State example with soft tan-gold toning and pleasantly minimal abrasions. Slight strike weakness is seen on Liberty's head and branch hand, as expected for the issue. Of the three 1921 keys, the Denver issue is the second-scarcest in Uncirculated grades.  
*Ex: ANA Signature (Heritage, 3/2016), lot 4937, which realized \$8,225. NGC ID# 24R7, PCGS# 6584*

1921-D Half Dollar, Well-Struck MS64  
Low-Mintage Key, Lightly Toned

**3109 1921-D MS64 PCGS. CAC.** This is a well-struck example of the key-date 1921-D half dollar, showing good definition on Liberty's branch hand and only slight incompleteness on the eagle's trailing leg. Golden-russet toning embraces satiny original luster, and grade-limiting abrasions are unobtrusive to the naked eye. The 1921-D boasts the lowest mintage of the three 1921 keys (208,000 coins). This is also the lowest mintage in the series. Examples of this issue are sought-after in all grades due to the wide-ranging popularity of the Walking Liberty half dollar as a date and mintmark collection. However, coins grading finer than MS64 are rare. PCGS lists just 38 such submissions (9/19). NGC ID# 24R7, PCGS# 6584

1921-S Walker, Satiny AU53  
The San Francisco Key

**3110 1921-S AU53 NGC.** A satiny About Uncirculated example of this key San Francisco issue, coming from a mintage of only 548,000 pieces. In Mint State, this issue is scarce regardless of grade, and even AU coins are challenging to locate. This piece shows little wear, and neither side has significant toning. Some die polishing lines (mint made) are evident in the fields, and there is some luster remaining in the peripheries. NGC ID# 24R8, PCGS# 6585

1923-S Half Dollar, Frosty Gem  
Only Issue Between 1922 and 1926  
Key Date in High Grades

**3111 1923-S MS65 PCGS.** Walking Liberty half dollar production was restricted to the San Francisco Mint in 1923. Only 2.1 million coins were manufactured that year. In fact, those were the only half dollars produced at any of the United States Mint facilities between 1922 and 1926. Speculation in the issue was apparently minimal, as examples of the 1923-S half dollar are seldom seen this fine and prove rare in higher grades. The surfaces are brilliant and softly frosted with the faintest tinges of pale gold. Liberty's head and branch hand are typically incomplete, as are portions of the eagle's breast and leg, but the rest of the design is well-detailed. A few tiny ticks on one of the middle rays serve as pedigree markers. Population: 52 in 65 (8 in 65+), 10 finer (9/19). NGC ID# 24R9, PCGS# 6586

## 1929-D Half Dollar, High-End MS66

- 3112** 1929-D MS66 PCGS. CAC. Splashes of golden patina accent the satiny, brilliant surfaces of this Premium Gem Denver half dollar. The branch hand and upper skirt lines are well-defined, while Liberty's head and the eagle's trailing leg show minor softness. High-end, as affirmed by CAC. Population: 81 in 66 (8 in 66+), 4 finer. CAC: 31 in 66, 2 finer (9/19). NGC ID# 24RC, PCGS# 6589

1935 Half Dollar, MS66+  
CAC-Approved and Lustrous

- 3113** 1935 MS66+ PCGS. CAC. The luster on this high-end Premium Gem is brilliant and remarkably luminous, highlighting excellent surface preservation. Liberty's branch hand is only a trifle soft, and the head is sharp; the eagle's trailing leg is also well-defined. Only 37 Premium Gems are Plus-graded at PCGS, and finer coins are scarce. The CAC endorsement is another coveted attribute on this 1935 Walker.  
Ex: *Houston Signature* (Heritage, 11/2012), lot 9431. NGC ID# 24RJ, PCGS# 6595

1938-D Half Dollar, MS67+  
Highest Grade Awarded

- 3114** 1938-D MS67+ NGC. CAC. A mintage of 491,600 coins ranks among the lowest production totals in the series. While these coins were saved by speculators and can generally be found in high grades, this Plus-graded, CAC-endorsed Superb Gem represents the one of the very finest examples attainable. Speckled multicolor toning adorns mostly brilliant surfaces, with satiny mint luster shimmering softly beneath the overlay. Strike definition is excellent on Liberty's head, branch hand, and skirt lines. Census: 26 in 67 (2 in 67+, 4 in 67★), 0 finer. CAC: 26 in 67, 0 finer (9/19). NGC ID# 24RV, PCGS# 6605

1941-S Half Dollar, MS67  
High Grade 'Short Set' Key

- 3115 1941-S MS67 NGC.** The 1941-S is the key issue from the "short set" of 1941 to 1947 Walking Liberty halves. The wartime West Coast issue is less rare than its reputation in grades through MS66, but Superb Gems are unquestionably rare relative to Registry demand for the popular series. The present lustrous example is brilliant save for tan-gold freckles near the rims. The strike is above average, particularly on the central skirt lines. Census: 29 in 67 (1 in 67+), 0 finer (9/19). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

1942-S Half Dollar, Strong MS67  
Overlooked Condition Rarity

- 3116 1942-S MS67 NGC.** Large S mintmark. The 1942-S Walking Liberty half dollar is actually rarer in the top levels of Mint State (i.e. MS66, MS67) than the more famous, conditionally scarce San Francisco issue that precedes it, the 1941-S. This Superb Gem remains brilliant with radiant mint luster, and the strike is much stronger than expected for an S-mint product of this period. There should be significant interest in this lot, so expect to pay a premium bid. Census: 13 in 67, 0 finer (9/19). NGC ID# 24S8, PCGS# 6617

FRANKLIN HALF DOLLARS

1954-S Half Dollar, MS67 Full Bell Lines  
Among the Finest at Both Services

- 3117 1954-S MS67 Full Bell Lines PCGS.** Although non-Full Bell Lines examples of the 1954-S Franklin half dollar are many times more plentiful overall than their Full Bell Lines counterparts, FBL representatives are still readily obtainable in the bread-and-butter grades of MS64 and MS65. Their population dwindles in MS66, where the issue becomes conditionally scarce, and it is at this esteemed level that the 1954-S makes its mark as a genuine rarity. Frosty surfaces are mostly silver with a crescent of speckled multicolor patina along the left and upper obverse border. Microscopic ticks are essentially unseen without magnification. Population: 7 in 67 Full Bell Lines, 0 finer (9/19). NGC ID# 24TB, PCGS# 86669

1955 Half Dollar, MS67 Full Bell Lines  
None Graded Finer

- 3118** 1955 MS67 Full Bell Lines NGC. The 1955 half dollar is a rarity with or without Full Bell Lines at the Superb Gem grade level. Shades of blue, violet, and gold lighten toward near-brilliant interiors. Frosty and sharply defined on each side. A prize for the Franklin half dollar specialist. Census: 6 in 67 Full Bell Lines, 0 finer (9/19). NGC ID# 24TC, PCGS# 86670

PROOF FRANKLIN HALF DOLLARS

1950 Half Dollar, PR68  
Practically Flawless, All-Brilliant

- 3119** 1950 PR68 NGC. Flawless fields show partial reflectivity typical of an early proof Franklin half dollar. Both sides remain wholly brilliant, accentuating the effect. The portrait, Liberty Bell, and legends are expectedly razor-sharp for a proof, while contrast is typically subdued. A practically unimprovable representative with great eye appeal. Census: 19 in 68 (1 in 68★, 1 in 68+★), 1 finer (9/19). NGC ID# 27VA, PCGS# 6691

1950 Franklin Half, PR67+ Cameo  
Rare in This High Grade as a Cameo

- 3120** 1950 PR67+ Cameo NGC. One of just a handful of 1950 PR67 Cameo halves that qualify for special recognition by NGC, this brilliant and deeply mirrored Plus-graded Cameo example shows essentially no hairlines, toning spots, or glue spots that plague the proofs in even the highest grades. While field/device contrast is a bit short of blatant, the frosted devices provide sufficient contrast to clearly stand out against the deep, glassy-mirrored fields and qualify for Cameo status.

Rick Tomaska notes in *A Guide Book of Franklin & Kennedy Half Dollars*, "Examples grading PF-66 Cam are seldom encountered, while Cameo PF-67s have always been excessively rare." This sparkling Superb Gem with the seldom-granted NGC Plus represents an ideal first-year representative for an exceptional set of Franklin half proofs. Census: 24 in 67 Cameo (2 in 67+, 2 in 67★, 1 in 67+★), 3 finer (9/19). NGC ID# 6L9N, PCGS# 86691

1951 Half Dollar, PR67+ Ultra Cameo  
Single Finest Ultra Cameo Certified at NGC  
Tied Finest Overall

- 3121** 1951 PR67+ Ultra Cameo NGC. The quest to build a complete set of exceptional cameo Franklin half proofs gets off to a challenging start with the 1950 and 1951 issues, which seldom display strong cameo contrast, let alone uncompromised Superb Gem, deeply reflective surfaces. Ultra Cameo examples of these dates in the highest grades comprise the greatest rarities in the Franklin half series.

We are pleased to offer an exquisite 1951 PR67+ Ultra Cameo coin — the sole-finest example at NGC, and a coin that is tied with one similarly graded proof at PCGS (9/19). Simply put, there are no numerically finer certifications for a 1951 Franklin half proof with deep cameo fields. Scintillating mirrors surround frost-white devices for splendid white-on-black contrast. A superior sharp strike provides the necessary foundation for this outstanding cornerstone to a world-class collection of Franklin half proofs, meaning the search for an ultimate 1951 proof begins and ends here. Census: 8 in 67 Ultra Cameo (1 in 67+), 0 finer (9/19). NGC ID# 27VB, PCGS# 96692

1953 Half Dollar, PR69  
Watery Mirrors

- 3122** 1953 PR69 NGC. Brilliant surfaces showcase watery mirrors that lack even the smallest disturbance to critique. Fully struck devices lack the thick mint frost that later Franklin half dollar proofs would show, but eye appeal is no less impressive because of it. Census: 10 in 69, 0 finer (9/19). NGC ID# 27VD, PCGS# 6694

EARLY DOLLARS

1795 Flowing Hair Dollar, XF45  
B-7, BB-18, Three Leaves  
Head of 1794

- 3123** 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3, XF45 PCGS. Bowers Die State I. Popular as a Three Leaves variety with the Head of 1794 (the only 1795 Flowing Hair dollar that has that design combination), the B-7, BB-18 is readily available in lower circulated grades but becomes scarce at the About Uncirculated level. This Choice XF example is only slightly less-scarce, with sharply defined motifs and minor high point wear.

Olive-gray toning displays traces of luster amid golden undertones, plus occasional blue accents. Struck on a heavy planchet, numerous Mint-made adjustment marks crisscross the obverse, congregating in the area of Liberty's ear. Few other marks exist on either the obverse or reverse. We note a tiny, shallow rim bump above Y in LIBERTY, but it is of little consequence. This original example is well-centered and undeniably attractive. NGC ID# 24WZ, PCGS# 39973 Base PCGS# 6852

1795 Flowing Hair Dollar, XF40  
B-6, BB-25, Three Leaves

- 3124** 1795 Flowing Hair, Three Leaves, B-6, BB-25, R.3, XF40 NGC. Bowers Die State III, as usual. This is a well-detailed Flowing Hair dollar, showing uniform pewter-gray patina with delicate lilac and golden accents. Wear is light on each side, and the surfaces are smooth. No adjustment marks are seen. The reverse shows a distinct grease streak (mint made) that stretches horizontally from the rim at 2 o'clock over the top of the eagle's head.

From *The Pelican Collection, Part II*. NGC ID# 24WZ, PCGS# 39975 Base PCGS# 6852

1795 Draped Bust Dollar, AU50  
Off-Center Portrait, B-14, BB-51

- 3125** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, AU50 PCGS. Bowers Die State I, the usual perfect dies. Dave Bowers explains in the revised edition of his *Silver Dollar Encyclopedia* that as a type, 1795 Draped Bust dollars are much scarcer than their Flowing Hair counterparts. On their own, BB-51 (Off-Center Bust) and BB-52 (Centered Bust) dollars are still collectible in lower circulated grades, with the former being more available than the latter. Accessibility begins to decline significantly at the AU grade level.

This Almost Uncirculated example of the inaugural-year type by Robert Scot enjoys attractive antique patina with luminous accents of rose, violet, and peach-orange. Both sides are generally smooth and uniformly well-struck, with bold detail on the curls and breast feathers. There are a few small digs around the eagle's head, and as-made file marks occur along the right obverse border. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1796 B-4, BB-61 Dollar, AU50  
Small Date, Large Letters

- 3126** 1796 Small Date, Large Letters, B-4, BB-61, R.3, AU50 NGC. Bowers Die State I. The usual die state for the B-4, BB-61 variety features three arcs that comprise Liberty's forecurl. Two 1796 dollar die varieties feature a Large Letters reverse. This more collectible marriage is distinguished by the single leaf under the D in UNITED. Each side of this high-grade Draped Bust dollar is bright silver and virtually devoid of color. Incompleteness is evident under Liberty's ear and on the eagle's breast, but the other design features are crisp with minimal friction. There are a couple of tiny rim bumps at 2 o'clock on the obverse and scattered hairlines, but none are singularly distracting. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

1797 B-1, BB-73 Dollar, XF40  
9x7 Stars, Large Letters

- 3127** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, XF40 PCGS. Bowers Die State III: Several cracks appear through and around Liberty's hair ribbon. The 9x7 Stars arrangement on the obverse and Large Letters reverse confirm the BB-73 attribution for this *Guide Book* variety. This XF40 survivor appears stone-gray with mottled patina head-on, but held at an angle the surfaces reveal more vibrant shades of golden-orange. The first few stars and UNIT(ED) are slightly soft, while the rest of the design maintains bold definition. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

1799/8 Silver Dollar, AU53  
13 Stars Reverse, B-1, BB-142

- 3128** 1799/8 13 Stars Reverse, B-1, BB-142, R.4, AU53 NGC. Bowers Die State III. Although BB-142 is one of three 1799/8 die marriages, it is most easily attributed by its reverse, which exhibits advanced die crumbling about the I in AMERICA. BB-142 is fairly scarce, and most third-party examples are certified in VF or lower grades. This problem-free representative displays lavender-red, apple-green, and golden-brown toning throughout protected regions. The eagle's breast shows wear, but the wings are well defined, and the eye appeal is exemplary. NGC ID# 24X8, PCGS# 40065 Base PCGS# 6884

1799 7x6 Stars Dollar, Scarce AU53  
B-11, BB-161, Original Toning

- 3129** 1799 7x6 Stars, B-11, BB-161, R.3, AU53 NGC. Bowers Die State III. The BB-161 variety is scarce in About Uncirculated condition and rare in Mint State. This is a pleasing, originally toned example, with faint iridescent colors at the margins that deepen to brownish-gray patina throughout the centers of both sides. A few glimmers of reddish-gold mint luster remain among the devices. The coin is well-struck despite multiply clashed dies and exudes natural eye appeal. Marks are limited to scattered, tiny abrasions and a shallow rim bump near U in UNITED. The 2013 Bowers' reference estimates fewer than 30 examples of BB-161 survive in AU or finer conditions (9/19). NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

1800 Draped Bust Dollar, AU50  
Scarce B-15, BB-195 Variety

- 3130** 1800 10 Arrows, B-15, BB-195, R.4, AU50 PCGS. Bowers-Borckardt Die State I. The BB-195 is a scarce variety recognized by the 10 perfect arrows on the reverse, with three arrowheads that have no shafts. This attractive AU specimen retains most of its original design detail and a surprising amount of original mint luster.  
Ex: FUN Signature (Heritage, 1/2013), lot 4537. NGC ID# 24X9, PCGS# 40080 Base PCGS# 6891

1802 B-6, BB-241 Dollar, AU53  
Narrow Date, Some Luster Remains

- 3131** 1802 Narrow Date, B-6, BB-241, R.1, AU53 NGC. Bowers Die State III. This is an attractive pewter-gray early dollar with delicate rose and pale blue toning on both sides. The surfaces are pleasing, and traces of luster are still evident. A bold strike delivers well-centered motifs on both sides, while abrasions are few and eye appeal is excellent. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

## SEATED DOLLARS

1857 Dollar, MS63 Prooflike  
Brilliant and Flashy

- 3132** 1857 MS63 Prooflike NGC. OC-2, R.3. The surfaces are fully Prooflike on both sides with generally strong design details — the eagle in particular — although Liberty's head is almost completely flat. Nearly every star is similarly incomplete. Such striking characteristics are typical of the business strike silver dollars produced in 1857. Census: 2 in 63 Prooflike, 5 finer (9/19).  
Ex: Dallas Signature (Heritage, 11/2005), 5131; FUN Signature (Heritage, 1/2015), lot 5332. PCGS# 86945

## PROOF SEATED DOLLARS

1857 Seated Dollar, PR63+  
Richly Toned and Attractive

- 3133** 1857 PR63+ NGC. OC-P1, R.5. Osburn-Cushing Die State a/a. An estimated 75 proofs were struck in the year before the Mint expanded its marketing of proofs to the general public. This is a gleaming Select smoke-gray proof with contrasting silver devices and smooth, minimally hairlined fields. The high-end surfaces are sharply struck except for the high point of the eagle's left (facing) wing. Wide, square rims surround the attractive, medium-toned fields. This is the sole Plus-graded proof at the MS63 level. Census: 4 in 63 (1 in 63+), 17 finer (8/19). NGC ID# 252B, PCGS# 7000

1858 Seated Liberty Dollar, PR20  
Proof-Only Issue, 300 Pieces Struck

- 3134** 1858 PR20 PCGS. CAC. OC-P1, Low R.4. Osburn-Cushing Die State a/a. As a proof-only date in the Seated dollar series, the 1858 is unquestionably a series key both by mintage and by demand. It is only occasionally available to collectors at auction. This is a well-circulated proof example that retains its wide rims but only glimpses of its original proof finish within protected areas. Tan toning on the high points contrasts with the silver-gray fields. Partial iridescence remains beneath the patina. Light abrasions are visible with a glass. This is the sole PR20 example at either PCGS or NGC. Housed in an old green label holder. NGC ID# 252C, PCGS# 7001

1866 Silver Dollar, PR64 Cameo  
Fully Struck and Frosty

- 3135** 1866 Motto PR64 Cameo NGC. OC-P2, R.3. Fire-red, sea-green, and lavender patina adorns the margins of this intricately struck and undisturbed Choice proof. The minimally toned motifs are luminous and contrast with the flashy fields. 1866 was the first year of the Motto subtype that continued until the "Crime of 1873" ended the series. The proof mintage was just 725 pieces, and less than one-quarter of survivors have secured a Cameo designation. Census: 18 in 64 Cameo (2 in 64★), 19 finer (9/19). NGC ID# 252M, PCGS# 87014

1867 Seated Dollar, PR64 Cameo  
Well-Contrasted Surfaces

- 3136** 1867 PR64 Cameo PCGS. OC-P1, Low R.3. The 1867 proof Seated Liberty dollar is elusive in Cameo grades, and Gem-quality coins in this category are rare. The present near-Gem displays the barest trace of light champagne toning over deeply mirrored fields and softly frosted devices. Cameo contrast is appreciable on both sides, producing excellent visual appeal. NGC ID# 252N, PCGS# 87015

1869 Seated Dollar, PR63 Deep Cameo  
Optimal White-on-Black Contrast

- 3137** 1869 PR63 Deep Cameo PCGS. OC-P3, Low R.4. Snow-white devices contrasting against deeply mirrored, reflective fields produce an optimal white-on-black contrast on this Select proof 1869 Seated dollar. The proof strike has fully brought up the details throughout both sides, including notably all the star radials on the obverse periphery and all of the intricate details on Liberty's hair, ribbon, and cap. The grade determinant is likely a few scattered hairlines and some contact marks of no consequence, but there is eye appeal to spare on this attractive proof Seated dollar, a nice entry point to the series for the right bidder. Population: 5 in 63 Deep Cameo, 20 finer (8/19).

Ex: ANA Signature (Heritage, 2/2014), lot 3979, which realized \$6,462.50. NGC ID# 252R, PCGS# 97017

TRADE DOLLARS

1875-S/CC Trade Dollar, MS64  
FS-501, Tied for Finest at NGC

- 3138** 1875-S/CC FS-501 MS64 NGC. Large S, Type One Reverse. A late die state, showing a meandering die crack through ICA and into the field at right. This is the more frequently seen of two 1875-S/CC varieties, with the second C widely spaced from the S. This piece is tied with one other FS-501 near-Gem for finest at NGC (9/19). The silvery-gray surfaces are remarkably frosty, and the devices are well-struck. The only abrasion that might serve as a pedigree identifier is a shallow mark in the upper-left obverse field. NGC ID# 2536, PCGS# 145813 Base PCGS# 7040

1877-S Trade Dollar, MS66  
Top-Notch Color and Luster

**3139 1877-S MS66 NGC.** Large S. More than 9.5 million pieces were struck of the 1877-S Trade dollar, making it a logical choice for type purposes. Fantastic eye appeal is the hallmark of this Premium Gem example, showing lovely pastel patina in dappled shades of pale blue, gray, rose, and golden-orange. All of the star radials are struck up on this coin — in itself a rarity — and the fine details of the central devices on both sides are also well-impressed. The 1877-S Trade dollar is a rarity in this grade, with only two coins reported numerically finer at NGC and PCGS combined. Census: 4 in 66 (1 in 66★), 1 finer (9/19). NGC ID# 253E, PCGS# 7046

1878-S Trade Dollar, MS66  
Ex: Jack Lee Collection

**3140 1878-S MS66 NGC.** In its final year of regular issue, the 1878 Trade dollar was struck in surprisingly large quantity at the San Francisco Mint — over 4.1 million pieces. John Sherman, the Secretary of the Treasury, ordered a halt to Trade dollar production in February, 1878. By then, the Western Mint had already struck more than 1.6 million pieces, and it continued production until April 1878. Always a political football, the Trade dollar had finally achieved its intended popularity in the Orient, only to be replaced by a mountain of federally mandated Morgan silver dollars. An unknown number of 1878-S Trade dollars were melted in the transition.

While the 1878-S Trade dollar remains readily available in most grades, it becomes rare in Premium Gem or finer Uncirculated condition. The surfaces this MS66 example are lightly imbued with a blush of pale-gold toning, evenly spread over brightly lustrous surfaces. Reflective in the fields, the coin was perhaps an early strike soon after the dies were polished, imparting a mirrored finish that is an attractive combination of prooflikeness and satiny texture. All Trade dollars tend to attract bagmarks in their open fields — especially so when they are smoothly reflective — yet this coin is remarkably well preserved. It is well-struck for an 1878-S, with minimal softness on Liberty's head and the right claw of the eagle, and only nominal rounding on the stars. Pedigreed to the Jack Lee Collection, this example will make a welcome addition to any advanced Trade dollar collection. A scratch on the holder is visible in the reverse photo. Census: 11 in 66, 0 finer (8/19).

Ex: *The Jack Lee Collection, III* (Heritage, 11/2005), lot 2269. NGC ID# 253G, PCGS# 7048

## PROOF TRADE DOLLARS

1876 Trade Dollar, PR64+ Deep Cameo  
Sole Finest Deep Cameo at PCGS

- 3141** 1876 PR64+ Deep Cameo PCGS. CAC. Type One Obverse, Type Two Reverse. The ribbon ends point left, and no berry exists beneath the eagle's claw. This is a brilliant, silver-mirrored borderline Gem proof, with glassy-smooth fields and richly frosted devices. Bold white-on-black contrast exists when viewed at an angle. Not all 1876 proofs are well-struck, but this example is mostly sharp throughout both sides — nominal weakness at stars 5 and 6 and on a few upper hair strands preclude a full strike. Eye appeal is exceptional, as confirmed by the PCGS Plus designation and CAC endorsement. No Deep Cameo proof is finer at PCGS. Population: 7 in 64 (1 in 64+) Deep Cameo, 0 finer. CAC: 3 in 64, 0 finer (9/19). NGC ID# 27YM, PCGS# 97056

1880 Trade Dollar, PR67 Cameo  
Delicately Toned, High-End Type Coin

- 3142** 1880 PR67 Cameo PCGS. The 1880 Trade dollar is a favorite type coin. Only struck in proof format, the date boasts a mintage of 1,987 pieces — several hundred more coins than were struck of the proof Morgan dollar the same year. The 1880 Trade dollar is also one of the most consistently well-made and attractive proofs in the series. Cameos are plentiful and typically have good contrast, and if one is willing to purchase a non-Cameo coin, it is not difficult to obtain an 1880 proof in Gem or better condition. However, where the ultimate proof type coin becomes scarce is in the upper reaches of the Cameo category, as well as in the Deep Cameo category. Few Superb Gems are certified at PCGS regardless of the contrast level, and none are finer than PR67+ (9/19). This PR67 Cameo is fully detailed and well-contrasted. The fields exhibit liquidlike reflectivity, backlighting delicate lavender toning overall. A threadlike strike-through on the reverse “wriggles” through the field from the eagle's right (facing) wing to the RI in AMERICA. An eye-appealing and beautifully preserved example. Population: 11 in 67 (2 in 67+) Cameo, 0 finer; 2 in 67 Deep Cameo, 0 finer (9/19). NGC ID# 27YS, PCGS# 87060

1880 Trade Dollar, PR68 Cameo  
White on Black Proof Type Coin

- 3143 1880 PR68 Cameo NGC.** Proof-only Trade dollars were struck annually between 1878 and 1885. The 1880 has the largest proof mintage of the series, and the date is often selected to represent the Trade dollar within proof type collections. Specimens are usually offered in PR61 to PR66 grades. At the PR68 level, the 1880 is extremely rare, with just 11 pieces certified by NGC (9/19), eight as PR68 Cameo, two as PR68★ Cameo, and one as PR68 Ultra Cameo. None have been graded PR69 or PR70 by either leading service. The present pristine piece offers glassy fields and frosty motifs. The strike is sharp, and the surfaces are brilliant save for a tiny spot near the final A in AMERICA. Concentric lathe lines (as made) are faintly evident on the central obverse field. NGC ID# 27YS, PCGS# 87060

1881 Trade Dollar, PR64+ Deep Cameo  
Marvelous Quality for the Grade

- 3144 1881 PR64+ Deep Cameo PCGS. CAC.** No question this proof 1881 Trade dollar appears finer than its technical near-Gem grade, explaining the Plus designation from PCGS and green CAC approval sticker. Brilliant, deeply contrasted surfaces showcase profoundly watery mirrors around frosty relief elements. Marvelous eye appeal and quality for the grade. Population: 12 in 64 (4 in 64+) Deep Cameo, 11 finer. CAC: 5 in 64, 5 finer (9/19). NGC ID# 2Z3P, PCGS# 97061

1882 Trade Dollar, PR66+ Cameo  
Important Proof-Only Issue, CAC

- 3145 1882 PR66+ Cameo PCGS. CAC.** Dealers and speculators purchased the majority of proof Trade dollars struck in 1879 to 1882, hoping to profit from the low, proof-only mintages and the perceived rarity of coins struck in such small numbers. By the end of 1882, the bloom was fully off the rose and the 1883 proof-only mintage dipped below 1,000 coins. While the 1882 Trade dollar saw diminished demand as well, a few high-grade examples survive and benefit from renewed interest among collectors.

This is a stunningly original and attractive Premium Gem 1882 Cameo proof, Plus-graded by PCGS and CAC-endorsed. Translucent reddish-gold toning wafts over glassy fields and frosted devices, while the toning deepens mildly at the borders. A razor-sharp strike adds to the outstanding eye appeal. PCGS reports just three cameo proofs in finer grades. Population: 11 in 66 (3 in 66+) Cameo, 3 finer (9/19). NGC ID# 27YU, PCGS# 87062

## MORGAN DOLLARS

1879-CC Silver Dollar, MS65  
Conditionally Challenging Carson City Issue

**3146 1879-CC MS65 PCGS.** The second-scarcest Carson City Morgan, the 1879-CC is popular with collectors from many avenues of pursuit. Mintage-wise, the 1879-CC is nothing special — 756,000 coins were struck, putting it about in the middle of the Carson City Morgan range. However, significant quantities of this date were paid out in the 19th century and dumped into circulation. Some researchers suspect that additional coins were destroyed during the Pittman Act melts that followed 1918. In any case, little more than 4,000 pieces remained in government vaults at the time of the GSA sales in the 1970s. Today, in Mint State, the 1879-CC is challenging to acquire, and in Gem condition, it is a formidable condition rarity in the context of Morgan dollars.

This example is vibrantly lustrous, sporting original, frosty surfaces that have only the faintest trace of light champagne toning. Tilting the coin beneath a light produces a hint of reflectivity in the obverse fields, although vibrant cartwheel bands are the dominant characteristic of the fields. A touch of the usual strike softness is evident on the hair above Liberty's ear but is not bothersome. PCGS has seen only six finer non-Prooflike 1879-CC Morgans, plus a few Prooflike and Deep Mirror Prooflike coins in this grade (9/19). NGC ID# 253U, PCGS# 7086

1879-CC Morgan, MS64 Deep Prooflike  
A Rarity in This Grade

**3147 1879-CC MS64 Deep Prooflike NGC.** The 1879-CC is a scarce issue regardless of its grade or mintmark type. Prooflike and Deep Prooflike examples are extremely scarce, and well-contrasted coins with deep mirrors are unequivocally rare in near-Gem or finer grades. This is a brilliant, sharply struck example of the Deep Prooflike format, boldly white-on-black when viewed at the proper angle, struck with the normal CC mintmark.

Liberty's cheek is smooth, frosted, and clear of distracting marks when viewed in hand. A few tiny ticks and wayward hairlines are visible under magnification on the well-mirrored fields and raised devices. Just 756,000 pieces were struck, and the issue has a low survival rate, of which fewer than 5% are thought to have deeply mirrored, prooflike fields. Census: 20 in 64 Deep Prooflike, 2 finer (9/19). NGC ID# 253T, PCGS# 97087

1879-CC Morgan Dollar, MS63  
VAM-3, Capped Die

- 3148** 1879-CC Capped Die, VAM-3, Top 100, MS63 PCGS. A Top 100 Variety. The popular "Capped Die" variety shows the remnants of a small, partially effaced CC under the primary mintmark. This impressive Select specimen displays well-detailed design elements with just the slightest blending on the hair above the ear. The lightly marked, lightly toned surfaces radiate vibrant mint luster. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1880/79-O Morgan Dollar, MS64+  
Rare Prooflike VAM-4

- 3149** 1880/79-O 80/79 Crossbar, VAM-4, MS64+ Prooflike PCGS. A Top 100 Variety. The remnants of an undertype 79 are visible beneath the final two digits in the date, identifying the popular VAM-4. This Plus-graded Choice example exhibits sharply detailed design elements and lightly marked prooflike fields, with highlights of violet, lavender, and sea-green toning. Population: 24 in 64 (8 in 64+) Prooflike, 2 finer (9/19). NGC ID# 356H, PCGS# 41287 Base PCGS# 7117

1881-S Morgan, MS68 Prooflike  
Spectacular Preservation

- 3150** 1881-S MS68 Prooflike PCGS. 30th Anniversary Green Label Holder. This MS68 Prooflike coin exceeds the quality of almost all other 1881-S dollars. It is among the finest Prooflike pieces certified and it is scarce as such. There are a few daubs of gold toning around the borders but most of each side is brilliant. The field reflectivity is captivating, but the true hallmark of this coin is the preservation. Liberty's cheek is flawless. In the fields, examination with a loupe reveals a few microscopic ticks immediately below Liberty's chin, and on the reverse there are similar insignificant signs of contact between UNITED and the dentils. Without these pedigree identifiers, a Plus designation would likely have been awarded. Nonetheless, this remains an exemplary type coin. Population: 5 in 68 Prooflike, 0 finer (9/19). NGC ID# 2549, PCGS# 7131

1882-CC Morgan Dollar, MS67  
Incredibly Vibrant Luster

- 3151** 1882-CC MS67 PCGS. The 1882-CC is one of several Carson City Morgans made plentiful by the GSA sales of the 1970s. More than 600,000 pieces were distributed through the General Services Administration, and in grades as fine as MS66, the 1882-CC is common. However, Superb Gems are conditionally scarce. This piece, blazingly lustrous and entirely untuned, showcases an impressive degree of quality and vibrancy. Strike sharpness is outstanding. PCGS lists only one MS68 coin numerically finer (9/19). NGC ID# 254S, PCGS# 7134

1884-S Dollar, MS60  
Well-Known Condition Rarity

- 3152** 1884-S MS60 NGC. This MS60 offering represents a terrific opportunity to obtain an Uncirculated example of the conditionally rare 1884-S dollar. Each side is frosty and brilliant. Design definition is strong at the centers. Scattered abrasions and slightly subdued mint luster in the open fields explain the grade. NGC ID# 254P, PCGS# 7156

1884-S Dollar, Brilliant MS60  
Famous Condition Rarity

- 3153** 1884-S MS60 NGC. Some light reeding marks on the cheek and neck are the sole grade-limiting factor on this Mint State 1884-S dollar. The obverse fields are exceptionally unabraded for the assigned grade, while the lustrous and frosted surfaces are uniformly well-struck. A brilliant example, clearly Uncirculated and in strong demand as such. NGC ID# 254P, PCGS# 7156

1884-S Morgan Dollar, MS62  
Elusive in Finer Grades

- 3154 1884-S MS62 NGC.** The history of the 1884-S dollar follows that of many mid-1880s Morgan issues. Significant qualities were released into circulation in the 19th century, and many of the pieces put into storage were later melted under the terms of the Pittman Act of 1918. Lesser quantities of the date were distributed to the public as late as the 1950s, although by that time, the 1884-S Morgan was inherently elusive in Mint State grades. Today, coins grading finer than MS62 are genuinely scarce. This collectible coin displays light russet toning over satiny surfaces. Well-struck design elements complement a lack of severe abrasions. NGC ID# 254P, PCGS# 7156

1884-S Dollar, MS61 Prooflike  
One of Nine Prooflike Mint State Coins at NGC

- 3155 1884-S MS61 Prooflike NGC.** A better date in Uncirculated condition, the 1884-S Morgan dollar is especially elusive with Prooflike fields. This piece, although low-end numerically for a Mint State coin, is significant for its mirrored fields and modest cameo contrast. NGC has seen only 79 submissions of a Prooflike 1884-S dollar in all grades, most of which are for coins in AU55 or AU58. In fact, NGC lists only nine Uncirculated Prooflike 1884-S dollars (9/19). This piece displays a bold strike and brilliant interiors, with a trace of gold around the peripheries. Light handling marks on the obverse limit the numeric grade. NGC ID# 254P, PCGS# 7157

1889-CC Morgan, AU53  
Lustrous Fields

- 3156 1889-CC AU53 NGC.** Luster remains in the fields of this About Uncirculated 1889-CC silver dollar, complementing well-detail design elements that have only slight high-point friction. Light golden toning on each side suggests original surfaces. Unlike many AU-level Morgan dollars — especially representatives of the key-date 1889-CC — this piece is somewhat smooth and free of bothersome abrasions.  
*From The Pelican Collection, Part II.* NGC ID# 2559, PCGS# 7190

1889-CC Morgan, AU53  
Border-Toned Carson City Key Date

- 3157 1889-CC AU53 NGC.** Bits of olive-gold toning cling to the margins of this lightly toned, sharply defined About Uncirculated 1889-CC. The low 350,000-piece mintage is only one factor that makes the '89-CC the absolute premier rarity among Carson City Morgans. Both the 1881-CC and 1885-CC have lower mintages, but few of those coins were released into circulation. Most were part of the GSA distributions, which included just a solitary 1889-CC in the massive sales. Tiny abrasions dot the sharply struck surfaces, but there are no outsized marks. Traces of luster remain. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, AU58  
Lustrous Peripheries

**3158** 1889-CC AU58 NGC. This near-Mint 1889-CC dollar has all the luster and eye appeal of a low-end Uncirculated coin, although some faint slide marks and hairlines on each side restrict it to the top end of the AU range. It is a well-struck coin with mostly brilliant surfaces. Only a few splashes of olive-gold toning make an appearance on each side.

Ex: FUN Signature (Heritage, 1/2008), lot 2980, which realized \$9,775. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, AU58  
Lustrous, Satiny Surfaces

**3159** 1889-CC AU58 NGC. Satiny luster illuminates this russet-gold near-Mint example, showing almost no perceptible wear. Under a loupe, faint hairlines are visible, and the devices are finely textured, but no singular abrasions are seen. Eye appeal is pleasing for the grade. The 1889-CC is among the most sought-after dates in the Morgan dollar series, and it is the rarest of the Carson City issues. High-end AU coins are always in demand. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, MS62  
Important Mint State Example

**3160** 1889-CC MS62 NGC. Coinage operations were reinstated in 1889 at the Carson City Mint after a three-year lull, but it was October before any silver dollars were struck. Equipment repairs, maintenance, and hiring new mint personnel delayed start-up, and the Nevada Mint's output for the year was just 350,000 Morgan dollars and 30,945 double eagles. Most of the mintage circulated to some extent — as a result, the 1889-CC was represented by just a single coin in the GSA sales.

This is a sharply defined MS62 example, with smoothly frosted surfaces and a minimum of abrasions or bagmarks for the grade. A faint sheen of golden-gray toning mellows the brilliant-silver surfaces, with bold cartwheel luster shining through the light patina on both sides. A thin abrasion above star 2 is the most noticeable mark, but it is minor for the assigned grade level. With most Uncirculated 1889-CC dollars in the MS61 to MS63 range, this coin fits well at the upper end of those examples, and finer coins are rare. NGC ID# 2559, PCGS# 7190

1889-CC Morgan, Lustrous MS63  
Original Lilac-Gold Toning

- 3161 1889-CC MS63 PCGS.** This is the highest grade in which most collectors can feasibly acquire an 1889-CC dollar. The key Carson City issue becomes scarce in higher grades and climbs out of reach in value for most series enthusiasts. In MS63, this piece balances quality and affordability. Original, frosty mint luster displays a delicate lilac-gold hue, with small daubs of russet and olive additionally evident around the borders. The devices are well-struck, and only a few light abrasions are evident. An outstanding and eye-appealing 1889-CC Morgan dollar. PCGS lists 34 numerically finer non-Prooflike coins, plus 27 higher-grade Prooflike and Deep Mirror Prooflike pieces (9/19). NGC ID# 2559, PCGS# 7190

1889-CC Dollar, MS62 Deep Mirror Prooflike  
Fantastic Quality and Eye Appeal

- 3162 1889-CC MS62 Deep Mirror Prooflike PCGS.** The 1889-CC Morgan dollar represents one of the two major keys to the series in circulation-strike format, along with the 1893-S. Most collectors would consider an example in problem-free Fine or Very Fine condition to represent a trophy coin attainable some time down the line. Few could fathom a coin of this magnitude in MS62 Deep Mirror Prooflike condition. Both sides are brilliant, with the only colorful embellishment being a ring of golden toning around the reverse. The fields are beautifully mirrored, contrasting against the crisp, frosted devices. Chatter is relative minor. Housed in an old green label holder. NGC ID# 2559, PCGS# 97191

1890-CC Dollar, MS65+  
Vibrant Mint Frost

- 3163 1890-CC MS65+ PCGS.** Near-complete brilliance and vibrant mint frost are the hallmarks of this Carson City dollar. The coin is wonderfully preserved with noticeably few abrasions, and detail over Liberty's ear and the eagle's breast is crisp. A few daubs of golden color accent the obverse. PCGS reports 20 finer submissions (9/19). NGC ID# 255D, PCGS# 7198

**1891-S Dollar, Frosty MS67**  
**Among the Finest Pieces at PCGS**

- 3164 1891-S MS67 PCGS.** The 1891-S is a better date in Uncirculated condition, but its true rarity becomes apparent only in the upper reaches of Mint State. Premium Gems are scarcely seen, and fewer than a dozen Superb Gems are reported at PCGS, all non-Prooflike coins; the finest Prooflike pieces at PCGS are a handful of MS66 coins, and a few Gems are the highest-graded Deep Mirror Prooflike coins at that service (9/19).

This remarkable Registry coin displays frosty, shimmering mint luster and bold design elements. The surface preservation is astounding for this date, which is typically seen with heavy bagmarks — there are only a couple of tiny ticks on Liberty's cheek that deny virtual perfection. The obverse has deep cobalt-blue and amber-orange toning around the borders with an essentially brilliant interior. On the reverse, the same border hues are present, but the center has warm golden toning as well. An eye-catching tied-finest 1891-S Morgan dollar. Population: 10 in 67 (1 in 67+), 0 finer (9/19). NGC ID# 255K, PCGS# 7210

**1893-CC Dollar, MS63**  
**Final-Year Semikey Issue**

- 3165 1893-CC MS63 NGC. VAM-3.** The 3 is lightly doubled outside the top loop, and the eye shows slight doubling at its front. This Select Uncirculated example is partially prooflike, with attractive golden-gray accents on the otherwise brilliant surfaces. Faint field chatter and some scattered light grazes on the frosted portrait account for the assigned grade, but the strike is sharp and the reverse shows only a few tiny, widely separated marks. This is a sharp and attractive example of the Carson City final-year issue. NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, MS64**  
**Brilliant and Well Struck**

- 3166 1893-CC MS64 PCGS.** The final-year 1893-CC is a much better Carson City issue, similar to the 1879-CC in rarity and trailing only the 1889-CC. Only a single '93-CC dollar emerged from the GSA sales, and many Uncirculated survivors exhibit softly struck centers. The present Choice example is well struck, and its brilliant surfaces show only a smattering of individually unimportant marks. NGC ID# 255S, PCGS# 7222

1895-O Morgan Dollar, MS62  
Lovely Original Toning

- 3167 1895-O MS62 PCGS.** The 1895-O Morgan silver dollar is a famous issue from the year of the proof-only Philadelphia Mint dollar that is known as the King of the Morgans. However, for collectors of non-proof silver dollars, this branch mint issue is extremely important as a major condition rarity. PCGS has only certified 170 of these in all Mint State grades (9/19). This example has impressive original toning that features rich ivory, gold, and blue on the obverse, and ivory and gold on the reverse. The toning hides the scattered, grade-consistent marks. Population: 52 in 62 (4 in 62+), 47 finer (9/19). NGC ID# 255Y, PCGS# 7236

1899 Dollar, MS66 Deep Mirror Prooflike  
None Graded Higher

- 3169 1899 MS66 Deep Mirror Prooflike NGC.** The 1899 Morgan dollar is known for its low reported mintage of 330,000 coins. Examples are typically available in high grades, but they are rarely seen in Deep Mirror Prooflike, especially this nice. Entirely brilliant surfaces enjoy profound depth of field that contrasts boldly against the frosted, razor-sharp devices. Census: 9 in 66 Deep Mirror Prooflike, 0 finer (9/19). NGC ID# 256B, PCGS# 97259

1896 Dollar, MS67+  
Two Coins Finer at PCGS

- 3168 1896 MS67+ PCGS. CAC.** This mass-minted Philadelphia issue is plentiful through MS67, but only two coins at PCGS and another five at NGC are certified higher than this Plus-graded Superb Gem — a key consideration for Registry players (9/19). The brilliant surfaces feature cartwheel mint frost and a remarkable dearth of abrasions. The device are crisp, and a small toning spot occurs above W(E). NGC ID# 2562, PCGS# 7240

1900-O/CC Dollar, MS67  
A Top 100 Variety  
Tied for Finest Known O/CC at NGC

**3170 1900-O/CC VAM-11, R.4, MS67 NGC.** A Top 100 Variety. In 1900, the Philadelphia Mint forwarded several unused Carson City dies to New Orleans. The CC mintmark was corrected to the proper O mintmark, but not fully effaced and still visible beneath the primary mark. As the final vestige of the famous Carson City Mint's historic past, the 1900-O/CC is prized by Carson City specialists and Morgan dollar enthusiasts alike.

This is a Superb Gem example of the popular VAM-11 overmintmark. Remnants of both Cs remain outside the O mintmark, which was entered high and shifted left to obscure the previous mark. Diagnostic die cracks confirm the variety, as does a threadlike die line in the lower cap above the hair ribbon. The surfaces of this MS67 are virtually free of marks, with light silver-gray toning and vibrant silver luster throughout both sides. The strike is sharp throughout. We have never offered a finer example. Census (all O/CC varieties): 2 in 67, 0 finer (9/19). NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

1901 Dollar, Lustrous MS63  
Important 20th Century Issue

**3171 1901 MS63 NGC.** The 1901 carries a modest premium in circulated grades over common issues, although it becomes scarce in Select Mint State. This Philadelphia issue is rare finer, and in Gem grade it is one of the greatest condition rarities in the series. This is a collectible but attractive MS63 coin. The mint luster is vibrant on each side and no toning is present. Strike weakness affects most of the relief elements, not just the centers, and likely contributes to the grade assessment. NGC has seen only 20 finer representatives of this sought-after 20th century condition key (9/19). NGC ID# 256J, PCGS# 7272

1901-O Dollar, MS67 ★  
Spectacular Reverse Toning

**3172 1901-O MS67 ★ NGC.** NGC awards its Star designation for spectacular eye appeal, and this Superb Gem dollar has it in spades. The reverse, which is given top billing in the holder, features impressive rainbow iridescence. Similar tones are more mottled on the obverse. Satiny and clean, although the strike is typical. Census: 25 in 67 (2 in 67+, 2 in 67★), 0 finer (9/19). NGC ID# 256K, PCGS# 7274

PROOF SET

1893 Liberty Nickel, CAC  
PR65 Deep Cameo

**3173 1893 PR65 Deep Cameo PCGS. CAC.** Only a tiny percentage of proof 1893 nickels have been certified as Deep Cameo by PCGS, but the present Gem exhibits icy motifs and darkly reflective fields. The strike is crisp, and contact is confined to a tick on the cheek and another west of the large V. Glimpses of autumn-brown toning visit both sides. Population: 4 in 65 Deep Cameo, 6 finer. CAC: 4 in 65, 5 finer (9/19). NGC ID# 2783, PCGS# 93891

1893 Dime, PR66+ Cameo  
Fully Struck, Lightly Toned

- 3174** 1893 PR66+ Cameo PCGS. CAC. Undeniable cameo contrast insures the eye appeal of this fully struck Premium Gem specimen. The smooth surfaces are predominantly brilliant, though Liberty's neck displays hints of tan-brown toning. Only about one-third of proof 1893 dimes have secured a Cameo designation. Population: 24 in 66 (2 in 66+) Cameo, 16 finer. CAC: 9 in 66, 17 finer (9/19). NGC ID# 23G4, PCGS# 84877

1893 Quarter, PR66 Cameo  
White on Black Eye Appeal

- 3175** 1893 PR66 Cameo PCGS. CAC. A brilliant and fully struck high-grade specimen. Snow-white frost across the portrait, eagle, and legends provides exquisite contrast with the darkly reflective fields. Thorough evaluation beneath a lens is required to locate even the most inconsequential imperfections. Population: 19 in 66 (2 in 66+) Cameo, 23 finer. CAC: 13 in 66, 15 finer (9/19). NGC ID# 2428, PCGS# 85679

1893 Barber Half Dollar  
PR66 Cameo, CAC

- 3176** 1893 PR66 Cameo PCGS. CAC. The second-year proof Barber half dollar had a much smaller mintage than its predecessor, a scant 792 pieces. A minority of survivors display the white-on-black look favored by modern collectors. The present brilliant Premium Gem demonstrates pleasing cameo contrast, and the mirrored fields are splendidly smooth. The strike shows slight softness on the right shield corner. Population: 26 in 66 (3 in 66+) Cameo, 9 finer. CAC: 22 in 66, 7 finer (9/19). NGC ID# 6UKV, PCGS# 86540

1893 Silver Dollar, CAC  
PR65+ Deep Cameo

- 3177** 1893 PR65+ Deep Cameo PCGS. CAC. The first year of the Barber series increased 1892 silver proof set production to 1,245 pieces. The 1893 proof mintage was more than one-third lower, 792 pieces. This well struck Gem is devoid of noticeable contact, and its eye appeal is exception. Outstanding cameo contrast is demonstrated by the ice-white devices and the glassy fields. Although it is possible to surpass the numerical grade of the present lot, it will satisfy even the most demanding specialist. PCGS has certified just 12 pieces as Deep Cameo in all grades. Population: 3 in 65 (1 in 65+) Deep Cameo, 9 finer. CAC: 4 in 65, 5 finer (9/19). NGC ID# 55UK, PCGS# 97328

## PROOF MORGAN DOLLARS

1882 Morgan Dollar, PR68★  
Vivid Multicolor Toning

1885 VAM-38 Silver Dollar, PR68 Cameo  
Tied for the Second Finest Cameo Proof

**3178 1882 PR68★ NGC.** A generous mintage of 1,151 proof Morgan dollars was accomplished in 1882, with 750 examples delivered in the first quarter, 101 in the second, 100 in the third, and 200 in the fourth. Of these, some 50+ examples were supposedly melted, leaving a net mintage of 1,100 coins. The 1882 proofs were well-produced, with sharp strikes and nice contrast, but few survivors can match the quality and eye appeal of the present coin. This delightful Superb Gem exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces include deeply reflective fields. The outstanding visual attribute of this piece is the stunning mix of violet, sea-green, and magenta toning that enhances the surfaces of both sides. Eye appeal is terrific. Census: 8 in 68 (2 in 68★), 0 finer; 5 in 68 (1 in 68+★) Cameo, 0 finer; 1 in 68 Ultra Cameo, 0 finer (9/19). NGC ID# 27Z6, PCGS# 7317

**3179 1885 PR68 Cameo NGC.** The Philadelphia Mint coined 930 proof Morgan dollars in 1885, with production in January, March, June, September, and December. There is no way to distinguish the month of coinage for individual specimens. Two proof varieties are known. VAM-31 has the bottom of the 5 doubled, while VAM-38, offered here, has the top of the 5 doubled. In fact, it appears to be tripled on this example.

This sensational Superb Gem Cameo proof exhibits flawless, untuned silver surfaces. A fully brilliant example, the fields are fully and deeply mirrored, framing the frosty and lustrous obverse and reverse devices. Census: 2 in 68 Cameo, 1 finer; 1 in 68 Ultra Cameo, 0 finer (9/19). NGC ID# 27ZE, PCGS# 87320

1890 Dollar, PR67 Cameo  
Only 590 Proofs Struck

- 3180** 1890 PR67 Cameo NGC. Proof Morgan dollar production amounted to 590 pieces in 1890 — one of the lowest mintages in the entire series. The overwhelming majority of certified proofs at NGC and PCGS lack sufficient contrast for a Cameo designation, although those bearing that assessment can still generally be found through PR66. This conditionally rare Superb Gem Cameo representative remains entirely brilliant with watery fields and frosty relief elements. Preservation is outstanding, without any contact marks worthy of mention. Census: 16 in 67 Cameo (1 in 67+), 5 finer in this category (9/19). NGC ID# 27ZK, PCGS# 87325

1898 Morgan, PR67+ Cameo  
Conditionally Rare Type Coin

- 3182** 1898 PR67+ Cameo PCGS. The 1898 was a well-made proof issue, often sharp and starkly contrasted. In fact, more high-end Deep Cameos are known than Cameos, as seen in the population data. This high-end Superb Gem proof is on the cusp of a Deep Cameo designation. It is well-contrasted on both sides, although slightly more so on the reverse. A delicate champagne tint across the interiors cedes to russet and blue border toning, which frames the sharp, satiny central devices. The eye appeal is outstanding. Population: 1 in 67 (1 in 67+) Cameo, 1 finer; 18 in 67 (4 in 67+) Deep Cameo, 3 finer (4/19). NGC ID# 27ZW, PCGS# 87333

1896 Morgan Dollar, PR66  
Vivid Multicolor Toning

- 3181** 1896 PR66 PCGS. Cameo contrast is a bit muted on this Gem proof Morgan dollar, but only because both sides are covered in rich crimson, violet, and blue patina with golden accents. The fields are flashy and reflective, and the relief elements are typically strong. One of just 762 proofs struck in 1896. Population: 20 in 66 (1 in 66+), 18 finer (9/19). NGC ID# 27ZT, PCGS# 7331

1904 Dollar, PR66+  
Peach-Gold and Lavender Toning

- 3183** 1904 PR66+ PCGS. CAC. Ex: Sunset Hill Collection. Peach-gold and lavender toning adorns the beautifully preserved surfaces of this late-date proof Morgan dollar. Contrast is typically subdued for a post-1902 specimen, but the visual quality is no less impressive. From a mintage of 650 pieces. Population: 39 in 66 (4 in 66+), 9 finer. CAC: 13 in 66, 5 finer (9/19). NGC ID# 2824, PCGS# 7339

## PEACE DOLLARS

1922-S Peace Dollar, MS66  
Important Condition Rarity

- 3184 1922-S MS66 NGC.** A faint golden-gray sheen complements lustrous, silver-gray surfaces of this Premium Gem 1922-S. The strike is sharp except for Liberty's hair strands at the temple, where the usual weak San Francisco strike manifests. Raised die polish lines exist adjacent to the portrait and throughout the fields, visible under a loupe. The 1922-S is a rarity in Premium Gem condition, and it is unknown in higher numeric grades. The finest examples certified are two MS66★ coins at NGC, and a single MS66+ at PCGS. Census: 18 in 66 (2 in 66★), 0 finer (8/19). NGC ID# 257E, PCGS# 7359

1924-S Peace Dollar, MS65  
Lustrous and Lightly Toned

- 3185 1924-S MS65 PCGS. CAC.** The 1924-S Peace dollar is one of the least available dates of the early part of this series. The present coin is sharply struck, with fine detail on the hair and eagle's feathers. The surfaces are brightly lustrous, under wisps of gold and lilac toning. Only eight coins have been certified finer by NGC and PCGS combined (9/19). NGC ID# 257K, PCGS# 7364

1928 Peace Dollar, MS65+  
Few Pieces Known Finer

- 3186 1928 MS65+ PCGS.** A scarce Plus-graded Gem example of this popular key date, boasting a mintage of little more than 360,000 coins. The strike is sharp and luster is vibrant. Instead of the usual golden toning, this piece is mostly untuned, with a few daubs of champagne color in the upper right reverse margin. Neither side exhibits bothersome abrasions. PCGS has seen only 21 finer submissions (8/19). NGC ID# 257V, PCGS# 7373

1934 Dollar Peace, MS66+  
Frosty With Blushes of Golden Color

- 3187 1934 MS66+ PCGS. CAC.** Luminous mint frost and blushes of thin almond-gold color complement the silvery surfaces of this Plus-graded and CAC-endorsed Premium Gem dollar. The obverse strike is razor-sharp, and the reverse is only marginally softer, as always. Void of anything other than a few superficial grazes. Six submissions are finer at PCGS (9/19). NGC ID# 257Y, PCGS# 7375

1934-D Peace Dollar, MS66  
Rare in Finer Grades

- 3188 1934-D MS66 PCGS. CAC.** Micro D mintmark. A sliver of amber-orange toning along the right border adds a welcome accent to the frosted, pearlescent silver surfaces of this Premium Gem Denver Peace dollar. The reverse mimics the obverse in coloration and surface quality, with coruscating mint luster and its own slice of orange at the right rim. Despite the richly frosted fields and devices, marks and abrasions are minor and few. PCGS reports just 10 coins in MS66+ and 2 finer (9/19). CAC: 22 in 66, 0 finer (8/19). NGC ID# 257Y, PCGS# 7376

1934-S Peace Dollar, MS64  
Better Date in Uncirculated Condition

- 3189 1934-S MS64 PCGS.** The 1934-S is the scarcest Peace dollar issue in Mint State, such coins being well-dispersed throughout the MS62 to MS65 grade range. This near-Gem example displays well-struck devices and satiny, golden-tinted mint luster. A few light abrasions in the left obverse field prevent a finer grade. NGC ID# 257Z, PCGS# 7377

## EISENHOWER DOLLAR

1974-S Silver Eisenhower Dollar, MS69  
Top-Grade Registry Coin  
A Rarity So Fine

- 3190** 1974-S Silver MS69 NGC. Virtual perfection is required to achieve the MS69 grade, and that is exactly what this silver 1974-S Ike dollar showcases. Both sides are frost-white and entirely untouched. Cartwheel luster illuminates sharp devices and glistens beneath a light. This is one of just two coins for the grade at NGC, and there are only three pieces of equal merit at PCGS (9/19). A Registry collectors dream coin. NGC ID# 258F, PCGS# 7417

## GOLD DOLLARS

1849-C Gold Dollar, MS60  
Pleasing Closed Wreath Example

- 3191** 1849-C Closed Wreath MS60 NGC. Variety 1. The Charlotte Mint 1849 Closed Wreath gold dollar is scarce in all grades from a mintage of just 11,634 pieces, but it is much more available than its ultra-rare Open Wreath counterpart. Mint State examples are especially challenging to find. As the only collectible gold dollar from the inaugural Charlotte Mint year, gold dollar date and year collectors as well as Charlotte Mint specialists require an example. Some faint granularity exists on the surfaces of this MS60 example, which is sharply struck with attractive lilac and orange accents over greenish-gold fields and devices. Census: 4 in 60, 27 finer (9/19). NGC ID# 25BC, PCGS# 7505

1849-O Gold Dollar, MS65  
First-Year New Orleans Condition Rarity

- 3192** 1849-O Open Wreath MS65 NGC. Variety 1. The mintmark is high, and the R in DOLLAR is doubled. In Gem condition, the 1849-O gold dollar is a rarity, and merely a handful of finer pieces are known. This example displays razor-sharp stars and hair detail, and the wreath leaves are bold. Original honey-gold luster shows no bothersome abrasions. Census: 11 in 65, 5 finer (9/19). NGC ID# 25BE, PCGS# 7508

1853 Gold Dollar, MS67  
Spectacular Preservation

- 3193** 1853 MS67 PCGS. One of the most plentiful Type One gold dollars, the 1853 is a popular type coin. Nonetheless, Superb Gem examples are conditionally rare, and coins grading finer than this MS67 example are prohibitively elusive. Fewer than two dozen MS67 and finer coins are reported at PCGS and NGC combined. This coin displays a full strike and vibrant, textured mint luster from moderately worn dies. Under a loupe, the preservation appears virtually flawless, without even a light mark on Liberty's cheek to be worthy of mention. Population: 9 in 67 (4 in 67+), 4 finer (9/19). NGC ID# 25BU, PCGS# 7521

1855-C Gold Dollar, MS61  
Important Type Two Charlotte Issue

**3194 1855-C MS61 PCGS. Variety 2.** The appeal of the 1855-C gold dollar is unique in the Charlotte series, it being a one-year type coin and conditionally rare in Mint State. In *Gold Coins of the Charlotte Mint*, third edition, Doug Winter estimates that no more than five or so truly Uncirculated pieces survive, even though the grading services have called 23 pieces Mint State (9/19) — a number that may include duplication. The poor strike quality of this issue contributes to the challenge of grading examples. Doug Winter writes: “I have never seen an 1855-C gold dollar that I would characterize as being well struck.” As many as 80% of the surviving population is decidedly weak, regardless of wear.

A textbook example of this is the present coin. Although graded Mint State, little definition is discernible in Liberty’s hair, and the corresponding central reverse is somewhat “rough,” reminiscent of an unstruck planchet. Additional strike weakness affects the borders on both sides. Charlotte specialists will recognize these attributes for what they are: a virtually unavoidable characteristic of the sought-after 1855-C gold dollar. This coin is bright yellow-gold with light signs of surface handling on the Liberty portrait and elsewhere. A faint glint of reflectivity in the fields is perhaps a redeeming attribute with regards to the eye appeal of the coin and likely contributed to the PCGS grade. PCGS has awarded just five coins a Mint State designation, one MS60, and four MS61s (9/19). NGC ID# 25C5, PCGS# 7533

1861 Gold Dollar, Frosty MS67  
CAC Approval, Condition Census

**3195 1861 MS67 PCGS. CAC.** When you look at a Superb Gem gold dollar, you expect — and rightly so — to be able to admire it with a loupe for great lengths of time without eventually becoming irritated by the presence of tiny but increasingly distracting imperfections. With the variances in coin grading throughout the years, the number of Superb Gems of which this can truly be said is surprisingly small within any given issue. We are pleased to offer here a Superb Gem 1861 gold dollar that is truly without distractions of any sort. In fact, the obverse of this piece is, as far as the human eye can determine, essentially flawless. Examining the reverse one gets the impression that it is not quite perfect, although nothing actually sticks out as an obvious grade inhibitor. This quality of preservation is compounded by warm, original orange-gold color and frosty mint luster. Excellent strike sharpness adds to the appeal. This CAC-endorsed Superb Gem is one of just four certified at PCGS and NGC combined, with none numerically finer. Population: 3 in 67 (1 in 67+), 0 finer. CAC: 3 in 67, 0 finer (9/19). NGC ID# 25CU, PCGS# 7558

1880 Gold Dollar, MS68 Deep Prooflike  
Single Finest at NGC

**3196** 1880 MS68 Deep Prooflike NGC. Following the ultra-low-mintage gold dollar issue of 1875, the next-lowest production in the post-Civil War era belongs to the 1880 gold dollar, which has a business-strike mintage of just 1,600 pieces. This astonishing Superb Gem has deep mirrors and crisp detail with ample contrast between the lemon-gold fields and the lightly frosted devices. A handful of tiny disturbances in the fields are planchet flakes that have no influence on the technical grade, nor on the eye appeal. The single finest of just six Deep Prooflike representatives certified by NGC (9/19).

Ex: *Dallas Signature* (Heritage, 10/2008), lot 1887. NGC ID# 25DJ, PCGS# 77581

## EARLY QUARTER EAGLES

1806/4 Quarter Eagle, XF Details  
Capped Bust Right, 8x5 Stars, BD-1

**3197** 1806/4 8x5 Stars, BD-1, High R.4 — Surfaces Smoothed — PCGS Genuine. XF Details. Bass-Dannreuther Die State b/b, with the die crack through LIBERTY. Only two die varieties are known for the 1806 Capped Bust right quarter eagle, both struck using overdated obverse dies. This BD-1 example employed an unused obverse die from 1804 that cracked quickly, making the variety scarce in today's market. The surviving population numbers 75-90 examples in all grades. This pleasing orange-gold example is lightly worn, with XF sharpness on the design elements and heavy planchet adjustment marks on the reverse. Traces of original mint luster remain intact, despite the noted smoothing.

1808 BD-1 Quarter Eagle, AU Details  
Famous Single-Year Type Coin

**3198** 1808 BD-1, R.4 — Bent — NGC Details. AU. Bass-Dannreuther Die State b, showing a crack that runs from the top of Liberty's cap down through the stars behind. This was the only die pair employed in the production of 2,710 quarter eagles in 1808. That small group of coins represents the sole emission for this type, guaranteeing ceaseless demand for these diminutive single-year representatives. Condition becomes somewhat secondary under the circumstances; with only 125 to 150 known, it is difficult to be overly choosy. Indeed, nearly 25% of the 60 1808 quarter eagle submissions at NGC reside in Details holders with problems of various kinds. In the case of this offering, design definition is impressive. Liberty's portrait and the eagle are strong. Detail is somewhat softer around the borders, but the all-important date remains bold. The coin is bent at the lower obverse, however this remains a pleasing key date that type collectors should be excited about. NGC ID# BFVZ, PCGS# 45515 Base PCGS# 7660

1827 Quarter Eagle, XF Details  
Capped Bust Left, BD-1

**3199** 1827 BD-1, R.5 — Surfaces Smoothed — PCGS Genuine. XF Details Bass-Dannreuther Die State a/c. A small mintage of 2,800 Capped Bust Left quarter eagles was accomplished in 1827, but some of those coins may have been dated 1826. A single die variety is known for the date. This lightly worn example exhibits XF sharpness on the design elements and the slightly granular orange-gold surfaces retain a few traces of original mint luster, despite the noted smoothing.

1832 Quarter Eagle, MS62+  
BD-1, Just One Finer at PCGS

**3200** 1832 BD-1, R.4, MS62+ PCGS. Bass-Dannreuther Die State a/c. Distinctly prooflike fields exist on both sides of this Plus-graded 1832 Capped Bust quarter eagle. Light field chatter exists, although it would not take a great stretch of the imagination to picture this example selling as a proof in earlier days. As it is, the coin is currently the PCGS CoinFacts plate coin for the 1832 regular strikes, and just one PCGS circulation strike example is graded finer.

A solitary 1832 proof is confirmed (the former Harry Bass example). Both proof and regular strikes come from the same die pair. The portrait of Liberty received a reworked profile in 1832 — a stronger chin and fuller cheeks, plus additional folds in the cap. With William Kneass' eyesight failing, it is unclear who did the revised engraving. This high-end MS62 piece displays vibrant orange-gold color that deepens to amber-gold at the borders. Tiny marks and abrasions dot the mirrored fields. The strike is needle-sharp throughout both sides. Population: 7 in 62 (1 in 62+), 1 finer (9/19). NGC ID# BFWB, PCGS# 45526 Base PCGS# 7672

LIBERTY QUARTER EAGLES

1848 Two and a Half, XF40  
CAL. Counterstamp  
Celebrated and Historic Rarity

**3201** 1848 CAL. XF40 NGC. John Marshall discovered gold on the mill of John Sutter on January 24, 1848. Word spread slowly, but by late that year it was obvious that California, recently secured from Mexico, would yield a vast amount of the precious gold metal. R.B. Mason, the military governor of California, shipped 230 ounces of gold to Washington, D.C. in December 1848. Secretary of War W.L. Marcy wrote to Mint Director Robert Patterson, suggesting "it be made into quarter eagles with a distinguishing mark on each." The mint-made CAL. counterstamp is reminiscent of the VIGO impression on 1703 British gold coins. Only 1,389 1848 quarter eagles were counterstamped by the Mint. Most went into circulation and remained there for some time, since few people could afford to set aside a souvenir of such value. NGC has certified just 44 examples in all grades. The significance of the issue has long been recognized, and it remains famous today. In the third edition of *100 Greatest U.S. Coins*, Jeff Garrett and Ron Guth rank the 1848 CAL. quarter eagle at #37.

This sun-gold example displays lightly impressed centers, but the stars, dentils, and other peripheral elements are sharp. The all-important counterstamp is bold. The slightly glossy surfaces lack any distracting marks. Minor strike-throughs on the lower right obverse field are of mint origin. An important opportunity to obtain a specimen of this legendary numismatic rarity. NGC ID# 25HA, PCGS# 7749

1849-C Two and a Half, AU58  
Challenging Charlotte Issue

**3202 1849-C AU58 NGC. Variety 1.** As is the case with all Charlotte Mint quarter eagle issues, the 1849-C is rare. A scant 10,220 pieces were struck, and among the 200 or so survivors, only a handful attain Mint State status. The present two and a half shows a trace of wear on the eyebrow and wingtips, but luster illuminates the eagle and brightens the borders. Both sides display inconsequential contact for the grade, although a small alloy spot is between the IT in UNITED. The strike is above average, with minor incompleteness noted on the lower half of the eagle. Census: 22 in 58, 10 finer (9/19). NGC ID# 7HRT, PCGS# 7753

1853-D Quarter Eagle, MS62  
Rare in Mint State, None Certified Finer

**3203 1853-D MS62 NGC. Variety 17-N.** Scarce in all grades, the 1853 Dahlonega quarter eagle is rare in Mint State and unknown any finer than the MS62 level. The latest Doug Winter reference pegs the number of surviving pieces in all grades at 85 to 105 coins — a figure echoed by PCGS CoinFacts, which suggests that under 100 pieces are known. Just 3,179 pieces were struck. We have sold just one MS62 example in the past 13 years, and that was five years ago.

This brassy-gold example shows a minimum of marks for the grade, with a thin line of mint grease that passes through the right side of star 7 to Liberty's hair. Some flecks of deep-gray build-up surround the stars, while soft mint luster glows from both sides. The obverse strike is unusually sharp at the stars, with the normal soft definition on the eagle's legs and talons as well as the curls below LIBER as is always the case for the 1853-D. Neither NGC nor PCGS report a finer submission. Census: 5 in 62, 0 finer (8/19). NGC ID# 25HW, PCGS# 7768

1862 Quarter Eagle, MS62+  
Rare With CAC Approval

- 3204** 1862 MS62+ NGC. CAC. Probably only a few hundred examples of the 1862 quarter eagle survive from a mintage of 98,508 coins. This high-end representative features softly lustrous orange-gold surfaces and needle-sharp strike definition. Light field chatter barely precludes a full Select Uncirculated assessment. Census: 17 in 62 (1 in 62+), 8 finer. CAC: 3 in 62, 5 finer (9/19).  
*From The Pelican Collection, Part II.* NGC ID# 25JZ, PCGS# 7796

1889 Quarter Eagle, MS65+  
Only One Coin Finer at PCGS

- 3205** 1889 MS65+ PCGS. CAC. The 1889 quarter eagle is moderately elusive in all Mint State grades, but it is genuinely rare in MS65. This Gem is among the finest coins certified by PCGS and one of only five pieces in this grade with a CAC green label. Frosty luster shimmers beneath a light. The surfaces are unblemished and showcase original peach and rose-gold hues. Some strike weakness is noted on the eagle's left (facing) leg and the hair curls around Liberty's face. Population: 14 in 65 (1 in 65+), 1 finer. CAC: 5 in 65, 1 finer (8/19). NGC ID# 7JTT, PCGS# 7841

1898 Quarter Eagle, MS67  
Exemplary Visual Appeal

- 3206** 1898 MS67 NGC. CAC. This strongly struck Superb Gem possesses exemplary cartwheel luster and virtually pristine surfaces. A remarkable example of this McKinley-era issue. Only 24,000 pieces were minted; larger gold denominations were more convenient for bank reserves and overseas trade. Census: 38 in 67 (4 in 67+, 4 in 67★), 0 finer. CAC: 13 in 67, 0 finer (9/19).  
*Ex: Long Beach Signature (Heritage, 6/2010), lot 1544.* NGC ID# 25LN, PCGS# 7850

PROOF LIBERTY QUARTER EAGLES

1903 Two and a Half, PR65 Cameo  
Rarely Encountered with Contrast

- 3207** 1903 PR65 Cameo PCGS. A total of 197 proofs quarter eagles were struck in 1903 in two deliveries. John Dannreuther in his award-winning book on proof gold estimates that a total of 120-160 examples are extant, and was even able to give an estimate of the number of survivors of each of the deliveries. The JD-1 die pair is most easily distinguished by the lump on the obverse rim close to star 13. The 1903 is infrequently seen with contrast between the fields and devices because of a deliberate attempt on the part of Mint personnel to produce non-contrasted proof coins beginning this year. This piece does show contrast, but not as pronounced as seen, for instance, on pre-1900 proofs. The surfaces display deep, even reddish patina over each side and there are, of course, no mentionable surface disturbances. Population for Cameo coins: 1 in 65 Cameo, 0 finer. For non-Cameo pieces: 22 in 65, 14 finer (9/19). NGC ID# 288T, PCGS# 87929

1904 Quarter Eagle, PR63  
Scarcest of the Late-Date Proofs

- 3208** 1904 PR63 PCGS. CAC. This Select proof glistens with orange-gold color and considerable mint frost on the central devices. Glassy-mirrored surfaces show a few light marks in the left obverse field, although there are no individually distracting abrasions. The reverse is fully Gem. A pair of shallow fissures are seen — one on Liberty's jawline, and another within the hair over the ear — neither is visible without magnification, nor are they of any import. CAC endorsement confirms the obvious eye appeal. NGC ID# 288U, PCGS# 7930

1905 Quarter Eagle, PR63 Cameo  
Only 144 Proofs Struck

- 3209** 1905 PR63 Cameo NGC. CAC. In general terms, 1905 proofs are relatively available despite a mintage of just 144 pieces. Cameo examples are another story — few proofs qualify for the designation. This Select proof has both recognized Cameo contrast and CAC endorsement. Brilliant, medium-gold surfaces are fully struck, with just two or three tiny marks that affect the technical grade (but not the eye appeal). Jet-black fields bolster the field/device contrast when viewed at an angle. Census: 5 in 63 Cameo, 14 finer. CAC: 2 in 63, 7 finer (9/19). NGC ID# 288V, PCGS# 87931

## INDIAN QUARTER EAGLES

1908 Quarter Eagle, MS66  
Four Finer Coins at NGC

- 3210** 1908 MS66 NGC. The 1908 Indian Head quarter eagle with its distinctive sunken-relief design becomes conditionally scarce at this esteemed grade level and is a major rarity any finer. Obverse device detail is strong throughout, while the central reverse shows a hint of typical incompleteness. Each side offers soft, frosty mint luster over warm orange-gold surfaces. A mark near star 6 is the only flaw of note. NGC has seen four finer submissions (9/19). NGC ID# 288Y, PCGS# 7939

1911-D Indian Quarter Eagle, MS62  
Sharply Detailed, Bold D

- 3211** 1911-D MS62 NGC. From a remarkably low mintage of 55,680 pieces, the 1911-D Indian quarter eagle is the sought-after key to the series. This attractive MS62 specimen offers sharply detailed central design elements and a bold D mintmark. The pleasing lemon-yellow surfaces are lightly marked for the grade and have satiny mint luster throughout. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, MS63  
Strongly Struck

- 3212** 1911-D MS63 PCGS. Not only is the D mintmark bold on this Select Uncirculated key date, so too are the eagle's feathers and the Indian's headdress. Each side features rich orange-gold color and distinctly satiny luster characteristic of the Denver Mint. There are no obvious marks on the cheek or distracting abrasions in the fields. A couple of faint peripheral die cracks are noted. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, Sharp MS64  
High-End Surfaces, Great Eye Appeal**

- 3213 1911-D MS64 NGC.** The 55,680-piece mintage is by far the lowest of the series, although there are a couple of Indian Head quarter eagles that are marginally scarcer in high Uncirculated grades. Overall, the 1911-D is by far the rarest issue in all grades combined. Demand is unrelenting for any 1911-D, and those who prefer to wait for a particularly high-end coin should pay close attention to this near-Gem example.

A diagnostic raised wire rim encompasses the entire right side of the coin (a good indicator of a bold strike), while the all-important mintmark is razor-sharp, as is the eagle's feather definition and the Indian's headdress. Sparkling orange-gold color radiates from both sides, with eye appeal seldom seen for this challenging Denver mint issue. A loupe reveals only a few tiny marks, and most of those are tiny planchet irregularities. We seldom see a 1911-D this choice. NGC ID# 7KR7, PCGS# 7943

**1912 Two and a Half, MS65  
Smooth, Lustrous Type Coin**

- 3214 1912 MS65 NGC.** The 1912 is plentiful in typical Mint State grades, but Gems are conditionally rare, and finer pieces are practically unobtainable. The present honey-gold representative exhibits minor blending of impression on the lower half of the headdress and on the right portion of the branch, but obverse contact is confined to a pair of ticks between stars 3 and 4. Census: 72 in 65 (1 in 65+), 2 finer (9/19). NGC ID# 7KR8, PCGS# 7944

**1912 Quarter Eagle, MS65  
Nicely Struck and Semireflective**

- 3215 1912 MS65 PCGS.** A lemon-gold Gem that boasts well-preserved semireflective surfaces. The strike is virtually complete on the eagle's branch, and the headdress shows only slight incompleteness. The 1912 will never be rare in scuffy Mint State, but Gems are both rare and desirable. Population: 91 in 65 (2 in 65+), 5 finer (9/19). NGC ID# 7KR8, PCGS# 7944

## PROOF INDIAN QUARTER EAGLE

1908 Indian Quarter Eagle, PR67  
Rare So Fine

**3216** 1908 PR67 NGC. With the unique sunken relief design by Bela Lyon Pratt in 1908 came also a new finish for proof quarter eagles. Instead of the familiar polished fields and frosted devices, proofs were struck and given a sandblast surface texture, producing a dull, granular, matte appearance. The technique had long been in use on medals of various sorts in Europe and was considered pleasing in that capacity. It gave proof Indian Head quarter eagles a distinctive look, but the American collector, long fond of the traditional polished fields proof coinage of previous years, did not take kindly to the new look of proof gold. The Mint sold only 236 matte proof Indian quarter eagles in 1908. Survivors are occasionally seen, but they are scarce, and examples in all grades command strong collector demand in modern times.

We have not handled a Superb Gem example of this first-year matte proof since 2015. Such coins are rare, and the NGC Census in this grade undoubtedly includes resubmissions and crossovers. This example is fully struck and pristine. Deep orange-gold surfaces have a faint olive hue and display glowing luster. Eye appeal is superb. Census: 33 in 67 (2 in 67+), 1 finer (9/19). NGC ID# 289G, PCGS# 7957

## THREE DOLLAR GOLD PIECES

1854-D Three Dollar, AU Details  
Key to the Dahlonega Type Set

**3217** 1854-D — Repaired — PCGS Genuine. AU Details. Variety 1-A. Simply put, collectors of Dahlonega gold have no choice but to take a deep breath and acquire an 1854-D three dollar gold piece. Just 1,120 pieces were struck, of which 85% to 90% no longer exist. This issue is coveted in all grades, yet it is seldom attractive and often impaired. Still, the 1854-D is the sole Dahlonega Mint example of the denomination. The present example maintains a sharp yellow-gold in-hand appearance, although the surfaces are granular. Areas of repair are seen on the reverse at 3 and 9 o'clock, where a mount was removed. The coin makes the most of bold AU Details despite its problems, and there will be no shortage of eager bidders when this lot is called.

1854-O Three Dollar, Near-Mint  
Desirable Southern Gold Type Coin

- 3218 1854-O AU58 NGC. Variety 2.** Variety 2 is usual for the 1854-O, and can be identified at a glance by the attenuated wreath ribbon. Both listed die varieties were likely coined from the same pair of dies. Relatively early in the production, the reverse die was lapped, diminishing definition on the lower portion of the wreath, though the mintmark is bold. The first-year 1854-O is well-known as the sole New Orleans issue of the denomination, and is thus an essential purchase for O-mint type collectors. Survivors from the mintage of 24,000 pieces are predominantly in XF to AU grades. The present example is much nicer than usual, since luster abounds across the legends and devices, and the orange-gold surfaces are void of detractors. Evenly struck and free from the strike-throughs often seen on the issue. NGC ID# 25M5, PCGS# 7971

1856-S Three Dollar, MS61  
Collectible Western Issue  
Conditionally Scarce

- 3219 1856-S MS61 PCGS. Medium S.** This is the usual variety with a small die break below LL in DOLLARS. The 1856-S represents the second and most collectible San Francisco issue in the series. Its mintage of 34,500 coins is substantially higher than its closest challenger, the 1857-S, which was struck to the extent of 14,000 pieces. This is the only Western three dollar issue that is remotely collectible in Mint State.

Bright mint frost emanates from light yellow-gold surfaces. The cotton bolls and lower wreath elements are notably strong, while the curls are slightly soft. Hairlines and tiny peppered marks explain the grade. Population: 8 in 61, 10 finer (9/19). NGC ID# 25M9, PCGS# 7975

1868 Three Dollar, Sharp MS62  
Vibrantly Attractive

**3220 1868 MS62 NGC. CAC.** The mintage was moderate in the context of the series (4,850 pieces struck), and while numerous survivors exist in circulated conditions, attractive Mint State examples are scarce. This is a partially prooflike MS62 with CAC endorsement. Vibrant orange-gold surfaces host a sharp strike and deep-orange accents around the raised devices. Liberty's hair strands are sharp and the bow knot is well-defined. A few light abrasions in the right field beneath ME in AMERICA are noted, but of little concern. Census: 25 in 62, 11 finer. CAC: 5 in 62, 9 finer (9/19). NGC ID# 25MP, PCGS# 7989

1878 Three Dollar, Shimmering MS67  
A Top-Grade Example for Type Collectors

**3221 1878 MS67 NGC.** Within the three dollar gold series, the 1878 is the most popular type coin candidate. Its mintage of 82,304 pieces is among the highest in the series, contributing to the issue's availability. However, it is also one of the most attractive issues in the series as a rule. A high-grade 1878 three dollar piece can be one of the most attractive U.S. gold coins known. Luster frequently shimmers like it does on no other issue, and ranges of color can be found. This Superb Gem showcases these attributes to their full advantage. The pristine surfaces a breathtaking, with shifting swirls of natural yellow-gold luster that reveals ribbons of deeper orange-gold as light plays across the surfaces. A touch of strike weakness is noted on the wreath bow, but the coin is otherwise well-defined. Eye-appealing in every respect. Only a few 1878 threes are certified this fine, with none finer. Census: 13 in 67 (3 in 67★), 0 finer (9/19). NGC ID# 25MZ, PCGS# 8000

**1879 Three Dollar, Radiant MS63+  
Honey-Gold Surfaces, CAC  
Just 3,000 Pieces Struck**

- 3222 1879 MS63+ PCGS. CAC.** A huge mintage of 82,304 three dollar gold pieces in 1878 was followed by a minuscule mintage of just 3,000 pieces in 1879. Although the three dollar coins hardly circulated, small groups were put aside and were well-preserved. This Select Uncirculated example carries the PCGS Plus designation and CAC endorsement confirming its high quality. Glittering, partially reflective honey-gold surfaces show minimal marks and a razor-sharp strike. Eye appeal is excellent. CAC: 12 in 63, 34 finer (8/19). NGC ID# 25N2, PCGS# 8001

**1879 Three Dollar, MS64 Prooflike  
Popular Low-Mintage Issue**

- 3223 1879 MS64 Prooflike PCGS.** The 1879 is much scarcer than its 1878 predecessor. The mintage was just 3,000 pieces. Contemporary dealers set aside a few hundred Uncirculated pieces, long since distributed to collectors. The present example has the appearance of a cameo proof, as it boasts radiant devices and moderately reflective fields. Careful inspection reveals a couple of minor field hairlines that limit the grade. As of (9/19), PCGS has certified three examples as Prooflike, one each in the MS63, MS63+, and MS64 grades. PCGS# 88001 Base PCGS# 8001

**1884 Three Dollar Gold, MS63  
Only 1,000 Pieces Struck**

- 3224 1884 MS63 NGC.** Rare in circulated grades, the 1884 is scarce in Mint State — just 1,000 pieces were struck in circulation strike format. No less than Harry Bass Jr. considered the 1884 the rarest three dollar gold piece, although today we know that about two Mint State coins exist for every circulated example. This is a Select Mint State coin, with gleaming, partially prooflike fields and sharply struck, frosted devices. Tiny field abrasions slightly diminish field reflectivity. There are no heavy marks, and pleasing medium-gold color flows evenly across both sides. Census: 6 in 63, 14 finer (9/19). NGC ID# 25N7, PCGS# 8006

**1885 Three Dollar Gold, MS61  
Merely 801 Coins Struck**

- 3225 1885 MS61 PCGS.** As one would expect from a mintage of just 801 pieces, the 1885 three dollar gold is scarce in absolute terms but relatively available in Mint State compared to other small-mintage series dates. This is a sparkling MS61 example, with only a few small marks over its partially prooflike surfaces. The strike is soft on the bow knot but uniformly sharp elsewhere. Eye appeal is excellent. Population: 8 in 61, 92 finer (9/19). NGC ID# 7KDP, PCGS# 8007

1889 Three Dollar Gold, MS66  
Final-Year Type Coin

- 3226 1889 MS66 NGC.** 1889 is the final year of the three dollar denomination, and the issue has a business production of only 2,300 pieces. About two-thirds of NGC and PCGS examples are in Mint State, typically in MS62 to MS64 grades. Nonetheless, Premium Gem examples are conditionally rare, and none finer have been certified by NGC. This coin displays bright yellow-gold luster across the interiors, ceding to deeper orange-gold around the borders. The strike is sharp, and only a few truly faint grazes in the semireflective fields prevent an even finer grade. The eye appeal is excellent. Census: 8 in 66, 0 finer (9/19). NGC ID# 7KDU, PCGS# 8011

EARLY HALF EAGLES

1795 Five Dollar, XF Details  
Small Eagle, Rare BD-2 Variety

- 3227 1795 Small Eagle, BD-2, R.6 — Repaired — PCGS Genuine.** XF Details. Bass-Dannreuther Die State a/c. Even Harry Bass had a challenging time locating the rare BD-2 die pair, with a mere 20 to 25 pieces known, according to John Dannreuther's research. Star 11 is awkwardly squeezed between Y of LIBERTY and star 12, touching each device. This example shows a repair between stars 8 and 9, where a hole was plugged, and other areas of tooling include Liberty's cap and the rim area above between 11 and 3 o'clock. Additional surface irregularities include scattered porosity and a pair of depressions at Liberty's drapery folds. Pleasing olive-gold color remains, with traces of luster within the reverse legends.

1800 Capped Bust Right Half Eagle, AU53  
Popular BD-5 Variety

- 3228 1800 BD-5, High R.3, AU53 NGC.** Bass-Dannreuther Die State e/c, with a die crack through IBER in LIBERTY and another through the base of the shield. According to Mint records, 37,628 Capped Bust Right half eagles were struck in 1800, with five die varieties known for the date. This coin represents the relatively available BD-5 variety, with the star touching the eagle's neck on the reverse. The BD-5 has a surviving population of 175-250 examples in all grades. This pleasing AU53 example offers lightly abraded orange-gold surfaces, with traces of original mint luster and just a touch of wear on the devices. NGC ID# 25NW, PCGS# 45595 Base PCGS# 8082

1800 BD-5 Half Eagle, MS63  
Late Die State, Conditionally Rare

- 3229** 1800 BD-5, High R.3, MS63 NGC. Bass-Dannreuther Die State e/c. Both dies have significant cracks in this late state. BD-5 is the final half eagle die marriage of 1800, and it is one of the most plentiful to collect. Still, it is believed that fewer than 250 pieces survive in all grades. This Select example is lustrous and satiny, showing uniform yellow-gold color and pleasantly clean surfaces. Only some faint hairlines in the fields prevent a finer grade. The border stars are well-defined, and there is only trivial weakness on the central hair curls. As a date, the 1800 half eagle is rare in this grade, and it is exceedingly so any finer. Census (all varieties included): 16 in 63 (1 in 63+), 8 finer (9/19). NGC ID# 25NW, PCGS# 45595 Base PCGS# 8082

1803/2 BD-3 Five Dollar, AU58  
Repunched E in UNITED

- 3230** 1803/2 BD-3, R.4, AU58 NGC. Bass-Dannreuther Die State d/a without a crack through the E in AMERICA, although light cracks pass through LIBERTY. All four 1803-dated die marriages are overdates. BD-3 is attributed by clear repunching on the T in UNITED. The present impressive Borderline Uncirculated example exhibits luster throughout the peripheries, curls, and eagle. No abrasions are apparent, and faint roller marks near 10 o'clock on the reverse are as issued. The strike shows slight inexactness on the eagle's left (facing) claw and the left side of the shield. NGC ID# 25NY, PCGS# 504950 Base PCGS# 8084

1803/2 BD-4 Half Eagle, AU50+  
Estimated 125 to 175 Coins Extant

- 3231** 1803/2 BD-4, R.4, AU50+ NGC. Bass-Dannreuther Die State c/c. The crack through the base of the date extends left. Two overdated obverse dies were used to strike the 1803/2 half eagles. The first die (BD-1 to BD-3) is missing the right foot on the T in LIBERTY. This is the only use of the second obverse die (BD-4), with a complete T. About 125 to 175 pieces survive. Partial luster and deep red-gold color provide lovely eye appeal. Minimally worn motifs exhibit strong detail. A slender mark joins star 6 to the portrait, and specks of aqua residue appear on each side. NGC ID# 25NY, PCGS# 504951 Base PCGS# 8084

1803/2 Five Dollar, AU53  
BD-4, Good Detail for the Grade

- 3232** 1803/2 BD-4, R.4, AU53 PCGS. Bass-Dannreuther Die State c/c. A die crack runs through the base of the date nearly to star 1. A simple identifier for the BD-4 die pair is the complete right foot on the T in LIBERTY. The *Early U.S. Gold Coin Varieties* reference provides a survival estimate of 125 to 175 coins from a possible mintage of 6,000 to 9,000 pieces (33,506 total for the date). This is an appealing coin for the grade with minimal friction on Liberty's portrait. The eagle's feathers exhibit bold detail. Bright yellow-gold color and glints of original luster within the star recesses characterize the surfaces. NGC ID# 25NY, PCGS# 504951 Base PCGS# 8084

1803/2 Capped Bust Right Half Eagle, AU53  
Pleasing BD-4 Example

- 3233** 1803/2 BD-4, R.4, AU53 NGC. Bass-Dannreuther Die State c/c, with a die crack through the bottom of the date to Star 1. The 1803 Capped Bust Right half eagle claims a mintage of 32,506 pieces, with four die varieties known for the date, all struck from overdated obverse dies from 1802. This coin represents the BD-4 variety, with a perfect T in LIBERTY. The surviving population numbers no more than 125-175 examples in all grades. This pleasing AU53 example is lightly worn and lightly abraded, with pleasing orange-gold surfaces that retain traces of original mint luster. NGC ID# 25NY, PCGS# 504951 Base PCGS# 8084

1803/2 BD-4 Half Eagle, MS64  
Few Pieces Known This Fine

- 3234** 1803/2 BD-4, R.4, MS64 PCGS. Bass-Dannreuther Die State c/c. BD-4 is the only use of this obverse die. The T in LIBERTY is from a perfect punch on this die, differentiating it from the first 1803/2 obverse that was used for the BD-1 through -3 marriages. This variety was once considered scarce, although more examples have become available in recent times, having been previously misidentified as the BD-3 overdate, which shares the same reverse. John Dannreuther estimates that 125 to 175 pieces survive overall, which makes it among the most plentiful 1803/2 die varieties.

Despite its overall availability, BD-4 is scarce in Mint State, and the variety is a major rarity above MS62. In fact, we have only handled one other example in MS64, also a Die State c/c representative. That coin appeared in our January 2012 FUN Signature, lot 4850, and realized \$57,500. Enter this coin more than seven years later. It is decidedly lustrous and has attractive lemon-gold coloration. Lack of definition affects the arrowheads as a result of adjustment marks in that area, but the coin is otherwise sharp. Faint handling marks in the fields are all that determine the grade. Eye appeal is outstanding. At least one finer specimen is known, the MS66+ PCGS coin from the D. Brent Pogue Collection, although the present example is likely within the Condition Census for the variety. NGC ID# 25NY, PCGS# 504951 Base PCGS# 8084

1806 Capped Bust Right Half Eagle, AU55  
Pointed 6, 8x5 Stars, BD-1

- 3235** 1806 Pointed 6, 8x5 Stars, BD-1, R.4, AU55 NGC. Bass-Dannreuther Die State b/e, with delicate die cracks through the left obverse stars. Mint records indicate 64,093 Capped Bust right half eagles were struck in 1806, with six die varieties known for the date. This coin represents the BD-1 variety, with Stars 1 and 2 nearly touching and broken T's in the reverse legend. Probably no more than 100-150 examples are extant in all grades. This lightly abraded Choice AU specimen exhibits well-detailed design elements, with a touch of softness on the eagle's claws and tail, due to some light planchet adjustment marks that were not completely struck out. NGC ID# 25P7, PCGS# 45621 Base PCGS# 8090

1806 Knob 6 Half Eagle, Choice AU  
BD-6, Sole 7x6 Stars Variety

- 3236** 1806 Knob 6, 7x6 Stars, BD-6, R.2, AU55 NGC. Bass-Dannreuther Die State d/e. BD-6 commands its own *Guide Book* variety as the 1806 Round Top 6, though its status as the sole die marriage with a 7x6 obverse star arrangement is arguably of greater significance. The present Choice AU example is a later die state with a rust lump on the R in LIBERTY. The sun-gold surfaces display considerable luster, and contact is confined to ticks on the field near Liberty's profile. The strike is good despite merging on the right-side dentils and selected softness on the shield. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1806 Knob 6 Half Eagle, MS63  
BD-6, 7x6 Stars  
Pleasing Type Coin

- 3237** 1806 Knob 6, 7x6 Stars, BD-6, R.2, MS63 PCGS. Bass-Dannreuther Die State d/e, as usual. For type collectors, no early half eagle variety is as suitable as the 1806 BD-6 issue. John Dannreuther estimates a survivorship of possibly as many as 900 coins. This variety alone comprises the Round-Top 6 *Guide Book* variety, the Knob 6 variety as recognized by PCGS. And yet, high-end Mint State pieces are scarce. Demand for MS63 and finer coins is unyielding among type and date collectors. This piece is especially pleasing for the Select grade. Yellow-gold surfaces tinge deeper orange-gold in the fields, and the frosty luster is apparently original. Minor strike weakness on the obverse stars and the reverse shield is not bothersome, and the surfaces are free of distracting abrasions. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1806 Five Dollar, MS64  
BD-6, Knob 6, 7x6 Stars  
Prohibitively Rare Any Finer

1807 Bust Right Half Eagle, BD-4, MS62  
An Elusive Die Variety

**3238** 1806 Knob 6, 7x6 Stars, BD-6, R.2, MS64 PCGS. Bass-Dannreuther Die State d/e. Cracks on both sides, clash marks, and light die lapping identify this late state of the BD-6 dies. This variety is characterized by the Knob 6 in the date. It is the only use of this obverse, although the BD-6 reverse die was also employed for the BD-5 marriage.

The 1806 half eagle represents the most plentiful date in the early five dollar gold series, and BD-6 is the most plentiful variety therein. This availability is especially significant in Mint State, but the population of BD-6 thins considerably in MS64, and finer coins are prohibitively rare. PCGS reports only three Gem Knob 6 coins finer (9/19).

In MS64, this piece is among the highest-graded early half eagles of any date within the grasp of most collectors. Luster is satiny and bright yellow-gold in color. The strike is even across both sides, with trivial weakness shared equally across the border star centrils and the shield stripes. Minute signs of surface contact keep this piece from an even finer grade, although they are not obvious to the unaided eye. Population: 47 in 64 (5 in 64+), 3 finer (9/19). NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

**3239** 1807 Bust Right, BD-4, High R.4, MS62 PCGS. Bass-Dannreuther Die State c/a. This is the earliest die state of the BD-4 half eagle. Clash marks and a radial crack from the dentils to the crown of Liberty's cap are from this obverse's previous usage with BD-3. The die is freshly lapped in this usage, although no additional damage is noted. Since this is the final use of John Dannreuther's Obverse 2, it is surmised that sometime after this coin was struck the die failed quickly, even modern collectors have not located a BD-4 coin struck from a terminal die state.

BD-4 is moderately scarce. Dannreuther estimates that 75 to 90 pieces survive in all grades. This Uncirculated coin displays original honey-gold luster and shows only light, scattered abrasions that limit the grade. The border stars are sharp, although the centers are weakly struck, and there are remnants of adjustment marks (mint made) in the same areas. NGC ID# CKLF, PCGS# 519901 Base PCGS# 8092

1807 Bust Left Half Eagle, XF40  
BD-8, Collector-Grade Example

- 3240** 1807 Bust Left, BD-8, R.2, XF40 NGC. Bass-Dannreuther Die State d/b, clash as usual, although the clashing is faint on this piece due to the extent of the wear. We frequently see AU and low-end Mint State examples of this first-year Bust Left issue, although a collector-grade XF coin is quite rare. Each side is remarkably smooth with natural greenish-gold and olive patina. On the reverse, flecks of ebony debris in the recessed banner letters and some of the eagle's feathers attest to the originality of the surfaces. Eye appeal is outstanding. All major design elements are well-defined, if lightly worn. NGC ID# CKLH, PCGS# 507607 Base PCGS# 8101

1808 Half Eagle, MS61  
BD-3, Close 5D, Lustrous Surfaces

- 3241** 1808 Close 5D, BD-3, R.4, MS61 NGC. Bass-Dannreuther Die State a/d, reverse lightly lapped. The 5D in the denomination are closely spaced on this variety. John Dannreuther estimates a survivorship of 100 to 125 pieces, which is significant for an early half eagle issue, although BD-3 is still inherently challenging for most collectors to acquire. This Mint State example displays an even, well-centered strike with excellent sharpness throughout the border stars and central devices. Bright yellow-gold luster is pleasing, and scattered handling marks are not bothersome for the grade. NGC ID# 25PA, PCGS# 507604 Base PCGS# 8102

1808 BD-4 Half Eagle, MS63  
Wide 5D, Unlisted Clashed Die State

**3242** 1808 Wide 5D, BD-4, High R.3, MS63 NGC. Bass-Dannreuther Die State c/"b", unlisted. The reverse is heavily clashed, showing a complete outline of Liberty's bust and an impression of the date within STATES. The reverse die was apparently lapped before its usage for the first 1809 issue, whose earliest die state shows less prominent versions of the same clash marks seen here. This late die state for BD-4 was not documented until recently, indicating that it comprises a minority of the 200-or-so BD-4 representatives believed known today.

This sharp type and date representative shows satiny yellow-gold luster with only light handling marks that limit the grade. The strike is even, and neither side exhibits distractions. Die variety and state aside, this Select 1808 half eagle represents a rare opportunity to acquire the date and type in high grade. Census (both Normal Date varieties included): 19 in 63, 7 finer (9/19). NGC ID# 25PA, PCGS# 507605 Base PCGS# 8102

1810 Five Dollar, Near Mint  
BD-4, Large Date, Large 5

**3243** 1810 Large Date, Large 5, BD-4, R.2, AU58 NGC. Bass-Dannreuther Die State c/b. The Draped Bust Left five dollar is a scarce early gold type, but a six-year date set (1807 to 1812) is collectible. This honey-gold example exhibits substantial luster, and no marks are remotely consequential. The central obverse displays light vertical roller marks, as made, though the strike is generally crisp. A subtle alloy spot between the lowest pairs of leaves provides an identifier. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

1810 Five Dollar, MS61  
Large Date, Large 5, BD-4

**3244** 1810 Large Date, Large 5, BD-4, R.2, MS61 NGC. Bass-Dannreuther Die State a/a without any cracks or clashes. The two extremes of rarity for early gold are represented by the 1810 Large Date five. The variety with a Large 5 reverse, BD-4, is fairly plentiful. The Small 5 reverse, BD-3, is High R.7 with only four to six examples known. Dannreuther suggests the Large 5 should instead be called the Fat, Squat 5 to better distinguish it from the narrow but tall Small 5. Whatever the nomenclature, the present lot is a member of the more collectible Large Date die variety. The sea-green and peach-gold surfaces are free from obvious marks, and the strike is crisp except on the shield. Luster brightens the legends, stars, curls, cap, drapery, and eagle.

Ex: Bently Foundation / FUN Signature (Heritage, 1/2014), lot 6607. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

1810 Capped Bust Left Half Eagle, MS65  
Large Date, Large 5, BD-4  
Conditionally Rare This Fine

**3245** 1810 Large Date, Large 5, BD-4, R.2, MS65 NGC. Bass-Dannreuther Die State c/b, with a vertical die crack at the clasp. A substantial mintage of 100,287 Capped Bust Left half eagles was accomplished in 1810, with four die varieties known for the date. The present coin represents the BD-4 variety, easily distinguished by the large numerals in the date and the Large 5 in the denomination. The BD-4 is a relatively available issue, with a surviving population of 500-750 pieces in all grades, but examples in MS65 condition are extremely elusive.

John Dannreuther estimates the BD-4 dies were used to strike 75,000-90,000 pieces of the reported mintage, accounting for the availability of the issue today. This was the second use of the obverse die, which was previously used to strike the rare BD-3 variety of this date. This was the only use of the reverse die.

The 1810 half eagle has been a favorite with collectors since the earliest days of the hobby. As a date, the issue began appearing at auction at least as early as lot 184 of the A.C. Kline Sale (M. Thomas & Sons, 6/1855), where the coin was merely listed by date and the lot realized \$5.37. By the 1880s, numismatists like Captain John W. Haseltine and John Colvin Randall began classifying the coins by die variety. In the sale of the Randall Collection (W. Elliot Woodward, 6/1885), the cataloger identified three die varieties of 1810 half eagles, including the example in lot 913, which was almost certainly a BD-4, "1810 No. 1; large date; fine, scarce." The lot realized \$5.50, only a small increase over the appearance in the Kline sale. Of course, the price has skyrocketed since then and recent sales include the MS65 PCGS example in lot 5090 of the FUN Signature (Heritage, 1/2011), which realized \$103,500.

The coin offered here is a spectacular Gem, with sharply detailed design elements in most areas. Some minor incompleteness is noted in the eagle's tail and claws, due to lapping, and the dentils are weak on the left side, due to some faint planchet adjustment marks. The well-preserved orange-gold surfaces show a mix of vibrant mint luster and prooflike reflectivity, with many parallel die striations in the fields. A few planchet adjustment marks are also visible on the bust, on close inspection. The overall presentation is most attractive. Census: 5 in 65, 1 finer (9/19). NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

1813 BD-1 Half Eagle, MS63  
Lustrous, Green-Gold Surfaces

- 3246** 1813 BD-1, R.2, MS63 PCGS. Bass-Dannreuther Die State b/b, clashed on both sides. The half eagle series from 1813 to 1834, including two different diameters of the same design, ranks among the rarest of all design types in the U.S. coinage series. There are no common dates and only a few that are occasionally available. The 1813 is one of those dates that is seen in major auctions and collections. It is also the first year of the design, a popular issue among type collectors. This example has lovely peach-gold surfaces with hints of orange toning. Only a couple of small marks on Liberty's cheek have prevented a higher grade. NGC ID# 25PM, PCGS# 519907 Base PCGS# 8116

## CLASSIC HALF EAGLES

1834 Classic Head Five Dollar, MS62  
Plain 4, Script 8, McCloskey 3-B

- 3247** 1834 Plain 4 MS62 PCGS. Breen-6501, McCloskey 3-B, R.1. First Head. Attributed by the Script 8 and Plain 4 in the date, the distance between 34, and the lack of a tongue in the eagle's mouth. This rich orange-gold type coin from the first year of Classic Head production showcases a strong peripheral strike and bold detail on the curls and feathers with just a hint of high-point incompleteness. Mint luster glows within the protected regions. NGC ID# 25RR, PCGS# 8171

1834 Plain 4 Half Eagle, MS63  
Attractive Classic Head Type Coin

- 3248** 1834 Plain 4 MS63 NGC. Breen-6502, McCloskey 2-A, R.1. Second Head. The 4 in the date is triple punched on this variety, and the D in UNITED is repunched. In MS63, the 1834 Plain 4 half eagle is moderately scarce but collectible. This example above-average sharpness, although trivial blending is seen on the central shield stripes and the hair curl above Liberty's ear. Both sides are satiny and lustrous with rich lemon-gold and orange patina. No singular abrasions are worthy of note. NGC ID# 25RR, PCGS# 8171

1837 Half Eagle, MS62  
Script 8, McCloskey 3-C

- 3249** 1837 MS62 PCGS. Breen-6513, McCloskey 3-C, R.4. Small Date, Script 8. The 8 in the date is enough to confirm the attribution for McCloskey 3-C. Vibrant shimmering mint luster around the legends and central devices illuminates the yellow-gold surfaces of this 1837 half eagle. The portrait, stars, eagle, and lettering are uniformly strong. Faint hairlines and tiny ticks occur on each side. NGC ID# 25RZ, PCGS# 8175

## LIBERTY HALF EAGLES

1843-D Liberty Half Eagle, AU58  
Few Marks for the Grade and Issue

- 3250 1843-D Medium D AU58 PCGS. Medium D, Variety 10-G.** The 1843-D is an early Dahlonaga issue but a well-made one, ideal for type purposes. Like all D-Mint half eagles, fully Mint State examples are scarce, making this near-Mint example an attractive alternative. Reflective fields show a minimum of field chatter, and only a few small marks dot the portrait. Pleasing yellow-gold surfaces show a blush of reddish-orange on each side, and the strike is sharp throughout. There are clearly fewer marks than normally seen on a 1843-D. Population: 11 in 58 (1 in 58+), 14 finer (9/19). NGC ID# 25T4, PCGS# 8215

1845-D Half Eagle, MS61  
Conditionally Rare in Mint State

- 3251 1845-D MS61 PCGS. Variety 13-H.** The 1845-D is among the most plentiful Dahlonaga half eagles overall, ideal for the collector seeking a single representative from this mint. Like most branch mint gold, the 1845-D is scarce in Mint State, and it quickly becomes rare with each step up the grading ladder. The strike is impressively sharp on this MS61 coin, and bright yellow-gold surfaces yield moderate reflectivity in the fields. Light surface chatter accounts for the grade in the absence of any singularly bothersome abrasions. Population: 11 in 61, 8 finer (8/19).  
*Ex: ANA Signature (Heritage, 3/2016), lot 5071. NGC ID# 25TC, PCGS# 8224*

1846-D Normal Mintmark Five, AU58  
Scarce, Underrated Mid-Series Type

- 3252 1846-D AU58 PCGS. Variety 15-H.** The Normal Mintmark 1846-D coins are scarcer than the more spectacular 1846-D over D variants, although advanced collectors endeavor to find an example of each type. This scarce near-Mint Normal Mintmark example displays a high date with the 6 closer to the neck than to the dentils. Partially reflective medium-gold surfaces retain bright mint luster and a sharp strike. Light field chatter is far less than expected, and the sharply struck surfaces show a mere hint of wear. Population: 4 in 58, 6 finer (9/19). NGC ID# 25TH, PCGS# 8228

1846-D/D Half Eagle, AU58  
Repunched Mintmark

- 3253 1846-D/D AU58 NGC. VP-001, Variety 16-J.** The date is low, with several die lines around the digits. The mintmark was initially punched too high before being adjusted, leaving remnants of the first impression above the corrected one. This strong near-Mint survivor shows minor ticks over yellow-gold surfaces. Hints of luster remain in the protected areas. From a mintage of 80,294 coins. Census: 23 in 58, 9 finer (9/19). NGC ID# 25TH, PCGS# 8229

1847 Five Dollar, MS64+  
Among the Finest at NGC  
High-Grade No Motto Type Coin

**3254** 1847 MS64+ NGC. With a mintage of 915,981 coins, the 1847 Philadelphia Mint half eagle is widely regarded as a collectible type coin issue. That is true in most grades through MS63, but it becomes conditionally rare at the near-Gem level. This Plus-graded Choice Uncirculated representative ranks among the finest submissions at NGC. It enjoys radiant mint frost, glowing orange-gold color, and a razor-sharp impression. There is just a hint of softness on the lower curl and the eagle's neck feathers, and trivial chatter on each side. Census: 16 in 64 (4 in 64+, 1 in 64+★), 0 finer (9/19). NGC ID# 25TL, PCGS# 8231

1857-C Half Eagle, MS61  
Uncirculated Charlotte Type Coin

**3255** 1857-C MS61 NGC. **Variety 1.** Mintages of half eagles at Charlotte declined with the 1854 advent of the San Francisco Mint. From the 1857 production of 31,360 pieces, the few hundred survivors are mostly clustered in XF and AU grades. This caramel-gold representative is Mint State and shows substantial luster. The fields and portrait display marks consistent with the MS61 level, though a horizontal depression on Liberty's chin appears to be a lamination, as made. The strike is sharp for the facility, save for occasional softness on the obverse dentils. Census: 13 in 61 (1 in 61+), 9 finer (9/19). NGC ID# 25V3, PCGS# 8272

1858-D Five Dollar, AU58  
Lustrous and Well-Struck

**3256** 1858-D AU58 PCGS. **Variety 43-HH.** The 1858-D half eagle is moderately scarce, with only 200 to 250 pieces known in all grades. Doug Winter notes that typical examples are weakly struck in the center, and in that respect the present coin is decidedly atypical — although some softness is visible on the highest hair curls around Liberty's face, the eagle's neck feathers and the shield are sharp. Satiny luster remains in the fields, complementing orange-gold coloration and remarkably smooth surfaces. Simply put: this is one of the most attractive AU-level 1858-D fives that we have seen. Population: 25 in 58 (1 in 58+), 14 finer (8/19). NGC ID# CBBT, PCGS# 8278

1860-D Half Eagle, MS61  
Semireflective Fields

- 3257** 1860-D Medium D MS61 PCGS. Variety 46-GG. All Mint State 1860-D half eagles certified by PCGS are of this Medium D variety, and these pieces are conditionally rare. Doug Winter estimates that fewer than 275 examples of the 1860-D survive in all grades, with as few as a dozen pieces in "true" Uncirculated condition. Some duplication is likely represented in the certified population figures. The present coin displays sharp obverse stars and hair curls and is undeniably Mint State. A bit of strike weakness on the eagle's neck is noted but not overly bothersome. The bright, brassy-gold surfaces are lightly marked but lack severe abrasions. An appealing Mint State Dahlonega half eagle. Population: 12 in 61, 16 finer (9/19). NGC ID# 25VH, PCGS# 8286

1872 Half Eagle, Mint State  
Rare Low-Mintage Issue

- 3258** 1872 MS60 NGC. The tiny commercial mintage of 1,660 half eagles during 1872 was likely intended to prevent speculation over the 30 proofs. Since the few gold collectors of the day acquired proofs, the 1872 is very rare in Mint State. Even circulated pieces are rare. PCGS estimates just 50 to 65 survivors, regardless of condition. The present unworn butter-gold example has a good strike and only a single reportable abrasion, a curved field mark near the profile. Census: 1 in 60, 3 finer (9/19). NGC ID# 25WF, PCGS# 8325

1883-CC Half Eagle, Choice AU  
Low Mintage, Green CAC Sticker

- 3259** 1883-CC AU55 NGC. CAC. This low-mintage Carson City half eagle issue (12,598 coins) claims an average certified grade between XF45 and AU50. This CAC-approved Choice About Uncirculated representative showcases needle-sharp definition and attractive, minimally abraded yellow-gold surfaces. A small dark spot occurs left of the date. Census: 23 in 55, 28 finer. CAC: 4 in 55, 10 finer (9/19). NGC ID# 25XL, PCGS# 8362

1891-CC Half Eagle, MS64+  
High-Grade Carson City Type Coin, CAC  
Deceptively Rare This Fine

- 3260** 1891-CC MS64+ PCGS. CAC. Variety 1-A. Easily the most available Carson City five, the 1891-CC does an abrupt "about face" at the high-end of the MS64 level and it is rare any finer. This Plus-graded MS64 defies the 1891-CC norm by avoiding most bagmarks, coupled with a nearly clear portrait of Liberty. Light copper-orange surfaces display a ring of frosted lilac patina at the borders, illuminated with strong cartwheel mint luster.

The mintage of 208,000 pieces was shipped long distances, and nearly all 1891-CC fives are heavily bagmarked as a result. The strike is unfailingly sharp. It is worth noting PCGS reports just two pieces numerically finer than this CAC-endorsed example, while just five pieces have received the PCGS Plus designation at the near-Gem level. Population: 5 in 64+, 2 finer. CAC: 23 in 64, 0 finer (9/19). NGC ID# 25Y5, PCGS# 8378

1899 Liberty Half Eagle, MS67  
Tied for Finest at PCGS

**3261 1899 MS67 PCGS.** There is no shortage of 1899 half eagles except at the Superb Gem level, where fewer than two dozen coins are certified, and there exists little likelihood for any influx of coins at that high grade. A large mintage of 1,710,729 pieces were struck, and while lesser examples than the present coin abound in high-end type collections and half eagle sets, just one piece is numerically finer at either PCGS or NGC.

Honey-gold and rose-gold shades glimmer beneath a heavy mantle of mint frost, giving this lustrous coin sumptuous eye appeal. The strike is razor-sharp throughout both sides. The surfaces are mark-free aside from a pair of pinprick marks visible under a loupe — one midway between star 4 and the nose, and any equally tiny tick below the chin. The surfaces are Superb in all aspects, a testament to this coin's graceful aging and careful preservation. Population: 4 in 67 (1 in 67+), 0 finer (8/19). NGC ID# 25YS, PCGS# 8398

PROOF LIBERTY HALF EAGLE

1881 Five Dollar Liberty, PR64 Cameo  
Seldom Offered Proof Gold Rarity

**3262 1881 PR64 Cameo NGC.** With paper money at par with gold in 1881, more proofs were struck — a total of 40 proof sets were made, plus two individual proofs. From those, at least 16 to 20 1881 proof half eagles survive. A single die pair struck the entire proof mintage. A tiny dent in the fourth horizontal shield stripe is a hub defect, useful to confirm the proof status from more than 5 million circulation strike half eagles produced in 1881.

There can be no question that this gleaming, orange-gold piece is a Choice Cameo proof. Lovely mirrored fields have a slight orange peel effect, and the razor-sharp devices contrast boldly with the reflective fields. A full strike defines all of the raised elements. We last offered an 1881 Proof Cameo four years ago. Census: 2 in 64 Cameo, 8 finer (9/19). NGC ID# 28CJ, PCGS# 88476

## INDIAN HALF EAGLES

1908 Half Eagle, MS65+  
Introductory Year Issue

- 3263 1908 MS65+ PCGS.** The first-year 1908 is regarded as a type issue, but the third-party population thins dramatically at the MS65+ level. As of (9/19), PCGS has certified only 18 pieces as MS65+ with just 27 examples finer. The present plus-assigned Gem is well struck and displays rich apricot toning. The obverse is refreshingly devoid of apparent marks, while the reverse is smooth save for a field line below the AME in AMERICA. NGC ID# 28DE, PCGS# 8510

1908-S Five Dollar Indian, MS64+  
Exceptional Surfaces, Great Eye Appeal

- 3264 1908-S MS64+ PCGS.** Despite the low mintage of just 82,000 pieces, a limited number of high-grade Uncirculated examples of the 1908-S survive. This issue was well-produced by the San Francisco Mint, with generally sharp strikes and fewer handling marks than other S-mint half eagles. Eye appeal is above average on most Choice Uncirculated or finer examples.

This smooth and lustrous 1908-S displays all of the positive attributes of the issue, with exceptionally few post-mint distractions. Gleaming orange-gold surfaces flash occasional lilac accents, and the strike is crisp on both sides. Scrutiny with a loupe reveals no significant abrasions or marks on the obverse, and just a solitary carbon fleck (pinpoint in size) on the reverse beneath M in AMERICA. Mint luster flows evenly across the fields and devices. Population: 12 in 64+, 73 finer (9/19). NGC ID# 65K3, PCGS# 8512

1908-S Indian Half Eagle, MS66  
With The Usual Magnificent Surfaces  
Expected From This Issue

- 3265 1908-S MS66 NGC.** Minuscule mintages were produced for the 1908-S in all three gold denominations, a feature that immediately grabs the attention of collectors. Only 82,000 half eagles were struck. While this figure is almost insignificant compared to other issues, it actually ranks third in the series behind the 1909-O and the 1911-D. As is often seen on the ten and twenty dollar issues of this same date and mintmark, the surfaces of this Premium Gem half eagle are exceptionally attractive. This is a fortunate coincidence as the 1908-S, while having a low mintage, was apparently saved in relatively high numbers as a first-year issue (at least in lower grades). The surfaces seen here are bright and have some of the "velvety" sheen normally seen on 1908-S gold coins. Even reddish-gold color is seen over each side. Census: 14 in 66, 7 finer (9/19). NGC ID# 65K3, PCGS# 8512

1909-O Half Eagle, AU55  
Collector-Grade Example

1909-O Half Eagle, Satiny MS61  
Important Mint State Offering of This Key

**3266 1909-O AU55 PCGS.** The 1909-O is the rarest Indian half eagle in Mint State, and attractive AU examples are highly sought-after. With a mintage of only 34,200 pieces, the 1909-O is the only New Orleans issue in the series. Coinage was halted in early 1909, as the use of the old Louisiana branch mint as a production facility was discontinued in favor of the new Denver Mint. The 1909-O half eagle is a major key date in the Indian Head series. This Choice AU representative displays natural orange-gold patina and sharp detail with just a brush of high-point wear. Remnants of satiny mint luster glow in the design recesses. NGC ID# 25ZK, PCGS# 8515

**3267 1909-O MS61 NGC.** A brief gander at auction records over the past several years is all that is needed to see that many of the 1909-O half eagle offerings during this time in high grades have represented numerous appearances of just a few coins. This key New Orleans issue is thus rarer than it would seem from auction listings, and these data also suggest that a majority of the high-end examples known are tightly held in private hands. Attractive Mint State examples — even those in the lower reaches of Uncirculated — are quite rare. The 1909-O boasts a mintage of only 34,200 coins. Although this date is more plentiful overall than, say, the 1929, it is by far rarer in Mint State.

This example displays pleasing strike sharpness and a clear mintmark. Soft wheat-gold luster shows scattered light abrasions, but none distract a whole lot from the eye appeal. For the New Orleans gold collector or Indian half eagle specialist, this piece is an important opportunity. It is a coin that we have not seen in recent years. NGC ID# 25ZK, PCGS# 8515

1910-S Five Dollar, MS64  
Long-Recognized Condition Rarity

**3268 1910-S MS64 NGC.** In 1979, David Akers wrote of the 1910-S Indian five, "The collector desiring a choice or gem quality mint state piece has to be patient because only a few such pieces are known to exist." This conditional semikey's reputation for being scarce in high grade is traceable as far back as the 1940s, when B. Max Mehl called attention to the conditional scarcity of a "choice" coin in the Belden E. Roach Collection (2/1944). Today, the 1910-S is mainly seen in lightly circulated grades or in the MS61 to MS62 Mint State range. Select examples are scarce, and near-Gems are decidedly rare. Only a handful of MS65 or better examples are known, and those are out of reach for most collectors.

This Choice coin is sharply rendered and displays satiny prairie-gold luster with only a few minor field marks that limit the grade. The strike is even and the mintmark is bold. A very appealing, high-end example of a date that poses a challenge in all Mint State grade levels. Census: 18 in 64, 1 finer (9/19). NGC ID# 28DN, PCGS# 8519

1911 Half Eagle, MS65  
Scarce This Fine

**3269 1911 MS65 NGC.** Its large mintage of 915,000 pieces makes the 1911 half eagle an available date in lower Mint State grades and a popular choice for type collectors. The issue becomes scarce in MS64, and Gems are quite elusive. In *A Handbook of 20th Century United States Gold Coins*, David Akers opines "Gems are rare in an absolute sense" and "MS-66s are virtually unknown."

The present coin is a delightful Gem, with lustrous, greenish-gold surfaces. The strike is a little soft on the lower feathers of the headdress, a feature commonly seen on this issue. While the 1911 is usually seen heavily abraded, the surfaces of this example show only a few insignificant handling marks. Census: 51 in 65, 2 finer (9/19). NGC ID# 28DP, PCGS# 8520

**1911 Quarter Eagle, MS66**  
**A Top-Graded Survivor**  
**The Finest We Have Offered**

**3270 1911 MS66 NGC.** From a production standpoint, there was never anything much to suggest that the 1911 half eagle would become a condition rarity. The Mint struck 915,000 pieces, and examples are available by the thousands through Choice Uncirculated condition. However, the population declines rapidly at the Gem grade level, and NGC and PCGS have only certified two MS66 submissions each with none finer (9/19).

This important Premium Gem exhibits pinpoint strike detail on the headdress and eagle. Warm yellow-gold surfaces awash in soft mint luster display a minimal number of inconsequential ticks. This lot should generate considerable interest as the single finest example Heritage Auctions has presented over the past quarter century. NGC ID# 28DP, PCGS# 8520

**1911-D Half Eagle, MS60**  
**Denver Mint Key**

**3271 1911-D MS60 NGC.** Among Indian half eagle issues, only the 1909-O has a lower mintage than the 1911-D. Most certified examples are in circulated grades, and Mint State pieces are in demand from advanced collectors of the series. This straw-gold representative is smooth aside from minor marks near UNUM. The mintmark is clear, and the strike is bold except for minor blending on the headdress feathers. A couple of gray spots on the obverse field have minimal effect on the eye appeal. NGC ID# 28DR, PCGS# 8521

**1911-D Indian Half Eagle, MS60**  
**Low-Mintage Branch Mint Key**

**3272 1911-D MS60 NGC.** From a modest mintage of 72,500 pieces, the 1911-D Indian half eagle is scarce in all Mint State grades today. This impressive Mint State example exhibits sharply detailed design elements and pleasing yellow and rose-gold surfaces that are lightly marked for the grade. Slightly subdued original mint luster radiates from both sides. NGC ID# 28DR, PCGS# 8521

**1911-D Five Dollar, MS61**  
**Only 72,500 Coins Struck**

**3273 1911-D MS61 NGC.** A mere 72,500 half eagles were manufactured at the Denver Mint in 1911, the mintage being only marginally higher than its quarter eagle counterpart. Mint State offerings are correspondingly elusive. This piece enjoys satiny, reddish-gold surfaces and good detail. A slender, well-hidden linear abrasion through the headdress and minor hairlines explain the grade. NGC ID# 28DR, PCGS# 8521

1911-D Five Dollar, MS62  
Semikey Denver Issue

- 3274 1911-D MS62 NGC.** In all Indian gold series, the 1911-D is at least a semikey, if not a key date. The 1911-D half eagle is elusive in all grades in the context of the series, and the Mint State population drops of sharply at each grade level above MS61. Finer than MS62, this Denver issue is decidedly scarce. The piece offered here will appeal to series collectors. Graded MS62, it balances surface quality with affordability. Well-struck design elements complement satiny honey-gold mint luster. Scattered abrasions and handling marks limit the grade, but none are of individual distraction. Eye appeal is quite appealing for the grade. Census: 55 in 62 (1 in 62+), 31 finer (9/19). NGC ID# 28DR, PCGS# 8521

1912 Half Eagle, Beautiful MS65  
Profound Color and Luster  
Prohibitively Rare Any Finer

- 3275 1912 MS65 NGC.** The 1912 Indian half eagle is scarce in MS65, and that alone is enough to promote this piece. On top of that, only three numerically finer coins are reported — all at NGC (9/19). However, what sets this piece apart even further is its profound color and luster. We cannot recall having previously handled a 1912 Gem half eagle with this spectacular of color. Fire-orange is the dominant hue, but it is clustered in the centers for the most part by peripheral rose and mint-green toning. Delicate silvery slivers appear when rotated beneath a light, and the whole palette is backlit by vibrant bands of cartwheel luster. The obverse is nearly pristine, while the reverse shows only a few tiny marks in the field that prevent an even finer numeric grade and status as a Condition Census coin. This is a 1912 half eagle worth getting excited about, even if Indian gold coinage is not normally a part of one's collection. Census: 43 in 65, 3 finer (9/19). NGC ID# 28DS, PCGS# 8523

1915 Five Dollar, MS65+  
Tied For Finest Certified

- 3276 1915 MS65+ PCGS.** A lovely orange-gold representative that offers exceptional smooth surfaces and an above-average strike. 1915 was the final year of Indian half eagle production, aside from the mass-melted 1929 issue. A pinpoint alloy spot on the Indian's neck provides an identifier. The 1915 is a type coin in grades through MS64, but Gems are rare relative to demand. As of (9/19), PCGS has graded only seven pieces as MS65+. None have been certified finer at either leading service. NGC ID# 28DX, PCGS# 8530

## EARLY EAGLES

1799 Draped Bust Eagle, AU Sharpness  
BD-10, Large Obverse Stars

**3277** 1799 Large Obverse Stars, BD-10, R.3 — Cleaned — PCGS Genuine. AU Details. Bass-Dannreuther Die State a/b. Luster is a bit subdued by an old cleaning, although orange-gold color remains across both sides. Attractive reddish-orange toning at the margins adds eye appeal. Angled in light, some telltale vertical hairlines emerge, as well as myriad light marks. A tiny dig in the left obverse field is the sole individual obverse mark of note. The reverse shows no signs of die clashing, but has wispy hairlines and light marks when viewed with a lens.

1800 BD-1 Eagle, Choice AU  
Unlisted Late Die State

**3278** 1800 BD-1, High R.3, AU55 NGC. Bass-Dannreuther Die State c/e, with interesting cracks atop LIBERTY and across the eagle's tail and branch. A crack over the M in AMERICA is omitted from the Dannreuther reference, as is the obverse rim die break at 4 o'clock. Obverse star 7 is boldly repunched. Dentil clash marks linger above the first T in STATES.

This pleasing medium-gold example is sharply struck except for minor weakness at the arrows and the left (facing) claw. Flashy luster remains among the design elements, and abrasions are grade-consistent except for a slender bright mark on the obverse rim at 12 o'clock. Minor adjustment marks at the lower obverse are of Mint origin, and the same is true concerning a small strike-through or planchet void above the first 0 in the date. NGC ID# BFYT, PCGS# 45732 Base PCGS# 8563

1801 Capped Bust Right Ten Dollar, AU55  
Popular BD-2 Variety

**3279** 1801 BD-2, R.2, AU58 PCGS. Bass-Dannreuther Die State b/b. A substantial mintage of 44,344 Capped Bust Right eagles was accomplished in 1801, with two die varieties known for the date. This coin represents the more available BD-2 variety, identified by the position of star 1 distant from the hair. John Dannreuther estimates the surviving population of the popular BD-2 at 600-800 examples in all grades. This was the only use of the obverse die, but the reverse was used again to strike the BD-3 variety in 1803.

The present coin is an impressive Choice AU specimen that shows just a trace of wear on the strongly impressed design elements. Some vertical spikes are seen in the cap, identifying the late die state. Heritage numismatist Mark Borckardt believes these spikes were caused by a set screw that fell between a planchet and the obverse die during striking, leaving an impression of its threads on the die. The vivid orange-gold surfaces are appropriately abraded for the grade and show vibrant satiny mint luster throughout. Population (for the variety): 1 in 55, 3 finer (9/19). NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

LIBERTY EAGLES

1838 Liberty Eagle, AU50  
First Year of Issue  
Important Two-Year Type

**3280** 1838 AU50 PCGS. This represents the first year of issue for the Liberty Head design by Christian Gobrecht. The portrait was modified partway through 1839, creating an important two-year type with a distinctive curved bust. According to Bowers in his 2017 *A Guide Book of Gold Eagle Coins*, "The first examples intended for circulation were delivered on December 26, 1838, some 6,700 pieces, followed by 500 more on December 31." With only 7,200 1838 eagles manufactured in all, the consensus among researchers is that probably no more than 100 pieces survive, including a majority in well-circulated condition. This relatively high-grade representative shows good central detail and bright, semireflective orange-gold surfaces. Small abrasions and hairlines are expected. Population: 9 in 50, 22 finer (9/19). NGC ID# 262D, PCGS# 8575

1845-O Ten Dollar, Choice AU  
Clearly Repunched Date

- 3281** 1845-O Repunched Date AU55 PCGS. **Variety 1.** Ex: The Blue Hill Collection. A moderately marked example with consistent caramel-gold color and ample glimmers of luster throughout the borders and devices. Small marks are scattered, through only a horizontal line near the beak merits mention. Despite a mintage of just 47,500 pieces, we have confirmed six different die marriages for the '45-O eagle. At least half of all survivors are Variety 1, which shows strong repunching south on the 84 in the date. Most such pieces certified by PCGS reside in holders that make no mention of the repunching. For all 1845-O varieties combined, Population: 10 in 55, 11 finer (9/19). NGC ID# 262V, PCGS# 88593 Base PCGS# 8593

1852-O Liberty Ten, Choice AU  
Low-Mintage New Orleans Issue

- 3282** 1852-O AU55 NGC. **Variety 1.** Unlike its 1851-O predecessor, the 1852-O is a very scarce low mintage issue. NGC and PCGS combined have certified just three pieces as Mint State. Two die marriages are known from the production of 18,000 pieces. Both have identical date placements and a shield ring atop the second vertical stripe, but Variety 1 shows the mintmark further west than Variety 2. This attractive yellow-gold Choice AU example has refreshingly few abrasions and displays noticeable luster about the margins and motifs. A whisper of struck-in grease is near Liberty's profile. Census: 21 in 55, 10 finer (9/19). NGC ID# 263D, PCGS# 8609

1857-O Ten Dollar, AU53  
Low Mintage, Scarce in Any Grade

- 3283** 1857-O AU53 NGC. **Variety 1.** With a mintage of just 5,500 pieces, the 1857-O is scarce in all grades and unknown in full Mint State according to current population reports. This challenging New Orleans issue trails only the 1841-O and 1859-O among No Motto O-mint issues — a trio of extremely low-mintage eagles from the Southern Mint. Prooflike accents remain around the stars and legends while light abrasions exist on both sides, with a short mark near star 12. A sharp strike adds to the considerable eye appeal. Census: 14 in 53, 22 finer (8/19). NGC ID# 263U, PCGS# 8623

1861 Double Eagle, Lustrous MS61  
Mint State No Motto Type Coin

- 3284** 1861 MS61 NGC. Ex: S.S. Republic. This moderately abraded shipwreck salvage maintains frosty mint luster and luminous yellow-gold color. Liberty's curls and the entire eagle are sharply defined, while the border elements exhibit a touch of trivial softness. The 1861 eagle is generally accessible, although the shipwreck history behind this No Motto ten makes it all the more interesting for collectors. Census: 29 in 61, 14 finer (8/19). NGC ID# 2647, PCGS# 8633

1877 Liberty Eagle, MS60 Prooflike  
One of the Few Prooflike Tens at PCGS

**3285 1877 MS60 Prooflike PCGS.** This vivid-orange eagle is a standout for its assigned grade. Carrying the seldom-seen Prooflike designation by PCGS (simply because it could not be called anything else), the coin displays fields that are deeply reflective and fully mirrorlike. Lightly frosted devices provide a pleasing amount of contrast. This is the sole 1877 Prooflike on the current PCGS population report.

A handful of small marks exist on the radiant surfaces, but overall they are few in number and of minor severity. Liberty's portrait and the eagle are virtually free of any abrasions or contact. The strike is pinpoint sharp throughout both sides, suggesting an even finer numeric grade is possible. We have not seen a Liberty eagle with more pizzazz or greater eye appeal in recent memory. Population: 1 in 60 Prooflike, 0 finer (9/19). PCGS# 88677

1880 Ten Dollar, MS64+  
CAC Endorsed  
Just One Coin Certified Finer at PCGS

**3286 1880 MS64+ PCGS. CAC.** The 1880 eagle is a plentiful date through MS62, but MS63 coins are scarce and high-end near-Gems are rare. Gem-quality examples are prohibitively rare. This sharp Choice example offers frosty yellow-gold luster with minimal abrasions. The PCGS Plus designation and CAC endorsement move this coin to the top of its assigned grade. A bit of die grease is struck into the planchet near the olive leaves on the reverse. Population: 6 in 64+, 1 finer. CAC: 12 in 64, 2 finer (9/19). NGC ID# 265S, PCGS# 8687

1881-O Ten Dollar, MS61  
Among the Finest Pieces Certified

- 3287 1881-O MS61 NGC. Variety 1.** Recently reopened followed the Reconstruction of the South, the New Orleans Mint struck just 8,350 Liberty eagles in 1881. This issue circulated, and the finest coins typically available to collectors today are graded AU. In Mint State, the 1881-O is rare. NGC has certified just 15 such examples, the finest of which grade MS61. PCGS lists only an additional six Mint State submissions, also with none finer than MS61. This top-grade coin displays a sharp strike and rich honey-gold coloration that has tendencies toward yellow-gold around the borders. The fields are semiprooflike, and only light abrasions are evident. Census: 8 in 61, 0 finer (9/19). NGC ID# 265Y, PCGS# 8693

1882-O Eagle, MS60 Prooflike  
The Only Coin So-Designated at PCGS

- 3288 1882-O MS60 Prooflike PCGS. Variety 1.** This is the only Prooflike-designated 1882-O ten dollar gold piece at PCGS. Each side showcases a pronounced layer of frost over the razor-sharp devices, contrasting against mirrored fields. Extensive abrasions limit the technical grade, but this remains an impressive and important New Orleans eagle from a mintage of 10,820 coins. Population: 1 in 60 Prooflike, 0 finer (9/19). *From The Pelican Collection, Part II.* NGC ID# 2664, PCGS# 78697

1897-O Ten Dollar, MS63  
Scarce at the Select Level, CAC Endorsed

- 3289 1897-O MS63 PCGS. CAC.** Demand is strong for all New Orleans eagles, and the 1897-O is a conditionally scarce representative of the popular late-series O-mint tens. A mintage of 442,500 pieces yields fewer than two dozen examples finer than the MS63 grade. This is an attractive Select Uncirculated coin with CAC endorsement. The sun-gold surfaces are highly lustrous with only a few, widely scattered small marks and terrific eye appeal. Population: 23 in 63 (1 in 63+), 11 finer. CAC: 7 in 63, 4 finer (9/19). NGC ID# 7LHC, PCGS# 8738

1903 Ten Dollar, Rare MS66  
Beautiful, Frosty Surfaces

**3290 1903 MS66 NGC.** The 1903 Liberty eagle is a great condition rarity in MS66, somewhat surprising considering the mintage was 125,800 pieces and it is frequently encountered in lower grades. We have previously only offered one MS66 example (in 2012). There is only one other MS66 certified — a PCGS coin (the coin that we sold in 2012 that brought \$22,325). The strike is sharply detailed throughout, and the frosty lemony-gold surfaces are nearly perfect aside from a lone mark behind Liberty's eye that determines pedigree. Census: 1 in 66, 0 finer (9/19). NGC ID# 267V, PCGS# 8752

1906-S Ten Dollar, MS65  
The Finest We Have Handled

**3291 1906-S MS65 PCGS.** According to our Permanent Auction Archives, this is the single finest 1906-S ten dollar gold piece we have ever had the pleasure of offering at public auction. Although the issue's mintage of 457,000 coins does not especially stand out, survivors are surprisingly scarce in Mint State, particularly above Select Uncirculated condition. This Gem is one of only two MS65 submissions at PCGS, with three Premium Gems and one Superb Gem finer (9/19). Peach-gold color deepens around the rims, and frosty mint luster cartwheels over each side. The reverse is pinpoint-sharp, while a touch of softness occurs over Liberty's ear. Chatter is insignificant. NGC ID# 53FB, PCGS# 8762

## INDIAN EAGLES

### 1907 No Motto Indian Eagle, MS65 Collectible No Periods Variety

- 3292 1907 No Motto MS65 PCGS.** The No Periods 1907 Indian eagle is a favorite type coin issue. The Wire and Rolled Rim varieties struck earlier in 1907 are scarce to rare, being far out of reach for the average collector. By contrast, the 1907 No Periods coin is plentiful. This piece displays satiny yellow-gold luster and boldly rendered design elements. The fields are fairly clean, with only a few light marks on Liberty's cheek preventing an even finer grade from PCGS. NGC ID# 28GF, PCGS# 8852

### 1907 No Motto Eagle, MS65+ Introduction of the Saint-Gaudens Type

- 3293 1907 No Motto MS65+ PCGS.** This classic first-year type coin is bright and softly lustrous with light yellow-gold color and a splash of copper above the date. The 1907 Saint-Gaudens eagle tends to come with incomplete detail, and although a few of the devices show typical softness, the overall impression is good. The most notable attribute is lack of abrasions. NGC ID# 28GF, PCGS# 8852 1910-D Eagle, MS65+ High-End Type Coin

- 3294 1910-D MS65+ PCGS. CAC.** More than 2.3 million examples of this Denver issue were struck, making the 1910-D eagle a popular branch mint date for type purposes. This is a high-end, CAC-approved Gem that nearly meets the criteria for a Premium Gem grade. Both sides are highly lustrous, smooth, and strongly detailed with warm yellow-gold color. A tick on the cheek and a graze near stars 1-2 are all that limit the grade. NGC ID# 28GS, PCGS# 8866

### 1915 Eagle, Distinctive MS65+ Swirling Mint Frost, CAC

- 3295 1915 MS65+ PCGS. CAC.** Soft mint frost swirls over warm, yellow-gold surfaces devoid of major abrasions. A few tiny marks are hidden within the well-detailed headdress and eagle's feathers, although the fields are notably unabraded. A couple of minuscule alloy spots appear on each side. The 1915 is scarce-but-available in Gem condition. Plus-graded and CAC approved examples at this level are rare, and the issue is extremely elusive any finer. Population: 7 in 65+, 15 finer. CAC: 22 in 65, 11 finer (9/19). NGC ID# 28H5, PCGS# 8878

## PROOF INDIAN EAGLE

1912 Matte Proof Indian Eagle  
Impressive Gem Proof

**3296 1912 PR65 PCGS. JD-1, R.5.** This well-preserved and attractive 1912 Gem proof retains its original mustard-brown color — slightly deeper than the 1911 proofs, indicating the Mint experimented with a finer grain of sand for its 1912 sandblast proofs. Mint reports show 144 proofs were produced, but only 83 pieces were sold. The public had long since lost interest in the unpopular matte proofs, with fewer proofs sold in each successive year after 1909. Some consider the 1912 proofs scarcer than any other year of the proof Indian gold series — among them David Akers, who wrote:

“Proofs of this date are extremely rare, and in my opinion are the rarest of the Indian Head type. The mintage would not indicate this but either the proofs of this year suffered an unusually high attrition rate for some reason, or most of the mintage were melted because the 1912 appears less often in Proof than any other Indian Head.”

John Dannreuther writes about the 1912 proofs in *Volume IV: Gold, Part Two of United States Proof Coins*:

“This year and the following ones are more difficult to obtain, but only the 1914 and 1915 usually bring higher prices. When higher grade examples are offered, the dates are of less consequence.”

Today’s numismatists find the matte proof tens much more appealing than previous-generation collectors. While many enthusiasts with deep pockets endeavor to acquire one of each date, many others require a single issue for proof type. Either discipline stands to benefit from this sparkling 1912 Gem. As expected, the strike is pinpoint sharp throughout both sides of the coin. The surfaces appear entirely free of marks or grazes, save for a microscopic shiny spot on the cheek and two tiny rim dimples below-left of star 1. Otherwise, the surfaces are essentially flawless, and the eye appeal is exceptional. Population: 4 in 65, 11 finer (8/19). NGC ID# 26YD, PCGS# 8894

## LIBERTY DOUBLE EAGLES

1851-O Double Eagle, AU55  
Excellent New Orleans Type Coin

**3297 1851-O AU55 NGC.** Only a few New Orleans double eagles are seen with any frequency in the entire Liberty Head series; fortunately, the 1851-O is one of the relatively available early issues. This is a particularly attractive Choice About Uncirculated coin, with semireflective fields and well-struck devices. Dappled orange accents bolster brassy-gold color. As expected, bagmarks exist — most notably around 18 in the date — yet the eye appeal is excellent despite numerous small marks. Finer examples become scarce and expensive. NGC reports just 96 numerically finer pieces (9/19). NGC ID# 268J, PCGS# 8905

1852 Twenty, Boldly Struck MS62+  
Original Rich-Gold Color

**3298 1852 MS62+ PCGS.** All Type One double eagles are scarce to rare in Uncirculated grades. Despite a large mintage of more than 2 million pieces, the 1852 is seldom seen any finer than this example, with only about two dozen finer coins reported by PCGS and NGC combined. Lustrous, frosted surfaces show minimal bagmarks or abrasions. The coin was struck with a partial wire rim or “fin,” and it shows a minor obverse edge nick at 9 o'clock in that area. Natural rich-gold color displays a pale-green hue, and a sharp strike provides crisp definition for Liberty's portrait and the surrounding stars. The surfaces are only nominally busy with field chatter and tiny marks. It would not be unusual for several years to pass before we see a finer 1852 example. The present coin is the sole Plus-graded MS62 at PCGS. Population: 39 in 62 (1 in 62+), 16 finer (9/19). NGC ID# 268K, PCGS# 8906

1852 Double Eagle, MS63  
Remarkably Clean for the Grade

**3299 1852 MS63 PCGS.** More 1852 double eagles are known in Mint State than any other non-shipwreck issue from the decade, according to Doug Winter, but there is no denying the issue's rarity in Select Uncirculated condition. Most examples are seen in MS62, and very few exist in this grade. Only three or four are known finer.

The surfaces are exceptionally clean for the grade. From a technical standpoint, this coin may very well challenge the top-certified examples. Slightly subdued mint luster possibly keeps this coin back, but it must be one of the best-preserved examples out there with respect to surfaces marks. The strike is razor-sharp. Population: 12 in 63 (2 in 63+), 4 finer (9/19). NGC ID# 268K, PCGS# 8906

1853/2' Twenty Dollar, AU53  
Listed in the *Guide Book*

- 3300** 1853/2' FS-301 AU53 NGC. The status of this so-called overdate has been championed by some and questioned by others, but it remains popular with collectors and is listed in the annual *Guide Book*. Luster glows around the stars, legends, and central devices, while the exposed areas feature golden-orange color. Typically defined and expectedly abraded, but seldom seen finer. NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

1853/2' Twenty Dollar, AU58  
Terrific Quality for the Issue

- 3301** 1853/2' FS-301 AU58 PCGS. CAC. The average certified grade for the 1853/2' double eagle falls between AU50 and AU53. Doug Winter asserts that probably only five to seven Uncirculated examples survive. This high-end near-Mint example with a seldom-awarded CAC approval sticker retains abundant original mint luster, and high-point rub is virtually indiscernible. Pleasing yellow-gold surfaces exhibit minimal bagmarks for the issue. A mark through the top of Liberty's bun behind the coronet is the only singular flaw. Population: 25 in 58 (2 in 58+), 10 finer. CAC: 14 in 58, 7 finer (9/19). NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

1856-S Double Eagle, AU58  
S.S. *Central America* #2, With a Pinch

- 3302** 1856-S Split Serif, S.S. *Central America* #2 (with Pinch) AU58 PCGS. The "Split Serif" die variety, as designated by S.S. *Central America* numismatist Robert Evans. This lightly abraded near Mint specimen offers sharply detailed design elements, with just the slightest trace of wear on the high points, and still-lustrous yellow-gold surfaces that show only minor signs of contact. Certified by PCGS in the Ship of Gold holder, with a pinch of gold dust. Original box and Certificate of Authenticity included. PCGS# 670704 Base PCGS# 8919

1857-S Liberty Double Eagle, MS64  
S.S. *Central America*, Spiked Shield

- 3303** 1857-S Spiked Shield, Variety 20A, MS64 PCGS. CAC. Ex: S.S. *Central America*, SSCA 4788. Spiked Shield, named for the two die lines extending from the left side of the shield. This well-preserved Choice example exhibits sharply detailed design elements throughout and the pleasing yellow and orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. Housed in an original box, with frame and Certificate of Authenticity, however, the serial number of the coin does not match the certificate. NGC ID# 2696, PCGS# 70000 Base PCGS# 8922

1858-S Twenty Dollar, MS61  
Mint State Rarity

- 3304** 1858-S MS61 PCGS. Ex: The Fairmont Collection. Unlike the 1857-S, the 1858-S double eagle is rare in Uncirculated condition, not benefiting from the discovery of shipwreck treasures. This piece displays peach-gold and rose-tinted luster in the fields, with greenish-gold patina where abrasions are the heaviest. Moderate abrasions on each side are typical of the grade. Few finer 1858-S double eagles are known. Population: 18 in 61, 4 finer (9/19). NGC ID# 2699, PCGS# 8925

1860 Twenty Dollar, MS62  
Rarely Offered This Fine

**3305 1860 MS62 PCGS.** The 1860 is the most plentiful of the three double eagles of this date in Mint State, although most of the Uncirculated survivorship grades no finer than MS61. This MS62 coin is rare, and finer pieces are out of reach for many collectors. Well-struck design elements and frosty peach-gold and sun-yellow luster characterize each side, while grade-limiting abrasions are minimal. Population: 18 in 62 (4 in 62+), 11 finer (9/19). NGC ID# 269D, PCGS# 8929

1865 Twenty Dollar, MS63  
Probable S.S. Republic Recovery

**3306 1865 MS63 NGC.** The famed Harry Bass Jr. Collection contained a single About Uncirculated example of the 1865 double eagle, which was the finest obtainable example at the time. Virtually all 1865 double eagles graded VF to XF in those days. Then in 2003, Odyssey Marine Exploration Inc. discovered the wreck of the *S.S. Republic*, a sidewheel steamship that foundered in a hurricane off the coast of Georgia on October 25, 1865. The ship carried a cargo of \$400,000 in coins bound for New Orleans — mostly gold eagles and double eagles, intended as post Civil War currency.

More than 50,000 coins in various denominations were recovered. Included were 320 1865 double eagles, in grades ranging from AU to MS65. It is probable that this Select Uncirculated example was one of the *S.S. Republic* recoveries (although not indicated as such on the current NGC holder). Finely grained, frosted surfaces are sharply struck and well-preserved. Soft mint luster reveals a mere handful of minor, light abrasions, plus a grade-defining reverse mark at the left side of TWENTY. Like most of the *S.S. Republic* gold coins, eye appeal is excellent. NGC ID# 269U, PCGS# 8943

1865-S Double Eagle, MS62  
Old-Time Luster

- 3307** 1865-S MS62 PCGS. Small S mintmark. This is a lustrous Mint State coin with natural greenish-gold and wheat-colored mint luster, showing sharp design elements. A lone mark on the hair curls over Liberty's temple is worthy of note, but other abrasions are light and scattered. This piece shows numerous spindly die cracks around the obverse periphery, plus radial cracks through the 5 in the date and down from the dentils near star 7. NGC ID# 269V, PCGS# 8944

1865-S Twenty Dollar, MS64  
From the S.S. *Brother Jonathan*

- 3308** 1865-S MS64 PCGS. Ex: Brother Jonathan 564. The S.S. *Brother Jonathan* sank near Crescent City, California on July 30, 1865, and many 1865-S twenties went down with the ship, along with 225 of the 244 passengers. A generous portion of the coins pedigreed to the shipwreck appeared in a May 1999 Bowers and Merena auction, but the present example was apparently sold privately beforehand. The pedigree has become increasingly elusive over the subsequent two decades, as coins have been broken out of their holders and resubmitted in hopes of securing a higher grade. The present conservatively graded Choice double eagle has rich apricot color and exhibits surprisingly few abrasions. The strike is bold and the eye appeal is undeniable. NGC ID# 269V, PCGS# 8944

1866-S Motto Double Eagle, MS61  
A Rarity in Mint State

- 3309** 1866-S Motto MS61 PCGS. In early 1866, the San Francisco Mint struck 120,000 double eagles before new reverse dies with the motto IN GOD WE TRUST arrived. The mint then produced more than 842,000 With Motto coins throughout the remainder of the year. The No Motto issue is a scarce, highly sought semikey date among Liberty double eagles. However, the With Motto variant is itself notable as a condition rarity in Mint State.

This collectible MS61 example displays lustrous, moderately abraded yellow-gold surfaces with olive toning where the abrasions are heaviest. The devices are well-struck, and there are no individually bothersome blemishes. PCGS has seen only 32 Mint State submissions, including possible duplication, with none grading finer than MS62+. Population: 17 in 61, 8 finer (9/19). NGC ID# 26B2, PCGS# 8950

1867 Double Eagle, MS62  
A Rare Issue in Higher Grades

- 3310 1867 MS62 PCGS.** The highest remotely accessible grade for the 1867 Type Two double eagle is MS62. Anything finer proves to be a major rarity, with just a handful of coins known in MS63 and two reported in MS66 (the MS66 listings may be the same coin). Frosty mint luster washes over this well-defined yellow-gold representative, with pale rose accents on each side. The date is slightly soft, and marks are more plentiful on the obverse than on the reverse. Population: 57 in 62 (4 in 62+), 5 finer (9/19). NGC ID# 269Z, PCGS# 8951

1867-S Double Eagle, MS60  
Challenging in Mint State

- 3311 1867-S MS60 NGC.** Large S. This second-year Type Two issue with a mintage of 920,750 coins can generally be found in AU grades but becomes challenging in Mint State. Frosty luster shines around the devices, and each side displays attractive peach-gold color with greenish accents. Characteristically struck with myriad grade-defining abrasions. Census: 8 in 60, 24 finer (9/19). NGC ID# 26A2, PCGS# 8952

1873 Double Eagle, MS64  
Frosty Open 3 Example  
One Coin Finer at PCGS

- 3312 1873 Open 3 MS64 PCGS.** Although this is the usually encountered variety among 1873 Philadelphia Mint double eagles, such coins are anything but common in this exceptional state of preservation. Most grade no better than MS61 or MS62, and the average certified assessment for the issue falls short of MS60.

Bright, thick mint frost is undoubtedly the highlight of this outstanding Choice Uncirculated Registry coin. Both sides feature natural peach-gold color and show minimal grazes. Strike detail is expectedly soft on the portrait but well-rendered elsewhere. Population: 12 in 64, 1 finer (9/19). NGC ID# 26AL, PCGS# 8967

1873-S Double Eagle, MS63+  
Closed 3, Conditionally Rare

- 3313** 1873-S Closed 3 MS63+ NGC. Small S. The logotype of the 3 was changed at Philadelphia on several denominations early in 1873, so that it less resembled an 8 at arm's length. The new dies made at Philadelphia took considerable time to reach distant San Francisco. As a result, the 1873-S Closed 3 is more available than its Open 3 successor. Both are rare in Select Mint State, as usual for the Type Two design. This lustrous honey-gold representative is nicely struck and without any individually mentionable marks. Census: 3 in 63 (1 in 63+), 1 finer (9/19). NGC ID# 26AL, PCGS# 8969

1874-CC Double Eagle, AU58  
Collectible Carson City Issue  
Semiprooflike Surfaces

- 3314** 1874-CC AU58 NGC. Variety 3-A The die chip behind Liberty's eye and widely spaced mintmark attribute this Carson City variety. The 1874-CC double eagle was struck to the extent of 115,085 coins and is generally considered one of the more collectible issues from the famed Western facility. However, the shortage of high-grade and especially Uncirculated survivors places significant pressure on near-Mint examples like this. Yellow-gold surfaces show traces of semiprooflikeness. The obverse stars and eagle's feathers are strong with little friction evident. Chatter and small abrasions are expected. PCGS reports 28 finer submissions (9/19). NGC ID# 26AP, PCGS# 8971

1876-CC Twenty Dollar, AU55+  
Reflective Fields, Few Marks

- 3315** 1876-CC AU55+ NGC. **Variety 3-A.** Much of the original prooflike surface remains on this high-end 1876-CC twenty. Not only is the issue elusive in attractive Choice About Uncirculated condition or finer, it is almost always found heavily abraded. The present example is a welcome exception, with only minor field marks and light chatter. Rich, sun-gold color retains most of the original mint luster. Minor friction on the upper hair strands suggests brief circulation. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, AU58  
Lustrous and Smooth

- 3316** 1876-CC AU58 PCGS. **Variety 6-A.** The 1876-CC is often chosen as a Carson City type coin. The date is plentiful among CC-mint issues, and many AU coins are known with lustrous fields. This near-Mint coin is also minimally abraded for the grade, showing smooth straw-gold surfaces and bold devices. Barely any measurable wear is evident. NGC ID# 26AW, PCGS# 8977

1879-CC Double Eagle, MS60  
Low Mintage, Rare in Mint State

- 3317** 1879-CC MS60 NGC. **Variety 1-A.** This is the only die pair known, featuring a lump below the 9 in the date and the right edge of the second C in the mintmark aligned with the left edge of the D in DOLLARS. Only 10,708 1879-CC double eagles were struck, and most survivors can be found in XF-AU grades. Of the total estimated population of 300-350 coins, it is almost certain that fewer than a dozen exist in Mint State. This coin is lustrous and unworn with crisp detail on the portrait, stars, and eagle. The open fields are slightly subdued, and small abrasions are minimal. Census: 5 in 60, 6 finer (9/19). NGC ID# 338L, PCGS# 8989

1881-S Double Eagle, MS62  
Rare Above This Level

- 3318** 1881-S MS62 PCGS. This date-mintmark combination may conjure images of the available Morgan dollar produced at the same facility in 1881, but its double eagle counterpart is scarce in MS62 and rarely seen finer. This frosty yellow-gold twenty displays small, scattered abrasions and attractive rose and green accents. PCGS counts 29 finer submissions (9/19). NGC ID# 26BD, PCGS# 8995

1889-CC Twenty, AU58  
Pleasing Color

- 3319** 1889-CC AU58 PCGS. Variety 1-A. Light high-point friction is mainly restricted to Liberty's portrait, where olive toning appears on the cheek and hair curls. The fields are lustrous with brighter orange-gold color. Scattered abrasions occur throughout. The 1889-CC is a popular date in the Carson City series, and coins grading finer than this near-Mint offering are elusive with decent eye appeal. NGC ID# 26BV, PCGS# 9011

1889-CC Liberty Double Eagle, MS61  
Scarce Branch Mint Type Three Issue

- 3320** 1889-CC MS61 PCGS. Variety 1-A. Coinage operations were suspended at the Carson City Mint after 1885, and the facility functioned as an assay office until 1889. The buildings were repaired and the equipment was updated in 1889 and coinage was resumed late in the year. Only 30,945 Liberty double eagles were struck, but the issue is more available than that small production total would suggest, due to a significant hoard that surfaced in Europe in the 1990s.

The present coin is an impressive Mint State specimen, with well-detailed design elements that show just a trace of softness on the letters in LIBERTY. The pleasing orange-gold surfaces are lightly marked for the grade and retain most of their original mint luster. The overall presentation is most attractive. Population: 63 in 61, 68 finer (9/19). NGC ID# 26BV, PCGS# 9011

1899 Liberty Twenty, MS62  
Elusive Deep Prooflike Example

- 3321** 1899 MS62 Deep Prooflike NGC. Although occasionally available with Prooflike surfaces, the 1899 is rare in Deep Prooflike format. This glittering, orange-gold example shows a bit of chatter in the mirrored fields, but the frosted devices stand out against the highly reflective backdrop, and the fields are visually deep-mirrored compared to regular prooflike examples. A sharp strike adds to the dramatic effect. NGC reports just three 1899 double eagles with in Deep Prooflike — all at the MS62 level. Census: 3 in 62 Deep Prooflike, 0 finer (9/19). NGC ID# 26CM, PCGS# 79035

1905-S Double Eagle, MS64 Prooflike  
Glassy Mirrors, Pronounced Contrast, CAC

- 3322** 1905-S MS64 Prooflike PCGS. CAC. Clear S. If a Liberty Head twenty dollar gold piece in proof format is out of reach, this near-Gem example with Prooflike surfaces and CAC endorsement may be the next best thing. Although it lacks any orange-peel texture in the fields, this 1905-S maintains virtually depthless mirrors that contrast starkly against the frosted, fully struck relief elements. Eye appeal is great, and there are far fewer abrasions than usual for a Prooflike double eagle. Population: 1 in 64 Prooflike, 0 finer. CAC: 1 in 64 Prooflike, 0 finer (8/19). PCGS# 89048 Base PCGS# 9048

1907 Liberty Head Twenty, MS65  
Among the Finest Certified

- 3323** 1907 Liberty MS65 PCGS. Nearly 1.5 million Liberty double eagles were struck at the Philadelphia Mint in 1907, representing the swan song for this long-lived design. Each side is fully detailed with rich orange-gold color and scintillating mint luster. Marks are inconsequential. Population: 25 in 65 (2 in 65+), 0 finer (9/19). NGC ID# 26D7, PCGS# 9052

1907-S Double Eagle, MS65  
None Numerically Finer  
Final Year of Issue

**3324 1907-S MS65 NGC.** James Barton Longacre's Liberty Head double eagle series finally came to a close in 1907 after a 58-year run. Production at the San Francisco facility culminated with a mintage of 2.1 million coins. Nevertheless, surprisingly few 1907-S Coronet twenties survive at the Gem grade level, and none are graded numerically finer at either NGC or PCGS.

This Registry-worthy example enjoys radiant mint frost and luminous peach-gold color. Design detail is strong throughout. Most notably, there are remarkably few abrasions for a large gold coin of this type. Census: 19 in 65, 0 finer (9/19). NGC ID# 26D9, PCGS# 9054

## HIGH RELIEF DOUBLE EAGLES

1907 Wire Rim High Relief Twenty Pin Back

**3325 1907 High Relief, Wire Rim Uncertified.** In our opinion, this coin has the details of an AU specimen that is Ex-Jewelry. Few will be unmoved by this lot. Many will see the rim-to-rim pin on the reverse as a numismatic tragedy. Others will see this as an opportunity. The first viewpoint is obvious to most. But taking an optimistic approach, the second viewpoint offers several advantages. The most obvious is it is still usable as jewelry, if one is so inclined. The pin back is fully functional with an intact clasp. Second, the coin is slightly bright, but it does not appear to have been cleaned; rather its brightness appears to come from light handling. This, in turn, leads to another advantage: minimal loss of high-point detail. There are only the slightest signs of contact, the most obvious (when closely examined) is a short scrape in the reverse field between the eagle's head and the U in UNITED. An unusual way to encounter, and possibly acquire, a High Relief twenty.

Augustus Saint-Gaudens

1907 Wire Rim Twenty, MS62  
Bright Yellow-Gold Surfaces

- 3326 1907 High Relief, Wire Rim MS62 NGC.** Both President Theodore Roosevelt and sculptor/designer Augustus Saint-Gaudens felt it would be inappropriate, even blasphemous, to include the motto *IN GOD WE TRUST* on the new double eagles. Saint-Gaudens considered employing the motto *AEQUUM CUIQUE*, as he had in his design for Roosevelt's 1905 inaugural medal. The Latin phrase, loosely translated, means "to each, that which is equitable" or "a square deal for every man." The square deal was a direct reference to Roosevelt's domestic policy regarding conservation, consumer protection, and controlling corporate greed. Although *AEQUUM CUIQUE* was never used on any of the eagles or double eagles, these High Relief twenties still speak to that trust-busting era of American progressivism, with Liberty striding boldly forward into the 20th century. This is a bright yellow-gold example that does not show any mentionable contact marks on either side, but close examination reveals a couple of shallow marks on the rims, which most likely account for the grade. NGC ID# 26F2, PCGS# 9135

1907 Flat Rim High Relief Double Eagle  
Uncirculated Sharpness

- 3327 1907 High Relief, Flat Rim — Reverse Rim Filed — NGC Details. Unc.** A fully struck, satiny yellow-gold example of this important High Relief issue. This piece represents the Flat Rim variety, struck late in 1907 after the Mint remedied a problematic "fin rim" that was being produced on the coins. The coin is mainly free of bothersome abrasions, although there are handling marks. On the reverse, rim filing along the right-hand border prevents a numeric grade from NGC.

*Augustus Saint-Gaudens' Monogram*

1907 Twenty Dollar High Relief, MS63  
Flat Rim Variant

SAINT-GAUDENS DOUBLE EAGLES

1907 Saint-Gaudens Double Eagle, MS66+  
Arabic Numerals Type Coin

**3328 1907 High Relief, Flat Rim, MS63 NGC.** Just a few months after the Saint-Gaudens High Relief double eagles were released to banks and sub-Treasuries, the January 1908 issue of *The Numismatist* prophetically wrote: "It is too early yet to tell just what the prices of the pieces will settle down to, but there is no doubt that the new twenty will command a substantial premium and that as time goes on the piece will gradually increase in rarity." With only 12,367 coins distributed, many available examples were hoarded or quickly flipped by profiteers, with collectors and speculators recognizing immediately their beauty and potential numismatic significance. Today, that tradition continues. The MCMVII High Relief double eagle remains one of the most admired and sought-after issues in American coinage. This is one of the later pieces produced, as seen by the so-called flat rim around the margins. This was done to minimize (hopefully eliminate) the "fin" or wire rim that Mint personnel saw as a strike defect. The surfaces are bright and satiny with a faint, but even layer of reddish patina over each side. NGC ID# 26F2, PCGS# 9136

**3329 1907 MS66+ PCGS.** Luster shimmers in the fields of this high-end Premium Gem, revealing peach, yellow-gold, and lilac hues. Liberty's fingers and the top of the torch are well-struck, and there are no distracting abrasions. The Plus designation is well-earned. The 1907 Arabic date Saint-Gaudens double eagle is occasionally available in MS66 but seldom with a Plus designation. Only 19 higher-grade pieces are reported at PCGS (8/19). NGC ID# 26F5, PCGS# 9141

1908-D Motto Double Eagle, MS66  
Nearly Impossible to Improve Upon

- 3330 1908-D Motto MS66 PCGS.** Long Rays Obverse, which is only seen on the With Motto coins of this date and mint. The 1908-D Saint-Gaudens twenty dollar gold issue claims a healthy mintage of 349,500 coins, although it is mainly available only in grades below MS65. Gems are scarce, and coins at this level are nearly impossible to improve upon with only six higher grading events at PCGS and NGC combined. This Premium Gem features sharp design elements and satiny rose-gold luster without any major abrasions. Eye appeal is outstanding. Population: 37 in 66 (3 in 66+), 4 finer (9/19). NGC ID# 26F9, PCGS# 9148

1908-D Motto Saint-Gaudens Twenty, MS66  
Radiantly Lustrous, High-End for the Grade

- 3331 1908-D Motto MS66 PCGS.** The 1908 Denver Mint double eagle mintage of slightly over 1 million pieces was divided among three varieties: Type One Short Rays, No Motto ... Type Two Long Rays, No Motto ... and Type Three Long Rays, With Motto. Recent research by Roger Burdette concludes that each variety had approximately the same mintage, and that the Type Three Long Rays, With Motto mintage was 342,640 pieces.

This Type Three twenty is a Premium Gem example of the With Motto design. Brilliant orange-gold surfaces are satin-smooth and lustrous, while the sharply struck fields and devices are essentially mark-free. The strike is sharp throughout. While Charles Barber is much-maligned for changes to the original Saint-Gaudens design, there is no question that this coin represents the fruition of his work. The surface quality and eye appeal suggest an even finer grade. Population: 37 in 66 (3 in 66+), 4 finer (9/19). NGC ID# 26F9, PCGS# 9148

**1908-S Double Eagle, MS63**  
Only 22,000 Pieces Struck  
Conditionally Scarce

**3332 1908-S MS63 PCGS.** The 1908-S double eagle represents the first Saint-Gaudens twenty dollar emission from the San Francisco Mint. It is well-known and popular among collectors for that reason, and for its tiny mintage of 22,000 coins. Uncirculated coins are highly sought-after but conditionally scarce, with AU55 representing the average grade awarded at the leading grading services. This reddish-gold Select Uncirculated example enjoys bright, frosty mint luster that radiates from slightly baggy surfaces. The natural color and vibrant luster deliver excellent eye appeal for the grade. NGC ID# 26FA, PCGS# 9149

**1910 Double Eagle, MS65**  
A Rarity in Higher Grades

**3333 1910 MS65 PCGS.** Gem condition is the highest collectible grade for this early Philadelphia Saint-Gaudens issue. PCGS and NGC have each certified just eight finer submissions (9/19), and those totals likely include duplication. Softly frosted surfaces feature warm golden-orange color and crisp definition on Liberty's face and torch hand. Small marks are well-hidden within the drapery. NGC ID# 26FE, PCGS# 9154

**1910 Double Eagle, MS66**  
Rare in Upper Mint State Grades

**3334 1910 MS66 NGC.** The 1910 double eagle is a rarity in upper Mint State grades. According to Roger Burdette's 2018 series reference:

"During the 1990s a few thousand Uncirculated examples turned up in European bank holdings, but most were abraded from handling and transport. These were consistent with the large majority of European bank hoards and grade between MS60 and MS63 or occasionally MS64."

This important Premium Gem displays nearly complete strike definition and eye-catching orange-gold color. Clean surfaces glittering with radiant mint frost. Rarely offered this nice and worthy of serious consideration. Census: 8 in 66 (1 in 66+, 1 in 66 ★), 0 finer (9/19). NGC ID# 26FE, PCGS# 9154

1913 Saint-Gaudens Twenty, MS64+  
Scarce, Popular Philly Issue; CAC

**3335 1913 MS64+ PCGS. CAC.** As the rarest With Motto Philadelphia issue in the early series (1908-1915), the 1913 Saint-Gaudens twenty is rare in Plus-graded MS64 and finer conditions. Fewer than 50 coins have received CAC endorsement in those high grades as well. This borderline Gem qualifies in both regards, with satin-smooth orange-gold surfaces, olive overtones, and a noticeably sharp strike. A few areas of bag grime on Liberty's high points suggest years of undisturbed bag storage, as does the lack of significant bagmarks. David Akers once said, "... it is easier to locate a high-grade 1929, 1931, or 1932 than it is to find a similarly graded 1913." Population: 34 in 64+, 15 finer. CAC: 37 in 64, 4 finer (9/19). NGC ID# 26FN, PCGS# 9161

1914 Double Eagle, MS65  
Important Rarity This Fine

**3336 1914 MS65 PCGS.** The 1914 is a relatively low-mintage issue, boasting a production total of only 95,250 coins. These were produced chiefly for the purpose of backing gold certificates being issued for circulation, although quantities eventually ended up in foreign trade shipments to Europe. Most surviving coins, repatriated from overseas, are extensively bagmarked from repeated moving and jostling in bags. In *Saint-Gaudens Double Eagles*, Roger Burdette reasons that most of the high-grade survivors known today came from the same few bags that received less movement throughout their life. A few high-grade pieces may also trace their origins to collectors who acquired them directly from the Mint Cashier in the United States.

This Gem example's origins are unknown, although its excellent quality is apparent. Satiny original mint luster yields shades of green-gold, peach, and orange that complement boldly struck design elements. Only a few tiny contact marks on the eagle's wing are visible with a loupe. Population: 40 in 65 (2 in 65+), 5 finer (9/19). NGC ID# 26FS, PCGS# 9164

**1914-S Double Eagle, MS66+★  
Only One Coin Listed Finer at NGC**

**3337 1914-S MS66+★ NGC.** From a mintage of nearly 1.5 million 1914-S double eagles, merely 1,500 coins were released into circulation and the rest were transferred to Treasury vaults. From there, 1914-S twenties trickled out over the next 15 years, mostly used for export. Most of the coins shipped to Europe, with the balance going to Central and South America, or Japan. There was no significant use for the coins in domestic commerce.

Most high-grade pieces that survive were either put aside early-on for collectors (often from the pyx coins) or from repatriated unopened bags from Central America. This frosted, high-end Premium Gem example shows virtually no sign of coin-to-coin contact, with only a few microscopic marks. Vibrant cartwheel luster illuminates finely textured, orange-gold surfaces. The sharp strike lacks full details on the torch flame, but all else is well-struck. Eye appeal excels. Census: 2 in 66+, 1 in 66★, 1 in 66+★, 1 finer (9/19). NGC ID# 82KA, PCGS# 9166

**1922 Twenty Dollar, MS65+  
Major Rarity Any Finer, CAC**

**3338 1922 MS65+ PCGS. CAC.** Most 1922 double eagles were exported to Europe, where they circulated between banks. This high-end Gem example almost certainly was not one of those coins, which returned to collector's hands in low Uncirculated grades. Gleaming orange-gold surfaces display a reasonably sharp strike, although a touch weak at the torch flame and the lower stars. The 1922 is extremely scarce any finer than this Plus-graded, CAC-endorsed MS65. Population: 45 in 65+, 9 finer. CAC: 29 in 65, 2 finer (9/19). NGC ID# 26G3, PCGS# 9173

**1922 Double Eagle, MS66  
Conditionally Rare, Top-Graded Example**

**3339 1922 MS66 PCGS.** The 1922 Philadelphia double eagle, unlike the run of plentiful P-mint twenty dollar issues that follow, is a major condition rarity at the Premium Gem grade level. Although nearly 1.4 million coins were struck, PCGS and NGC have certified only 18 MS66 submissions combined, evenly split between the two services with a single Star-designated example at NGC (9/19).

This MS66 representative is phenomenal in every regard. Mint luster swirls radiantly over each side. Clean surfaces glisten with peach-gold color and feature pinpoint-sharp detail on Liberty's face and torch hand. A monumental opportunity for advanced Saint-Gaudens double eagle collectors. NGC ID# 26G3, PCGS# 9173

1924-D Double Eagle, MS64  
Satin, Unabraded Fields

- 3340 1924-D MS64 PCGS.** The 1924-D, formerly an uncollectible rarity in the series, is now merely scarce at this Choice Uncirculated level thanks to overseas repatriations in past decades. Finer coins remain largely unobtainable. Satiny mint luster radiates vibrantly over smooth, well-detailed, peach-gold surfaces. A tick on Liberty's left thigh will identify this otherwise minimally marked near-Gem in future appearances. PCGS reports 12 numerically finer submissions (9/19). NGC ID# 34VE, PCGS# 9178

1925-S Double Eagle, MS62  
Heavily Melted Issue

- 3341 1925-S MS62 NGC.** Well-struck and frosty with original wheat-gold mint luster. Scattered light abrasions determine the grade but none are individually distracting. Much of the 1925-S double eagle's mintage of more than 3.7 million pieces was melted, making this a better date overall for collectors. Uncirculated coins grading finer than the present are scarce.

*From The Pelican Collection, Part II.* NGC ID# 26GC, PCGS# 9182

1926-S Double Eagle, MS65  
Mass-Melted San Francisco Issue

- 3342 1926-S MS65 PCGS.** Of the 2 million double eagles manufactured at the San Francisco Mint in 1926, it is believed that only 2,000 pieces survived the mass meltings that took place after the Gold Recall of 1933. Most of the examples that avoided destruction derive from overseas repatriations and show scattered bagmarks, typically grading between MS62 and MS64. This is an exceptional Gem, minimally abraded with marvelous golden-orange surfaces and radiant mint luster. Well-defined, except on the Capitol dome, with minor "vault dirt" above CA in AMERICA. Population: 40 in 65 (2 in 65+), 4 finer (9/19). NGC ID# 26GF, PCGS# 9185

1928 Double Eagle, MS67  
Nearly Pristine Registry Coin

- 3343 1928 MS67 PCGS.** The 1928 Saint-Gaudens double eagle boasts a famously massive production of 8.8 million coins — by far the most substantial mintage for any double eagle ever made. Collectors could be forgiven for thinking the issue is widely available in any grade, but such is not the case. Survivors are scarce at this level, and none are graded numerically finer (9/19). This nearly pristine Superb Gem is fully struck and highly lustrous. Unabraded orange-gold surfaces radiate swirling mint luster and show delicate peach and lavender accents. Eye appeal is extraordinary. NGC ID# 34VK, PCGS# 9189

COMMEMORATIVE SILVER

1893 Isabella Quarter, MS67  
Attractively Toned, Rare CAC Endorsement

- 3344 1893 Isabella Quarter MS67 PCGS. CAC.** The 1893 Isabella is the only quarter dollar in the classic commemorative series. Specimens are scarce at the Superb Gem grade level, and such pieces are rare with CAC endorsement. This coin displays a bold strike and original satin luster. Golden-orange and deep rose interior toning surrounded by gold and sea-green border toning is a color scheme that adorns both sides of this high-end type coin. Population: 57 in 67 (8 in 67+), 7 finer. CAC: 33 in 67, 3 finer (9/19). NGC ID# BYJ9, PCGS# 9220

1935/34 Daniel Boone Half Dollar, MS68  
Tied for Finest Certified

- 3345 1935/34 Boone MS68 NGC.** This variety of the 1935 Boone half dollar shows the 1934 Pioneer Year in the field above the rising sun. The “dual date” issue was produced at all three active mints this year. The finest Philadelphia coins certified grade MS68; there are four in this grade at each NGC and PCGS, and they are highly sought-after by Registry collectors. This specimen displays an impressively bold strike and satiny mint luster. Dusky golden-olive toning covers much of the interior, with vivid rainbow color around the outer peripheries. Census: 4 in 68, 0 finer (9/19). NGC ID# 34SZ, PCGS# 9262

1935 Hudson Half Dollar, MS67  
Attractive Peripheral Patina

- 3346 1935 Hudson MS67 PCGS.** The Hudson half dollar had one of the lowest type mintages of the commemorative silver series, and it was regarded by contemporary numismatists as an exploitative issue. In the October 1935 *Numismatist*, Frank Duffield reported that “members sent in their money for those Hudson half dollars as far back as May when they were first announced. Early in July the money order was returned saying all the coins had been sold or distributed.” Today, the coins are scarce but collectible in most Mint State grades. Superb Gems are rare, and none have been graded numerically finer by either leading service. This lustrous and virtually immaculate example displays light cherry-red and butter-gold peripheral patina. Population: 27 in 67 (5 in 67+), 0 finer (9/19). NGC ID# BYGS, PCGS# 9312

1921 Missouri Half Dollar, MS66+  
Tied for Finest Certified at PCGS  
CAC Endorsed

- 3347 1921 Missouri MS66+ PCGS. CAC.** This popular classic commemorative celebrates Missouri's 1821 statehood, with the coonskin-capped portrait of a youthful-looking Daniel Boone on the obverse, and the standing figures of a frontiersman and an Indian looking westward, musket and peace pipe in their respective hands. Two varieties of the issue added interest for collectors. One includes the incuse imprint 2★4, signifying Missouri's status as the 24th state. A “Plain” variety lacks the imprint.

While somewhat more Plain coins were distributed, the availability of the two versions is similar. This is a high-end Premium Gem Plain example that features CAC endorsement. Dappled emerald, gold, and tan-gray toning spreads over lustrous, silver-gray surfaces. The central strike is sharp except for a small area at the back of the cap, opposed by slight weakness at the left shoulder of the frontiersman. PCGS reports no finer certifications. Population: 4 in 66+, 0 finer. CAC: 16 in 66, 0 finer (8/19). NGC ID# BYH2, PCGS# 9330

**1939 Oregon Trail Half Dollar, MS68**  
**Exceptional Strike and Surface Quality**

- 3348** 1939 Oregon MS68 NGC. The Oregon Trail commemorative series started in 1926 — 13 years before the final issue was struck in 1939. Just 3,004 pieces were distributed in the final year. This is a sharply struck and technically exceptional Superb Gem. Bluish-gray toning is evenly dispersed throughout each side, yielding to pale-lavender accents at the borders. This fully struck coin is essentially mark-free and splendid in all regards. Tied for the finest-certified at NGC behind a pair of MS68★ coins. Census: 10 in 68 (2 in 68★), 0 finer (8/19). NGC ID# BYHL, PCGS# 9352

**1935-S Texas Half Dollar, MS68**  
**None Graded Higher**

- 3349** 1935-S Texas MS68 NGC. This Texas commemorative half dollar struck at the San Francisco branch mint was one of 10,008 pieces distributed. Speckled multicolor toning around the edges cedes to brightly frosted centers. Preservation is virtually flawless. An important coin for a top Registry Set, with none graded higher at either of the two leading services. Census: 9 in 68, 0 finer (9/19). NGC ID# BYJD, PCGS# 9384

**1936 Wisconsin Half, MS68**  
**Rich Peripheral Toning**

- 3350** 1936 Wisconsin MS68 PCGS. CAC. Ex: The Poteat Collection. Rich reddish-orange patina at the rims surrounds satiny silver-gray centers. The devices are suitably defined, and the overall preservation is exemplary. While PCGS has certified 47 examples of this issue in MS68 (9/19), it is not as frequently seen as some other commemorative issues in this lofty grade; the Norfolk comes to mind.  
 Ex: FUN Signature (Heritage, 1/2007), lot 7869. NGC ID# BYKU, PCGS# 9447

**COMMEMORATIVE GOLD**

**1903 McKinley Gold Dollar, MS67+**  
**Louisiana Purchase Exposition**

- 3351** 1903 Louisiana Purchase, McKinley Gold Dollar MS67+ PCGS. CAC. The Louisiana Purchase nearly doubled the size of the United States. The centennial of the land purchase by Jefferson from Napoleon was celebrated at a 1904 exposition in St. Louis, Missouri. Nonetheless, the coins are dated 1903, and one of the two varieties features William McKinley, despite his assassination two years before. The 1903 McKinley can be obtained in typical Mint State, but MS67+ pieces are rare. As of (9/19), PCGS has certified only 12 coins as MS67+ with just three examples finer. The present peach-gold Superb Gem is well struck and practically pristine. A couple of small alloy spots near the O and second L in DOLLAR do not distract. The strike is crisp save for occasional blending on the dentils. NGC ID# BYLE, PCGS# 7444

**1904 Lewis and Clark Gold Dollar, MS67**  
**Only One Coin Numerically Finer at NGC**

- 3352** 1904 Lewis and Clark Gold Dollar MS67 NGC. The 1904 and 1905 Lewis and Clark gold dollars were issued as a souvenir commemorative in conjunction with the Lewis and Clark Centennial Exposition held in Portland, Oregon, in 1905. Both dates were distributed to the extent of 10,000 pieces, not including assay coins. However, the 1904 is slightly more collectible in Superb Gem condition. This type coin displays satiny yellow-gold mint luster and a bold strike. Whereas many lower-grade examples show faint hairlines at certain angles that keeps them from grading higher, this piece is beautifully preserved. Census: 31 in 67 (1 in 67+, 6 in 67★, 2 in 67+★), 1 finer (9/19). NGC ID# BYLF, PCGS# 7447

## PANAMA-PACIFIC SET

### 1915-S/S Panama-Pacific Half Dollar, MS65 Vivid, Multicolor Toning

- 3353** 1915-S/S Panama-Pacific, FS-502, MS65 NGC. Mint Engraver's Charles Barber and George T. Morgan collaborated on the design of the 1915-S Panama-Pacific half dollar, which enjoyed a distribution of 27,134 pieces. This impressive Gem exhibits well-detailed design elements and vibrant mint luster, under high-intensity shades of lavender-gray, cerulean-blue, and pale gold toning. Part of a five-piece Pan-Pac set, with the coins offered in consecutive lots in this catalog. NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357

### 1915-S Panama-Pacific Gold Dollar, MS64+ Lustrous and Appealing

- 3354** 1915-S Panama-Pacific Gold Dollar MS64+ NGC. From a design by Charles Keck, the 1915-S Panama-Pacific gold dollar claims a modest distribution of 15,000 pieces. This impressive Plus-graded Choice example offers sharply detailed design elements throughout and well-preserved orange-gold surfaces that radiate vibrant mint luster from both sides. Overall eye appeal is outstanding. Part of a five-piece Pan-Pac set, with the coins offered in consecutive lots in this catalog. NGC ID# BYLH, PCGS# 7449

### 1915-S Pan-Pac Quarter Eagle, MS66+ Scarce in Higher Grades

- 3355** 1915-S Panama-Pacific Quarter Eagle MS66+ NGC. The 1915-S Panama-Pacific quarter eagle was struck in conjunction with the Panama-Pacific International Exposition, from a design by Mint Engraver's Charles Barber (obverse) and George Morgan (reverse). Only 6,749 examples were distributed. This Plus-graded Premium Gem exhibits well-detailed design elements and impeccably preserved, lustrous surfaces, with outstanding eye appeal. The Pan-Pac quarter eagle becomes elusive in grades above MS66. Part of a five-piece Pan-Pac set, with the coins offered in consecutive lots in this catalog. NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Fifty, MS64  
 Scarcer Round Version  
 483 Examples Sold

**3356 1915-S Panama-Pacific 50 Dollar Round MS64 NGC.** These celebrated fifty dollar gold coins are greatly appreciated for their beauty, impressive size, and scarcity. As souvenirs of the Panama-Pacific International Exposition, they are unparalleled. But perhaps more significantly, these coins serve as tangible symbols of the California Gold Rush economy and the resulting growth of the city of San Francisco.

There would be no Panama-Pacific International Exposition, no fifty dollar slugs, were it not for the monumentally important discovery of gold by James Marshall at John Sutter's mill on January 24, 1848. The find brought tens of thousands of migrants from the Eastern United States and Europe to northern California with the hopes of striking it rich. San Francisco quickly became the hub of Western expansion. Its population swelled from roughly 150 residents in 1846 to more than 50,000 just 10 years later. However, in the early years of the Gold Rush, economic growth was made more difficult, if not hampered, by a tradition found in many parts of America at that time.

California, like other states, had a history of metallism - a reliance on "hard money" and a distrust of paper currency. However, in the face of vast amounts of wealth being mined in the gold fields, a shortage of circulating coinage persisted. "Coin of the realm" was needed to pay customs, and its scarcity incited hoarding. Miners, merchants, and other settlers usually traded in gold ore or dust, which varied widely in purity and required carrying scales. Private assayers and coiners of varying repute set up shop along Montgomery Street, but this was only a partial solution to the problem.

A more sustainable answer to the coin shortage was authorizing the firm of Moffat & Co. to act under government contract as the United States Assay Office in 1851, with Augustus Humbert as U.S. Assayer. The U.S.A.O. served as a sort of provisional mint, producing large fifty dollar ingots to serve as a standardized medium of exchange on the frontier.

In 1854, the U.S. government established a branch mint at San Francisco. After a period of normal growing pains, the facility quickly proved itself capable of converting vast quantities of California gold into usable circulating coinage. The San Francisco Mint outgrew its first building in just two decades and moved into what is commonly referred to as the Granite Lady in 1874. That property would serve as its home until 1937, and was one of the few buildings to survive the devastating earthquake and fire that decimated the city in 1906.

The 1915-S Panama-Pacific fifty dollar gold coins are products of this long and fascinating history. They were modeled after the iconic Humbert fifty dollar slugs, struck at the famous Second San Francisco Mint, and produced to commemorate, in part, San Francisco's rebirth after the devastating earthquake of 1906. Both round and octagonal versions were produced, using the same basic design by sculptor Robert Aitken. The coins had a selling price of \$100 per coin, too expensive for all but the most wealthy collectors to afford. As a result, only 483 examples of the round version were sold.

The present coin is an attractive Choice example of the elusive round Pan-Pac fifty, with well-detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster from both sides. Overall eye appeal is terrific for this classic gold commemorative issue. Part of a five-piece Pan-Pac set, with the coins offered in consecutive lots in this catalog. NGC ID# BYHP, PCGS# 7451

1915-S Panama-Pacific Fifty, MS63  
 Iconic Octagonal Version  
 Only 645 Examples Distributed

**3357 1915-S Panama-Pacific 50 Dollar Octagonal MS63 NGC.** The 1915 Panama Pacific International Exposition's stated purpose was to celebrate the completion of the Panama Canal. Although organizers saw greater value in using the fair to showcase San Francisco's rebirth after the devastating earthquake and fire of 1906, the opening of the canal on August 15, 1914 remains central to the production of these coins.

Much can be gleaned about the progress of construction and working life on the canal through *The Canal Record*, "published weekly free of charge, one copy each, to all employees of The Panama Canal and Panama Railroad Company whose names are on the "gold roll." (More on the "gold roll" later.)

On the front page of the July 22, 1914 edition, printed just a few weeks before the canal opened, headlines included "Work on Dry Dock No. 2 at Balboa Stopped" and "Preparations for Completing Transmission Lines." Page 3 detailed a deadly explosion that took four lives and injured dozens more, the result of a drill barge accidentally driving into a submerged rock that was being charged with dynamite. Other topics addressed in the weekly covered social matters like the organization of a Christian Endeavour Society, a series of first aid classes for women, public school enrollments, and official circulars containing operational information for workers.

In many ways, *The Canal Record* highlights the similarities between day to day life in the Canal Zone versus today. It also underscores the profound social inequalities around race and gender built into the conditions and attitudes of those living and working in the Panama Canal Zone. For example, the "gold roll" mentioned above was reserved for white Americans, meaning non-whites had to pay five cents to obtain this information. Finally, it provides a vivid historical account of the building of the Panama Canal, one of the seven wonders of the modern world.

These 1915-S Octagonal fifties pay tribute to that engineering marvel. Designer Robert Aitken included dolphins around the periphery to symbolize the "uninterrupted waterway" that would facilitate trade between East and West. Only 645 Octagonal fifties were distributed.

The present coin is an attractive Select specimen, with sharply detailed design elements throughout. The textured orange-gold surfaces are lightly marked, with no mentionable distractions. Especially vibrant mint luster adds to the outstanding eye appeal. Part of a five-piece Pan-Pac set, with the coins offered in consecutive lots in this catalog. NGC ID# BYHP, PCGS# 7452

## PROOF COMMEMORATIVE GOLD

1903 Louisiana Purchase Gold Dollar  
McKinley Obverse Type, PR65 Cameo  
Rare Early Striking in Proof Format

**3358** 1903 Louisiana Purchase McKinley Gold Dollar PR65 Cameo PCGS. The 1903 gold dollars depicting presidents Thomas Jefferson and William McKinley were issued in conjunction with the Louisiana Purchase Exposition, held in St. Louis in 1904 — one year before the Lewis and Clark Exposition was held in Portland, Oregon. The Louisiana Purchase Expo gold dollars were the first gold commemoratives struck by the U.S. Mint (excluding the 1848 CAL. quarter eagle). The first 100 pieces of each design struck were produced in proof format and given to government and exposition officials, along with a few others who were well-connected. The original packaging for these proofs was a wax-sealed paper window on an imprinted card, secured inside a large frame for display. Almost none of the coins remain in or are even accompanied by their original frames today.

This Gem Cameo example of the McKinley proof is deeply reflective and fully struck. A few faint coppery colorations appear in the fields, but the coin is otherwise bright yellow-gold overall. Neither side has mentionable contact marks. Population: 5 in 65 Cameo, 4 finer; 0 in 65 Deep Cameo, 1 finer (9/19). NGC ID# BYMG, PCGS# 87483

## MODERN BULLION COIN

2000 Silver Eagle, MS70  
Millennium Set

**3359** 2000 Millennium Set Silver Eagle MS70 PCGS. A total of 75,000 three-piece Millennium sets were sold, which included these Silver Eagles, the new Sacagawea dollars, and \$1 Federal Reserve notes. This is a satiny, fully brilliant example in pristine MS70 condition. One of five examples at this level at PCGS (9/19). NGC ID# 26JZ, PCGS# 9969

## TERRITORIAL GOLD

1849 Norris, Gregg, & Norris Half Eagle, MS61  
Rare Period After ALLOY, Plain Edge Type , K-2

**3360** 1849 Norris, Gregg, & Norris Five Dollar, Plain Edge, MS61 NGC. K-2, R.5. Period after ALLOY. Norris, Gregg, & Norris was one of the earliest — if not the earliest — issuers of private gold coinage in California. The 1849 Plain Edge half eagles were struck sometime in May 1849. The half eagles are of remarkably good workmanship given what must have been rudimentary facilities. Evidence suggests the Norris, Gregg, & Norris half eagles were struck from 100% California gold, naturally alloyed with silver, without any admixture or parting acids to alter the alloy in line with Federal standards.

Still, the coins were confirmed to contain 1% greater than standard gold content by weight, and traded at a premium in Eastern banking establishments. This example is sharply struck with partially reflective fields. It displays the greenish-gold color of native California gold, and has acquired a faint speckling of olive-gray patina. The eagle is fully struck, and a fully discernible period exists after ALLOY. We expect this earliest of California private mint gold coins to elicit strong bids from Territorial gold specialists. Listed on page 400 of the 2020 *Guide Book*. NGC ID# ANJD, PCGS# 10279

1852 U.S. Assay Office \$50 Gold  
AU Sharpness  
Reeded Edge, 887 THOUS., K-13

**3361** 1852 Assay Office Fifty Dollar, 887 THOUS, K-13, Low R.5 — Improperly Cleaned — NGC Details. AU. One of the enduring symbols of the California Gold Rush, the 1852 octagonal fifties remain in strong demand among collectors in all grades and conditions. Few pieces survived melting upon opening of the San Francisco Mint in 1854, and those octagonal “ingots” that do survive often show impairments and signs of handling to be expected for such a heavy, awkward coin.

This example retains much appeal despite the noted cleaning. Pleasing rich-gold color exists on both sides, and the corners show only one or two minor bumps. The engine-turned reverse is exceptionally well-preserved. Most signs of cleaning are seen on the obverse, which is a bit bright. The peripheral lettering is lightly impressed but readable, with numerous abrasions among the letters. The upper shield and eagle's lower half are weakly struck as well, while About Uncirculated sharpness remains among the other elements. Listed on page 402 of the 2020 *Guide Book*.

1852 Assay Office Ten, AU58  
Popular K-12a Variety, Faint Beads

- 3362** 1852 Assay Office Ten Dollar AU58 NGC. K-12a(2), Faint Beads, R.4. Upon retirement of John L. Moffat, the remaining partners of Curtis, Perry, and Ward reorganized to run the United States Assay Office under contract with the Federal government. Augustus Humbert continued as U.S. Assayer. Ten and twenty dollar gold pieces were produced in quantity to meet the needs of local commerce — slightly overweight to compensate for .884 fineness, less than Federal standard. This is a near-Mint ten dollar coin, well-struck and attractive, with lightly patinated greenish-gold color and soft remaining luster. Listed on page 404 of the 2020 *Guide Book*. Census: 24 in 58 (1 in 58+), 41 finer (9/19). NGC ID# ANGV, PCGS# 10001

1853 Assay Office Ten Dollar, AU53  
K-16, Rare 900 Fineness Variety

- 3363** 1853 Assay Office Ten Dollar, 900 Thous, AU53 NGC. K-16, Low R.6. Struck between March and April 1853, the Kagin-16 ten dollar gold pieces required a bit of fancy footwork by Augustus Humbert, who skirted the precepts of the August 31, 1852 law requiring .900 fineness of all gold coinage. Unable to provide the required admixture of copper without proper parting acids, Humbert continued to strike coins of lesser fineness (but increased alloy to meet Federal standards). Once the parting acids arrived in early March 1853, any .880 and .884 coins were melted and .900 ten and twenty dollar gold pieces were produced. This is a sharply struck and well-produced .900 fineness ten dollar piece, struck on new equipment provided to the U.S. Assay Office in preparation for opening of the official San Francisco Mint in 1854. Olive-gold color deepens within the recesses, with orange accents around the raised devices. Only light abrasions are seen for a Territorial gold piece, most of which saw rigorous circulation or melting upon opening of the new branch mint. Listed on page 404 of the 2020 *Guide Book*. Census: 1 in 53, 17 finer (9/19). NGC ID# ANHB, PCGS# 10007

1861 Clark, Gruber & Co. Five  
Choice XF, Kagin-6

- 3364** 1861 Clark, Gruber & Co. Five Dollar XF45 PCGS. K-6, R.4. The second and final year of Clark, Gruber & Co. Colorado coinage took place in 1861. Unlike the 1860 ten and twenty dollar issues, all four 1861 denominations closely imitated their Federal counterparts, though the legends differed. The present lemon-gold representative exhibits less wear than anticipated for the XF45 level, though the centers show the softness of impression usual for the private territorial facility. The slightly luminous surfaces display a smattering of thin marks. Listed on page 416 of the 2020 *Guide Book*. Population: 7 in 45, 36 finer (9/19). NGC ID# ANK2, PCGS# 10140

1861 Clark, Gruber Gold Ten Dollar  
K-7, AU Sharpness

- 3365** 1861 Clark, Gruber & Co. Ten Dollar — Rim Repaired — PCGS Genuine. AU Details. K-7, R.4. The exact nature of the rim repair is not obvious, although it might be in the vicinity of stars 6 to 9, where some tooling is visible among the stars and rim to remove some deep build-up or alloy spots. A horizontal planchet lamination exists between the tip of Liberty's nose to star 4. Olive-gold surfaces are otherwise smooth and minimally abraded, while the strike is sharp except at the eagle's neck and head. A pleasing and historic relic of Colorado's Gold Rush, when Pike's Peak gold spawned the beginnings of the Denver Mint through the entrepreneurship of Clark, Gruber & Co. Listed on page 416 of the 2020 *Guide Book*.

CALIFORNIA FRACTIONAL GOLD

1853 Arms of California Half Dollar, MS64  
Enigmatic Period One Fractional Gold, BG-435

- 3366** 1853 Arms of California 50 Cents, BG-435, Low R.5, MS64 PCGS. The 1853 Arms of California round 50 cent type is distinctive among all Period One (1852-1857) fraction gold pieces, both for its design and its enigmatic origin. The Breen-Gillio reference suggests Braverman & Levy is a possible issuer, although officially the variety remains the work of an unknown maker. The central obverse motif is a crude rendition of the State Seal of California, while the reverse design takes its inspiration from the Humbert fifty dollar octagonal slugs that circulated at the time.

Several known pieces show signs of circulation, an important consideration placing the Arms of California pieces alongside other Period One round halves. This example is a near-Gem Uncirculated example, with prooflike fields, sharply struck devices, and attractive orange-gold color. Marks are limited to a few faint abrasions, virtually insignificant on this tiny coin. Vibrant luster adds to the eye appeal. Housed in a PCGS Generation 4.0 blue-label holder, with barcode on the back. Population: 10 in 64, 5 finer (9/19). NGC ID# 2BKU, PCGS# 10471

1882 BG-892 Fractional Gold Piece, MS65  
Rare Indian Round Twenty-Five Cents

- 3367** 1882 Indian Round 25 Cents, BG-892, High R.7, MS65 NGC. Issued by the firm Nast, Greenzweig & Co. of San Francisco, this Indian round issue was suppressed by the efforts of Secret Service Chief James J. Brooks through his operative, Col. Henry Finnegan, and few pieces survive. The small rounds were struck on copper planchets, then plated with silver, and finally gold-plated. This example is a brilliant and prooflike Gem, one of fewer than a dozen survivors, and it is tied for second or third in the Condition Census for the variety. In 2012, we sold an MS66 PCGS BG-892 for \$17,250 (FUN Signature, 1/2012), lot 6889 — perhaps the finest-known of the type. NGC ID# 2BVU, PCGS# 10753

PHILIPPINES

1905 Philippines Peso, PR65  
Only 471 Proofs Struck

- 3368** 1905 Philippines Peso PR65 NGC. The 1905 is the lowest-mintage proof peso in the Philippines series struck under United States sovereignty. Only 471 pieces were coined. NGC has certified 44 survivors in all grades, none Cameos. This Gem displays a sharp strike and reflective fields. The devices are satiny. Delicate gold, lilac, and olive-russet toning graces each side, with the deeper hues clinging to the recesses near the borders and devices. Census: 5 in 65, 4 finer (9/19). NGC ID# 2CAJ, PCGS# 90404

PATTERNS

1857 Cent in Copper-Nickel  
Judd-186, PR63

- 3369** 1857 One Cent, Judd-186, Pollock-222, High R.7, PR63 PCGS. The obverse depiction of Liberty is the same as on the 1865 three cent nickel, but stars replace the peripheral legend. The reverse features the denomination within a wreath. UNITED STATES OF AMERICA does not appear on this rare pattern. Struck in copper-nickel with a plain edge. Medallion turn. The surfaces are clearly of copper-nickel composition when closely examined, but each side displays significant gray-lilac patina which partially subdues the flash from the mirrored proof fields. PCGS# 11815

1858 Flying Eagle Cent in Copper-Nickel  
Judd-206, PR65

- 3370** 1858 Flying Eagle Cent, Judd-206, Pollock-242, R.5, PR65 PCGS. Snow-PT16. Paquet's Small Eagle pattern obverse is paired with the regular issue Low Leaves reverse. Struck in copper-nickel with a plain edge. The surfaces display pronounced red color and at first we thought this might be one of the rare copper strikes. However, close examination of the squared-off rims show the much lighter lilac color one expects from a copper-nickel composition. The fields show remarkable depth of reflectivity and enhance the overall red seen across both sides. NGC ID# 29BM, PCGS# 11877

1863 With Motto Half Dollar in Silver  
Judd-340, Toned PR66

- 3371** 1863 Half Dollar, Judd-340, Pollock-412, Low R.6, PR66 NGC. Virtually identical to the adopted design with the motto GOD OUR TRUST included in the upper reverse field without a banner or scroll. Struck in silver with a reeded edge. Also struck in copper with about two dozen known in each composition. This piece displays remarkably deep mirrors in the fields on each side which greatly enhance the multicolor patina seen throughout. Fully struck. NGC ID# 29FU, PCGS# 60502

1865 No Motto Half in Copper  
Judd-432, PR63 Red

- 3372** 1865 Half Dollar, Judd-432, Pollock-505, R.7, PR63 Red PCGS. Dies trials striking of the 1865 Seated half dollar. Struck in copper with a reeded edge. Radiant, cherry-red surfaces are free of even the faintest patina. Bright features and a minimum number of noticeable distractions suggest an even higher grade.  
Ex: ANA Signature (Heritage, 8/2001), lot 8339, where it brought \$3,220; Collection of William Rau / Central States Signature (Heritage, 4/2018), lot 4964. PCGS# 80617

1867 Three Dollar in Nickel  
Judd-597, PR58

- 3373** 1867 Three Dollar, Judd-597, Pollock-661, R.8, PR58 NGC. The regular issue design for the 1867 three dollar gold piece. Struck in nickel with a reeded edge. At least three examples of this pattern variety are known. What is not known are the circumstances surrounding the issue of these pieces. They are alleged to be off-metal dies trial strikings, but more likely is the profit motive. They were probably struck a few years later for sale to collectors. Examples are also known in copper and silver, thus the possibility that three-piece sets of these patterns were sold by the Mint. Alternatively, Saul Teichman (USPatterns.com) suggests that they might be mint errors, struck on planchets intended for Shield nickels. Both denominations have exactly the same diameter, so his theory is certainly possible. The surfaces of this piece are bright with pale color. A distinctive planchet void is seen to the left of the 3 as a reliable pedigree identifier.  
Ex: ANA Signature (Heritage, 8/2001), lot 8344; William Rau Collection / Central States Signature (Heritage, 4/2018); Central States Signature (Heritage, 4/2019), lot 4566. NGC ID# 29MS, PCGS# 60809

1870 Double Eagle in Aluminum  
Judd-1039, AU55

- 3374** 1870 Twenty Dollar, Judd-1039, Pollock-1174, High R.7, AU55 PCGS. A small number of 1870 proof sets, from the cent through the double eagle, were struck in aluminum, presumably as an offering to well-placed collectors of the day. This rare die trials piece is struck from regular issue dies in aluminum with a reeded edge. About a half-dozen copper examples are known, but only three pieces are believed extant in aluminum. Curiously, this piece shows evidence of friction. It is unlikely to have circulated since no commercial value could have been established for an aluminum striking, so it must have been carried for a considerable time as a pocket piece. Numerous small to medium-sized contact marks accrued to the surfaces over those years; yet, the fields are still deeply reflective. An interesting and unusual pattern. NGC ID# 2A2E, PCGS# 61288

1871 Seated Liberty Dollar in Silver  
Judd-1146, PR61

- 3375** 1871 Dollar, Judd-1146, Pollock-1288, Low R.7, PR61 NGC. The obverse features Longacre's design for Seated Liberty wearing an Indian headdress and supporting a liberty pole with her right hand faces left. Her left hand rests on a globe inscribed LIBERTY. Behind her is a flag ornamented with 22 stars. Thirteen stars surround, the date 1871 is at the bottom. The reverse is from the die used for regular issue Liberty Seated dollars. Struck in silver with a plain edge. Struck in silver, copper, and aluminum and each metal has plain and reeded edge variants. The fields show signs of hairlines from cleaning and there are a few small contact marks that also contribute to the grade. Mostly brilliant. NGC ID# 2A58, PCGS# 61408

1883 Liberty Nickel in Nickel  
Judd-1707, PR67 Cameo

- 3376** 1883 Liberty Nickel, Judd-1707, Pollock-1913, Low R.6, PR67 Cameo NGC. The central obverse device is similar to the head of Liberty adopted on the regular issue five cent pieces of this year, the date is below, with UNITED STATES OF AMERICA around the margin. The reverse shows the experimental nature of this pattern with 75 N./25 C. in the center, surrounded by a wreath of cotton and corn, FIVE on the upper border, CENTS on the lower border, with 13 stars arranged seven left and six right at the margin. Struck in a magnetic alloy of 75% nickel and 25% copper with a plain edge. Both sides are brilliant with strongly contrasting mint frost over the devices. The design high points show slight softness of strike, as one would expect from a planchet with such a high percentage of nickel in the alloy. PCGS# 389201

### End of Session One

## SESSION TWO

### COLONIALS

1652 Oak Tree Threepence, Fine 12  
Noe-28, Salmon 6-B

- 3377** 1652 Oak Tree Threepence, Fine 12 PCGS. Noe-28, W-310, Salmon 6-B, R.4. The slightly uneven strike weakens the upper portion of the oak tree as well as the AT in MASATHVSETS. The reverse is weak on the corresponding GLA in ENGLAND. The remainder of the coin is well-defined, despite moderate wear. Both sides have deep steel-gray patina with mild granularity in the fields. The reverse is well-centered on the planchet, although the obverse is slightly off-center toward 12 o'clock, obscuring the beaded border at 6 o'clock. Listed on page 40 of the 2020 *Guide Book*. NGC ID# 2ARH, PCGS# 18

1652 Pine Tree Sixpence, VF30  
Noe-33, Off-Center Obverse  
Well-Centered Reverse

- 3378** 1652 Pine Tree Sixpence, Pellets at Trunk, VF30 PCGS. CAC. Noe-33, W-670, Salmon 2-B, R.3. This CAC-endorsed, cream-gray sixpence shows glimpses of deeper toning within crevices of the designs. The obverse is misaligned toward 11 o'clock, diagnostic for Noe-33. Later dies exist with a vertical break between 1 and 6 in the date. The coin is moderately wavy from striking with rocker dies, but wear is mostly even except for the obverse high point at 9 o'clock. Listed on page 41 of the 2020 *Guide Book*.  
Ex: Central States Signature (Heritage, 5/2007), lot 9; FUN Signature (Heritage, 1/2012), lot 3943; FUN Signature (Heritage, 7/2016), lot 3002. NGC ID# BYVT, PCGS# 45367 Base PCGS# 22

1652 Pine Tree Shilling, VF35  
Large Planchet, Reversed N, Noe-6

- 3379** 1652 Pine Tree Shilling, Large Planchet, Reversed N, VF35 PCGS. Noe-6, W-720, Salmon 5-Di, R.6. 73.1 grams. A wonderfully original collector-grade example of this scarce Large Planchet, Reversed N variety. As often seen on the variety, the 6 o'clock area is compromised by the rocker press effect, with strike softness and accentuation of reverse die flaws — here seen with a notched planchet split precisely in that area. The surfaces are otherwise Choice for the VF level, and a case could be made for a higher numeric grade based on the unaffected portion of the flan. Listed on page 41 of the 2020 *Guide Book*. Population: 2 in 35, 21 finer (8/19). NGC ID# 2ARX, PCGS# 45372 Base PCGS# 23

1652 Pine Tree Shilling, XF40  
Small Planchet, Noe-16

- 3380** 1652 Pine Tree Shilling, Small Planchet, XF40 PCGS. Noe-16, W-835, Salmon 2-B, R.2. 71.0 grains. The middle die state with a break on the lower left branches and lesser breaks between 4:30 and 6 o'clock. This Pine Tree type coin has powder-blue, straw-gold, and cream-gray fields. The highpoints are stone-white. All legends are clear and complete, and about half of the outer beads are present. No marks are remotely consequential. Listed on page 41 of the 2020 *Guide Book*. NGC ID# 2ARZ, PCGS# 24

**1779 Rhode Island Ship Medal, AU55  
No Wreath Below Ship, Betts-562  
'VLUGTENDE' Removed**

- 3381** 1779 Rhode Island Ship Token, No Wreath, Brass, AU55 NGC. Betts-562, W-1730, R.4. Most of these medals are holed as if they are struck in copper, but research indicates all were struck in brass. An area exists below Admiral Howe's ship, crudely effaced to remove the word "VLUGTENDE," which was intended to be the Dutch word for *fleeing*. Exactly who was fleeing came into question, and the word (already misspelled) was removed. This is a Choice About Uncirculated example, with glossy reddish-brown surfaces and sharp devices. Listed on page 52 of the 2020 *Guide Book*. NGC ID# 26LC, PCGS# 588

**1787 Massachusetts Cent, MS62 Brown  
Scarce Ryder 4-C**

- 3382** 1787 Massachusetts Cent, Arrows Left, Bowed Head, R. 4-C, W-6100, Low R.4, MS62 Brown NGC. A glossy medium brown commonwealth copper. No marks are more than incidental, and the high points show only slight blending. The "Bowed Head" Ryder 4-C is a somewhat better variety, identified by die flaws near the W in WEALTH and the M in MASSACHUSETTS. Listed on page 61 of the 2020 *Guide Book*. PCGS# 688948 Base PCGS# 302

- 3383** 1786 Connecticut Copper, Mailed Bust Left, M. 5.5-M, W-2595, R.3, AU55 PCGS. Die alignment: 195°. A Choice AU 1786 Connecticut copper is always remarkable, and the present coin seems certain to rank high among its few peers. Light tan coloration with copper undertones mellows to darker brown in a few areas mostly on the obverse. While the centers are a bit weakly struck, the peripheries are rather strong, with a bold date and legends. There are few surface marks — indeed, the original Newman envelope called it uncirculated. Superior to any of the Ford, Taylor, or Perkins pieces. The reverse is a somewhat early die state, for while the crack extending clockwise from INDE is visible, the die failure at Liberty's shins is just becoming apparent. Listed on page 62 of the 2020 *Guide Book*.

Ex: Eric P. Newman Collection, Part IX (Heritage, 11/2017), lot 15029; Long Beach Signature (Heritage, 2/2018), lot 3015. PCGS# 686354 Base PCGS# 331

- 3384** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS63 Brown NGC. N. 8-X, W-6750, R.3. With a massive die break at the lower obverse. According to Bowers, 189 examples remained as part of the Bank of New York Hoard in 1948. This deep brown example is well-defined, except at the upper reverse, corresponding to the obverse break. Listed on page 89 of the *Guide Book*. NGC ID# AX5E, PCGS# 883

- 3385** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays — Struck on Defective Planchet — MS63+ Brown PCGS. N. 13-X, W-6855, R.2. A mark-free chocolate-brown representative with glimmers of the initial red in selected design crevices. The strike is bold except on the obverse exergue and the opposite upper reverse. The planchet flaw noted on the PCGS holder is mostly on the sundial and impacts the Roman numerals IV and V. Listed on page 89 of the 2020 *Guide Book*. Ex: FUN Signature (Heritage, 1/2015), lot 3040, which realized \$2,232.50.

**1791 Washington Large Eagle Cent, MS63 Brown  
Baker-15**

- 3386** 1791 Washington Large Eagle Cent MS63 Brown PCGS. Baker-15, W-10610, Musante GW-15, R.2. This boldly struck and semiprooflike example is principally medium brown and steel-blue, although glimpses of mint red reside in protected areas of the reverse. The obverse has a few tiny and unimportant gray spots. Teenaged engraver John Gregory Hancock of the Westwood Mint struck the Large Eagle and Small Eagle cents in an attempt to secure a Federal coinage contract. Instead, the United States established its own mint in 1793. Listed on page 83 of the 2020 *Guide Book*. Population: 26 in 63 Brown, 36 finer (9/19). Ex: National Money Show Signature (Heritage, 3/2008), lot 116. NGC ID# 2B6Z, PCGS# 702

**1795 Washington Grate Halfpenny, MS65  
Baker-29B, Red and Brown Surfaces**

- 3387** 1795 Washington Grate Halfpenny, Large Buttons, Reeded Edge, MS65 Red and Brown PCGS. Baker-29B, W-10955, GW-49, R.2. Large Buttons, with a reeded edge that slopes down to the right. This delightful Gem exhibits sharply detailed design elements, with fine definition on Washington's hair. The well-preserved surfaces are mostly chocolate-brown and crimson, with traces of original red at the peripheries. Listed on page 85 of the 2020 *Guide Book*. Population: 2 in 65 Red and Brown, 0 finer (9/19). NGC ID# 2B7M, PCGS# 747

(Circa-1864) Higley Copper, MS65  
Bolen Brass Facsimile, Musante JAB-10

- 3388** (circa-1864) Higley Copper, J.A. Bolen Facsimile, Brass, MS65 PCGS. Kenney-4, Musante JAB-10, W-14275, Low R.7. The Musante variety JAB-10 is typically found in copper, and is very rare in brass or silver. The tenth example we have handled in the last two years, yet only the fourth in this composition. This important brass example exhibits brilliant yellow luster ceding to deep gold toning in the peripheral areas of each side. PCGS# 535247

## HALF CENTS

- 3389** 1794 Normal Head, Small Edge Letters, C-4a, B-6b, R.3, VF20 PCGS. Manley Die State 3.0. The Small Letters Edge subvariety. The usual die state for the variety with prominent clash marks and a sizeable field bulge to the left of the date. Toned tan-brown overall with glimpses of mahogany-red. Void of abrasions, though mildly granular on portions of the right-side margins. Our EAC grade Fine 12.  
Ex: FUN Signature (Heritage, 1/2013), lot 3805. NGC ID# 2223, PCGS# 35036 Base PCGS# 35015
- 3390** 1797 Plain Edge, Low Head, C-3a, B-3c, R.3 — Scratches — Struck on Cut Down Large Cent — NGC Details. Good. Struck on a cut-down large cent — likely Sheldon-139 — that was originally struck off-center. The undertype is about 50% off-center toward 2 o'clock relative to the obverse, showing a clear AME and dentils. The coin shows moderate wear and scattered contact marks, including some old pinscratches on each side. Deep chocolate-brown surfaces are faintly granular. Our EAC grade AG3. NGC ID# 2WCM, PCGS# 35110 Base PCGS# 35107

1803 C-3 Half Cent, AU58  
Middle Die State

- 3391** 1803 Widely Spaced 3, C-3, B-3, R.1, AU58 PCGS. Manley Die State 3.0. The obverse die is bulged through the 18 in the date, and clash marks are clear at Liberty's throat. A curving die crack from the dentils extends downward through the right arm of the second T in STATES, toward the F in HALF. This near-Mint coin is well-detailed save for some softness on the highest wreath leaves. Medium chestnut-brown surfaces a satiny and smooth with good eye appeal. Our EAC grade XF45. NGC ID# 222E, PCGS# 35134 Base PCGS# 1060

- 3392** 1804 Plain 4, No Stems, C-13, B-10, R.1 — Double Struck, Rotated in Collar — Obverse Cleaned — NGC Details. Fine. Manley Die State 2.0. Double struck on the obverse with the second, stronger impression rotated approximately 80 degrees clockwise from the first impression. Both outlines of Liberty's portrait are complete. The reverse shows areas of flatness, mainly in the margins, from being struck into a second planchet that prohibited the reverse from being double struck by the reverse die. The surfaces are smooth with medium chocolate-brown color and good eye appeal. Our EAC grade VG8.

- 3393** 1828 12 Stars, C-2, B-3, R.2, MS64 Brown NGC. The fields are incredibly smooth throughout this glossy chocolate-brown half cent. Stars 1 through 5 are slightly soft, as are a couple of the wreath leaves. However, this near-Gem is generally strong. The only 1828 12 Stars variety, and the final die marriage used during the year. Our EAC grade MS60. NGC ID# 222W, PCGS# 35264 Base PCGS# 1150

- 3394** 1857 C-1, B-1, R.2, MS65 Brown NGC. CAC. Manley Die State 1.0. From a final-year mintage of 35,180 pieces, this attractive Gem exhibits well-detailed design elements, with just a touch of softness on some star centers. The crimson-brown surfaces show no mentionable distractions. Our EAC grade MS62. NGC ID# 26Z3, PCGS# 35339 Base PCGS# 1239

## LARGE CENTS

- 3395** 1794 Head of 1793, S-19b, B-3b, R.4, AG3 PCGS. Breen Die State II. Well-worn but pleasantly smooth surfaces have medium walnut-brown color. The obverse is worn away at the rim, the date being weak and only the LIBER in LIBERTY visible. Liberty's portrait and the cap remain bold. The reverse has the usual strong border and is weak throughout the interior. Some small pits appear near the reverse rim at 7 o'clock. Our EAC grade AG3. NGC ID# 223N, PCGS# 35519 Base PCGS# 1362

1795 Cent, XF40  
S-78, B-8, Plain Edge

- 3396** 1795 Plain Edge, S-78, B-8, R.1, XF40 PCGS. The T in LIBERTY is centered over the curl, while the adjacent Y is right of it. Copper-orange accents complement the reddish-brown surfaces of this 1795 S-78 cent. Dentilation below the date and above STATES OF is strong but incomplete elsewhere. According to Breen, coins from this set of dies were often struck "on blanks showing numerous minute defects," as seen here. Our EAC grade VF30. NGC ID# 223T, PCGS# 35729 Base PCGS# 1380

- 3397** 1803 Small Date, Large Fraction, S-257, B-16, R.2, AU50 NGC. A splendidly defined cent with mildly prooflike steel-blue and mahogany-brown surfaces. Generally smooth, though we note a tiny obverse rim bump at 5:30 and a pair of brief thin marks behind the shoulder curl. Our EAC grade VF25.  
Ex: Sacramento ANA Signature (Heritage, 3/2011), lot 3035; Long Beach Signature (Heritage, 9/2011), lot 3132. NGC ID# 224G, PCGS# 36395 Base PCGS# 1485

**3398 1810/09 S-281, B-1, R.1, XF40 NGC.** S-281 is the sole overdated 1810 Sheldon die marriage, and one of the most popular Classic Head varieties. The blatant overdated digits provide immediate attribution. This is an attractive medium-to-deep-brown example, with faint red undertones, well-defined motifs, and semi-glossy surfaces. Marks are minor in nature. An oval area of light carbon exists below R in AMERICA. Our EAC grade VF30. Census: 8 in 40, 12 finer (8/19). NGC ID# 224T, PCGS# 36469 Base PCGS# 1552

**3399 1812 Small Date, S-290, B-2, R.1, AU53 NGC. CAC.** Breen Die State III. Block 8. The date digits are nearly level, unlike S-291, which has a high first 1. This ebony-brown cent exhibits light high point wear on the leaves and curls, but luster emerges from the motifs, stars, and legends when the coin is rotated beneath a light. Carbon is absent and the surfaces are only minutely granular. Our EAC grade XF40.

Ex: *Eric P. Newman Collection, Part V (Heritage, 11/2014), lot 3123; FUN Signature (Heritage, 1/2019), lot 3889, which realized \$2,400.* NGC ID# 224W, PCGS# 36499 Base PCGS# 1561

#### 1814 Plain 4 Cent, S-295, AU55 Pleasing Color, Smooth Surfaces

**3400 1814 Plain 4, S-295, B-2, R.1, AU55 PCGS.** Breen Die State VI. The Plain 4 variant is slightly scarcer than the crosslet 4. Reddish-brown surfaces are tinged with blue across surfaces that are mostly smooth and attractive. We note a tiny dig beneath the bow, a sizeable carbon between 1 and 4 in the date, and a short pinscratch between star 2 and the neck. Traces of luster remain at the margins of this pleasing 1814, which is well-struck except for a few of Liberty's curls that show a combination of light strike and brief wear. Our EAC grade XF45. NGC ID# 224Y, PCGS# 36517 Base PCGS# 1576

**3401 1837 Plain Cords, Medium Letters, N-4, R.2, MS66 Brown NGC.** Significant die cracks are present on the left and upper-obverse as well as the upper-right reverse. Generally teak-brown surfaces show ample blue overtones on the obverse and mahogany-rose tints on the reverse. Our EAC grade MS63.  
Ex: *Baltimore Signature (Heritage, 3/2009), lot 151.* NGC ID# 225U, PCGS# 37156 Base PCGS# 1735

**3402 1838 N-1, R.1, MS65+ Brown PCGS. CAC.** Diagnostics for the N-1 variety include a broken upper-left serif on the E in LIBERTY, doubling on the flag of the 1, repunching on the left side of the I in UNITED, and the O in OF is low. Glossy brown surfaces are well-struck in the centers, softening around the edges. Stars 10 to 14 show full radials. Smooth and eye-appealing. Our EAC grade MS63. NGC ID# 225V, PCGS# 37180 Base PCGS# 1741

#### 1839 Booby Head Cent, N-6, MS65 Brown Lustrous Original Surfaces

**3403 1839 Booby Head, N-6, R.2, MS65 Brown PCGS.** The line under CENT is omitted on this variety. On the obverse, the back end of the bust truncation overlaps the lower hair curls. This piece displays luminous satin mint luster and rich chocolate-brown surfaces. Highlights of silver and steel-blue glimmer in the fields when tilted beneath a light. Although several stars are weakly struck, the portrait and wreath exhibit sharp definition. Our EAC grade MS62. NGC ID# 225Z, PCGS# 37240 Base PCGS# 1751

**3404 1849 N-2, R.2, MS65 Brown PCGS.** A fairly early die state with die crumbling in the N in ONE and joining the tops of CE in CENT. Other die crumbling and die erosion is fairly minor. Bob Grellman listed 33 die states for this variety in his detailed study of the late date cents. We do not want to take the die state study of this piece away from the collector who enjoys such pursuits. Our EAC grade MS60.

Ex: *ANA Signature (Heritage, 8/2017), lot 3070, which realized \$1,762.50.* PCGS# 405637 Base PCGS# 1886

**3405 1853 N-25, R.1, MS67 Brown NGC.** Grellman Die State b. A 'bar' in the denticles between stars 1 and 2 plus slight repunching of the 1 and 3 in the date identify the die marriage. Forest-green and golden-brown shades invigorate this lustrous and well preserved Superb Gem. A few stars are incompletely brought up, but the major devices are intricately impressed. Our EAC grade MS63. Census: 7 in 67 Brown, 0 finer (8/19).

Ex: *FUN Signature (Heritage, 1/2009), lot 282.* NGC ID# 226K, PCGS# 403927 Base PCGS# 1901

#### FLYING EAGLE CENTS

**3406 1857 MS65 NGC.** An attractive Gem representative of this historic issue, with sharply detailed design elements and lustrous copper-red surfaces that have mellowed to light brown in some areas. No mentionable distractions are evident. Housed in new NGC holder commemorating the *Guide Book* and signed by Ken Bressett. NGC has graded 12 numerically finer examples (9/19). NGC ID# 226P, PCGS# 2016

#### 1858 Flying Eagle Cent, MS66 Large Letters Motif, Seldom Finer

**3407 1858 Large Letters MS66 PCGS.** High Leaves Reverse. Closed E in ONE. This is a high-grade example of the short-lived introductory small cent type. Flying Eagle cents are notorious for softness on the eagle's tail and the upper leaves of the reverse wreath, but the present piece approaches a full strike. The coin is devoid of apparent abrasions. The obverse legends are lightly strike doubled. Population: 48 in 66 (7 in 66+), 3 finer (9/19). NGC ID# 2277, PCGS# 2019

## INDIAN CENTS

- 3408 1859 MS65 PCGS.** While the 1859 cent is easily found, exceptionally struck pieces are much more difficult to locate. This Gem displays fully defined diamonds and sharp feather-tip detail. Golden-tan surfaces are imbued with blushes of violet and sky-blue, and the smooth, lustrous surfaces lack significant contact marks. Some tiny light flecks are scattered about, especially on the obverse. Ex: *FUN Signature (Heritage, 6/2008), lot 100.* NGC ID# 227E, PCGS# 2052

### 1864 Copper-Nickel Cent, MS66+ Only One Coin Certified Finer

- 3409 1864 Copper-Nickel MS66+ PCGS.** A high-end example of this final-year copper-nickel Indian cent, conditionally scarce in MS66 and rare with the Plus designation. PCGS has seen only a single Superb Gem finer, and NGC reports no finer examples (9/19). Satiny luster displays pleasing tan-gold patina. Some headdress feathers are weak at their tips, but the coin is otherwise well-struck. No distracting abrasions are seen. Population: 48 in 66 (5 in 66+), 1 finer (9/19). NGC ID# 227K, PCGS# 2070

- 3410 1864 Bronze No L MS66 Red PCGS.** The original red surfaces of this spectacular Premium Gem are well-preserved and lustrous and the design elements are sharply detailed throughout, with dramatic clash marks on both sides. Population: 45 in 66 (3 in 66+) Red, 3 finer (9/19). NGC ID# 227L, PCGS# 2078

### 1864-L Indian Cent, MS65+ Red and Brown Sharply Struck, CAC-Endorsed

- 3411 1864 L On Ribbon MS65+ Red and Brown PCGS.** CAC. This Plus-graded Gem is sharply struck throughout both sides, with the important L on the ribbon clearly visible to confirm the popular *Guide Book* variety. An intense peppering of blue-gray toning over fire-orange surfaces earns the Red and Brown designation, while the coin is free from carbon spots or other significant marks. The strike is razor-sharp on each of the feather tips and throughout the wreath. Minor repunching is visible at 864 of the date, with a small lump above the dentils beneath 1, suggesting Snow-8 (a minor variety). Population: 12 in 65+ Red and Brown, 17 finer. CAC: 48 in 65, 7 finer (8/19). NGC ID# 227M, PCGS# 2080

- 3412 1869/69 Snow-3, FS-301, MS65 Brown PCGS.** The 9 is boldly repunched, with moderate repunching visible at the top-right curve of 6. A die chip on the cheek and a short die line from the corner of Liberty's mouth between the lips all confirm the Snow-3, FS-301 designation. Struck from an early die stage, with light die clashing visible on the headdress between the last four feathers. Traces of mint red remain within the lustrous obverse fields, and more extensively on the reverse. Pleasing medium-brown toning covers the raised elements. Population: 6 in 65 Brown, 3 finer (9/19). NGC ID# 227T, PCGS# 37474 Base PCGS# 2094

- 3413 1872 MS64+ Red and Brown PCGS.** CAC. This Plus-graded Choice example displays well-preserved surfaces that show a mix of original red, crimson, and light brown patina. The design elements are sharply detailed and vibrant mint luster adds to the outstanding eye appeal. NGC ID# 227W, PCGS# 2104

- 3414 1872 MS65 Red and Brown PCGS.** The well-preserved surfaces of this impressive Gem show a mix of original red and light brown patina, with vibrant mint luster and no mentionable surface flaws. The design elements are well-detailed, with some loss of detail due to lapping. Population: 91 in 65 (3 in 65+) Red and Brown, 12 finer (9/19). NGC ID# 227W, PCGS# 2104

- 3415 1873 Open 3 MS65 Red PCGS.** The second of two date variants for this year, the 3 is noticeably wider on the left side than the Closed 3 variety. Early Indian cents are challenging to locate with intact mint color, and this Gem piece displays bright, yellow-tinged red mint luster. The coin is a bit softly struck on the tips of the feathers in the headdress. Population: 29 in 65 (1 in 65+) Red, 6 finer (8/19). NGC ID# 227Y, PCGS# 2108

- 3416 1876 MS64 Red PCGS.** The well-preserved original red surfaces of this pleasing Choice example show a few freckles of light brown on the reverse. The design elements are sharply detailed and vibrant mint luster adds to the outstanding eye appeal. Housed in a green label holder. Population: 61 in 64 Red, 62 finer (9/19). NGC ID# 2283, PCGS# 2126

- 3417 1877 XF45 PCGS.** This Choice XF example of the key-date 1877 Indian Head cent features a bold LIBERTY on the headband and strong, minimally worn devices. Smooth chocolate-brown surfaces exhibit lighter accents on the high points. NGC ID# 2284, PCGS# 2127

### 1878 Indian Cent, MS65 Red Snow-2, FS-301 Misplaced Date Sole Finest in Full Red

- 3418 1878 Misplaced Date, Snow-2, FS-301, MS65 Red PCGS.** The Snow-2 variety (*Cherry-pickers'* FS-301) features bold misplaced digits in the dentils, where the tops of an errant 7 and 8 are sharply visible. This dramatic variety is seldom encountered and unusual in the Indian cent series, often underappreciated by the collecting community. The present Gem example is the sole-finest MS65 Red Snow-2 certified — a splendid, sharply struck coin with vivid-orange luster and a faint speckling of reddish-tan patina. A solitary pale-gray fleck below N in CENT is nondistracting, and a network of wispy die cracks exists on both sides. Population: 1 in 65 Red, 0 finer (8/19). PCGS# 37512 Base PCGS# 2132

- 3419 1893 MS66 Red PCGS.** Brick-red obverse color yields to tan-gold toning on the reverse of this sharply struck Premium Gem Red cent. The strike is sharp throughout the finely granular surfaces, and there are no significant marks or bothersome carbon to report. Mint luster radiates from both sides. Population: 44 in 66 (7 in 66+) Red, 3 finer (8/19). NGC ID# 228M, PCGS# 2186

- 3420 1893 MS66 Red PCGS.** The well-preserved original red surfaces of this impressive Premium Gem show a scattering of microscopic obverse carbon spots under a loupe, but none are visible to the naked eye. The design elements are well-detailed and the surfaces radiate vibrant mint luster throughout. Population: 44 in 66 (7 in 66+) Red, 3 finer (9/19). NGC ID# 228M, PCGS# 2186

**3421 1902 MS67 Red NGC.** This spectacular Superb Gem exhibits sharply detailed design elements throughout, with impeccably preserved original red surfaces that radiate vibrant mint luster from both sides. Eye appeal is terrific. Census: 19 in 67 Red, 1 finer (9/19). NGC ID# 228X, PCGS# 2213

**3422 1908-S MS66 Red and Brown PCGS.** The San Francisco Mint transitioned to minor coinage in 1908, with the 1908-S cent among its first attempts of the lesser denominations. Produced on presses designed for silver coinage, the low-mintage 1908-S was struck on planchets often improperly alloyed. This lustrous Premium Gem Red and Brown example displays vibrant golden color with an intense freckling of tan-orange patina. The strike is sharp except on the first three headdress feather tips, which lack interior detail. Population: 24 in 66 (1 in 66+) Red and Brown, 0 finer (8/19). NGC ID# 2296, PCGS# 2233

#### 1908-S Indian Cent, MS66 Red First Mintmarked Cent Issue

**3423 1908-S MS66 Red PCGS.** Although the 1908-S was probably saved to some degree as the first mintmarked cent, the 1909-S Indian was widely saved as the last of the series (and the general collecting public saved many more 1909-S VDB Lincoln cents as a novel new design). The San Francisco cents of 1908 and 1909 were struck on lighter-colored planchets than earlier cent issues. This 1908-S example offers lovely, original surfaces of tan-gold. While the strike atop the headdress feather is not razor-sharp, this Premium Gem coin is virtually unafflicted by carbon or marks. Just one piece has achieved the Superb Gem Red level at PCGS. Population: 75 in 66 (16 in 66+) Red, 1 finer (8/19).

*Ex: Denver Signature (Heritage, 8/2006), lot 270.*

**From The Jona Collection, Part II.** NGC ID# 2296, PCGS# 2234

**3424 1909 MS66 Red PCGS. CAC.** A boldly impressed Premium Gem from this final Indian cent issue. The reddish-orange surfaces are uncommonly vibrant with impressive fiery luster. A needle-sharp strike exists on both sides, while carbon is limited to inconsequential pinprick flecks, no more than a handful on each side. The eye appeal is nothing short of astonishing, earning CAC endorsement. NGC ID# 22AZ, PCGS# 2237

**3425 1909-S MS65 Brown PCGS. CAC.** The 1909-S Indian cent has a lower mintage than any Lincoln business issue, even the famous 1909-S VDB. This mark-free Gem has a steel-gray center and a variegated russet-brown border. The strike is crisp except on the upper headdress feather tips. NGC ID# 22B4, PCGS# 2238

## PROOF INDIAN CENTS

### 1877 Indian Cent, PR64 Red and Brown Mostly Red Proof

**3426 1877 PR64 Red and Brown PCGS.** The bold N in ONE identifies this 1877 Indian cent as a proof, and the fields are indeed reflective. A few flecks are visible with a loupe, but this Red and Brown near-Gem is still eye-appealing for the grade. Sharp devices are softly frosted, and each side displays mainly copper-orange color with shades of amber that prevent a full Red designation. NGC ID# 229W, PCGS# 2319

**3427 1881 PR67 Brown NGC.** Vivid shades of violet-blue and lilac toning blanket the virtually flawless surfaces of this spectacular Superb Gem proof, with razor-sharp design elements and deeply reflective fields underneath. Census: 5 in 67 (1 in 67★) Brown, 0 finer (9/19). NGC ID# 22A2, PCGS# 2330

## LINCOLN CENTS

**3428 1909-S VDB MS63 Red and Brown PCGS.** Traces of colorful iridescence exist beneath overall copper-orange color throughout the lustrous, smooth, and attractive Select Uncirculated surfaces of this appealing 1909-S VDB. Microscopic pinpoint specks pepper the obverse. We note a small, faint carbon above and left of the date, and another near the sharply struck V.D.B. initials at the lower reverse, none of which detract from the bold, natural eye appeal. NGC ID# 22B2, PCGS# 2427

**3429 1909-S VDB MS64 Red and Brown PCGS.** The obverse of this original and well-preserved key issue shows prominent Red color, while an evenly mellowed reverse suggests that the coin may have once resided in a cardboard-backed album. A sharp strike covers each side, with few marks visible on the lustrous, near-Gem surfaces even with the aid of a strong loupe.  
*Ex: Long Beach Signature (Heritage, 6/2002), lot 5340.* NGC ID# 22B2, PCGS# 2427

### 1909-S VDB Cent, MS65 Red and Brown Outstanding Aesthetic Appeal

**3430 1909-S VDB MS65 Red and Brown NGC.** Smooth and lustrous fire-orange surfaces have acquired bluish-brown overtones to justify the Gem Red and Brown designation by NGC. More red than brown, this sharply struck cent is free of any significant marks, and only a few tiny carbon flecks exist, easily overlooked amid the attractive, original patina. The demand for sharp and problem-free, Gem-quality 1909-S VDB examples easily outpaces the supply, and no shortage of bidders will vie to own this outstanding representative. NGC ID# 22B2, PCGS# 2427

1909-S VDB Lincoln Cent  
CAC-Approved MS65 Red and Brown

- 3431 1909-S VDB MS65 Red and Brown NGC. CAC. Housed in an early generation NGC holder with CAC endorsement, this sharply struck 1909-S VDB is softly lustrous beneath an attractive freckling of reddish-brown patina, with a surfeit of original mint red color throughout both sides. There are no marks or carbon that interrupt the smooth, well-preserved surfaces, suggesting that this splendid Red and Brown Gem is worthy of an even finer grade. *From The Jona Collection, Part II.* NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red  
Iconic Key Date

- 3432 1909-S VDB MS65 Red PCGS. The iconic 1909-S VDB Lincoln cent claims a small mintage of 484,000 coins. Every element of the design is strongly raised on this Gem example, especially the reverse, including Brenner's initials. Faint die flow lines appear in the clean obverse fields. Each side displays radiant mint luster and warm coppery-gold color. Scarce any finer. NGC ID# 22B2, PCGS# 2428

1909-S VDB Lincoln Cent, MS65 Red  
In a Green Label Holder

- 3433 1909-S VDB MS65 Red PCGS. A sharp, satiny Gem example of this key date, showing original copper-orange mint luster. Both sides have the faintest trace of a woodgrain pattern of chestnut color on each side, although the overall impression of this coin is still full Red. A few faint flecks do not detract. Housed in a green label holder. NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS65 Red  
Rich, Brassy-Red Color, CAC

- 3434 1909-S VDB MS65 Red PCGS. CAC. Rarity has little to do with the popularity of the 1909-S VDB, which gained a reputation for greatness early on, and never looked back. Demand continues unabated, and Gem Red 1909-S VDB remains one of the ultimate collector coins of the entire Federal series. This is a sparkling, high-end Gem example, with deep-red toning accents surrounding brassy-red interiors. The strike is sharp, and no evidence of carbon exists. Housed in an early generation PCGS blue-label holder, with barcode on the back and CAC endorsement. NGC ID# 22B2, PCGS# 2428

- 3435 1912-S MS65+ Red PCGS. The 1912-S is a semikey early issue that was seldom located in the 1950s and 1960s when the great roll search was on. This is a high-end Gem with intact mint red luster. Sharply struck throughout. Population: 86 in 65 (10 in 65+) Red, 10 finer (9/19). NGC ID# 22BC, PCGS# 2458

- 3436 1913-D MS65 Red PCGS. CAC. Sharply struck for a 1913-D, this CAC-endorsed Gem Red coin displays prominent peach-orange luster flecked with attractive, soft-gray patina. A solitary mark behind Lincoln's head is visible under a loupe, and pedigrees this challenging Denver issue. CAC: 19 in 65, 7 finer (8/19). NGC ID# 22BE, PCGS# 2464

- 3437 1913-S MS65 Red PCGS. Red 1913-S cents are scarce, particularly in Gem condition. When finer than the MS65 level, the date becomes a major rarity that few collectors will be able to acquire. This MS65 Red coin displays attractive satin luster and lovely peach-gold color that has a rose tint throughout. Sharp design elements complement a lack of carbon spotting. Eye appeal is excellent. NGC ID# 22BF, PCGS# 2467

1916-S Cent, Original MS65 Red  
Tied for Finest at PCGS

- 3438 1916-S MS65 Red PCGS. Peach-orange color dominates the obverse, while the reverse deepens to a pale orange-red hue. Struck with the San Francisco dies widely spaced, this Red Gem Uncirculated 1916-S has some small marks from the original planchet that remain on Lincoln's shoulder and hairline. The devices are otherwise sharp except at AM in AMERICA. Brilliant mint luster glows from each side, and carbon is limited to a few microscopic flecks. Population: 28 in 65 Red, 0 finer (9/19). NGC ID# 22BR, PCGS# 2494

**1917 Cent, MS67 Red  
Conditionally Rare Registry Coin**

- 3439 1917 MS67 Red PCGS.** Luminous satin surfaces display shades of yellow-gold, rose, and peach color across this overall Red 1917 Lincoln cent. The coin is fully struck and devoid of mentionable abrasions. The 1917 is rarely offered this fine, and higher-grade Red pieces are virtually uncollectible. Population: 21 in 67 (3 in 67+) Red, 2 finer (9/19). NGC ID# 22BS, PCGS# 2497

**1922 No D Cent, AU53  
Strong Reverse, FS-401, Die Pair 2**

- 3440 1922 No D, Strong Reverse, FS-401, Die Pair 2, AU53 NGC.** CAC. The 1922 No D is a challenging coin to locate in About Uncirculated grades. The vast majority of known pieces are in low grades; also, a few coins exist in Mint State. At each end of the grading spectrum, the issue is relatively easy to grade. However, the present coin must be graded by how much luster remains, because the obverse is diagnostically mushy (except for the final 2 in the date). The reverse is extra-sharp and free of die wear. This example has a wealth of original mint gloss around the devices on each side. The surfaces display attractive, deep chocolate-brown color, and the only marks needing individual mention are some short nicks on Lincoln's forehead and another near the rim below 22 in the date. CAC endorsement confirms the quality.  
*Ex: Long Beach Signature (Heritage, 5-6/2007), lot 257.*  
**From The Jona Collection, Part II.** NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

- 3441 1932 MS67 Red PCGS.** With more than 9 million coins produced, the 1932 is anything but rare in an absolute sense. At the MS67 Red level, however, this date is elusive, and collectors who are assembling PCGS Registry Sets of this series should take note that there are no coins certified as MS68 Red or finer. The reddish-orange surfaces are smooth from rim to rim with virtually no carbon to report. Sharply struck and fully lustrous, both sides possess eye appeal to spare. Population: 43 in 67 (3 in 67+) Red, 0 finer (9/19). NGC ID# 85ZB, PCGS# 2623

**1933 Lincoln Cent, MS67+ Red  
Tied for Finest at PCGS, CAC**

- 3442 1933 MS67+ Red PCGS. CAC.** Plus-graded by PCGS and endorsed by CAC, this flashy-red Superb Gem cent is virtually free of obverse marks and carbon. Impressively preserver surfaces radiate mint luster, while the sharply struck portrait is fully brought up at Lincoln's shoulder and hairline. We note a pair of microscopic marks above O in ONE and a minor tick on the O, although the reverse is spectacular in all other regards. NGC ID# 22D7, PCGS# 2629

- 3443 1934 MS68 Red PCGS.** A small number of 1934 Lincoln cents qualify for the nearly impossible grade of MS68 Red — 28 coins at PCGS, six at NGC. None are Plus-graded, and none are finer. These top-grade coins are heavily sought-after as Registry Set candidates. The piece offered here displays frosty original luster and essentially flawless surfaces. Rich copper-orange interior hues cede to brighter golden margins. Eye appeal is outstanding. Population: 28 in 68 Red, 0 finer (9/19). NGC ID# 22D9, PCGS# 2635

- 3444 1934-D MS67 Red PCGS.** While the mintage of more than 28.4 million pieces is just a fraction of the 1934 Philadelphia mintage, this Denver issue is readily available up to the Superb Gem level. At MS67 Red, examples are rare. Pale-lilac accents enliven reddish-orange surfaces, with an absence of discernible carbons or marks. The strike is sharp throughout. Aside from seven Plus-graded coins, no numerically finer pieces exist at either PCGS or NGC. Population: 52 in 67 (7 in 67+) Red, 0 finer (9/19). NGC ID# 22DA, PCGS# 2638

- 3445 1936 Doubled Die Obverse, FS-101, MS63 Red and Brown PCGS.** Strong die doubling is obvious on the date, LIBERTY, and IN GOD WE TRUST to confirm this rare and important Mint State *Cherry-pickers'* and *Guide Book* variety. Two other lesser doubled die varieties exist for the issue, but the FS-101 (formerly FS-014) doubled die is the one sought by major variety specialists. Fire-orange hues yield to an overlay of bluish-brown toning on this Select Uncirculated example, which is seldom seen and nearly uncollectible any finer. Population: 2 in 63 Red and Brown, 2 finer (8/19). NGC ID# 22DE, PCGS# 37749 Base PCGS# 82649

**1943-D Steel Cent, MS68  
CAC-Approved Registry Coin**

- 3446 1943-D MS68 PCGS. CAC.** A spectacular strike from fresh dies, this high-end 1943-D steel cent is among the finest examples certified. It is a rarity with CAC endorsement. Zinc-silver luster illuminates both sides unhindered by toning or abrasions. The 1943-D is elusive in this high grade, and CAC-approved examples are on Registry Set collectors' want lists. NGC ID# 22E6, PCGS# 2714

**1944-D/S Cent, MS66 Red  
Scarcer FS-511 Variant**

**3447 1944-D/S FS-511 MS66 Red PCGS.** The *Cherrypickers'* reference states: "This variety is the 1944-D/S that is generally quoted in various price guides. This variety is much rarer than [FS-512]." FS-511 shows the upper portion of an S protruding from the top of the primary D mintmark. The S is quite prominent, earning the variety increased popularity. This Premium Gem example displays a bold strike and frosty copper-orange mint luster. A few small flecks do not detract. Population: 14 in 66 (2 in 66+) Red, 2 finer (9/19). NGC ID# 2734, PCGS# 37834 Base PCGS# 2728

**3448 1955 Doubled Die Obverse, FS-101, MS63 Brown PCGS.** A chocolate-brown example of this famous mint error. The obverse legends display a remarkable spread, and of equal significance, both hubbings are equally bold. Thorough study beneath a loupe locates minor marks, none of which particularly detract. Certified in an old green label holder.  
*Ex: Dallas Signature (Heritage, 11/2007), lot 169.* NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1958 Cent, MS67+ Red  
Elite Registry Set Coin, Tied Finest**

**3449 1958 MS67+ Red PCGS.** More than a quarter billion 1958 cents were struck, yet only three pieces survive in Superb Gem condition with the PCGS Plus designation. This obviously elite Registry Set contender is sure to draw much attention, with distinctive lilac accents around Lincoln's head and rich, reddish-orange color throughout the incredibly smooth, sharply struck surfaces. Eye appeal is tremendous. Population: 48 in 67 (3 in 67+) Red, 0 finer (8/19). NGC ID# 22FP, PCGS# 2848

**1972 Lincoln Cent, MS67 Red  
Guide Book Doubled Die Obverse**

**3450 1972 Doubled Die Obverse MS67 Red PCGS.** The 1972 double die cent is rightfully one of the most sought-after varieties in the Lincoln cent series. Wide doubling appears on the date, LIBERTY, and IN GOD WE TRUST — visible to the sharp unaided eye, and every bit as dramatic as other famous doubled dies in the series. This is a Registry Set caliber coin, essential to a complete set. The Superb Gem surfaces show just a handful of pinpoint specks, and a minor tick in the right obverse field. Lustrous, satin-smooth fields and devices emit fiery copper-orange color throughout both sides. Population: 65 in 67 (3 in 67+) Red, 1 finer (9/19). NGC ID# 22GT, PCGS# 2950

**PROOF LINCOLN CENTS**

**3451 1910 PR66+ Red and Brown PCGS.** The obverse retains much of its original red-orange color, with navy-blue accents forming along the Lincoln's jawline and throughout the fields immediately adjacent to the portrait. The reverse is a rich-brown color, which blossoms into forest-green, emerald, and deep-rose shades under direct light. This attractive matte proof is sharply struck, with mark-free surfaces and virtually no signs of carbon. Population: 3 in 66+ Red and Brown, 6 finer (9/19). NGC ID# 22KT, PCGS# 3307

**1914 Cent, PR66★ Brown  
Beautifully Toned**

**3452 1914 PR66★ Brown NGC.** NGC has awarded the Star designation to just two 1914 Premium Gem Brown proof cents, a situation that has not changed over at least the past 7 years. This PR66★ Brown example displays radiant powder-blue patina that consumes the obverse. The reverse exhibits amazing, dappled cherry-red and gunmetal-gray toning. Spectacular color is just one of the attributes offered by this nearly flawless, high-grade matte proof. The strike is needle-sharp, and there are no distracting marks of any kind. Mint luster glistens from every angle. Census: 16 in 66 (2 in 66★) Brown, 0 finer (9/19).  
*Ex: Houston Signature (Heritage, 11-12/2012), lot 3266, which realized \$3,407.50.* NGC ID# 22KX, PCGS# 3318

**3453 1914 PR66 Red and Brown PCGS.** Rich, evenly dispersed blue toning overlays glowing mint red hues across immaculate, finely textured surfaces of this outstanding Premium Gem matte proof cent. The strike is unfailingly sharp throughout both sides, and we can find nary a problem of any consequence on either side of this exceptional Red and Brown proof. Population: 43 in 66 (2 in 66+) Red and Brown, 9 finer (9/19). NGC ID# 22KX, PCGS# 3319

**1914 Cent, PR66+ Red and Brown  
Rare CAC-Approved Example**

- 3454 1914 PR66+ Red and Brown PCGS. CAC.** Well-balanced copper-orange, burgundy-red, and delicate chestnut hues adorn each side of this high-end Premium Gem proof, complementing the sharp strike and near-flawless preservation, which is recognized by CAC. A lone fleck near the 1 in the date is noted as a pedigree marker. Eye appeal is outstanding. Population: 43 in 66 (2 in 66+) Red and Brown, 9 finer; 23 in 66 (1 in 66+) Red, 10 finer. CAC: 24 in 66, 6 finer (9/19). NGC ID# 22KX, PCGS# 3319

**1940 Cent, PR67 Red  
Exemplary Registry Coin**

- 3455 1940 PR67 Red NGC.** A couple of cherry-red alloy spots on the portrait and speckled spots elsewhere accent the fire-orange color that dominates this Superb Gem proof cent. Glassy surfaces are free of contact. From a mintage of 15,872 pieces. Census: 14 in 67 (1 in 67 ★ Red, 1 in 67+ ★), 0 finer (9/19). NGC ID# 22L7, PCGS# 3347

**TWO CENT PIECE**

- 3456 1869 MS65 Red PCGS.** The well-preserved original red surfaces of this impressive Gem two cent piece show a few small patches of light brown patina on the lower obverse. The design elements are sharply detailed and both sides are lustrous and appealing. Population: 32 in 65 (3 in 65+) Red, 6 finer (9/19). NGC ID# 22ND, PCGS# 3605

**PROOF TWO CENT PIECES**

- 3457 1867 PR66 Red and Brown PCGS.** A pair of tiny carbon flecks are seen on the obverse — one above G in GOD, and the other just above the left-side scroll end. Bluish-tan toning joins reddish-gold fields and sharply struck motifs for exceptional eye appeal. No 1867 proof two cent pieces in Red and Brown format are certified above the PR66 level at PCGS. Population: 22 in 66 Red and Brown, 0 finer (9/19). NGC ID# 274W, PCGS# 3634
- 3458 1872 PR65 Red and Brown PCGS.** From a mintage of 950 pieces, this attractive Gem proof two cent piece exhibits sharply detailed design elements and hazily reflective fields on both sides. The well-preserved surfaces show a mix of original red and light brown patina. PCGS has graded 44 numerically finer examples (9/19). NGC ID# 2752, PCGS# 3649

**1873 Closed 3 Two Cent Piece, PR66  
Pleasing Red and Brown Surfaces**

- 3459 1873 Closed 3 PR66 Red and Brown NGC.** Faded mint red on both sides with light tan to brown elsewhere. The surfaces are clean and attractive, with no distracting specks or spots. This is the final year of issue for the two cent piece, with the reported mintage of 600 pieces. It is believed that at least a portion of these were melted on July 10, 1873 once sales dwindled. Census: 42 in 66 (1 in 66★) Red and Brown, 3 finer (8/19).  
Ex: *Palm Beach Signature* (Heritage, 3/2006), lot 224, which realized \$3,220; *Long Beach Signature* (Heritage, 1/2019), lot 3530, which realized \$4,320. NGC ID# 2753, PCGS# 3652

**THREE CENT SILVER**

**1851-O Three Cent Silver, MS66  
Finest at PCGS and CAC**

- 3460 1851-O MS66 PCGS. CAC.** A single issue in the entire three cent silver series was produced at a branch mint: the 1851-O. The New Orleans facility coined 720,000 pieces that year. Most coins saw significant circulation, but Mint State examples remain collectible through MS64. This Premium Gem ranks among the finest examples at PCGS and CAC. Central strike detail is slightly soft, but the legends, including the mintmark, are sharp. Gunmetal-blue and golden toning covers most of each side, except for the obverse star, which remains frosty. Population: 35 in 66 (4 in 66+), 0 finer. CAC: 21 in 66, 0 finer (9/19). NGC ID# 22YY, PCGS# 3665
- 3461 1852 MS66+ NGC. CAC.** A beautifully preserved, CAC-endorsed Type One three cent silver piece, slightly weak in the center of the shield but otherwise well-struck. The dies are lightly clashed but unlapped. Neither side exhibits toning. The Type One design has no outlines around the obverse star and is absent the olive branch and arrows that are on the reverses of the Type Two and Type Three varieties. Census: 90 in 66 (3 in 66+), 22 finer. CAC: 41 in 66, 19 finer (8/19). NGC ID# 22YZ, PCGS# 3666

**1852 Three Cent Silver, MS67  
Frosty Type One Candidate**

- 3462 1852 MS67 PCGS.** The three cent silver design was simpler as originally issued on the Type One coins, without arrows or the olive branch that were later added to the reverse. Struck from 1851 to 1853, the Type One coin shows only the Roman numeral III within the large C on the reverse, stars around. On the obverse, the star is simpler, not having any border framing that is present on later issues. This Superb Gem 1852 coin is an ideal choice for the type collector. It is scarce in this grade, and finer pieces are prohibitively rare. Frosty original luster glistens on each side, complementing exceptional preservation. A touch of strike weakness is noted at the centers. Population: 30 in 67 (2 in 67+), 2 finer (9/19). NGC ID# 22YZ, PCGS# 3666

**1857 Three Cent Silver, MS65+  
Colorful and Clean for the Grade**

- 3463 1857 MS65+ PCGS. CAC.** Blue toning around the obverse border frames mostly golden interiors with elements of violet and sea-green throughout. Similar shades dominate the reverse in a slightly more variegated fashion. The underlying surfaces are lustrous and exceptionally clean for the grade. The shield and arrows are strong, while softness appears on some of the obverse lettering, the reverse stars, and olive leaves. Population: 32 in 65 (1 in 65+), 17 finer. CAC: 10 in 65, 13 finer (9/19). NGC ID# 22Z6, PCGS# 3673

**PROOF THREE CENT SILVER**

**1863/2 Three Cent Silver, PR63  
Controversial Overdate, CAC**

- 3464 1863/2 PR63 PCGS. CAC.** This *Guide Book* variety is unlisted in the *Cherrypickers'* reference. Low-power magnification reveals remnants of a 2 beneath the 3 in the date (or possibly some other artifact within the 3). PCGS has certified just 38 examples in all grades (9/19), though NGC does not currently attribute the variety. This sharply struck representative exhibits deeply mirrored fields and softly frosted devices. Light lavender-blue and green-gold hues color the surfaces, with only a few faint hairlines defining the grade. CAC endorsement adds to the appeal.  
Ex: *Central States Signature (Heritage, 4/2014)*, lot 3985. NGC ID# 22ZF, PCGS# 3713

- 3465 1863 PR65 PCGS.** A mintage of 460 proofs supplemented the low circulation-strike production of just 21,000 three cent silver coins in 1863. This Gem proof presents dusky gold interiors that deepen toward the rims. Marvelous original eye appeal. Housed in a green label holder. NGC ID# 7VZF, PCGS# 3712

- 3466 1871 PR66 PCGS.** Attractive mint-green, pale-violet, blue, and peach-gold hues decorate the mirrored surfaces of this Gem proof in concentric rings. Slight strike weakness is seen on the high points of the shield but no other distractions are observed. The reverse is exceptionally vibrant, with glistening mirrors and vivid, electric-blue hues surrounding the fire-orange center. Population: 32 in 66 (2 in 66+), 7 finer (9/19). NGC ID# 27CG, PCGS# 3722

- 3467 1871 PR66 PCGS. CAC.** Attractive silver-blue and green-gold patina embraces each side of this sharply struck Premium Gem proof. Carefully preserved and housed in a green label holder with CAC endorsement, this gleaming example displays ample mirroring throughout both sides and a razor-sharp strike. Population: 32 in 66 (2 in 66+), 7 finer. CAC: 13 in 66, 8 finer (9/19). NGC ID# 27CG, PCGS# 3722

- 3468 1873 PR64 PCGS.** Lightly toned and remarkably well-struck, this beautifully mirrored final-year proof was one the scant proof-only production of 600 pieces. The flashy fields surround sharp, lightly frosted devices for outstanding eye appeal. A few light hairlines mingle with die polish lines, visible only under a strong loupe. Choice in all regards, the coin is encapsulated in a first-generation "rattler" PCGS holder and seems destined for an even finer grade. NGC ID# 27CJ, PCGS# 3724

- 3469 1873 PR64 Cameo PCGS.** The year 1873 is a significant one in American numismatics. In the case of the three cent silver, the year represents the final issue in the series, and a proof-only one at that (600 pieces). Cameo contrast persists despite a layer of original golden toning. Great eye appeal. NGC ID# 27CJ, PCGS# 83724

**THREE CENT NICKELS**

- 3470 1880 MS67 PCGS.** A stunning Superb Gem specimen of this popular issue, with sharply detailed design elements and virtually pristine surfaces that show much prooflike reflectivity in the fields. Overall eye appeal is terrific. Population: 44 in 67 (3 in 67+), 0 finer (9/19). NGC ID# 275C, PCGS# 3748

- 3471 1884 VF35 PCGS.** A scarce circulated example of this low-mintage three cent nickel issue. Olive-gray patina lends itself well to the lightly worn devices and smooth surfaces. Eye appeal is pleasing and the coin is decidedly original in appearance. From a mintage of 1,700 circulation strikes. Population: 11 in 35, 69 finer (8/19). NGC ID# 2766, PCGS# 3752

## PROOF THREE CENT NICKELS

### 1868 Three Cent Nickel, PR67 Ultra Cameo Tied for Finest Certified

- 3472 1868 PR67 Ultra Cameo NGC.** Relatively few proof 1868 three cent nickels have been designated as Ultra or Deep Cameos. This Premium Gem is a conditionally rare example, and no finer coins are reported by NGC or PCGS. The strike is sharp, and the brilliant surfaces offer stark cameo contrast. Census: 5 in 67 Ultra Cameo, 0 finer (9/19). NGC ID# 3L2N, PCGS# 93764

### 1877 Three Cent Nickel, PR66 Cameo Only 900 Proofs Struck for the Year

- 3473 1877 PR66 Cameo NGC. CAC.** This proof-only three cent nickel represents the singular key to the series. Profoundly mirrored fields surround fully struck and frosted relief elements. Wisps of gold patina complement the otherwise brilliant surfaces. NGC has graded 28 finer Cameo submissions (9/19). NGC ID# 275X, PCGS# 83773

### 1877 Three Cent Nickel, PR67 Cameo Proof-Only Key Issue

- 3474 1877 PR67 Cameo NGC.** While the proof-only mintages of both the 1877 and 1878 three cent nickels were generally saved and well-preserved, the 1877 is scarcer by a ratio of nearly 1 to 2 when compared to the higher-mintage 1878. In Superb Gem Cameo format, the 1877 is rare in both an absolute and conditional sense (not to mention by demand). This contrasted, nearly untuned example displays steel-silver color with a faint hint of lilac on the frosted devices. Smooth-mirrored fields surround the sharply struck motifs. Census: 25 in 67 Cameo (1 in 67+, 5 in 67★, 1 in 67+★), 3 finer (9/19). NGC ID# 275X, PCGS# 83773

### 1883 Three Cent Nickel, PR67+ Cameo Sought-After CAC Registry Coin

- 3475 1883 PR67+ Cameo PCGS. CAC.** The majority of Superb Gem proof 1883 three cent nickels are non-Cameos. This Cameo coin is conditionally scarce, and it is a rarity with the Plus designation and CAC endorsement. Modest contrast on each side presents mirrored fields and sharp, satiny devices. A light golden hue overall complements the eye appeal. Population: 62 in 67 (13 in 67+) Cameo, 1 finer; 2 in 67 (1 in 67+) Deep Cameo, 0 finer. CAC: 46 in 67, 1 finer (9/19). NGC ID# 2765, PCGS# 83779

- 3476 1888 PR67 Cameo PCGS. CAC.** This Superb Gem is among the finest 1888 proof three cent nickels at PCGS and carries the important CAC endorsement as part of its resume. Nearly flawless, nickel-gray surfaces contrast boldly with the smoothly frosted portrait and raised elements. The strike is pinpoint-sharp. Population: 24 in 67 (2 in 67+) Cameo, 0 finer. CAC: 20 in 67, 0 finer (9/19). NGC ID# 276B, PCGS# 83785

## SHIELD NICKEL

- 3477 1870 MS66 PCGS.** The 1870 Shield nickel is a scarce issue in all grades, and rare at the Premium Gem level. NGC has certified five coins in MS66 with only one finer; PCGS has graded 22 examples in MS66 with none finer (9/19). The present coin features attractive olive-gray surfaces with strong mint luster. Many interesting obverse die cracks are evident.  
Ex: FUN Signature (Heritage, 1/2010), lot 452; Eugene Gardner Collection / New York Signature (Heritage, 6/2014), lot 30143. NGC ID# 22P4, PCGS# 3797

## PROOF SHIELD NICKELS

### 1876 Nickel, PR67+ Cameo Peach and Lavender Accents

**3478 1876 PR67+ Cameo NGC.** Delicate peach-gold and lavender toning complements the contrasted nickel-gray surfaces of this marvelous PR67+ Cameo representative. Eye appeal is terrific. One of an estimated 1,150 proof nickels manufactured in 1876. Census: 8 in 67 Cameo (1 in 67+), 1 finer in this category (9/19). NGC ID# 276T, PCGS# 83830

**3479 1878 PR67+ NGC.** The mid-series proof-only issues (1877 and 1878) command much attention from Shield nickel specialists. While the 1877 is the scarcer of the two dates, just 2,350 1878 proofs were struck, and it is equally rare at the highest levels. This ice-blue proof displays pale lavender overtones across needle-sharp, reflective surfaces. It is the sole-finest Superb Gem proof at NGC, nor does PCGS report a numerically finer example. Census: 23 in 67 (1 in 67+), 0 finer (9/19). NGC ID# 276V, PCGS# 3832

**3480 1878 PR66 Cameo PCGS. CAC.** The sharply detailed, frosty design elements of this delightful Premium Gem proof shield nickel contrast boldly with the deeply mirrored fields to create noticeable cameo contrast. The well-preserved surfaces show a few hints of lavender toning. Population: 30 in 66 (4 in 66+) Cameo, 8 finer. CAC: 13 in 66, 6 finer (9/19). NGC ID# 276V, PCGS# 83832

## LIBERTY NICKELS

### 1883 With Cents Nickel, MS67 Tied for Finest at Both Services

**3481 1883 With Cents MS67 PCGS.** This first-year issue from a mintage of 16 million coins was saved to a far lesser extent in high grades than its No Cents counterpart from the same year. This near-flawless example is exceptionally clean and razor-sharp. Softness is limited to the ear of corn left of the bow. Mostly nickel-gray surfaces exhibit blushes of pale green, blue, and violet patina. Population: 16 in 67, 0 finer (9/19). NGC ID# 22PH, PCGS# 3844

**3482 1885 AU50 PCGS. CAC.** There is a brush of friction on this AU 1885 Liberty nickel, although luster remains in the fields — characteristic of the About Uncirculated grade. The coin easily earns CAC recognition. Original pewter-gray surfaces have limited contact marks, and the only weakness visible is from the strike, not wear, seen mainly on the corn ear to the left of the wreath bow. Housed in a first generation holder. One of four coins for the grade with a CAC green label (9/19). NGC ID# 2773, PCGS# 3846

**3483 1895 MS66 PCGS.** A vertical woodgrain toning pattern alternates gold and pale rose hues on this Premium Gem example. The stars are sharp, and the corn ear to the left of the wreath bow shows above-average definition. Satiny mint luster is without distracting abrasions. The 1895 Liberty nickel is scarce in this grade, and only one Superb Gem is reported finer at PCGS and NGC combined. Population: 38 in 66 (6 in 66+), 1 finer (9/19). NGC ID# 277A, PCGS# 3856

### 1897 Nickel, MS66+ Only Two Coins Graded Higher

**3484 1897 MS66+ PCGS.** It would surprise most collectors to learn that although more than 20.4 million Liberty nickels were struck in 1897, only two coins are graded higher than this MS66+ representative at both services combined. This lustrous Premium Gem features essentially unmarked fields with blushes of golden color. Definition is slightly stronger on the reverse. A few dark spots near the date and a single tick on the jaw identify this important offering. Population: 32 in 66 (10 in 66+), 2 finer (9/19). NGC ID# 22PN, PCGS# 3858

## PROOF LIBERTY NICKELS

### 1883 Nickel, PR67 Cameo Single-Year No Cents Type

**3485 1883 No Cents PR67 Cameo PCGS. CAC.** This 1883 No Cents proof nickel enjoys brilliant surfaces defined by its deeply mirrored fields and frosted motifs. A total of 5,219 pieces were minted before the design was permanently modified later in the year. Population: 31 in 67 Cameo, 0 finer in this category. CAC: 6 in 67, 0 finer (9/19). NGC ID# 22PU, PCGS# 83878

**1883 With Cents Liberty Nickel, PR67 Cameo  
Delicately Toned Type Coin**

**3486 1883 With Cents PR67 Cameo NGC.** A fully struck Cameo proof, graced in delicate lilac and champagne toning that complements the liquidity of the fields and the satiny shimmer of the devices. There is one milky spot below Liberty's hair bun in the right obverse field that serves as a pedigree marker. With Cents Cameo proofs are rarely seen this fine. The "denominated" 1883 variety is scarcer in this grade than the more famous No Cents issue struck earlier in the year. Census: 4 in 67 (5 in 67+), 3 finer (9/19). NGC ID# 277S, PCGS# 83881

**3487 1897 PR67 Cameo PCGS. CAC.** The obverse boasts distinctive golden-tan woodgrain toning, while the reverse is less intensely imbued with similar coloration. Both sides exhibit overt contrast between the frosted devices and reflective fields. One tiny contact mark is noted on Liberty's jaw, but this remains an exceptional piece. Population: 20 in 67 (5 in 67+) Cameo, 3 finer. CAC: 19 in 67, 4 finer (9/19). NGC ID# 2787, PCGS# 83895

**1909 Nickel, PR67+ Cameo**

**3488 1909 PR67+ Cameo PCGS. CAC.** A sharply struck and essentially brilliant Superb Gem that boasts radiant devices and unmarked fields. The sole perceptible imperfections are obverse carbon specks at 10:30 and below the bust tip. As of (9/19), PCGS has certified only seven pieces as PR67+ Cameo and just five examples finer. CAC: 38 in 67, 3 finer (9/19). NGC ID# 278K, PCGS# 83907

**3489 1912 PR67 NGC.** The final regular-issue proof of the Liberty nickel series (the five 1913 nickels notwithstanding), this Superb Gem 1912 proof glistens with golden and pale-lilac toning that showcases a razor-sharp strike. Nearly flawless, mirrored fields surround frosted devices for tremendous eye appeal. Finer proofs are rare from either service. Census: 22 in 67 (1 in 67+, 1 in 67★), 5 finer (8/19). NGC ID# 278N, PCGS# 3910

**3490 1912 PR67 PCGS.** No Deep Cameo 1912 proof nickels are certified at PCGS, making non-Cameo and Cameo Superb Gems the finest pieces available to collectors. This non-Cameo has modest contrast despite the lack of such a designation on the holder. Delicate champagne color graces each side, complementing full design sharpness and beautiful mirrors. Eye appeal is outstanding. Population: 19 in 67 (6 in 67+), 2 finer; 8 in 67 Cameo, 0 finer (9/19). NGC ID# 278N, PCGS# 3910

**BUFFALO NICKELS**

**3491 1913-D Type One MS67 PCGS. CAC.** Top-notch surface quality and rich satin luster combine with a bold strike and attractive toning to define this Superb Gem nickel. The obverse is well-produced, lustrous, and appealing with golden accents over pearlescent gray fields and motifs. The reverse displays dramatic, steel-blue tones with lilac highlights and nearly full details on the bison. An excellent Type One nickel in all ways. Population: 94 in 67 (13 in 67+), 3 finer. CAC: 43 in 67, 0 finer (9/19). NGC ID# 22PX, PCGS# 3916

**1913-S Type Two Nickel, MS66  
Elegant Light Golden Patina**

**3492 1913-S Type Two MS66 PCGS. CAC.** This 1913-S Type Two nickel in CAC-approved MS66 condition represents the key date among six issues for the year. Only 1.2 million examples were struck and few were deliberately saved in high grades. Light golden patina graces each side. The obverse is boldly defined, while the reverse shows softness on the bison's head, the denomination, and AMERICA. Population: 56 in 66 (6 in 66+), 8 finer. CAC: 17 in 66, 1 finer (9/19). NGC ID# 22R3, PCGS# 3923

**1915 Nickel, MS67+  
Tied for Finest at PCGS**

**3493 1915 MS67+ PCGS. CAC.** This is a collectible early Philadelphia Mint issue. Definition is remarkably strong on the bison, and the braid is similarly bold. Largely brilliant and softly lustrous with blushes of gold and sky-blue color. Population: 77 in 67 (11 in 67+), 0 finer. CAC: 21 in 67, 0 finer (9/19). NGC ID# 22R7, PCGS# 3927

**3494 1918/7-D FS-101 Fine 15 PCGS.** Struck from an advanced state of the dies with heavy metal flowlines in the fields, this overdate nickel is nonetheless quite appealing with natural olive-gray patina. Wear is consistent with the grade, the bison retaining about half of its horn. The overdate feature is clear. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1918/7-D Nickel, VF20  
FS-101, Guide Book Variety

- 3495 1918/7-D FS-101 VF20 PCGS.** A tiny crack that extends off the right side of the Indian's hair braid is one of the diagnostic markers among authentic 1918/-D nickels. This well-circulated VF20 survivor still shows a strong overdate, and the reverse legends are bold. The bison's head and shoulder are significantly softer, not that it affects the appeal of this example in any way. Nickel-gray with pale golden accents. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1919-D Buffalo Nickel, MS65  
Challenging Issue at This Grade Level

- 3496 1919-D MS65 PCGS.** Satin mint luster glistens over well-preserved, nickel-gray surfaces of this sharp 1919-D nickel. There are three or four tiny ticks on the portrait and a few more on the bison's leg, but other than that each side is essentially clear of marks. The motifs show excellent strike detail for the issue, particularly on the hair braid and the horn, and the legends are sharply brought up. A pleasing Gem in all regards. Population: 86 in 65 (6 in 65+), 21 finer (8/19). NGC ID# 22RM, PCGS# 3942

1920-D Buffalo Nickel, MS65  
A Rare Date in Finer Grades

- 3497 1920-D MS65 PCGS.** The 1920-D Buffalo nickel is scarce in MS65 and decidedly rare any finer. This piece is satiny with lilac and orange-gold toning overall. The central obverse is curiously sharp despite mild weakness on the central reverse. The bison's head is also a trifle soft, as normal. Housed in a green label holder. PCGS lists a half dozen numerically finer representatives (9/19). NGC ID# 22RR, PCGS# 3945

1920-D Buffalo Nickel, MS65+  
Early-Date Strike Rarity

- 3498 1920-D MS65+ PCGS.** The 1920-D is a well-known strike and condition rarity from the 1920s, and it is seldom located in Gem condition. The obverse on this piece is especially well-struck, with hair definition complete all the way down to the knot in the braid. The reverse, on the other hand, is somewhat soft on the bison's head but the tail is fully split. Rich cinnamon-rose and lilac toning covers the surfaces of this softly frosted, problem-free Gem. The 1920-D is rare any finer. Population: 36 in 65+, 6 finer (9/19). NGC ID# 22RR, PCGS# 3945

1921 Nickel, Splendid MS67  
Vibrant Toning, Sharp Strike

- 3499 1921 MS67 NGC.** Beautifully toned and close to fully struck, this Superb Gem 1921 nickel is a torchbearer for the P-mint date, which is often found well-struck and attractive. Vibrant reddish-gold toning combines with pale-blue accents for outstanding eye appeal. The Indian's hair is almost fully defined, matched by the bison's full details. A seemingly unimprovable example, eligible for an even finer grade. Census: 13 in 67 (1 in 67+, 3 in 67★), 0 finer (9/19). NGC ID# 22RT, PCGS# 3947

- 3500 1924-S MS62 PCGS.** From a small mintage of 1.4 million pieces, the 1924-S Buffalo nickel is a challenging issue in Mint State grades. This attractive MS62 specimen exhibits lightly marked surfaces under shades of golden-brown and lavender-gray toning. The design elements are well-detailed, with some of the typical softness on the bison's head. NGC ID# 22RZ, PCGS# 3953

1927 Buffalo Nickel, MS67  
Scarce, Among the Finest Certified

- 3501 1927 MS67 NGC.** This Superb Gem 1927 Buffalo nickel is among the finest pieces certified, and it is conditionally rare as such. Luster is softly frosted and unabraded, cast in delicate sky-blue and golden hues. A touch of the usual strike softness is visible on the central high points but is not bothersome. Census: 10 in 67 (1 in 67+, 1 in 67★), 0 finer (9/19). NGC ID# 22S8, PCGS# 3960

- 3502 1927-S MS64 PCGS.** Satin luster and appealing toning create lovely eye appeal for this near-Gem specimen. Shades of gold, orange, and red are present. Die wear is evident and though not fully struck, the level of design detail is pleasing. The population drops dramatically above the MS64 level, with PCGS having awarded higher numeric grades to only 46 examples (9/19).  
*Ex: Central States Signature (Heritage, 4/2014), lot 3362. NGC ID# 22SA, PCGS# 3962*

**1927-S Nickel, Satiny MS64+  
Smooth and Appealing Surfaces**

- 3503 1927-S MS64+ PCGS.** This near-Gem 1927-S Buffalo nickel was struck from lightly worn dies, with slight “fuzziness” around the relief design elements. No major metal flowlines are yet present in the fields, and the coin is well-struck considering the reputation of San Francisco coinage during this period. Luster is satiny and showcases warm champagne toning. There are 46 finer submissions at PCGS (9/19). NGC ID# 22SA, PCGS# 3962

**1934 Buffalo Nickel, Luminous MS67  
Registry Set Quality, Conditionally Scarce**

- 3504 1934 MS67 PCGS.** The 1934 follows suit with most other Buffalo nickel issues in the series, being scarce in Superb Gem condition. This MS67 coin is among the finest pieces certified save for a handful Plus-designated coins in the same grade (9/19). Luster beams from the frosty surfaces, revealing delicate pastel shades of iridescence. Both sides are well-struck and devoid of abrasions. This is a coin that just radiates eye appeal — a superb Registry contender. Population: 43 in 67 (5 in 67+), 0 finer (9/19). NGC ID# 22SL, PCGS# 3972

- 3505 1935 MS67+ PCGS. CAC.** This Plus-graded Superb Gem is sharply detailed in most areas, with just the slightest softness on the hair above the braid. The impeccably preserved, lustrous surfaces are enhanced by delicate shades of ice-blue and pale jade toning. PCGS has graded four numerically finer examples (9/19). NGC ID# 22SN, PCGS# 3974

- 3506 1937-D Three-Legged, FS-901, MS62 NGC.** Satiny surfaces are lightly toned in pale golden patina. The obverse is well-defined, and the reverse is only slightly softer. Lapping has removed the bison’s front right leg, identifying this famous *Guide Book* variety. Ticks are minor for the grade. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D Three-Legged Nickel, MS63  
FS-901 *Guide Book* Variety**

- 3507 1937-D Three-Legged, FS-901, MS63 PCGS.** Due to the nature of the variety, all 1937-D Three-Legged Buffalo nickels exhibit considerable die erosion. The dies were heavily lapped late in their use to prolong their life, and the bison’s forward right leg was inadvertently effaced in the process. This Select example of the variety displays satiny luster and deep amber-gold and bronze toning. The strike is remarkably sharp on the bison’s horn and shoulder, despite the die erosion that affects the recesses. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D FS-901 Nickel, MS64  
Three-Legged Variety**

- 3508 1937-D Three-Legged, FS-901, MS64 NGC.** This popular *Guide Book* variety is housed in an MS64 NGC holder hand-signed by Editor Emeritus Kenneth Bressett. The satiny, untuned surfaces show good obverse detail and characteristic incompleteness on the reverse, having been struck from a lapped and well-worn die. Far above the average XF45 to AU50 example. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3509 1938-D MS68 NGC.** A common date, the 1938-D Buffalo nickel is perhaps unrivaled among late-series issues for type coin popularity. However, this MS68 example is conditionally scarce and among the finest pieces certified (9/19). Delicate pastel hues adorn bright luster on both sides, complementing impressively sharp definition. The preservation is nearly flawless. Census: 41 in 68 (1 in 68+, 8 in 68★, 1 in 68+★), 0 finer (9/19). NGC ID# 22T2, PCGS# 3984

- 3510 1938-D MS68 PCGS.** The 1938-D Buffalo nickel is readily available as a type coin, even in Superb Gem condition. However, precious few examples are known as fine as MS68, and none are numerically finer. This top-grade coin displays shimmering luster and delicate lilac and ice-blue toning. Greenish-gold hues appear around portions of the outer peripheries. Under a loupe, the only visible surface characteristics are the metal flowlines produced by die erosion, with no evidence of surface contact. Population: 40 in 68 (2 in 68+), 0 finer (9/19). NGC ID# 22T2, PCGS# 3984

**1938-D Buffalo Nickel, MS68★  
Top-Grade Final-Year Type Coin**

- 3511 1938-D MS68★ NGC.** One of the premier Buffalo nickel issues for type collectors, the 1938-D is easily found in high grades up to the MS67 level. Any finer, the competition becomes fierce. This is an amazing MS68★ example, with a central blush of lavender ringed by yellow-gold. Gleaming mint luster illuminates a sharp strike, with nominal weakness at the bison's shoulder. The eye appeal is fantastic. Only a handful of 1938-Ds could ever be considered finer at NGC and PCGS combined. Census: 41 in 68 (1 in 68+, 8 in 68★, 1 in 68+★), 0 finer (9/19). NGC ID# 22T2, PCGS# 3984

**1938-D/S Nickel, CAC-Approved MS67+  
FS-512 Overmintmark Variety**

- 3512 1938-D/S FS-512 MS67+ PCGS. CAC.** The *Cherrypickers' Guide* and PCGS recognize five different overmintmark varieties of the 1938-D nickel. FS-512 shows the curve of an S within the D, but the D is not repunched as it is on the FS-511 variety. This high-end Superb Gem displays delicate lilac and champagne-blue hues across satiny, unabraded mint luster. Just a touch of strike softness is evident in the centers, with most of the design being well brought up. PCGS has Plus-graded 40 D/S nickels in MS67 (all varieties included), with a lone MS68 coin finer. CAC: 51 in 67, 0 finer (8/19). PCGS# 569456 Base PCGS# 3984

**PROOF BUFFALO NICKELS**

**1913 Type One Matte Proof Buffalo Nickel  
Razor-Sharp and Appealing PR66**

- 3513 1913 Type One PR66 NGC.** As the representatives of the Type One Buffalo nickel design with the best definition, the proofs of earlier 1913 are perhaps the ultimate expression of the Buffalo nickel in coined form. This Premium Gem has bright satiny surfaces that are pale nickel-gray with faint gold and rose accents. The visual appeal is marvelous. NGC ID# 278R, PCGS# 3988

**1915 Buffalo Nickel, PR67  
Sharp and Impressive Matte Proof**

- 3514 1915 PR67 PCGS.** While the matte proof format won few supporters among collectors of the day, it is highly appreciated by today's specialists — especially in the Buffalo nickel series, where the matte format is seen as an especially good fit for the design. This is an exquisite Superb Gem example, with delicate shades of reddish-gold and lilac toning over lustrous, sharply struck surfaces. Not all of the minted proofs were sold in 1915, putting pressure on high-grade pieces such as this spectacular proof. Population: 78 in 67 (13 in 67+), 8 finer (9/19). NGC ID# 278U, PCGS# 3992

**1916 Buffalo Nickel, PR65  
Scarce Matte Proof Issue**

- 3515 1916 PR65 PCGS.** Housed in an old green label holder, this Gem matte proof is one of just 600 pieces struck. Most likely, not all were sold. The 1916 matte proof is a scarce issue in all grades. Its nonreflective finish was unpopular with collectors, a contributing factor in the Mint's decision to forego issuing proof sets until the program was reinstated in 1936. This Gem coin is fully struck, with mark-free surfaces that display colorful iridescent rainbow hues, highlighted by shades of ice-blue toning and bands of tan-gold color. NGC ID# 278V, PCGS# 3993

- 3516 1936 Type One — Satin Finish PR67+ PCGS. CAC.** This delightful Plus-graded Superb Gem exhibits razor-sharp definition on all design elements and the virtually pristine surfaces radiate satiny matte luster from both sides. Overall eye appeal is outstanding. PCGS has graded 52 numerically finer examples (9/19). NGC ID# 278X, PCGS# 3994

**1936 Satin Proof Buffalo Nickel, PR68  
Near-Perfection**

**3517 1936 Type One — Satin Finish PR68 NGC.** A stunning Superb Gem, this Satin Finish proof is essentially flawless with bright, satiny luster and nickel-gray surfaces that exhibit faint gold and lavender toning on each side. The Satin Finish proof of 1936 is rarely offered this fine, and no higher-grade examples are reported at NGC. Census: 32 in 68 (2 in 68+, 2 in 68★, 1 in 68+★), 0 finer (8/19). NGC ID# 278X, PCGS# 3994

**3518 1936 Type Two — Brilliant Finish PR67 NGC.** This spectacular Superb Gem exhibits fully struck design elements and the deeply reflective brilliant finish that identifies the Type Two proofs. The impeccably preserved surfaces show a few subtle hints of pale green toning. Housed in new NGC holder commemorating the *Guide Book* and signed by Ken Bressett. NGC ID# 278Y, PCGS# 3995

**1937 Nickel, PR68  
None Finer at NGC**

**3519 1937 PR68 NGC.** The satiny, brilliant surfaces of this Superb Gem nickel are completely void of mentionable contact. Strike definition is complete, as expected. Proof production resumed in 1936, and output increased to 5,759 specimens the following year. Census: 61 in 68 (1 in 68+, 5 in 68★), 0 finer (9/19). NGC ID# 278Z, PCGS# 3996

**JEFFERSON NICKELS**

**1938 Nickel, MS67+ Full Steps  
Attractively Toned, Tied for Finest at PCGS**

**3520 1938 MS67+ Full Steps PCGS.** Attractive pale-rose toning highlights Jefferson's portrait, surrounded by subtle blue accents throughout the margins for tremendous eye appeal. Similar toning accentuates the sharply struck reverse, which displays bold Full Steps and no marks of consequence. Mint luster glows throughout this high-end Superb Gem. Population: 8 in 67+ Full Steps, 0 finer (8/19). NGC ID# 22T4, PCGS# 84000

**1943-D Jefferson Nickel, MS68  
With Six Full Steps**

**3521 1943-D MS68 Full Steps NGC.** This magnificent MS68 Jefferson nickel exhibits razor-sharp definition on all design elements, with six full steps showing on Monticello. The surfaces are impeccably preserved, with vivid highlights of lime-green toning on both sides. Vibrant mint luster adds to the terrific eye appeal. Census: 4 in 68 (1 in 68★) Full Steps, 0 finer (9/19). NGC ID# 22TS, PCGS# 84020

**3522 1944-S MS68 PCGS.** Struck in the wartime silver composition, this delightful MS68 specimen is sharply detailed and impeccably preserved, with vibrant mint luster and vivid highlights of lavender and burnt-orange toning. Population: 6 in 68, 0 finer (9/19). NGC ID# 22TW, PCGS# 4024

**3523 1955 MS66 Full Steps PCGS.** This impressive Premium Gem exhibits sharply detailed design elements, with Full Steps definition on Monticello. The well-preserved surfaces radiate vibrant mint luster, with outstanding eye appeal. Population: 14 in 66 Full Steps, 1 finer (9/19). NGC ID# 22UV, PCGS# 84056

**PROOF JEFFERSON NICKEL**

**3524 1939 Reverse of 1938 PR68 NGC.** The slightly wavy steps on the porch of Monticello identifies the Reverse of 1938. This delightful PR68 specimen is fully struck, with virtually perfect brilliant surfaces and deeply mirrored fields. Eye appeal is terrific. Housed in new NGC holder commemorating the *Guide Book* and signed by Ken Bressett. Census: 15 in 68 (3 in 68★), 0 finer (9/19). NGC ID# 279X, PCGS# 4176

**EARLY HALF DIME**

**3525 1795 V-6, LM-9, R.4 — Environmental Damage — PCGS Genuine. XF Detail.** This well-detailed LM-9 is bright from a past cleaning and polishing — but not to its detriment — since an area of corrosion was minimized as a result. Remnants of corrosion persist in the lower-left obverse quadrant. Mint-made adjustment marks angle across Liberty's hair strands, and the reverse shows strong die clashing. Still, this is a reasonably attractive Flowing Hair example with solid XF definition for an issue that is often impaired in one way or another.

**BUST HALF DIMES**

**3526 1831 V-1, LM-6, R.1, MS65 NGC.** The design elements of this spectacular Gem are sharply detailed throughout, with some light recutting on star 3 and dramatic clash marks on both sides. Pleasing greenish-gray toning blankets the well-preserved surfaces. Census: 3 in 65 (1 in 65+), 0 finer (9/19). NGC ID# 232D, PCGS# 38661 Base PCGS# 4278

1832 Capped Bust Half Dime, MS66  
V-1, LM-3 Variety

- 3527 1832 V-1, LM-3, R.1, MS66 NGC. LM-3 shows repunching on star 12, and the M in AMERICA is entered with a defective punch that shows a missing right diagonal. The variety as a whole is plentiful and a popular choice for type coin cabinets. This piece is sharp throughout the stars and central devices. Softly frosted luster shines through original shades of lavender-gray, sea-green, and golden toning, with no disruptive abrasions of note. NGC ID# 232E, PCGS# 38665 Base PCGS# 4279

- 3528 1835 Large Date, Small 5C, V-10, LM-5.1, R.3, MS65 NGC. This variety features 35 in the date closely spaced, and the 5 in the denomination has a curved flag centered under the feather tip. A melange of mottled tones includes gunmetal-blue, forest-green, violet, and russet-orange. The design elements are strongly brought-up with a touch of softness on the forecurls and the leading edge of the eagle's left wing. PCGS# 38712 Base PCGS# 4283

SEATED HALF DIMES

- 3529 1837 No Stars, Large Date (Curl Top 1) MS65+ NGC. This Plus-graded Gem exhibits sharply detailed design elements throughout, with the remnants of a misplaced date showing to the south of the primary digits. High-intensity shades of sea-green and bluish-gray toning blanket the well-preserved surfaces, with an interesting lint mark in the right obverse field. NGC ID# 232M, PCGS# 4311

1840 Half Dime, MS66  
Short-Lived No Drapery Subtype

- 3530 1840 No Drapery MS66 PCGS. The strike is pinpoint sharp on both sides of this frosted Premium Gem No Drapery half dime. About three times as many No Drapery half dimes were struck in 1840 than its With Drapery counterpart. The 1,034,000-piece mintage yields the occasional Premium Gem coin, although such pieces are scarce, and rare any finer. This example displays bluish-gray accents over faintly iridescent silver-gray surfaces. Population: 19 in 66 (2 in 66+), 15 finer (9/19). NGC ID# 232U, PCGS# 4321

PROOF SEATED HALF DIME

1871 Half Dime, PR67 Cameo  
Colorful Toning, Deeply Mirrored Fields

- 3531 1871 PR67 Cameo PCGS. CAC. This Superb Gem proof is among the finest Cameo representatives obtainable in a PCGS holder. Three Deep Cameo proofs are certified finer in PR65, PR66, and PR67. Vivid gold, violet, blue, and sea-green toning blankets the deeply mirrored fields. The figure of Liberty is slightly soft, partly due to significant die rust over the obverse relief elements. Population: 6 in 67 (2 in 67+) Cameo, 0 finer. CAC: 7 in 67, 0 finer (9/19).  
Ex: *Central States Signature* (Heritage, 4/2015), lot 3784; *FUN Signature* (Heritage, 1/2016), lot 3703. NGC ID# 2368, PCGS# 84454

EARLY DIMES

1803 JR-3 Dime, VF25  
Very Scarce Date

- 3532 1803 JR-3, R.4, VF25 PCGS. CAC. Although five die pairs of 1803 dimes are known, all are very scarce to rare. The *Guide Book* mintage states just 33,040 pieces were produced. The present example has lavender fields and cream-gray high points. Marks are minor for the grade though we note a faint thin vertical line on the portrait.  
Ex: *Bently Foundation / National Money Show Signature* (Heritage, 2-3/2014), lot 3265. NGC ID# 236L, PCGS# 38764 Base PCGS# 4473

- 3533 1805 4 Berries, JR-2, R.2, VF20 NGC. Two varieties exist for this plentiful issue, one with four berries (JR-2) and one with five (JR-1). JR-2 is slightly more collectible. Deep gray fields lighten considerably over the well-worn high points. The rims above the first few stars and UNITED are soft, but the rest of the design is strong, especially the curls and neck feathers. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

**1805 JR-2 Dime, AU50  
Four Berries Reverse**

- 3534 1805 4 Berries, JR-2, R.2, AU50 PCGS.** Jade-green, golden-brown, and ice-blue toning adorns this lightly circulated Heraldic Eagle type coin. Each side is sharply detailed with softness at the obverse stars, characteristic of the later die state. We note unobtrusive marks near the 5 in the date and the second S in STATES. A slender retained lamination near the L in LIBERTY is as-made. The visual appeal far exceeds the technical grade.  
Ex: *Chicago Signature* (Heritage, 8/2013), lot 3484; *FUN Signature* (Heritage 1/2015), lot 3782. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

**1807 JR-1 Dime, XF45  
Sole Variety for the Year**

- 3535 1807 JR-1, R.2, XF45 NGC.** Somehow, the JR-1 die pair held together for the entire final-year mintage of 165,000 Draped Bust dimes, and the reverse die was particularly indestructible — also used to strike 1807 BD-1 quarter eagles. Extensive die clashing and die wear is seen on many 1807 late die state dimes, as well as weakness from die bulging. This Choice XF example shows several strong die clashes, and peripheral weakness exists on both sides. Golden-gray toning allows areas of bright silver luster to shine through for substantial eye appeal, despite the advanced die state and numerous surface irregularities. The worn dies were soon retired, replaced in 1809 by the new John Reich Capped Bust design. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

**BUST DIMES**

- 3536 1820 Medium 0, JR-7, R.2, AU58+ PCGS.** In our nomenclature, the JR-7 variety displays a Medium 0 in the date, while PCGS calls it a Small 0. The difference in size is hard to determine, and of little importance as long as the correct variety is specified. This is a well-defined JR-7 dime, with silver-gray surfaces that deepen to golden-gray at the margins. The eagle's head and neck are weakly struck, although all else is sharp. Marks are few, including a short streak of struck-in mint grease from star 5 to the nose. Soft mint luster glows from both sides of this borderline Mint State dime. NGC ID# 236X, PCGS# 38787 Base PCGS# 4493
- 3537 1825 JR-2, R.2, MS63 NGC.** The well-detailed design elements of this impressive Select example exhibit a touch of softness on the stars on the left and a faint die crack connects stars 12 and 13. Only minor signs of contact are evident, but some clashing shows on the reverse. Census: 13 in 63 (1 in 63+), 24 finer (9/19). NGC ID# 2374, PCGS# 38808 Base PCGS# 4503

- 3538 1831 JR-3, R.1, MS64 PCGS.** A plentiful variety, representing many type coins in collectors' cabinets. This near-Gem JR-3 dime displays full detail and has satiny, untuned mint luster. Light handling marks limit the grade, but there are no bothersome abrasions. Population: 49 in 64, 28 finer (9/19). NGC ID# 237B, PCGS# 38851 Base PCGS# 4520

- 3539 1831 JR-3, R.1, MS64 PCGS.** This JR-3 Bust dime is sharply struck and attractive, with original and lustrous, brilliant-silver surfaces accented by deep-gray and pale-gold toning. The E in STATES is noticeably larger than the surrounding letters, helping to identify the variety. There are no rare 1831 varieties, although the odd-numbered ones (JR-1, JR-3, and JR-5) are seen more frequently than the even-numbered die pairs (JR-2, JR-4, and JR-6). While readily available as a date, near-Gem or finer coins are scarce and eagerly sought by Bust dime specialists. Population (all varieties combined): 51 in 64, 32 finer (9/19). NGC ID# 237B, PCGS# 38851 Base PCGS# 4520

**SEATED DIMES**

- 3540 1858 F-103, R.3, MS65+ NGC.** A lustrous stone-white Gem with essentially immaculate preservation. Liberty's head and portions of the wreath are lightly brought up. The 1 is entered high, and the date slopes down. The reverse, though, matches F-106 with parallel die lines through AMERICA. For all Fortin business varieties, Census: 17 in 65 (2 in 65+), 11 finer (9/19). PCGS# 538120 Base PCGS# 4616

- 3541 1860-O F-101, R.3, VF20 PCGS.** Fortin writes: "This date is scarce in the lower circulated grades and often comes porous due to examples being dug out of the ground." The stone-gray 1860-O dime is well-circulated with blue accents on the obverse. Population: 11 in 20, 51 finer (9/19). PCGS# 538160 Base PCGS# 4632

**PROOF SEATED DIMES**

- 3542 1859 PR65 NGC.** Only 800 proof Seated Liberty dimes were struck in 1858, the second year of the Mint's commercial proof offerings. This delightful Gem exhibits sharply detailed design elements and reflective fields under vivid shades of magenta and steel-blue toning. Census: 31 in 65, 33 finer (9/19). NGC ID# 23CD, PCGS# 4748

- 3543 1859 PR65 Cameo NGC. F-101, R.4** A brilliant and unabraded Gem with nicely mirrored fields and discernible frost throughout the motifs and legends. Cameo proofs of the Stars Obverse type are scarce, particularly in high grades. 1859 was the first year that proof mintages were recorded, with a reported mintage of 800 proof dimes. Census: 9 in 65 Cameo, 17 finer (9/19). NGC ID# 23CD, PCGS# 84748

- 3544 1863 PR66 NGC. CAC. F-101, R.4.** Both sides of this CAC-endorsed proof are impressively preserved beneath substantial patina. The obverse has a lighter coat of green-gold and orange while the reverse is duskier with largely blue and rose-based hues. Viewed at an advantageous angle, the fields reveal strong mirrored effect, while the frosted devices see their contrast diminished by the rich toning. A threadlike strike-through is seen with a lens across Liberty's lap. Census: 23 in 66, 8 finer. CAC: 9 in 66, 0 finer (8/19). NGC ID# 23BS, PCGS# 4756

- 3545 1876 PR66 Cameo NGC. F-101, R.4.** The sharply detailed, frosty design elements of this delightful Premium Gem contrast boldly with the deeply mirrored fields to produce a startling cameo effect. The virtually flawless surfaces add to the terrific eye appeal. Census: 7 in 66 Cameo, 0 finer (9/19). NGC ID# 23CZ, PCGS# 84773

## BARBER DIMES

- 3546 1901-O MS66 NGC.** This attractive Premium Gem is sharply detailed in most areas, but a touch of softness shows in the lower wreath, where some die striations were not completely struck out. The well-preserved surfaces radiate vibrant mint luster, with outstanding eye appeal. Housed in new NGC holder commemorating the *Guide Book* and signed by Ken Bressett. Census: 6 in 66 (1 in 66+), 0 finer (9/19). NGC ID# 23EG, PCGS# 4825

### 1910 Dime, Brilliant MS67+ Two Coins Finer

- 3547 1910 MS67+ PCGS. CAC.** Sharp, brilliant, and well-preserved, this Superb Gem 1910 Barber dime is conditionally rare and eye-catching. Perfect for type purposes, as only a two numerically finer coins are reported by PCGS and NGC combined. The cartwheel effect is vibrant. Population: 32 in 67 (20 in 67+), 2 finer. CAC: 10 in 67, 3 finer (9/19).  
Ex: *ANA Signature (Heritage, 8/2017)*, lot 3511. NGC ID# 23FF, PCGS# 4854

- 3548 1911 MS67 NGC.** This impressive Superb Gem Barber dime offers sharply detailed design elements and impeccably preserved surfaces, with a few subtle hints of lavender toning. Vibrant mint luster adds to the outstanding visual appeal. Housed in new NGC holder commemorating the *Guide Book* and signed by Ken Bressett. Census: 11 in 67 (1 in 67★), 2 finer (9/19). NGC ID# 23FJ, PCGS# 4857

- 3549 1913-S MS64 NGC.** One of the keys to the Barber dime series, the 1913-S had a mintage of just 510,000 pieces — slightly more than the 1895-O, and also trailing the essentially uncollectible 1894-S. While some perceptive individuals hoarded the low-mintage 1913-S, it still represents a considerable challenge for series collectors in near-Gem or finer grades. This is a Choice frosted, silver-gray example, with traces of gold toning at the margins. The strike is pleasingly sharp. Census: 24 in 64, 31 finer (8/19). NGC ID# 23FS, PCGS# 4864

## PROOF BARBER DIME

- 3550 1901 PR67 NGC.** Vivid shades of strawberry-red and lime-green toning visit the impeccably preserved surfaces of this spectacular Superb Gem proof, with sharply detailed design elements and deeply mirrored fields underneath. Census: 15 in 67 (1 in 67★), 2 finer (9/19). NGC ID# 23GE, PCGS# 4885

## MERCURY DIMES

### 1916 Mercury Dime, MS68 Full Bands Incredible Luster and Eye Appeal

- 3551 1916 MS68 Full Bands NGC.** Spectacular mint luster encompasses this nearly flawless Full Bands coin, yielding traces of ice-blue and champagne color but presenting as mainly brilliant to the unaided eye. This first-year Mercury dime is fully struck. The fields are especially captivating, and the overall preservation is simply marvelous. A rarity this fine, unknown numerically finer. Census: 19 in 68 (2 in 68★) Full Bands, 0 finer (9/19). NGC ID# 23GX, PCGS# 4905

### 1916-D Mercury Dime, XF Details Well-Detailed Series Key Issue

- 3552 1916-D — Cleaning — PCGS Genuine. XF Details.** The surfaces are a bit glossy, although signs of a past cleaning are largely obscured by an even veil of golden-gray, pale-blue, and lavender toning that envelops both sides. Solid XF definition remains, with a good measure of eye appeal despite the minor effects of cleaning. A surplus of bidders always emerge when a 1916-D crosses the block regardless of grade.

- 3553 1918-D MS64 Full Bands PCGS.** Razor-sharp definition is evident on all design elements of this attractive Choice Mercury dime, with fully split and rounded bands on the fasces. The well-preserved surfaces radiate vibrant mint luster and outstanding eye appeal. Population: 82 in 64 (3 in 64+) Full Bands, 33 finer (9/19). NGC ID# 23H6, PCGS# 4919

**1919-D Dime, MS64 Full Bands  
Much Better Denver Issue**

**3554 1919-D MS64 Full Bands PCGS.** The 1919-D is among the most challenging issues in the Mercury dime series in Full Bands. This Choice example displays gold-tinted luster and impressively sharp definition. Faint grazes on Liberty's cheek are all that limit the grade. An interesting, bold radial die crack runs north from the bottom rim into the neck truncation. PCGS has seen only 22 numerically finer Full Bands representatives (9/19). NGC ID# 23H9, PCGS# 4925

**3555 1923 MS67+ Full Bands PCGS. CAC.** The 1923 Mercury dime is seldom encountered in grades above the MS67 level. This Plus-graded Superb Gem exhibits sharply detailed design elements throughout, including fully split and rounded bands on the fasces. The impeccably preserved, lustrous surfaces are enhanced by highlights of lime-green and amber toning. PCGS has graded eight numerically finer examples (9/19). NGC ID# 23HG, PCGS# 4939

**1924 Mercury Dime, MS67+ Full Bands  
Just One Finer At PCGS, This With CAC**

**3556 1924 MS67+ Full Bands PCGS. CAC.** A condition rarity, certainly among the finest Full Bands examples known of this date. Frosty surfaces display light-gold and lavender hues, and the fasces bands are well-separated. PCGS lists a quantity of Full Bands coins at the MS67 level, making the Plus designation with CAC endorsement all the more important. Population: 34 in 67 (4 in 67+) Full Bands, 1 finer. CAC: 14 in 67, 0 finer (9/19). NGC ID# 23HJ, PCGS# 4943

**3557 1929-D MS67+ PCGS. CAC.** This Plus-graded Superb Gem exhibits sharply detailed design elements in most areas, but a touch of blending is apparent on the middle bands on the fasces. The impeccably preserved lustrous surfaces show a few highlights of lime-green and amber toning. Population: 17 in 67 (10 in 67+), 3 finer. CAC: 7 in 67, 3 finer (9/19). NGC ID# 23J3, PCGS# 4974

**1929-D Dime, MS67+ Full Bands  
Rare CAC-Endorsed Registry Coin**

**3558 1929-D MS67+ Full Bands PCGS. CAC.** A scarce Superb Gem Full Bands example of this Denver issue which is plentiful in lower grades. With the Plus designation and CAC endorsement it is a rarity, and finer coins are prohibitively difficult to acquire. Impressively frosted luster illuminates sharp design elements, and daubs of olive-green, crimson, russet, and gold appear on each side. Population: 57 in 67 (5 in 67+) Full Bands, 3 finer. CAC: 23 in 67, 1 finer (9/19). NGC ID# 5LXC, PCGS# 4975

**3559 1934 MS68 Full Bands PCGS.** This magnificent MS68 Mercury dime exhibits sharply detailed design elements throughout, including fully split and rounded bands on the fasces. The impeccably preserved lustrous surfaces are enhanced by highlights of lilac and sea-green toning. Population: 35 in 68 (2 in 68+) Full Bands, 0 finer (9/19). NGC ID# 5BZ8, PCGS# 4989

**3560 1935 MS67+ Full Bands PCGS. CAC.** Dusky shades of sea-green and bluish-gray toning visit the impeccably preserved surfaces of this Plus-graded Superb Gem and the design elements are sharply detailed throughout, with Full Bands on the fasces. PCGS has graded 19 numerically finer examples (9/19). NGC ID# 23JC, PCGS# 4993

**1935-S Dime, MS67+ Full Bands  
Pristine Registry Set Candidate**

**3561 1935-S MS67+ Full Bands PCGS. CAC.** An indication that the worst years of the Great Depression were over was the resumption of Mercury Dime production at San Francisco in 1935, after a four-year hiatus for the denomination. The 1935-S is readily obtained in most Mint State grades, but at the MS67+ level, PCGS has certified just 16 pieces with only 2 finer (9/19). This fully white Superb Gem is boldly struck and remarkably void of contact. Worthy of the finest Registry Set. NGC ID# 23JE, PCGS# 4997

**1941-S Dime, MS68 Full Bands  
Top-Grade Condition Rarity**

- 3562 1941-S MS68 Full Bands PCGS.** Struck from freshly polished dies with microscopically fine die polish lines in the fields, this sharp and smooth MS68 entirely brilliant and needle sharp. Fully rounded diagonals and crisply defined bands bundle the fascies. The obverse is brightly reflective and close to prooflike, while the reverse has intervening areas of mint frost that add to the strong mint luster. An outstanding Registry Set candidate, tied for finest at PCGS. Population: 16 in 68 Full Bands, 0 finer (8/19). NGC ID# 23JZ, PCGS# 5033

**1942/1 Dime, MS62  
A Popular Guide Book Variety**

- 3563 1942/1 FS-101 MS62 NGC.** Among the keys to the Mercury dime series, this hubbing error is prominent and easily recognized by the overlapping last numerals in the date. The middle bands exhibit considerable separation, and a magnifier is required to be certain this is not a Full Bands coin. A medley of lavender, greenish-yellow, and gray toning resides on both sides. Census: 34 in 62, 38 finer (9/19).  
*Ex: Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33162, which realized \$3,965.63. NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036*

- 3564 1942-S MS67+ Full Bands PCGS. CAC.** Delicate highlights of sea-green and lavender toning visit the impeccably preserved surfaces of this spectacular Plus-graded Superb Gem, with vibrant mint luster on both sides. The design elements are sharply detailed, with Full Bands definition on the fascies. PCGS has graded six numerically finer examples (9/19). NGC ID# 23K7, PCGS# 5043

**PROOF MERCURY DIMES**

- 3565 1936 PR67 PCGS.** A stunning Superb Gem proof Mercury dime, with razor-sharp definition on all design elements and deeply mirrored fields. The brilliant surfaces are virtually flawless and eye appeal is terrific. Population: 97 in 67 (7 in 67+), 3 finer (9/19). NGC ID# 27DG, PCGS# 5071
- 3566 1938 PR68 NGC.** This magnificent PR68 Mercury dime exhibits razor-sharp definition on all design elements and the deeply mirrored fields are impeccably preserved. A few hints of emerald-green toning visit the peripheries and eye appeal is terrific. Housed in new NGC holder commemorating the *Guide Book* and signed by Ken Bressett. Census: 43 in 68 (4 in 68★), 1 finer (9/19). NGC ID# 27DJ, PCGS# 5073

- 3567 1939 PR67 Cameo NGC.** The sharply detailed frosty design elements of this spectacular Superb Gem proof contrast boldly with the deeply mirrored fields and the brilliant surfaces are impeccably preserved, with terrific eye appeal. Housed in new NGC holder commemorating the *Guide Book* and signed by Ken Bressett. Census: 24 in 67 Cameo (3 in 67★), 1 finer (9/19). NGC ID# 27DK, PCGS# 85074

**ROOSEVELT DIMES**

**1948-D Dime, MS68 Full Bands  
Attractively Toned, Tie for Finest**

- 3568 1948-D MS68 Full Bands PCGS.** This is a must-have coin for the Registry Set collector. PCGS lists only 10 MS68 examples of the 1948-D Roosevelt dime, including three without Full Bands and seven with (8/19). This piece is among the latter group. The surfaces are virtually flawless, complemented by a bold strike and vibrant mint luster. Original yellow-gold, mint-green, and lilac toning graces each side. Population: 7 in 68 Full Bands, 0 finer (8/19). NGC ID# 23KS, PCGS# 85089

- 3569 1951-S MS68 Full Bands PCGS.** This sharply detailed MS68 specimen exhibits Full Bands definition on the torch. The virtually pristine surfaces radiate vibrant mint luster and show highlights of amber and sea-green toning at the peripheries. Population: 10 in 68 Full Bands, 0 finer (9/19). NGC ID# 23L4, PCGS# 85099

**1953-D Roosevelt Dime, MS68 Full Bands  
Sole-Finest at PCGS**

- 3570 1953-D MS68 Full Bands PCGS.** Not only is this Superb Gem 1953-D an important Registry Set Roosevelt dime, it is an exemplary "color" coin with exquisite obverse toning in shades of lime-green, fuchsia-pink, and robin's egg blue. The attractive pastel toning deepens at the rims, and carries over to the reverse border. Nearly flawless surfaces host a sharp Full Bands strike and a repunched mintmark (RPM-005, repunched D over tilted D). Population: 1 in 68 Full Bands, 0 finer (8/19). NGC ID# 27KH, PCGS# 85104

- 3571 1957 MS67 Full Bands PCGS.** This spectacular Superb Gem Roosevelt dime exhibits sharply detailed design elements throughout, including Full Bands definition on the torch. The lustrous surfaces are virtually flawless and eye appeal is terrific. Population: 19 in 67 (4 in 67+) Full Bands, 0 finer (9/19). NGC ID# 23LK, PCGS# 85114

## TWENTY CENT PIECE

- 3572 1875-S MS64 PCGS. BF-5, R.2.** This is one of the most intriguing 1875-S twenty cent varieties, showing a small rim cud below the date and extensive peripheral die cracks on the reverse, which include a triangular break at the U in UNITED. This near-Gem shimmers with frosty, untuned mint luster. The top crests of the eagle's wings show weakness, but Liberty's figure is only weak on the foot. NGC ID# 23R7, PCGS# 5298

## PROOF TWENTY CENT PIECES

- 3573 1875 PR62 PCGS. BF-1, R.1.** The usual variety with the shield tip pointing to the left side of the top of the 1. A total of 1,200 twenty cent proofs were struck in 1875, the first year of issue for the denomination. Dusky patina turns to blended blue, violet, and golden hues when the coin is rotated. Minor contact marks reside beneath the toning. NGC ID# 27GZ, PCGS# 5303

### 1878 Twenty Cent, Toned PR64 Final-Year of Issue

- 3574 1878 PR64 PCGS. BF-1, R.3.** All 1878 twenty cent pieces were struck from a single die pair, which shows a small die lump in the drapery folds to the right of the Y in LIBERTY. These are all proof coins, coming from a mintage of 600 pieces, and they are the last twenty cent coins struck in any format. This near-Gem displays sharp detail and reflective fields. Deep aquamarine toning encompasses the margins, leaving the centers with a lighter lilac hue. NGC ID# 27H5, PCGS# 5306

## EARLY QUARTERS

### 1796 Draped Bust Quarter, Poor 1 B-2, Counterstamped J. HALSTRICK. / BOSTON

- 3575 1796 B-2, R.3, Poor 1 NGC. J. HALSTRICK. / BOSTON Counterstamp. Brunk H-154.** This Browning-2 quarter is almost worn smooth on both sides, although the date area is obligingly clear and fully readable, allowing attribution. The reverse is interestingly counterstamped J. HALSTRICK. / BOSTON, in the style of a silversmith or jeweler. The counterstamp is listed in Dr. Brunk's reference on a 1796 quarter (presumably, this coin) as H-154.

Research shows two possibilities for the counterstamp, the more likely one being Joseph S. Halstrick (1815-1912), who was a Boston silversmith listed in several Boston directories in the mid-1800s. In circa 1850, he was in partnership with James D. Stanwood in the firm Stanwood & Halstrick. His son, Joseph Halstrick, Jr. was born in about 1842. He was also a silversmith in Boston, enlisted in 1861 and wounded at Bull Run, discharged in 1863. In 1876 he was granted a patent for improvement in gas burners. NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310

### 1805 B-2 Quarter, XF45 Challenging Variety This Fine

- 3576 1805 B-2, R.2, XF45 PCGS. CAC. Tompkins Die State 2/2.** Weakness at the right side of R in LIBERTY and multiple die clashing on the reverse define the die state. While the Browning-2 variety is reasonably available in lower circulated grades, Choice XF or finer coins are scarce. This partially lustrous example displays tan-gold toning with blue accents. Traces of reflectivity remain in the minimally marked fields. The devices show moderate wear and, as usual, the stars are weakly struck. NGC ID# 23RC, PCGS# 38924 Base PCGS# 5313

- 3577 1806/5 B-1, R.2, VF20 PCGS. Tompkins Die State 2/2.** The curve and ball of an underdigit 5 is clearly visible at the lower loop of 6. Overall deep, dove-gray and orange toning lightens at the points of wear to silver-gray, creating a partial "circulated cameo" effect. This is a well-defined, attractive collector-grade coin, with a few light hairlines beneath the toning but no marks of any size. Pleasing for the grade. NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

**1806 B-3 Quarter, Satiny AU50  
Late Die State**

**3578 1806 B-3, R.1, AU50 PCGS.** Tompkins Die State 4/5, cracked, clashed, with rim crumbling. Although weak around the obverse border and on the eagle's head and neck, this Browning-3 Draped Bust quarter retains most of the detail it had when it was struck. Light rub is evident in a general sense across each side, but there is no obvious loss of detail — aside from localized areas of softness on account of the strike. Each side is satiny with hints of luster. Light russet-golden toning graces the margins. NGC ID# 23RD, PCGS# 38929 Base PCGS# 5314

**3579 1806 B-10, R.5, Fine 12 PCGS.** Tompkins Die State 1/1. A smooth and problem-free example of the scarce B-10 variety — known but unpublished by Browning, with Walter Breen claiming discovery of the die pair. This is an ideal Fine 12 example, with substantial wear, but all of the devices are well-represented. The olive branch beneath the eagle's right (facing) wing is largely obscured by sinking of the die. The rims and dentils remain intact despite nearly 50 points of wear. NGC ID# 23RD, PCGS# 38937 Base PCGS# 5314

**3580 1807 B-1, R.2, VF35 PCGS.** Tompkins Die State 5/2, heavily clashed reverse, lapped obverse. B-1 is the slightly more plentiful of the two 1807 Draped Bust quarter varieties. Central strike detail is strong for the VF level, and each side shows splashes of lilac-gray and olive toning. The borders are soft, as is often the case with early type coins struck on a screw press from worn dies. NGC ID# 23RF, PCGS# 38939 Base PCGS# 5316

## BUST QUARTERS

**3581 1815 B-1, R.1, XF40 PCGS. CAC.** Tompkins Die State 4/2. A dual set of clash marks above and through the date confirm the mid-to-late die state. Rich, olive-gray toning covers both sides, with silver-gray accents at points of wear. No quarters were minted after 1807 until 1815. Spanish 2 reales pieces circulated widely and were readily accepted in commerce, while the quarter denomination remained new and less familiar. Banks, in particular, were loath to accept any coin of less than half dollar value. Planters Bank of New Orleans instigated production of 1815 quarters, providing bullion for most of the mintage, refusing to accept delivery of anything other than quarters, and seeking to replace worn out circulating Spanish coinage passing through their banking channels. It is likely that this CAC-endorsed quarter passed through the Planters Bank system at one time. NGC ID# 23RG, PCGS# 38942 Base PCGS# 5321

**3582 1821 B-2, High R.4, AU55 PCGS.** Tompkins Die State 2/2, with a die crack from Liberty's temple down past the eye, and die rust within and around the 5 in the denomination. Diagnostic markers for this die pair include star 7 pointing above the headband, the A in STATES above UR, and the wide spacing of 25. This lightly circulated Capped Bust quarter is well-defined with minimally toned centers. Golden and gunmetal patina colors the borders. NGC ID# 23RM, PCGS# 38964 Base PCGS# 5331

**1825/4/(2) Bust Quarter, MS63  
Popular B-2 Variety**

**3583 1825/4/(2) B-2, R.2, MS63 PCGS.** Tompkins Die State 1/1. Actually, a little past the "perfect" state of the reverse die, with the mere beginnings of a die crack above the left serif of I in UNITED, but it does not descend into the field below. The fields and devices of this Browning-2 quarter are remarkably unabraded — only one or two minor marks are visible with a loupe. A bit of rim chatter is visible with a glass but is minor. The strike is generally sharp except on the middle cap fold and the eagle's forward-right (facing) talon. Attractive shades of amber-gold and lilac-gray blanket lustrous surfaces. Population: 6 in 63, 14 finer (10/18). NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336

## SEATED QUARTERS

**1838 Seated Liberty Quarter, MS63  
First-Year No Drapery Example**

**3584 1838 No Drapery MS63 NGC. Briggs 1-A.** Open Claws Reverse, the usually seen variety among first-year 1838 No Drapery quarters. Thin antique patina graces each side of this Select representative. Frosty luster percolates through the thin overlay, a common trait among Uncirculated survivors. The central motifs are sharp, while the border elements are incomplete. That includes OF AMERICA, where striations from the draw bench are visible. Census: 23 in 63 (2 in 63+, 1 in 63★), 33 finer (9/19). NGC ID# 23SE, PCGS# 5391

1854-O Quarter, Huge O, VF20  
Popular *Guide Book* Variety

- 3585** 1854-O Arrows, Huge O, Briggs 1-A, FS-501, VF20 PCGS. This intriguing *Guide Book* variety is inherently difficult to find with pleasing eye appeal, as most examples are well-worn and suffer from varying degrees of die fatigue. The present coin is lightly circulated, but retains detail well-worthy of the VF grade level. Original pewter-gray patina overall yields to deeper olive toning in the recesses, giving this piece a distinct old-time appearance. An old, faint pinscratch in the right obverse field does not affect the grade assessment from PCGS. Population: 9 in 20, 43 finer (9/19). NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

1854-O Quarter, VF25  
FS-501, 'Huge O' Mintmark

- 3586** 1854-O Arrows, Huge O, Briggs 1-A, FS-501, VF25 PCGS. The Huge O mintmark was presumably entered by hand on the working die, resulting in its ungainly, irregular appearance. Larry Briggs notes that not only was the crude die work performed on the reverse, but nearly the entire obverse was recut as well including the stars, Liberty, the Arrows and the date. Indeed, on a well-circulated coin such as the current example, the figure of Liberty more closely resembles the Grim Reaper than a classic symbol of freedom. This mid-grade example is problem-free with pleasing old-silver color and few abrasions of any kind. A popular *Guide Book* variety — scarce in all grades. Population: 5 in 25, 38 finer (9/19). Ex: *ANA Signature (Heritage, 8/2015)*, lot 4639. NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

1879 Quarter Dollar, MS66  
Low-Mintage Circulation Strike

- 3587** 1879 MS66 PCGS. CAC. Briggs 1-A. Despite a mintage of just 13,600 pieces, a surprising number of high-grade 1879 quarters survive. Low-mintages were the rule for quarters and half dollars during the frenzy of Morgan dollar production under the terms of the Bland-Allison Act, and sharp-eyed dealers and speculators put Uncirculated coins aside. This sharply struck Premium Gem displays a mixture of satiny mint luster and semiprooflike reflectivity. Peach-gold, cerulean-blue, and amber-orange toning decorates each side of this CAC-endorsed quarter. Population: 41 in 66 (3 in 66+), 28 finer. CAC: 14 in 66, 22 finer (8/19). NGC ID# 23VB, PCGS# 5511

PROOF SEATED QUARTERS

- 3588** 1861 PR64 NGC. Briggs 7-E. Mottled shades of lavender, amber, and sea-green toning blanket the lightly marked surfaces of this attractive Choice proof, with sharply detailed design elements and deeply reflective fields underneath. Census: 23 in 64, 26 finer (9/19). NGC ID# 23WN, PCGS# 5557

1862 Quarter, Toned PR65  
Attractive Color and Mirroring

- 3589** 1862 PR65 NGC. An elusive proof issue, particularly in Gem condition. There are few Cameos known in this grade, but the present non-Cameo has other attributes that make it equally appealing, namely deep mirroring in the fields and old-time cottonwood-green, lemon-gold, and lilac-amber toning. A few of the left hand stars are incomplete, but the central devices showcase sharp definition. Census: 11 in 65, 8 finer; 3 in 65 Cameo, 9 finer (9/19). NGC ID# 23WP, PCGS# 5558

**1863 Quarter, Lightly Toned PR65  
Modest Field-Device Contrast**

**3590 1863 PR65 PCGS. Briggs 4-D.** A deeply mirrored Gem proof with fully struck design elements and natural golden toning with steel-blue accents. There is moderate contrast between the central devices and the fields, although not quite strong enough to earn a Cameo designation from PCGS. Eye appeal is excellent for the grade. Population: 16 in 65, 14 finer (9/19). NGC ID# 23WR, PCGS# 5559

**3591 1863 PR64 Cameo PCGS.** All 1863 quarters are scarce in either circulation strike or proof formats. Just 460 proofs were struck. This contrasted proof example displays a trace of reddish-brown toning at the rims. The strike is razor sharp on both sides, with die polish lines that are visible with magnification across the well-mirrored fields. Frosted central devices add to the strong Cameo effect. Population: 23 in 64 (4 in 64+) Cameo, 10 finer (8/19). NGC ID# 23WR, PCGS# 85559

**1863 Quarter, PR66 Cameo  
Toned and Attractive**

**3592 1863 PR66 Cameo PCGS. Briggs 4-D.** A sharp proof, well-contrasted on both sides with deeply mirrored fields and satiny devices. Multicolor toning graces much of the fields, with the colors being most vibrant on the reverse. There are a few microscopic ticks on Liberty's left (facing) arm, although the fields are pristine. Proof 1863 quarters are rare this fine with cameo contrast. Population: 5 in 66 (1 in 66+) Cameo, 0 finer (8/19). NGC ID# 23WR, PCGS# 85559

**3593 1874 Arrows PR64 PCGS. Briggs 5-D.** A spectacular Choice proof specimen of the short-lived Arrows design, with sharply detailed design elements throughout and deeply reflective fields. The brilliant surfaces show a few minor hairlines and contact marks and a light smudge in the field near Liberty's elbow. Population: 77 in 64, 59 finer (9/19). NGC ID# 23XS, PCGS# 5575

**1880 Seated Quarter, PR67  
Mintage of 1,355 Proofs**

**3594 1880 PR67 PCGS. Briggs 2-B.** Type Two Reverse, with a die lump in the shield and narrow feet on the base of TAT in STATES. Dusky rose, violet, blue and gold patina is deeper on the obverse than the reverse of this attractive Superb Gem quarter. Faint remnants of a partial print appear in the left obverse field. Collectible alternative to the low-mintage circulation strikes for the year. Population: 15 in 67 (2 in 67+), 4 finer in this category (9/19). NGC ID# 23XC, PCGS# 5581

**3595 1886 PR64 Ultra Cameo NGC.** Deep, watery mirrors surround richly frosted devices, with a hint of gold toning that mellows the otherwise brilliant-silver surfaces. Profound contrast exists between the raised elements and glassy fields. A sharp proof strike delivers fully struck stars and a crisp, three-dimensional eagle, with only a few minor imperfections throughout the entire near-Gem surfaces. Census: 1 in 64 Ultra Cameo, 8 finer (8/19). NGC ID# 23XJ, PCGS# 95587

**1890 Quarter, PR66 Cameo  
Attractive, Boldly Contrasted**

**3596 1890 PR66 Cameo PCGS. CAC.** The rims show a faint reddish-gold hue that drifts inward as almost imperceptible wafts of vague patina, but for all purposes the surfaces of this well-contrasted Premium Gem proof are essentially brilliant. Liquidlike mirrored fields surround sharply struck and smoothly frosted devices for bold cameo effect. There are no visual or technical distractions, and CAC endorsement supplements the excellent eye appeal. Population: 7 in 66 Cameo, 5 finer. CAC: 2 in 66, 3 finer (8/19). NGC ID# 27US, PCGS# 85591

## BARBER QUARTERS

### 1892-S Barber Quarter, MS63+ Deep Rainbow Toning

**3597 1892-S MS63+ PCGS. CAC.** A lustrous, deeply toned first-year San Francisco issue showing concentric rainbow toning on each side. A couple of small marks on Liberty's chin prevent a full near-Gem grade, although this piece does have the distinction of being the only Plus-graded MS63 example at PCGS. The strike is sharp and eye appeal is outstanding. Population: 34 in 63 (1 in 63+), 38 finer. CAC: 4 in 63, 10 finer (8/19). NGC ID# 23XV, PCGS# 5603

**3598 1901-S AG3 PCGS.** A solid About Good example of this 20th century rarity, with all four digits of the date and the mintmark clearly legible. The peripheral lettering on the reverse is worn partially smooth, and merges with the well-worn rim. The central devices and mintmark are heavily worn but visible.  
*Ex: Central States Signature (Heritage, 5/2004), lot 7014.* NGC ID# 23YR, PCGS# 5630

**3599 1901-S AG3 NGC. CAC.** A pleasing, silver-gray example of this key Barber quarter, smoothly worn but without any distracting marks or rim problems. Deeper medium-gray accents surround the border devices and the central reverse motifs. Abrasions are limited to a few faint lines including one that runs from the top of the head to the eye. The obverse rates a notch higher than the well-worn reverse, where the rims blend with the letters of the legend.  
*Ex: Long Beach Signature (Heritage, 9/2016), lot 3925, which realized \$1,997.50.* NGC ID# 23YR, PCGS# 5630

**3600 1913-S VG8 PCGS. CAC.** The dove-gray surfaces of this low-mintage key are well-worn, but all major design elements are complete in outline and the rims remain full. The date, mintmark, motto, and reverse legend remain legible, but LIBERTY is worn flat. From a minuscule mintage of 40,000 pieces. NGC ID# 23ZW, PCGS# 5666

## PROOF BARBER QUARTERS

**3601 1907 PR65 Cameo PCGS. CAC.** A starkly contrasted Gem Cameo proof, fully struck save for some lightness on the eagle's talons. Both sides have an overlay of light golden toning, while the obverse also has a tinge of russet in the field near Liberty's chin. Population: 15 in 65 (1 in 65+) Cameo, 29 finer; 0 in 65 Deep Cameo, 8 finer. CAC: 3 in 65, 20 finer (8/19). NGC ID# 242N, PCGS# 85693

**3602 1910 PR65 PCGS. CAC.** Although often available overall, the proof 1910 Barber quarter is a rarity with CAC endorsement. This Gem displays deep mirrors and sharp devices, all accented by gold, rose, and sea-green toning. Neither side has mentionable abrasions and eye appeal is outstanding. Population: 25 in 65, 38 finer. CAC: 5 in 65, 14 finer (9/19). NGC ID# 242S, PCGS# 5696

## STANDING LIBERTY QUARTERS

### 1917 Type One Quarter, MS67 Full Head Attractively Toned, CAC Endorsed

**3603 1917 Type One MS67 Full Head PCGS. CAC.** A lustrous, well-struck Type One quarter, showing typically bold definition across the obverse. Of special note is the sharpness also of the eagle's left (facing) wing along its leading edge, which is often weak and overlooked on the 1917 Type One coin. Attractive lilac toning graces the obverse and central reverse, with gold and blue-green hues around the reverse border. A loupe reveals only tiny contact marks on the obverse, none bothersome. Population: 95 in 67 (10 in 67+) Full Head, 0 finer. CAC: 39 in 67, 0 finer (8/19). NGC ID# 242Z, PCGS# 5707

**3604 1917-S Type One MS65 Full Head PCGS. CAC.** This Gem Full Head 1917-S Standing Liberty quarter has all of the sharpness for which the Type One issues are famous, although its luster is distinctly more satiny than usual for the San Francisco issue. This date is often mattelike or deeply toned. The present coin is luminous and cast in delicate champagne and pale lilac hues. A few small contact marks are seen beneath a loupe. NGC ID# 2433, PCGS# 5711

**3605 1917 Type Two MS66+ Full Head PCGS. CAC.** A Plus-graded Premium Gem from the first year of the Type Two design, this coin exhibits sharply detailed design elements, with Full Head definition and just a trace of softness on the shield rivets. The well-preserved, lustrous surfaces are visited by shades of lime-green toning. PCGS has graded 18 Full Head examples in numerically finer grades (9/19). NGC ID# 2434, PCGS# 5715

### 1918 Standing Liberty Quarter, MS66 Elusive Full Head Example

**3606 1918 MS66 Full Head PCGS.** This spectacular Premium Gem exhibits sharply detailed design elements, with fine definition on Liberty's head and the eagle's feathers. The impeccably preserved, lustrous surfaces are enhanced by highlights of pale gold toning. Overall eye appeal is terrific. Population: 55 in 66 (7 in 66+) Full Head, 15 finer (9/19). NGC ID# 2437, PCGS# 5721

**3607 1918-D MS65 Full Head PCGS.** A pleasing Gem Full Head example, cast in mottled olive-gold and russet toning on the obverse with light champagne color across the reverse. Shield rivets are weak, but Liberty's hairline is complete. The date numerals are sharp. Population: 67 in 65 (3 in 65+) Full Head, 35 finer (9/19). NGC ID# 3TWU, PCGS# 5723

**3608 1918/7-S FS-101 — Damage — PCGS Genuine. VF Details.** The date is clear on this piece, and detail is well within the VF grade level. To the unaided eye, this coin is moderately appealing, with slate-gray patina overall that grows darker in the fields and recesses. Under a loupe, some significant marks are seen on Liberty's forward leg and the shield, and both sides have extensive hairlines from a wire brush. These characteristics, however, will not remove this piece from consideration for a budget-minded *Guide Book* Standing Liberty quarter collection, wherein the 1918/7-S is typically one of the stoppers.

**3609 1919-D MS63 PCGS.** This is a bright, completely untoned example of the well-known 1919-D Standing Liberty quarter. Each side is satiny with relatively minor marks for the grade. Uneven strike definition is characteristic. NGC ID# 243C, PCGS# 5730

**1924-D Quarter, MS65 Full Head  
Strong Detail and Totally Brilliant**

**3610 1924-D MS65 Full Head PCGS.** Design definition is far above average for this notoriously strike-challenged Denver issue. Liberty's head and chainmail, and most of the shield rivets (except for 3 and 4) are well-struck. Obverse softness is limited largely to the tops of the date digits. Both sides of this Gem are fully brilliant with vibrant, satiny mint luster. PCGS reports 26 Full Head submissions finer (9/19). NGC ID# 243M, PCGS# 5749

**1926-S Quarter, Frosty MS66  
Spectacular Original Luster**

**3611 1926-S MS66 PCGS.** Glistening mint luster shines through russet toning on this Premium Gem 1926-S quarter, without a single noteworthy abrasion. The surfaces are decidedly original. Typical of the 1926-S, this coin is weakly struck on Liberty's head and the shield rivets, but Liberty's toes and the leading edge of the eagle's left (facing) wing are remarkably well-defined. The 1926-S is rare in this grade. Many collectors only focus on Full Head coins, leaving high-end non-Full Head pieces somewhat underappreciated — and some would argue undervalued. PCGS and NGC combined list only three non-Full Head pieces numerically finer than the present. Population: 26 in 66 (1 in 66+), 1 finer (9/19). NGC ID# 4462, PCGS# 5758

**3612 1929-S MS67 Full Head NGC.** This spectacular Superb Gem exhibits sharply detailed design elements in most areas, with Full Head definition and just a touch of softness on the shield rivets. The lustrous, brilliant surfaces are virtually unmarked. Housed in new NGC holder commemorating the *Guide Book* and signed by Ken Bressett. Census: 37 in 67 (2 in 67+ Full Head, 5 in 67★), 2 finer (9/19). NGC ID# 2444, PCGS# 5777

**3613 1930 MS67 Full Head NGC.** In the Standing Liberty quarter series, even common dates become conditionally rare in MS67 Full Head. This 1930 is among the finest Full Head coins at NGC. Luster is frosty and beautifully preserved, complementing well-struck design elements. A light champagne glow warms each side. Census: 34 in 67 (1 in 67+ Full Head, 1 in 67★), 0 finer (9/19). NGC ID# 2445, PCGS# 5779

**WASHINGTON QUARTERS**

**3614 1932-S MS65 PCGS.** Delicate highlights of lavender and sea-green toning visit the well-preserved surfaces of this delightful Gem, with sharply detailed design elements and vibrant mint luster throughout. From a first-year mintage of 408,000 pieces, the 1932-S Washington quarter is one of the keys to the series. PCGS has graded four numerically finer examples (9/19). NGC ID# 2449, PCGS# 5792

**3615 1932-S MS65 PCGS.** A satiny Gem example of this key San Francisco issue, showing a bold strike and well-preserved surfaces. Dusky tan-gold toning covers each side. The 1932-S is one of the two famous key dates in the Washington quarter series. The other — the 1932-D — has a slightly higher mintage of 436,800 coins; the 1932-S represented here boasts a mintage of only 408,000 pieces. NGC ID# 2449, PCGS# 5792

**1932-S Quarter, MS65+  
Low-Mintage Key**

**3616 1932-S MS65+ PCGS.** This key-date Washington is challenging to locate in Gem condition and is extremely rare any finer. Indeed, PCGS and NGC report only 12 submissions finer than MS65 (9/19). Freckles of golden-brown patina gravitate to the margins, slightly more extensive and deeper on the obverse. Both sides are well-struck and devoid of mentionable marks. NGC ID# 2449, PCGS# 5792

**3617 1935 MS67+ PCGS. CAC.** A Plus-graded Superb Gem representative of this early series issue, with well-detailed design elements and virtually pristine surfaces that show highlights of sea-green toning. Vibrant mint luster adds to the considerable eye appeal. PCGS has graded one numerically finer example (9/19). NGC ID# 244D, PCGS# 5797

**1937-D Quarter, MS67+  
Tied for Finest at PCGS**

- 3618 1937-D MS67+ PCGS.** The 1937-D is an early branch issue that resides in the shadow of its surprisingly scarce 1936-D predecessor. MS67+ pieces are undeniably rare, since PCGS (as of 9/19) has certified only 9 examples as such with none finer. This remarkable representative is predominantly brilliant aside from a rich arc of autumn-brown and sea-green toning across the upper margin. The strike is sharp save for slight blending on the CA in AMERICA. The lustrous surfaces are splendidly smooth. NGC ID# 244L, PCGS# 5804

**1937-D Quarter, MS67+  
None Graded Finer**

- 3619 1937-D MS67+ PCGS. CAC.** Neither PCGS nor NGC have certified an MS68 1937-D, leaving about a 15 Superb Gems with Plus or Star designations to vie for "finest known" honors. This is one of those few top-graded coins, with CAC endorsement adding to its credentials. A dusting of reddish-brown and olive-gray patina confirms the original surfaces, and a sharp strike delivers praiseworthy definition throughout the raised elements. Population: 9 in 67+, 0 finer. CAC: 24 in 67, 0 finer (8/19). NGC ID# 244L, PCGS# 5804

- 3620 1942 MS67+ PCGS. CAC.** This Plus-graded Superb Gem Washington quarter displays well-detailed design elements and impeccably preserved surfaces, with highlights of sea-green and lavender-gray toning. Vibrant mint luster adds to the outstanding eye appeal. Population: 62 in 67 (12 in 67+), 0 finer. CAC: 32 in 67, 0 finer (9/19). NGC ID# 2452, PCGS# 5817

- 3621 1943-D MS67+ PCGS. CAC.** Cherry-red and lemon-gold patina accompanies the right obverse margin. The remainder of both sides displays light sea-green toning. Careful evaluation reveals delicate obverse field grazes. A coin with Registry Set credentials based on the PCGS Plus designation and CAC endorsement. Population: 95 in 67 (18 in 67+), 1 finer. CAC: 38 in 67, 0 finer (8/19). NGC ID# 2456, PCGS# 5821

- 3622 1949-D MS68 NGC.** A handful of 1949-D Washington quarters are certified in the lofty MS68 grade, with none finer. These pieces are of the utmost importance to Registry Set collectors. This example is deeply toned in sun-gold, peach-orange, amber, rose, and russet hues. It is well-struck and vibrantly lustrous. Eye appeal excels. Census: 6 in 68 (2 in 68★), 0 finer (9/19). NGC ID# 245R, PCGS# 5840

**1965 Quarter, MS68  
Registry Set Contender**

- 3623 1965 MS68 NGC.** Minted by the billions and generally ignored by collectors, the first-year clad quarters set a mintage record that still stands — but it was either not saved in high grades, or the grading services find the issue unworthy in its entirety. This MS68 is one of three pieces that exist at the MS68 level (including a single MS68★), all at NGC. PCGS has not certified any examples at the MS68 level (9/19). NGC ID# 246W, PCGS# 5878

**EARLY HALF DOLLARS**

- 3624 1794 O-101, T-7, High R.3, VG8 NGC.** Tompkins Die State 1/3. A well-worn VG8 specimen from the first year of the denomination, this coin retains all major design elements complete in outline and the date, LIBERTY, and the reverse legend are still legible. The rim is worn flat on the obverse from 2 o'clock to 8 o'clock, and the slate-gray surfaces show only minor abrasions. Housed in new NGC holder commemorating the *Guide Book* and signed by Ken Bressett. Census (for the variety): 2 in 8, 23 finer (9/19). NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

**1794 O-101a Half Dollar, VG8  
Smooth Wear, Aged Patina**

- 3625 1794 O-101a, T-7, High R.3, VG8 PCGS.** Tompkins Die State 1/5. Heavy reverse die breaks at the upper reverse precipitate sinking of the die, which accelerates wear at the central reverse. The obverse is well-defined for the VG8 level, with the date fully readable and the other motifs distinctly outlined. Dappled deep-gray toning alternates with smooth, silver-gray patina on this problem-free first-year Flowing Hair half. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**1794 O-104 Half Dollar, VF Details  
Reverse Rim Cud Die State**

- 3626** 1794 O-104, T-11, R.5 — Reverse Scratched, Improperly Cleaned — NCS. VF Details. Tompkins Die State 3, with a rim cud above the ER in AMERICA. This piece has moderate detail. Slate-gray surfaces show evidence of cleaning, although the obverse remains visually pleasing. The reverse has numerous crisscrossing scratches across the interior, as well as lesser mint-made adjustment marks in the margins. Both sides have complete border dentils. Overton-104 is a scarce variety but is among the more often seen die marriages for the 1794 half dollar after the O-101 and O-101a issues.

- 3627** 1795 2 Leaves, O-104, T-24, R.4, Fine 12 PCGS. Tompkins Die State 3/2. Cream-gray toning on the high points yields to deep, grayish-brown patina in the fields on the obverse, while rich bluish-brown fields on the reverse contrast with silver-gray motifs. The expected small marks exist beneath the toning, with all of the design elements well-defined for the grade. A problem-free and collectible example of the Flowing Hair design, ideal for type. NGC ID# 24E7, PCGS# 39219 Base PCGS# 6052

**1795 O-110a Flowing Hair Half, VF30  
Attractively Toned Collector-Grade Example**

- 3628** 1795 2 Leaves, O-110a, T-21, R.3, VF30 PCGS. Tompkins Die State 3/3. A heavy, arc-shaped obverse die crack that curves between 1 and 3 o'clock is characteristic of the Overton subvariety. The beginnings of a second, similar crack runs parallel to the first crack from R in LIBERTY. Medium walnut-brown toning visits this attractively detailed Flowing Hair half. Faint adjustment marks (as produced) are noted on the eagle's legs. A few pinscratches and short scrapes outline the portrait, which shows die clashing near and above Liberty's hair. NGC ID# 24E7, PCGS# 39229 Base PCGS# 6052

- 3629** 1795 2 Leaves, O-124, T-12, R.5, Fine 12 NGC. Ex: Hilt Collection. Tompkins Die State 2/2. Lightly clashed. Star 1 pierces the bottom curl and star 15 solidly touches the underside of the bust truncation. Red and blue undertones shine through the medium-gray toning of this smooth Flowing Hair half. About 15% of the wing feathers are visible, and the rims are complete despite the considerable wear.  
Ex: *Central States Signature* (Heritage, 4/2015), lot 4360. NGC ID# 24E7, PCGS# 39240 Base PCGS# 6052

**1795 Two Leaves Half Dollar, VF30  
Scarce O-130, 7x10 Berries Variety**

- 3630** 1795 2 Leaves, O-130, T-8, Low R.5, VF30 NGC. Tompkins Die State 3/3. A blurry, heavy diagonal die crack crosses Liberty's face on the obverse, and peripheral die cracks are apparent on the reverse. Overton-130 is a scarce variety, distinctive for the 7x10 berry count on the reverse wreath, which is shared by no other variety. The VF coin offered here displays glossy pewter-gray surfaces and even wear. Some parallel adjustment marks (mint made) are seen in the upper portion of Liberty's hair behind the temple. NGC ID# 24E7, PCGS# 39242 Base PCGS# 6052

**1801 O-101 Half Dollar, VF25  
Elusive CAC Green Label**

- 3631** 1801 O-101, T-2, R.3, VF25 PCGS. CAC. Tompkins Die State 2/3. The 1801 half dollar is a better date in the Draped Bust set. Moreover, only 53 examples carry CAC endorsement in all grades. This is one of those pieces. Wear is light for the grade, complementing medium gray and olive-gold hues across each side. Some lightness of strike is visible in the stars and clouds above the eagle, but the obverse is well-defined. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1801 O-101 Half Dollar, VF30  
Well-Defined and Uniformly Toned**

- 3632** 1801 O-101, T-2, R.3, VF30 PCGS. This variety famously shows large die lumps around the reverse arrows, the UN in UNITED, and between the ER in AMERICA. This example is evenly worn with uniform olive-gray patina. Delicate lilac and golden undertones are evident in the margins, mainly near the dentils. The borders are sharply defined, although some weakness is noted amid the central reverse stars. Eye appeal is pleasing as a date or variety coin. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**3633** 1805/4 O-101, T-4, R.3, XF40 NGC. Tompkins Die State 1/2. Charcoal-gray borders cede to dove-gray fields and pearl-white high points. This is a deeply toned, well-defined Overton-101 with scattered minor obverse marks and an unabraded reverse. O-101 is an obvious overdate, with the crosslet, diagonal, base, and upright of the 4 all partly visible beneath 5. Struck from an early die stage, lacking the reverse cud above R and I of AMERICA that represents the later die states.

Ex: *Long Beach Signature* (Heritage, 6/2015), lot 4455, where it brought \$2,820. NGC ID# 24EH, PCGS# 39290 Base PCGS# 6070

#### 1805 O-112 Half Dollar, AU53

Smooth, Toned Surfaces

**3634** 1805 O-112, T-2, R.2, AU53 PCGS. CAC. Ex: Summers. Tompkins Die State 1/1. There is a retained cud through STATES on the reverse, although it has not yet begun to buckle as on Die State 1/2. This AU coin displays hints of remaining luster in the peripheral fields, complementing bold central devices. Deep olive, yellow-gold, and lilac-gray hues cover each side. NGC ID# 24EG, PCGS# 39286 Base PCGS# 6069

**3635** 1805 O-113a, T-1, High R.4 — Planchet Flaw — PCGS Genuine. AU Details. Tompkins Die State 2/2. A linear planchet defect extends from between stars 5 and 6 to Liberty's temple area, the precipitating factor for PCGS' reluctance to assign a numeric grade to this otherwise sharp and original early half. Strong die clashing exists through the 1805 date and above the bust. The devices show bold About Uncirculated definition, while orange and blue border toning surrounds golden-gray centers. Mint luster remains in sheltered areas. This is an interesting and attractive O-113a example, which is unknown in full Mint State, and is sure to find a home in an advanced early half collection.

#### 1806 Draped Bust Half, AU50

Pointed 6, No Stem, O-109

Much Luster Remains

**3636** 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU50 PCGS. Tompkins Die State 1/2. Aside from light reverse die clashing, perfect dies were used to strike this attractive About Uncirculated O-109 (T-15) half. The O-109 is known as the most-available die marriage among all 1806 half dollars. The variety is important to collectors, representing one of just two known 1806 die pairs without a stem through the eagle's right (facing) claw, proving that the stem end was not part of the master die or hub, and had to be entered by hand into each working die. The rare Overton-108 (T-2) is the other variety without a stem. This sharply struck O-109 retains ample areas of reddish-gold luster that enliven pleasing bluish-gray surfaces. A few faint hairlines exist beneath the attractive toning, but they do not hinder the substantial eye appeal. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

**3637** 1807 Draped Bust, O-104, T-9, Low R.5, XF40 PCGS. Tompkins Die State 1/1, without peripheral cracks in the left hand stars. Overton-104 is a challenging die variety. This piece is strong for the grade, showing elements of luster in the margins along with pleasing lilac and blue-gray toning. The interiors have tendencies toward gunmetal-gray and gold, although wear is lighter than expected for the grade, especially considering the weakly struck nature of this variety. A pleasing example. NGC ID# 24EM, PCGS# 39342 Base PCGS# 6079

#### 1807 Draped Bust Half, AU53

Reflective O-105 Example

**3638** 1807 Draped Bust, O-105, T-4, R.1, AU53 PCGS. The 1 in the date joins the curl, and the beak chomps down on a star, "point to point" as Overton says. A die lump appears between S and OF, and a die crack joins the tops of STATES. Glassy, reflective surfaces throughout show pinkish-gold centers and deep-aqua rim toning. Ex: *FUN Signature* (Heritage, 1/2014), lot 4354. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

#### 1807 Draped Bust Half Dollar, AU55

Lightly Toned O-105 Example

**3639** 1807 Draped Bust, O-105, T-4, R.1, AU55 PCGS. Tompkins Die State 2/2. A dusting of reddish-tan toning speckles the fields and takes up residence on the high points of this Choice About Uncirculated Draped Bust half. Silver luster remains prominent on both sides despite the intermittent toning. Tiny marks and wispy hairlines are seen under a loupe. The strike lacks sharpness on the star centers and light, grade-consistent wear adds weakness to a few high points, although Liberty's hair strands are well-defined and the eagle's breast feathers are bold. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

### BUST HALF DOLLARS

**3640** 1808 O-109a, R.3, AU55 PCGS. This is the late die stage of the 1808 O-109a variety, with lengthy die cracks on both sides and the peripheral reverse elements drawn to the edge. Dentils are weak or missing. The obverse of this Choice About Uncirculated example is sharply struck despite cracked dies, while the eagle and scroll are sharp as well. Reddish-gold and deep-blue shades provide a rich and distinctive patina. NGC ID# 24EP, PCGS# 39375 Base PCGS# 6090

**1809 Half Dollar, AU58  
Normal Edge, O-106, Attractive Toning**

- 3641** 1809 Normal Edge, O-106, R.3, AU58 PCGS. The recutting on the base of the N in UNITED distinguishes the reverse and thus the variety. A crack through stars 1 to 7 confirm the usual later die state. This piece offers gorgeous concentric patina in iridescent copper-gold, jade, aqua, and central pinkish tones. An eye-appealing and lustrous near-Mint example.  
Ex: FUN Signature (Heritage, 1/2014), lot 4370. NGC ID# 24ES, PCGS# 39395 Base PCGS# 6092

- 3642** 1809 III Edge, O-107, R.3, AU53 NGC. Diagnostic indicators include a die line from the curl to the B in LIBERTY, and die lumps between 50 C. in the denomination. The silver-gray surfaces of this lightly circulated 1809 half dollar display blushes of golden color and generally strong detail. The only exceptions are stars 6 through 9 and the lower portion of the eagle. NGC ID# 24ES, PCGS# 39383 Base PCGS# 6094

**1813 Half Dollar, MS63  
Toned O-108, Tied Top of Census  
The Early Die State**

- 3643** 1813 O-108, R.3, MS63 NGC. An oversized centering dot in the upper-left portion of the shield helps confirm this unique reverse. Deep olive-gray patina overall includes iridescent glints of golden-orange, rose, and violet color that heighten the appeal. Marks are difficult to discern, and the central strike is crisp. Liberty's profile is widely strike doubled. Surprisingly, no O-108 early die state examples are listed any finer in either the Parsley reference or Steve Herrman's latest listing (Summer, 2019). NGC ID# 24EZ, PCGS# 39469 Base PCGS# 6103

**1815/2 Half Dollar, VF25  
O-101, Popular Key Date  
Early Die State**

- 3644** 1815/2 O-101, R.2, VF25 NGC. The low production of just 47,150 pieces combines with an absence of any 1815 mintages for most denominations, making all 1815/2 half dollars numismatically significant in multiple respects. The overdate feature adds interest, as does the fact that the present coin is struck from an early die state — before any significant die cracks or die clashing. This solid, midgrade example displays pleasing silver-gray toning and warm, golden-gray accents. Small marks and abrasions dot the fields and moderate wear exists on the high points, yet from the collector's viewpoint it is an ideal coin for a circulated set. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

**1817 O-103 Half Dollar, Choice AU  
Punctuated Date**

- 3645** 1817 181.7, O-103, R.2, AU55 PCGS. The so-called Punctuated Date variety is attributed by the raised die dot between 17, and the Is in UNITED and AMERICA are missing their lower right serifs. Both sides are brightly untuned and lightly clashed with the peripheral devices drawn to the rims. Central definition is crisp, showing just a brush of friction. A challenging die marriage in high grades, with this Choice AU example ranking among the top offerings in recent years. NGC ID# 24F6, PCGS# 39510 Base PCGS# 6110

- 3646** 1820/19 Curl Base 2, O-102, R.1, AU55 PCGS. Overton-102 commands its own *Guide Book* listing as the sole overdated Curl 2 die variety. Forest-green and autumn-brown patina graces the obverse periphery, while the rest of this minimally marked example is stone-gray. NGC ID# 24FE, PCGS# 39574 Base PCGS# 6126

**1820 O-108 Half Dollar, MS62**  
**Square Base 2, Large Date, No Knob**

- 3647** 1820 Square Base 2, Large Date, No Knob, O-108, R.2, MS62 PCGS. Star 5 is recut, the Square Base, Curl Top 2 leans left, and the olive leaves are doubled. This piece may qualify for the low end of the Condition Census. Whether it does or does not, it remains an impressive Uncirculated example with mostly brilliant, nicely frosted centers and blushes of blue and golden color around the borders. The curls, stars, and feathers display razor-sharp definition. NGC ID# 24FD, PCGS# 39570 Base PCGS# 6123

**1822 O-105 Half Dollar, MS63**  
**Delicate Pastel Toning**

- 3648** 1822 O-105, R.3, MS63 PCGS. Lovely pastel toning graces each side of this Select Uncirculated O-105 half dollar, complementing satiny luster. The border stars are sharp, as are the central devices. Eye appeal exceeds expectations for the grade. As a date the 1822 is collectible in MS63, but finer pieces are scarce, and Gems are rare. NGC ID# 24FG, PCGS# 39590 Base PCGS# 6129

**1823 O-101a Half Dollar, MS62**  
**Patched 3 Guide Book Variety**

- 3649** 1823 Patched 3, O-101a, R.1, MS62 PCGS. The distinctive Patched 3 variety is listed separately in the *Guide Book* and enjoys considerable demand as such. Totally brilliant and brightly frosted interiors are ringed in shades of blue, green, crimson, and gold. Liberty and the eagle are both strongly defined, and grazes are shallow and undistracting. NGC ID# 24FJ, PCGS# 39621 Base PCGS# 6133

- 3650** 1827/6 O-102, R.1, AU58 PCGS. The lower loop of the a 6 is visible at the base of the 7 on this variety. This obverse die is shared by all three overdate die pairings. The O-102 reverse displays a die break near the top of the final A in AMERICA, the "apostrophe" variety. The die break is blurred on this piece, characteristic of the late die state and the metal flowlines that creep into the margins. The centers are well-struck, and faint luster plays in the fields, with weakness on the border stars. Original olive-gold toning lends itself to deeper russet-green hues around the peripheries. NGC ID# 24FP, PCGS# 39752 Base PCGS# 6147

- 3651** 1827 Square Base 2, O-125, R.3, MS63 NGC. This variety shows a die line through the T in LIBERTY and the center line of the fourth shield vertical extends down below the border. This brightly lustrous Select Uncirculated half dollar features light multicolor toning around the borders and fully brilliant interiors. Slightly uneven strike. NGC ID# 24FN, PCGS# 39724 Base PCGS# 6144

- 3652** 1828 Square Base 2, Small 8s, Large Letters, O-117a, R.1, AU58 PCGS. The serif of the C in 50C. is repunched on this variety. A peripheral die crack running between the dentils and UNITED STATES identifies the O-117a die state. This near-Mint coin easily claims the eye appeal of a Mint State specimen. Although a trace of friction is evident on the highest points of the devices, abundant luster remains, and both sides display beautiful multicolor toning. Orange-gold and lemon-yellow peripheral hues transition to mint-green, blue, and lilac on their journey toward the centers. The strike is sharp on the devices and also on most of the border stars. NGC ID# 4D7L, PCGS# 39772 Base PCGS# 6151

**1832 Small Letters Half Dollar, MS63+**  
**O-122, CAC Endorsed**

- 3653** 1832 Small Letters, O-122, R.1, MS63+ PCGS. CAC. A short stub off the right base of the first T in STATES aids in the attribution of this plentiful Small Letters variety. This CAC-approved example boasts a Plus designation from PCGS, yielding satiny luster in the fields beneath shades of gold, lilac, and sea-green toning. Several stars are weak, but the central devices are well-defined. NGC ID# 24FW, PCGS# 39883 Base PCGS# 6160

**1834 O-102 Half Dollar, MS64**  
**Large Date, Large Letters**

- 3654** 1834 Large Date, Large Letters, O-102, R.1, MS64 PCGS. The 3 in the date is sharply repunched below, similar to O-118 except that variety has a Small Date obverse. This lustrous Choice Mint State Capped Bust half dollar exhibits frosty surfaces beneath pleasing gold, champagne, and blue toning. NGC ID# 24FY, PCGS# 39906 Base PCGS# 6164

---

**1834 O-102 Half Dollar, MS64****Large Date, Large Letters  
Recut 3 in Date**

**3655** 1834 Large Date, Large Letters, O-102, R.1, MS64 NGC. This lustrous, album-toned near-Gem displays frosted surfaces and essentially mark-free surfaces and strong eye appeal. A ring of deep cobalt-blue and russet toning surrounds lightly toned, pale-gold centers. The 3 is diagnostically doubled in the left-sloping date to confirm the O-102 variety — one of three 1834 die pairs that represent the Large Date, Large Letters subtype. A die bulge surrounds Liberty's face, and corresponds to weakness at the eagle's left (facing) wing feathers. Liberty's profile is strike-doubled at the chin and neck. NGC ID# 24FY, PCGS# 39906 Base PCGS# 6164

**3656** 1834 Small Date, Small Letters, O-116, R.1, MS63 PCGS. Olive-green, gold, and russet-amber hues cover both sides of this Select Mint State Small Date coin, with no distracting abrasions visible. The stars and the tip of Liberty's bust are weakly struck, as is the URI in PLURIBUS. The centers are better-defined. NGC ID# 24FY, PCGS# 39921 Base PCGS# 6166

---

**REEDED EDGE HALF DOLLARS****1837 GR-5 Reeded Edge Half Dollar, MS64  
Attractively Toned, Sharply Struck**

**3657** 1837 GR-5, R.1, MS64 NGC. Struck from a late die state, with multiple die cracks on both sides. The 1837 GR-5 is a readily available variety, although the near-Gem MS64 grade ties this coin at the top of Dick Graham's census for the variety. The latest Stephen Herrman report of auction and mail bid prices for GR-5 tops out at MS63 (9/19). Iridescent rainbow colors at the borders transition to lilac-gray centers with strong eye appeal. As usual, the reverse is rotated about 30° counterclockwise, while a sharp strike exists on both sides. The eagle's head and neck are well-struck (not always the case for this variety). NGC ID# 24G4, PCGS# 531051 Base PCGS# 6176

**3658** 1837 GR-7, R.2, MS62 PCGS. A die anomaly at the C in AMERICA is popularly known as the "Inverted G" variety, but perhaps a more accurate description is an upside-down, backwards G. However, no G punch was used. There must have been die damage to the proper C, which was modified without success. The GR-7 die pair remains popular with collectors nevertheless. This is a richly toned example, with iridescent colors lurking beneath olive-gray overtones. A sharp strike adds to the considerable eye appeal. PCGS# 531053 Base PCGS# 6176

**3659** 1838 GR-11, R.1, MS63 NGC. A late die state of this plentiful variety with a bold crack from the eagle's claw down through the space between AL in HALF Liberty's curls and the eagle's feathers are strong, while the peripheries are slightly softer. Those same areas are lightly toned in multicolor patina, while the interiors remain brilliant and satiny. PCGS# 531092 Base PCGS# 6177

**3660** 1839-O GR-5, High R.4, XF40 PCGS. CAC. A small die lump in the field below the eagle's right (facing) wing identifies this elusive die pairing. The 1839-O Reeded Edge half dollar is popular overall. This piece displays light wear and pewter-gray patina. The originality of the surfaces is CAC endorsed. NGC ID# 24G7, PCGS# 531110 Base PCGS# 6181

---

**SEATED HALF DOLLARS****1839 Drapery Seated Half Dollar, MS64  
WB-102, Colorfully Toned**

**3661** 1839 With Drapery, WB-102, Die Pair 5, R.3, MS64 PCGS. Clash marks in the reverse shield and in the drapery below Liberty's elbow aid in attribution of the die pair on this Drapery type coin. Satiny luster complements a hint of reflectivity in the fields, and the design elements are sharp. Original gold, lilac, and ocean-blue toning appears on each side. Only a few minor contact marks are evident. Population: 20 in 64, 3 finer (9/19). NGC ID# 24GL, PCGS# 572001 Base PCGS# 6232

**1849 FS-301 Half Dollar, XF45  
Dramatically Repunched and Misplaced Date**

**3662** 1849 Repunched Date, WB-102, FS-301, Die Pair 6, R.5, XF45 NGC. Bill Bugert's 2016 *Register of Liberty Seated Half Dollar Varieties*, Volume 5 notes, "Finding one of these in any condition would be a centerpiece of a Liberty Seated half dollar collection." Along these lines, *Cherrypickers'* adds, "... this variety is considered by many to be one the true rarities of the entire series." The date is widely repunched north and west, with fragments of all four digits visible under little or no magnification. The bottom curve of a misplaced 9 protrudes from the rock base above the primary date. Rich, brownish-gray toning occupies both sides of this Choice XF example, with few marks and sharply defined motifs. NGC ID# 24HE, PCGS# 409890 Base PCGS# 6262

**1881 Half Dollar, MS65**  
**Reflective Fields**

- 3663 1881 Closed Bud, WB-102, MS65 PCGS.** As usual for the 1881, which boasts a low 10,000-coin mintage, this Gem half dollar is prooflike on both sides. Liberty's temple and the adjacent stars, and the eagle's left (facing) foot are slightly weak, although this brilliant type coin is otherwise well-defined. No singular abrasions are noted. Population: 15 in 65 (1 in 65+), 21 finer (9/19). NGC ID# 24KU, PCGS# 572264 Base PCGS# 6363

**1883 Half Dollar, MS65**  
**Original Mint Luster**

- 3664 1883 WB-101 MS65 PCGS.** This is a brilliant, frosty Gem, well-struck aside from trivial weakness on Liberty's temple and the adjacent stars. Only 8,000 circulation-strike half dollars were produced in 1883, and most surviving examples show a degree of prooflike reflectivity. This Gem has a balance of mirroring and cartwheel luster, and neither side exhibits bothersome abrasions. Population: 14 in 65 (1 in 65+), 18 finer (9/19). NGC ID# 24KW, PCGS# 572267 Base PCGS# 6365

**1891 Half Dollar, MS65**  
**Reflective Final-Year Type Coin**

- 3665 1891 WB-101 MS65 PCGS.** A fully prooflike Gem example of this final-year issue, showing a bold strike and exceptionally clean surfaces. There is the faintest hint of champagne toning over each side, but the coin is otherwise brilliant. This issue is scarce in MS65 and is rarely offered in higher grades. The mintage of 200,000 pieces marked the end of the ultra-low-mintage half dollar period from 1879 through 1890, although this is still a better date in most grades. Housed in a green label holder. Population: 22 in 65 (1 in 65+), 18 finer (9/19). PCGS# 572276 Base PCGS# 6373

**PROOF SEATED HALF DOLLARS**

- 3666 1863 PR63 NGC.** Glittering silver mirrors surround sharply struck, lightly frosted devices of this brilliant Civil War era proof. When the coin is precisely angled in light, a few light hairlines are visible to account for the conservative NGC grade. Just 460 proofs were struck, and perhaps as many as 65% of those survive in all grades. The 1863 is scarce in any circulated grade, putting additional pressure on current proof population. Census: 34 in 63 (1 in 63★), 48 finer (8/19). NGC ID# 27TP, PCGS# 6417

- 3667 1864 PR63 PCGS. CAC.** Variegated blue, reddish-brown, and gold toning of medium intensity covers the obverse, while the reverse is richly toned in complex shades of blue, russet-red, and deep lavender. Mirrored fields lay undisturbed beneath the toning, while frosted devices acquire grayish-tan to bronzelike brown shades. This original, well-patinated proof is CAC endorsed. Population: 41 in 63, 84 finer. CAC: 4 in 63, 15 finer (9/19). NGC ID# 27TR, PCGS# 6418

**1880 Seated Liberty Half, PR66+**  
**Sharp With Attractive Toning, CAC**

- 3668 1880 PR66+ PCGS. CAC.** Richly toned in deep aquamarine and golden-brown shades, this high-end Premium Gem proof has porthole toning that provides a window to the mirrored fields and frosted motifs. The obverse strike is needle-sharp, and the eagle's extremities are well-struck on the reverse. A mintage of 1,355 proofs supplemented the low circulation strike output of just 8,400 coins. Only a half dozen proofs are finer at PCGS. Population: 2 in 66+, 6 finer. CAC: 13 in 66, 2 finer (8/19). NGC ID# 27UF, PCGS# 6441

**1886 Half Dollar, Toned PR65**  
**Subtle Obverse Contrast**

- 3669 1886 PR65 PCGS.** Only the Philadelphia Mint struck half dollars in 1886, and coinage amounted to just 5,000 circulation strikes augmented by 886 proofs. The proof issue is often chosen by date collectors, as Gems are occasionally available with excellent toning. This piece is such a coin. The strike is full throughout, and the mirroring in the fields is outstanding. Multicolor toning on each side consists chiefly of rose, gold, and russet hues across the interiors, with sea-green and blue border color. NGC ID# 3EN3, PCGS# 6447

**1886 Half Dollar, PR67**  
**Gorgeous Multicolor Toning**

- 3670 1886 PR67 NGC.** This is a magnificent target-toned Superb Gem proof with rings of russet, gold, green, blue, violet, and rose patina that progress from the outer rims to the centers. The strike is predictably pinpoint-sharp, and eye appeal is exquisite. From a mintage of 886 proofs. Census: 5 in 67, 1 finer in this category (9/19). NGC ID# 3EN3, PCGS# 6447

**1888 Seated Liberty Half Dollar, PR65**  
**Rare Cameo Specimen**

- 3671 1888 PR65 Cameo NGC.** From a proof mintage of 832 pieces, this delightful Gem proof exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices to produce a startling cameo effect. The well-preserved surfaces show a few highlights of cerulean-blue and lime-green toning at the peripheries. Census: 17 in 65 Cameo (1 in 65★), 9 finer (9/19). NGC ID# 5H74, PCGS# 86449

**1891 Half Dollar, PR67**  
**Final Seated Liberty Issue**

- 3672 1891 PR67 NGC.** The obverse of this eye-catching final-year proof half dollar is fully and completely toned in melded peach-gold, violet, and ice-blue patina, while the reverse is considerably lighter. That side features a thin layer of dusky blue and gold color. Only 600 pieces struck. Census: 5 in 67, 1 finer in this category (9/19). NGC ID# 27UT, PCGS# 6452

**BARBER HALF DOLLARS**

- 3673 1893 MS64 PCGS. CAC.** Any pre-1900 Barber half is worth a second look, especially in high Mint State grades. This frosted and brilliant near-Gem 1893 shows just a hint of pale-gold at the margins, with a faint ice-blue cast to the dazzling-white surfaces. The strike is sharp at all of the usual trouble spots (especially along the eagle's right side). Mint luster rolls across the unmarked fields and devices. A tiny almond-gold toning dot at the outside-right field star does not distract. The coin is CAC-endorsed in an old generation blue label holder with barcode on the back. Population: 39 in 64 (3 in 64+), 36 finer. CAC: 11 in 64, 19 finer (9/19). NGC ID# 24LK, PCGS# 6465

**1893 Half Dollar, Toned MS66**

- 3674 1893 MS66 PCGS.** Splashes of electric-blue, lavender, and purple toning distinguish this obviously original Premium Gem Barber half. All design elements exhibit strong definition, except for the usual weakness in the upper-right shield corner and the nearby eagle's talon. The 1893 is a great challenge to locate at this level of preservation. Population: 13 in 66 (2 in 66+), 1 finer (8/19). NGC ID# 24LK, PCGS# 6465

**1900-S Barber Half, MS64**  
**Attractively Toned, Elusive Finer**

- 3675 1900-S MS64 PCGS.** The 1900-S is scarce in Mint State, and pieces finer than MS64 are decidedly rare. This Choice example displays satiny mint luster cast in shades of olive-gold, sea-green, lilac, and blue toning. The fields glisten beneath a light. Strike softness is seen on the eagle's right (facing) shoulder and on the highest points of the leaves around Liberty's head, as usual for this type. Population: 23 in 64 (1 in 64+), 15 finer (9/19). NGC ID# 57PC, PCGS# 6488

**1904 Half Dollar, MS66  
Condition Census Quality**

**3676 1904 MS66 NGC.** The 1904 has a mintage of nearly 3,000,000, and is a type issue in most grades. Nonetheless, it emerges as an important conditional rarity as a Gem, and the issue becomes very rare at the MS66 level. The present Premium Gem confirms its lofty grade, since the lustrous surfaces are intricately struck and magnificently preserved. Both sides display a wisp of golden patina, and a small reverse spot at 4:30 is noted as an identifier. Census: 4 in 66, 1 finer (9/19). NGC ID# 5EPG, PCGS# 6498

**3677 1911-S MS62+ NGC.** A few hints of pale sea-green toning visit both sides of this Plus-graded MS62 Barber half dollar. The lustrous surfaces are lightly marked and the design elements are well-detailed. Census: 11 in 62 (1 in 62+), 27 finer (9/19). NGC ID# 24NF, PCGS# 6523 Base PCGS# 6523

**1911-S Barber Half, MS65  
Underappreciated Conditional Scarcity**

**3678 1911-S MS65 PCGS.** A conditionally rare Gem example of this San Francisco issue, showing satiny mint luster with the faintest trace of light champagne toning. A touch of strike weakness affects the eagle's right (facing) shoulder and some of the obverse border stars, but this piece is otherwise pleasing. The 1911-S is seldom seen in this grade, and especially finer. Population: 15 in 65, 10 finer (9/19). NGC ID# 24NF, PCGS# 6523 Base PCGS# 6523

**3679 1915 MS62 NGC.** Delicate shades of lavender and sea-green toning blanket the lightly marked surfaces of this popular late series issue, with satiny mint luster and sharply detailed design elements throughout. Census: 14 in 62, 24 finer (9/19). NGC ID# 24NR, PCGS# 6532

**1915-S Barber Half Dollar, MS66  
Lustrous Condition Rarity**

**3680 1915-S MS66 PCGS.** A lustrous, satiny example of this final-year San Francisco type coin, showing a trace of light golden toning over impeccably preserved surfaces. There is trivial strike softness on the eagle's right (facing) talons and the fletchings, but the remainder of the design on both sides is well-defined. The 1915-S is a rarity in this lofty grade, and only a few finer pieces are reported. Population: 12 in 66 (1 in 66+), 2 finer (9/19). NGC ID# 24NT, PCGS# 6534

**PROOF BARBER HALF DOLLARS**

**3681 1893 PR65 PCGS.** Ex: Benson. This 1893 Barber half dollar proof derives from a production of 792 pieces. Each side is lightly toned in dusky shades of gold, rose, blue, and green, delivering lovely aesthetic appeal. NGC ID# 24NV, PCGS# 6540

**1894 Barber Half, PR66+ Cameo  
Old-Time Proof Set Toning**

**3682 1894 PR66+ Cameo NGC.** CAC. A beautiful, razor-sharp Premium Gem-Plus Cameo proof, showing dramatic old-time proof set toning. Concentric shades of yellow-gold, mint-green, ocean-blue, lilac, and orange-gold surround a champagne center on the obverse, while the reverse displays sea-green, blue, and lavender color overall. Any surface imperfections that prevent a full Superb Gem grade are hidden by the patina, and this piece even earns CAC recognition. Census: 12 in 66 Cameo (1 in 66+), 17 finer; 1 in 66 Ultra Cameo, 0 finer. CAC: 6 in 66, 3 finer (9/19). NGC ID# 24NW, PCGS# 86541

---

1894 Half Dollar, Brilliant PR67 Cameo

**3683 1894 PR67 Cameo NGC.** A mintage of 972 proofs ranks among the highest totals in the series, second only to the first-year 1892. This all-brilliant Superb Gem delivers the pronounced white-on-black contrast collectors enjoy. Raised design elements are richly frosted and surrounded by reflective fields. The obverse features a complete impression, while minor incompleteness occurs on the eagle's neck and the right shield-wing juncture. Census: 15 in 67 Cameo (1 in 67+), 2 finer (9/19). NGC ID# 24NW, PCGS# 86541

**3684 1896 PR66 Cameo PCGS.** Every minute detail of this starkly contrasted Premium Gem proof is needle-sharp, complementing the frosty luster of the devices and the liquidity of the mirrored fields. A light golden hue warms each side, but the coin is otherwise brilliant and is devoid of contact marks. Population: 20 in 66 (3 in 66+) Cameo, 5 finer; 2 in 66 (1 in 66+) Deep Cameo, 1 finer (9/19). NGC ID# 24NY, PCGS# 86543

---

1897 Half Dollar, PR66 Cameo  
Deeply Mirrored Fields

**3685 1897 PR66 Cameo NGC.** The 1897 P-mint Barber half is not a scarce coin per se, in either proof or circulation strike format. Still, it is one of the pre-1900 dates that never fails to attract attention from Barber specialists. This is a lightly toned Premium Gem Cameo proof, with a translucent pale-gold skin that exudes originality and careful preservation. Smooth, watery fields contrast boldly with the frosted devices. A sharp strike weakens at the shield junction, a characteristic of the design that the Mint could seldom avoid. Census: 10 in 66 Cameo (1 in 66+), 23 finer (9/19). NGC ID# 24NZ, PCGS# 86544

---

WALKING LIBERTY HALF DOLLARS

**3686 1916 MS65 PCGS.** Among Philadelphia Walking Liberty issues, only the 1921 has a lower mintage than the 1916. This well-struck Gem exhibits vibrant luster and shows only a wisp of golden patina. Marks are uncommonly absent, and the eye appeal is undeniable. *Ex: Long Beach Signature (Heritage, 2/2017), lot 4389.* NGC ID# 24PL, PCGS# 6566

---

1916 Walking Liberty Half, MS65+  
Deeply Toned First-Year Type Coin

**3687 1916 MS65+ PCGS.** The first-year Walker is immensely popular with type collectors and series specialists alike. Most examples seen grade no finer than MS64, although Gems are occasionally available. This Plus-graded Gem stands apart from its peers, and finer pieces are scarce. Deep russet and olive-gold toning covers each side, complementing satiny luster and impressively sharp design elements. Any minor abrasions that limit the grade are hidden by the patina. NGC ID# 24PL, PCGS# 6566

**3688 1916-D MS65 PCGS.** A bold strike and areas of original, dark charcoal toning enhance the appearance of this lustrous Gem half. The eagle's trailing leg is a touch soft, but this attractive half dollar is especially well-struck on Liberty's branch hand and head. Ideal for a Gem set of lustrous, toned Walking Liberty halves. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

**3689 1916-D MS65 PCGS. CAC.** From a first-year mintage of just over 1 million pieces, the 1916-D Walking Liberty half dollar is somewhat scarce at the MS65 grade level, and finer coins are decidedly elusive. The well-preserved, lustrous surfaces of this attractive Gem are blanketed in shades of golden-brown and lavender toning, with a sharp strike and outstanding eye appeal. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

---

1916-D Walking Liberty Half, MS66  
Exceptional Luster and Originality

**3690 1916-D MS66 PCGS.** With a mintage of just over 1 million pieces, the 1916-D Walking Liberty half dollar is surprisingly available in high grade, making it a favorite choice of first-year branch mint type collectors. This impressive Premium Gem exhibits well-detailed design elements and vibrant mint luster throughout. Attractive shades of champagne-gold and light russet toning warm each side. Population: 77 in 66 (3 in 66+), 4 finer (9/19). NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

**3691 1916-S MS64 PCGS.** Thick, satiny luster provides a gentle glow beneath lavender-gray and champagne hues that blanket the original surfaces of this Choice Uncirculated first-year Walker. Partial thumb separation on Liberty's branch hand is a plus, and there are no major abrasions. Challenging in finer grades, this piece offers the budget-conscious collector a slightly more affordable avenue for securing an example of this early San Francisco issue. *Ex: Long Beach Signature (Heritage, 6/2015), lot 4622, which brought \$2,820.* NGC ID# 24PN, PCGS# 6568

**1916-S Half Dollar, MS64  
First-Year Issue, Obverse Mintmark**

- 3692 1916-S MS64 PCGS.** This first-year Walking Liberty half dollar with the short-lived obverse mintmark placement was one of barely more than a half-million such coins struck at the San Francisco Mint in 1916. Blushes of pale gold color over smooth, frosty surfaces will appeal to series enthusiasts. Well-detailed, except on the skirt lines. NGC ID# 24PN, PCGS# 6568

**1917-D Half Dollar, MS64+  
Reverse Mintmark, CAC Example**

- 3693 1917-D Reverse Mintmark MS64+ PCGS. CAC.** The central strike is a tad sharper than some examples, while the PCGS Plus designation and CAC endorsement confirm the high quality surfaces and eye appeal. Satiny silver luster reveals a thin skin of iridescent toning, with dappled shades of pale-rose and ice-blue throughout the obverse, and wisps of reddish-brown on the reverse. Population: 9 in 64+, 56 finer. CAC: 24 in 64, 9 finer (9/19). NGC ID# 24PS, PCGS# 6571

- 3694 1917-S Obverse Mintmark AU55 PCGS.** This Choice AU Walking Liberty half dollar was struck early in the year before the mintmark was moved to the reverse. This lovely example has a trace of high-point wear with considerable brilliant silver luster and hints of peripheral gold toning. NGC ID# 26G7, PCGS# 6572

- 3695 1917-S Reverse Mintmark MS64 PCGS.** Following an anomalous two-year stint on the obverse, the mintmark on Walking Liberty halves moved to the reverse, as was traditional for minor silver coinage at the time. While the strike is about average for the issue, this attractive piece displays natural lemon-gold patina overall, with hints of pink and blue-gray color. Soft, pleasing luster peeks out beneath the toning. A visually impressive example of this early issue, one uncommonly seen in the near-Gem grade or finer. NGC ID# 24PU, PCGS# 6573

- 3696 1918 MS64 PCGS.** From a mintage of 6.6 million pieces, the 1918 Walking Liberty half dollar is surprisingly difficult to locate in grades above the MS64 level. This attractive Choice specimen offers well-detailed design elements and lightly marked satiny surfaces, with a few subtle hints of sea-green toning. NGC ID# 24PX, PCGS# 6574

**1918 Half Dollar, Lustrous Gem  
Silvery With Pale Gold Accents**

- 3697 1918 MS65 NGC.** The 1918 Walking Liberty half dollar is surprisingly elusive in Gem condition despite a mintage of 6.6 million pieces. Lustrous silver-gray surfaces feature accents of rose and gold that are slightly more prominent on the obverse. The strike is sharp overall, showing a split thumb and good detail on Liberty's head. NGC has seen only seven finer submissions, all in MS66 (8/19).  
Ex: ANA Signature (Heritage, 8/2014), lot 4544. NGC ID# 24PX, PCGS# 6574

- 3698 1918-D MS62 PCGS.** Satiny luster is the hallmark of this brilliant, lower-end Mint State 1918-D half dollar. Abrasions are minimal, although the centers are weakly struck as usual. Early branch mint Walking Liberty halves are elusive well-struck. NGC ID# 24PW, PCGS# 6575

**1918-D Half Dollar, MS64  
Challenging Early Denver Mint Issue**

- 3699 1918-D MS64 PCGS. CAC.** This early Denver issue is one of the more challenging Walking Liberty half dollars to locate well-struck. Liberty's head is sharp on this near-Gem, but minor incompleteness occurs on the branch hand and the eagle's central feathers. The surfaces show few abrasions and yield vibrant luster and touch of light golden toning. There 33 numerically finer coins at PCGS (8/19).

Ex: ANA Signature (Heritage, 8/2015), lot 5161. NGC ID# 24PW, PCGS# 6575

- 3700 1918-S MS64 PCGS.** Bits of attractive lavender and orange toning add eye appeal to the lustrous, silver-gray surfaces of this near-Gem 1918-S. Sharply struck at the perimeters, the coin is typically weak along the eagle's trailing leg and slightly so through the Liberty's head, hand, and lower gown lines. Marks are limited to a few tiny nicks and a short contact along the jawline. Finer examples are scarce. NGC ID# 24PX, PCGS# 6576

**1919-D Half Dollar, MS62**  
**Lightly Toned Denver Semikey**

- 3701 1919-D MS62 PCGS. CAC.** The 1919-D Walker is famously rare in Gem condition, and all Mint State pieces demand strong collector attention. This accessible MS62 piece displays Satiny mint luster and warm golden toning, with a splash of pale blue color in the obverse margin around the LI in LIBERTY. Typical of the 1919-D, this piece is weakly struck in the centers, as well as on Liberty's head. Abrasions, however, are minimal for the grade. NGC ID# 24PZ, PCGS# 6578

**1919-S Half Dollar, AU58**  
**Elusive San Francisco Semikey**

- 3702 1919-S AU58 NGC.** The 1919-S ranks among the scarcest Walking Liberty half dollars, especially in Mint State. This is a still-lustrous near-Mint example, with essentially unmarked surfaces and attractive, original lilac-gray toning. Glimmers of iridescence glow at the margins. The coin appears struck from widely spaced dies, with central weakness and sharper peripheries. NGC ID# 24R2, PCGS# 6579

**1920 Walking Liberty Half Dollar, MS65**  
**Gunmetal-Blue and Gold Patina**

- 3703 1920 MS65 NGC.** The 1920 Walking Liberty half dollar was a well-produced issue, but not one that was widely saved in high grades. Luster glows beneath the patina on this strong Gem. Gunmetal-blue and pale gold toning appears on each side, delivering elegant, original eye appeal. Census: 44 in 65 (1 in 65+, 1 in 65★), 6 finer (9/19).  
*Ex: FUN Signature (Heritage, 1/2014), lot 4680. NGC ID# 24R3, PCGS# 6580*

**1921 Half Dollar, Unc Details**  
**Lustrous and Appealing**

- 3704 1921 — Cleaned — PCGS Genuine. Unc Details.** This unworn key-date Walker displays bright silvery luster and a vibrant cartwheel effect. There are a few light abrasions, as well as faint hairlines on the obverse — the latter prevent a numeric grade from PCGS but hardly detract from the eye appeal. The centers are weakly struck, as is often the case with the 1921.

**1923-S Walking Liberty Half, AU58**  
**Remarkably Lustrous and Well-Preserved**

- 3705 1923-S AU58 PCGS.** The casual observer would never know that this 1923-S half dollar is not Mint State — it is lustrous, brilliant, and minimally abraded. The only high-point friction seems to be slide marks, perhaps from an album page, seen with a 10x power loupe at certain angles. The strike is typically weak in the centers, as normal for the 1923-S. NGC ID# 24R9, PCGS# 6586

**1923-S Half Dollar, MS63**  
**Brilliant Collector-Grade Example**

- 3706 1923-S MS63 PCGS.** The 1923-S is a better date in Uncirculated condition that becomes particularly scarce at the Gem level. This Select representative is an ideal collector-grade example. The strike partially defines the thumb on Liberty's branch hand and is bold elsewhere. Both sides are essentially brilliant with a few unobtrusive abrasions.  
*Ex: Dallas Signature (Heritage, 4/2017), lot 15572. NGC ID# 24R9, PCGS# 6586*

- 3707 1927-S MS62 PCGS.** A bright, lustrous Mint State example of this often challenging San Francisco issue, showing grade-consistent abrasions in the fields. Although weakly struck in the centers as usual, this piece is moderately attractive for the grade. NGC ID# 24RA, PCGS# 6587

**1927-S Half Dollar, MS64**  
Only Walker Issue for the Year

- 3708 1927-S MS64 PCGS.** Those looking to complete a date set of Walking Liberty half dollars have no choice but to opt for the 1927-S. Soft strikes and abrasions typically plague the issue, as the coins were produced hastily and handled carelessly to satisfy immediate commercial needs. This near-Gem is typically defined and mostly brilliant with specks of gunmetal-blue and olive patina at the lower obverse. Shimmering luster and lightly scattered ticks appear over each side. Scarce any finer.  
Ex: *New York Signature* (Heritage, 10-11/2015), lot 4622. NGC ID# 24RA, PCGS# 6587

**1928-S Half Dollar, MS64**  
Bright, Frosty Mint Luster

- 3709 1928-S MS64 PCGS.** The 1928-S has a lower mintage than the 1927-S, but it is slightly more available in high grades. This piece shows typically bright, frosted mint luster, and strike definition is stronger than usual. Each side is mostly brilliant with a marginal accent of deep golden-russet patina.  
Ex: *ANA Signature* (Heritage, 8/2016), lot 4871. NGC ID# 24RB, PCGS# 6588

- 3710 1929-D MS65 PCGS.** This attractive Gem shows a typical strike for the issue, with a touch of softness on Liberty's head and the eagle's leg, but some signs of separation between the thumb and fingers on the wreath hand. The lustrous, well-preserved surfaces exhibit delicate highlights of sea-green and lavender-gray toning. NGC ID# 24RC, PCGS# 6589

- 3711 1929-D MS65 PCGS. CAC.** Despite a mintage of just over a million pieces, the 1929-D half dollar is a scarce coin in better-than-Gem condition. This CAC-endorsed MS65 example offers a great balance between quality and price. The strike is above average for this Denver issue, and its mix of effusive luster plus rose, gold, blue, and silver patina adds up to excellent eye appeal. NGC ID# 24RC, PCGS# 6589

**1929-S Walking Liberty Half, MS66**  
PCGS Lists Only Two Finer Examples

- 3712 1929-S MS66 PCGS.** The San Francisco Mint struck more half dollars in 1929 than Denver (1.9 million coins), although the S-mint coin is slightly scarcer today. This is especially significant in the upper Mint State grades, where the 1929-S is challenging to acquire. The present coin displays satiny luster and light golden toning, which radiates eastward across the coin from a crescent of lemon-gold patina that graces the left-hand border of each side. Mild strike softness is noted on Liberty's branch hand. Population: 62 in 66 (1 in 66+), 2 finer (9/19). NGC ID# 24RD, PCGS# 6590

**1933-S Walking Liberty Half, MS65**  
Sharply Struck, First Generation Holder

- 3713 1933-S MS65 PCGS.** Some collectors consider the 1933-S the last issue of the early series of Walkers, while others consider it the first issue of the late series. Either way, it is scarce in Gem or finer grades. The present example has full brilliance with sharp details and faint traces of pale gold toning. This Gem is housed in a Generation 1.2 PCGS "rattler" holder, now at least 30 years old.  
Ex: *Dallas Signature* (Heritage, 10/2009), lot 763; *Long Beach Signature* (Heritage, 2/2010), lot 470. NGC ID# 24RE, PCGS# 6591

**1934-S Half Dollar, MS65**  
Lightly Toned and Boldly Struck

- 3714 1934-S MS65 PCGS. CAC.** The Great Depression bottomed out in 1933, and by 1934, the economy had improved enough for half dollars to be struck at all three mints. In Mint State, the 1934-S is clearly the scarcest among the trio. This lustrous Gem is pearl-gray with autumn-gold and lime-green margins. The strike is bold, and contact is confined to the right obverse field.  
Ex: *Central States Signature* (Heritage, 4/2012), lot 4745. NGC ID# 24RH, PCGS# 6594

**3715 1935 MS67 NGC.** Just a touch of the usual softness shows on the wreath hand, but this delightful Superb Gem is sharply detailed in most areas. The impeccably preserved brilliant surfaces radiate vibrant mint luster from both sides. Housed in new NGC holder commemorating the *Guide Book* and signed by Ken Bressett. Census: 32 in 67 (2 in 67+, 1 in 67★), 1 finer (9/19). NGC ID# 24RJ, PCGS# 6595

**3716 1935 MS67 PCGS.** A scarce Superb Gem example of this otherwise plentiful Philadelphia issue, showing gold-tinted satin luster and outstanding preservation in the fields. Moderate strike weakness is seen by Liberty's branch hand and on the eagle's trailing leg. Population: 65 in 67 (8 in 67+), 2 finer (9/19). NGC ID# 24RJ, PCGS# 6595

**3717 1935-S MS66 PCGS.** A stunning Premium Gem Walking Liberty half dollar, with a typical strike for the issue, showing just a touch of softness on the wreath hand and eagle's leg. The well-preserved surfaces are lustrous and attractive. PCGS has graded four numerically finer examples (9/19). NGC ID# 24RL, PCGS# 6597

#### 1936 Half Dollar, MS67+ Beautiful Mint Luster

**3718 1936 MS67+ PCGS. CAC.** The luster on this high-end Superb Gem is just gorgeous. Traces of light champagne and lilac grace each side while the fields and devices glisten beneath a light. This 1936 Walking Liberty half dollar is boldly struck and beautifully preserved. The date is challenging to locate this fine, and PCGS has seen only three higher-grade representatives (9/19). NGC ID# BYGX, PCGS# 6598 Base PCGS# 6598

**3719 1936-D MS67 PCGS.** A satiny Superb Gem example of this Denver issue, conditionally scarce this fine. The luster is original, being pearl-white overall with tinges of gold and russet near the borders. Liberty's branch hand is a trifle soft, but the strike is overall impressive for the issue. No numerically finer pieces are certified by either service. Population: 52 in 67 (4 in 67+), 0 finer (8/19). NGC ID# 24RN, PCGS# 6599 Base PCGS# 6599

#### 1936-S Half Dollar, MS67 Top-Tier Registry Coin

**3720 1936-S MS67 NGC.** Every detail of this 1936-S Walker is fully defined, right down to the feathers on the eagle's trailing leg. Luster is frosty, brilliant, and vibrant. In MS67, this San Francisco issue is rare. NGC and PCGS combined report only 33 grading events for an MS67, none are Plus-designated, and none are finer (9/19). This coin is must-have for the Registry collector. Census: 20 in 67, 0 finer (9/19). NGC ID# 24RP, PCGS# 6600

**3721 1938-D MS66+ PCGS. CAC.** Plus-graded by PCGS and CAC-endorsed, this high-end Premium Gem is brilliant and sharply struck on both sides. A mere hint of gold creeps onto a few of the raised devices, but the overwhelming impression is one of frosted silver luster that radiates throughout this splendid, low-mintage 1938-D. Scarce any finer. Population: 59 in 66+, 54 finer. CAC: 160 in 66, 26 finer (8/19). NGC ID# 24RV, PCGS# 6605

#### 1940-S Half Dollar, MS67 Among the Finest Pieces Known

**3722 1940-S MS67 NGC.** The 1940-S Walking Liberty half dollar is rare in MS67, and no MS68 coins are known finer (9/19). This NGC example is a must-have for the Registry collector. Although the strike is a trifle soft on Liberty's branch hand and thigh, the luster is impeccable, and the troublesome right obverse field is pristine. Brilliant surfaces radiate frost-white cartwheel bands. Eye appeal is exceptional. Census: 14 in 67, 0 finer (9/19). NGC ID# 24S2, PCGS# 6610

**3723 1942 MS67+ NGC. CAC.** This is one of just seven Plus-graded MS67 coins at NGC, with four MS68 pieces finer (8/19). Luster is frosty and vibrant. Sharp design elements complement the outstanding preservation, and the CAC green label is well-earned. NGC ID# 24S6, PCGS# 6614 Base PCGS# 6614

#### 1944-D Half Dollar, MS67+ Just One Coin Finer at PCGS

**3724 1944-D MS67+ PCGS.** Although the population of 1944-D halves is substantial at the MS67 level, it decreases precipitously at the Plus-graded level, and numerically finer coins are virtually uncollectible. This splendid Plus coin is tastefully toned and vibrantly lustrous. A sharp strike exists on the head, hand, and other trouble spots, while the satin-smooth surfaces show a bare minimum of marks and no distractions that need mention. Reddish-brown shades embrace icy-silver centers. Population: 22 in 67+, 1 finer (8/19). NGC ID# 24SD, PCGS# 6622 Base PCGS# 6622

**3725 1945 No AW, FS-901, MS66 PCGS.** An underrated *Cherrypickers'* variety, without the designer's initials. This impressive Premium Gem offers well-detailed design elements, with just a touch of softness on the eagle's feathers. The lustrous surfaces are virtually flawless. Population: 2 in 66, 0 finer (9/19). NGC ID# 24SF, PCGS# 145800 Base PCGS# 6624

**1945-D Half Dollar, MS67+  
Lustrous and Pristine**

- 3726 1945-D MS67+ PCGS. CAC.** The 1945-D is plentiful in Mint State, but as of (9/19), PCGS has certified just 29 pieces as MS67+ and only two finer. This lustrous wartime Superb Gem merits its desirable Plus designation, since both sides appear essentially as struck aside from light and attractive russet-brown peripheral patina. Only minor incompleteness of strike limits the grade. NGC ID# 24SG, PCGS# 6625

**PROOF WALKING LIBERTY  
HALF DOLLARS**

**1936 Half Dollar, PR66  
Resumption of Proof Production**

- 3727 1936 PR66 NGC.** The Philadelphia Mint resumed commercial proof set offerings in 1936. The facility achieved a mintage of 3,901 Walking Liberty half dollars that year. This spectacular Premium Gem exhibits razor-sharp definition on all design elements and a layer of dusky patina over reflective fields that includes highlights of emerald-green and lavender color. Overall eye appeal is outstanding.  
Ex: *Long Beach Signature* (Heritage, 9/2017), lot 3525; *Dallas Signature* (Heritage, 12/2017), lot 3785. NGC ID# 27V4, PCGS# 6636

- 3728 1939 PR68 NGC.** This piece displays sharply struck, satiny devices set against watery fields that are seemingly devoid of flaws. Vivid sun-gold and amber peripheral hues yield to lighter pastel shades of lavender and ice-blue in the centers, granting this high-end Superb Gem impeccable visual appeal. NGC has graded one numerically finer example (9/19).  
Ex: *Long Beach Signature* (Heritage, 6/2015), lot 4675, which realized \$3,055; *ANA Signature* (Heritage, 8/2015), lot 5258, which realized \$2,350. NGC ID# 5ESU, PCGS# 6639

- 3729 1939 PR68 NGC.** Gold and iridescent toning masks the brilliant silver surfaces of this Superb Gem proof. Both sides are fully mirrored with a hint of cameo contrast between the fields and the devices. The NGC insert is hand-signed by *Guide Book* Editor Emeritus Ken Bressett. Census: 102 in 68 (2 in 68+, 21 in 68★), 1 finer (9/19). NGC ID# 5ESU, PCGS# 6639

**1941 Half Dollar, PR68  
Dusky Gold and Powder-Blue Patina**

- 3730 1941 PR68 NGC.** Dusky gold and powder-blue patina lightly blankets the satiny, mirrorlike surfaces of this 1941 Walking Liberty proof half dollar. As befits the PR68 assessment, both sides are virtually pristine. From a mintage of 15,412 specimens. Census: 86 in 68 (18 in 68★, 1 in 68+★), 1 finer (9/19). NGC ID# 24SP, PCGS# 6641

- 3731 1942 PR68 NGC.** The NGC label is hand signed by *Guide Book* editor Ken Bressett. A stunning Superb Gem proof, this 1942 Walking Liberty half dollar exhibits sensational mint brilliance with deeply mirrored fields and sharply defined, satin devices.  
Ex: *Houston Signature* (Heritage, 11/2012), lot 4100; *FUN Signature* (Heritage, 1/2015), lot 5173, which realized \$2,820. NGC ID# 282G, PCGS# 6642

**FRANKLIN HALF DOLLARS**

- 3732 1954-S MS66+ Full Bell Lines PCGS. CAC.** The 1954-S is not only a low-mintage issue, it is one of the greatest strike rarities of the entire Franklin half series. Widely spaced dies deliver little detail on most examples. This is one of the few Full Bell Lines coins that combines high-end technical quality with strong eye appeal. The well-preserved surfaces are luminous beneath attractive lilac-silver, gold, sage, teal, and rose patina. Marks are few and far between. Population: 28 in 66+ Full Bell Lines, 6 finer. CAC: 38 in 66, 1 finer (8/19). NGC ID# 24TB, PCGS# 86669

**1957-D Half Dollar, MS67 Full Bell Lines  
Registry Set Quality, None Certified Finer**

- 3733 1957-D MS67 Full Bell Lines PCGS.** Franklin half specialist and author Rick Tomaska notes "A 1957-D in any grade with exceptional color on both obverse and reverse is a rare coin — and obviously very desirable." To that, we might add in the finest-known MS67 condition, such a coin is virtually unsurpassable for any top-tier Registry Set collection. The obverse toning on this Superb Gem is clearly exceptional, while the reverse is more subtly toned to showcase its extra-sharp strike. Neither PCGS nor NGC has certified a finer Full Bell Lines example. Population: 25 in 67 Full Bell Lines, 0 finer (8/19). NGC ID# 24TE, PCGS# 86673

**1958-D Franklin, MS67 Full Bell Lines  
Incredible Toning, Among the Finest Certified**

- 3734 1958-D MS67 Full Bell Lines PCGS. CAC.** This is a spectacular Franklin half dollar. Not only is it among the finest-certified 1958-D coins with Full Bell Lines, it is CAC endorsed in this grade, and it showcases beautiful toning. The obverse is cast in swirling emerald-green and rose-red hues, while the reverse displays dusky lilac-gray overall with a crescent of rainbow along the upper border. Without question the strike is sharp, and any minute contact marks that deny an even finer grade are forgotten by the captivating appeal of the toning. Population: 100 in 67 (10 in 67+) Full Bell Lines, 0 finer. CAC: 59 in 67, 0 finer (9/19). NGC ID# 5HNM, PCGS# 86675

**1959-D Half Dollar, MS67 Full Bell Lines  
Tied for Finest at Either Service**

- 3735 1959-D MS67 Full Bell Lines NGC.** A majority of 1959-D Franklin half dollars come with Full Bell Lines definition, but few possess the unabraded surfaces and eye appeal required for an MS66, and certainly for an MS67 assessment. This satiny Superb Gem with multicolor toning is exceptionally preserved and attractive. A few unimportant ticks on the portrait and bell are only visible under magnification. Census: 3 in 67 Full Bell Lines, 0 finer (9/19). NGC ID# 6L37, PCGS# 86677

**PROOF FRANKLIN HALF DOLLARS**

- 3736 1952 PR68 NGC.** The jet-black fields are deeply reflective on this Superb Gem Franklin half dollar proof. Contrast against the devices is insufficient for a formal Cameo designation, but the eye appeal remains excellent for this Registry-grade example. NGC ID# 27VC, PCGS# 6693
- 3737 1952 PR68 NGC.** Razor-sharp definition is evident on all design elements of this magnificent PR68 Franklin half dollar, with deeply mirrored fields that show just the lightest hint of pale jade toning. The pleasing surfaces are virtually flawless. NGC has graded six numerically finer examples (9/19). NGC ID# 27VC, PCGS# 6693
- 3738 1956 Type Two PR69 Deep Cameo PCGS.** The normal reverse for the year with three bold feathers left of the eagle's perch. This black-and-white PR69 half dollar presents eye-catching Deep Cameo contrast and is virtually flawless. Population: 78 in 69 Deep Cameo, 0 finer (9/19). NGC ID# 24TW, PCGS# 96697
- 3739 1957 PR69 Cameo NGC.** The sharply detailed, frosty design elements of this magnificent PR69 specimen contrast boldly with the deeply mirrored fields to create an intense cameo effect. The brilliant surfaces are just one tick away from perfection. Census: 57 in 69 Cameo (9 in 69★), 0 finer (9/19). NGC ID# 24TX, PCGS# 86698

**KENNEDY HALF DOLLARS**

**1964 Kennedy Half, MS67+  
None Certified Finer**

- 3740 1964 MS67+ PCGS.** Tied for finest-certified by virtue of its PCGS Plus designation, this Superb Gem Kennedy half resembles a fine watercolor in its intermingled colors and subtle transitions from one shade to another. A glow of copper-orange toning serves as the focal point on each side, augmented by interwoven blue, gold, and lilac hues — all illuminated by bright silver luster that shines through. A decidedly sharp strike adds to the high technical quality. Population: 7 in 67+, 0 finer (8/19). NGC ID# 27WH, PCGS# 6706

- 3741 1966 MS67 PCGS.** Myriad die polish lines (mint made) appear in the fields of this Superb Gem Registry candidate, producing the illusion of mild reflectivity where there is actually satin luster. Glints of golden color accent brilliant surfaces along the upper and lower obverse border and above STATES OF. Fully struck with a few tiny ticks in the hair. Population: 22 in 67 (4 in 67+), 1 finer (8/19). NGC ID# 24WH, PCGS# 6709

**1967 Kennedy Circulation Strike, Top-Grade MS67  
Spectacularly Toned on Both Sides**

- 3742 1967 MS67 PCGS.** The mintage was just shy of 300 million pieces, yet Superb Gem examples of the 1967 regular-issue Kennedy halves are nearly nonexistent. The current PCGS population report indicates just 31 pieces are so-graded (including three pieces in 67+), and there are no numerically finer examples at either PCGS or NGC (8/19). This splendid example is colorfully toned throughout both sides, in a panorama of rainbow shades that occupy nearly mark-free surfaces. The obverse strike is far above normal, while the reverse is as sharp as ever seen for the issue. Eye appeal is off the charts. NGC ID# 24WJ, PCGS# 6710

**1969-D Kennedy Half, MS67+  
Top-Grade Registry Set Rarity  
None Finer at PCGS**

- 3743 1969-D MS67+ PCGS.** Those building a color set of Kennedy halves can add a capstone to the collection with this Plus-graded 1969-D, which is imbued with fiery rainbow colors on both sides. Struck with silver content, the 1969-D is important as the final Kennedy half issue earmarked for commercial circulation with that alloy. It is also one of the rarest dates in the series in MS67 or finer condition. This sharply struck, Plus-graded example is tied for the finest-certified with just one other coin at PCGS. Population: 25 in 67 (2 in 67+), 0 finer (8/19). NGC ID# 24U8, PCGS# 6712

**SMS KENNEDY HALF DOLLAR**

**1967 SMS Half Dollar, SP68 Deep Cameo  
Stark White-on-Black Contrast**

- 3744 1967 SMS SP68 Deep Cameo PCGS.** This magnificent Kennedy half dollar comes from a Special Mint Set. It shows an extraordinary degree of cameo contrast between the sharply detailed, frosty design elements and the deeply reflective fields, making the coin almost indistinguishable from a true proof. The surfaces are impeccably preserved and eye appeal is incredible. The Special Mint Set program was discontinued after 1967. This piece is tied with just 16 others as the finest Deep Cameo at PCGS, a population that has not increased in at least the past 24 months. Population: 17 in 68 Deep Cameo, 0 finer (8/19). NGC ID# 24WJ, PCGS# 96847

**EARLY DOLLARS**

- 3745 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Cleaned — PCGS Genuine. Good Details.** Bowers Die State Undetermined. Remnants of the variety-identifying die gouge in the left obverse field remain clear on this well-worn 1795 Flowing Hair dollar. The muted surfaces are somewhat rough with several scratches on the reverse. Still, the motif outlines are strong and the legends are fully legible.
- 3746 1795 Draped Bust, Off-Center, B-14, BB-51, R.2 — Obverse Graffiti — NGC Details. VF.** "Bowers Die State II." Unlisted, but as often seen with clash marks left of O(F). This Off-Center variant was the first Early dollar issue to feature the Draped Bust portrait. Variegated silver-gray surfaces display strong remaining detail. Myriad adjustment marks on the reverse are as-made, while a series of small cuts in the right obverse field and a dig above Liberty's head prevent a numeric assessment.

**1795 Draped Bust Dollar, VF30  
B-14, BB-51, Off-Center Portrait  
Attractive, Original Color**

- 3747 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VF30 PCGS.** Bowers Die State I. Struck from perfect dies, the earliest die state for this first-year Draped Bust dollar. A later die state exists, with die clashing visible at O in OF. The BB-51 variety is best-known for its off-center portrait of Liberty, which was placed too far left in the inaugural die for a visually unbalanced obverse design. Both sides of this attractive VF example show smooth, minimally marked golden-gray surfaces with blue overtones. The strike is well-centered on the flan, and there are no adjustment marks on this sharp and problem-free, midgrade early dollar. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

**1798 Large Eagle Dollar, XF40  
B-27, BB-113, Pointed 9**

- 3748 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, XF40 PCGS.** Bowers Die State III. No adjustment marks are visible on this piece, and wear is light. Both sides exhibit deep olive-gray patina with golden undertones. BB-113 represented the Pointed 9, Close Date *Guide Book* variety, although it is also popular as a Heraldic Eagle type coin. NGC ID# 24X6, PCGS# 40030 Base PCGS# 40018

**1798 Heraldic Eagle Dollar, Pleasing XF40  
Pointed 9, Close Date, B-27, BB-113**

- 3749 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, XF40 PCGS.** Bowers Die State II. The high, right-leaning 8 in the date and a diagnostic reverse die crack through OF confirm the BB-113 variety and die state. This sharply defined XF example shows excellent detail throughout Liberty's hair, with light wear visible at the drapery folds. The reverse is equally sharp for the grade, with only minor weakness at some the field stars. The wing feathers and tips retain considerable sharpness. Marks are limited to a few minor abrasions, and natural bluish-brown toning glows with underlying iridescence. Housed in an old green label PCGS holder. NGC ID# 24X6, PCGS# 40030 Base PCGS# 40018

**1798 Heraldic Eagle Dollar, VF35**  
**Pointed 9, B-24, BB-124**  
**'Blundered Stars Reverse'**

- 3750** 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2, VF35 PCGS. Bowers Die State IV. The field stars are placed too high in a line star pattern, with the top two stars overlapping the clouds above. A gap between obverse stars 11 and 12 helps to distinguish the BB-124 obverse from the similar BB-122. Multiple obverse die cracks confirm a late die state; understandably, the obverse die was used to strike just this single variety. Faint hairlines exist on the silver surfaces, which display dappled gray toning on both sides. Weakness at the field stars above and to the right of the eagle's head corresponds to die damage and bulging at the lower-right obverse, seen on all BB-124 mid-to-late die states. NGC ID# 24X6, PCGS# 40041 Base PCGS# 40018

**1799/8 Draped Bust Dollar, XF45**  
**B-3, BB-141, 15 Stars Reverse**

- 3751** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, XF45 NGC. Bowers Die State III, as often seen. This variety shows 15 stars on the reverse instead of the usual 13; the left- and right-most clouds above the eagle were enlarged by the die cutter to cover the errant two stars, although the points of those stars still protrude from the clouds. This coin is lightly circulated with natural olive-gray and tan-gold patina. No adjustment marks are visible, although a small rim nick is evident at 3 o'clock on the obverse. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

- 3752** 1799 7x6 Stars, B-16, BB-158, R.2, VF30 PCGS. Bowers Die State III. The two upper berries on the laurel branch are weak, but visible. Die clashing shows as "waves" above the date. This is an attractive Heraldic Eagle early dollar with lovely old-silver toning and a bare minimum of marks on the smooth, sharply defined surfaces. Slight wear exists on the high points, where the patina lightens to silver-gray. The coin is well-centered entirely problem-free for the VF30 grade. NGC ID# 24X7, PCGS# 40050 Base PCGS# 6878

- 3753** 1799 7x6 Stars, B-16, BB-158, R.2, VF30 PCGS. Bowers Die State I. An early die state, with all of the upper berries bold and no die clashing visible above the date. This attractive midgrade dollar has ideal color, strike, and surfaces for the VF30 grade. Medium golden-gray toning spreads evenly across both sides, with both the obverse and reverse well-centered. Strong rims and dentils surround sharply outlined devices, while smooth fields show a sparse scattering of tiny marks and no problems whatsoever. Eye appeal is exceptional for the grade level. NGC ID# 24X7, PCGS# 40050 Base PCGS# 6878

**1800 Silver Dollar, AU Sharpness**  
**Wide Date, Low 8, B-10, BB-190**

- 3754** 1800 Wide Date, Low 8, B-10, BB-190, R.3 — Artificial Toning, Cleaned — NGC Details. AU. Bowers Die State IV. The date is wide, with most of the space between 00. The 8 sits below 1 and the adjacent 0. Struck from a middle die state, with several light reverse die cracks visible with magnification. Toned in reddish-gold, aquamarine, and brownish-gray shades, with traces of luster beneath the rich, but perhaps contrived toning. Most of the devices are sharply defined, and marks from circulation or handling are few. Light wear appears on Liberty's upper hair strands, and on the clouds, field stars, and scroll. Some minor signs of the past cleaning remain beneath the pleasing coloration.  
*From The Pelican Collection, Part II.*

- 3755** 1800 Dotted Date, B-14, BB-194, R.3, Fine 15 PCGS. Bowers Die State II. A popular *Guide Book* variety, named for the small rust pits around the 0 in the date. This attractive representative has deep gray fields and lighter, silvery devices. The surfaces are remarkably smooth for the grade and eye appeal is pleasing. NGC ID# 24X9, PCGS# 40078 Base PCGS# 6889

**1803 Dollar, Appealing XF40**  
**B-1, BB-251, Small 3 in Date**

- 3756** 1803 Small 3, B-1, BB-251, R.4, XF40 PCGS. Bowers Die State II. Attractive mint luster lingers at the margins, illuminating shades of blue that meld into overall golden-tan toning. The naturally toned surfaces are well-struck for the XF40 level, with light abrasions in the fields and moderate high-point wear to define the assigned grade. This Small 3 variety shows the thin-top 3 leaning left and well-removed from the drapery line. Star 8 is close to Y of LIBERTY, while a strong die crack runs from the dentils through the left side of E to Liberty's hair. NGC ID# 24XD, PCGS# 40096 Base PCGS# 6900

**1803 Large 3 Dollar, XF40  
B-6, BB-255, Originally Toned**

- 3757 1803 Large 3, B-6, BB-255, R.2, XF40 ANACS.** Bowers Die State II. Among the six known 1803 varieties, only the BB-255 die marriage has a Large 3 in the date. All other varieties feature the Small 3. Still, this Large 3 variety outnumbered all of the Small 3 die pairs combined, making it the most readily available of the entire 1803 mintage. Rich iridescent toning covers reflective fields and well-struck devices, which show grade-consistent wear on the high points. Marks are limited to a hairline pinscratch between 1 and 8 of the date, and a minor rim bump above E in LIBERTY. Original surfaces offer excellent eye appeal. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

**SEATED DOLLARS**

- 3758 1840 AU53 NGC. OC-1, R.1.** Osburn-Cushing Die State c/c. An impressive AU53 example from the first year of the design, this piece shows only the slightest wear on the design elements and the lightly marked surfaces show mottled highlights of golden-tan and lavender-gray toning. NGC ID# 24YA, PCGS# 6926

**1841 Seated Liberty Dollar, MS61  
Second Year of Issue, Scarce This Fine**

- 3759 1841 MS61 NGC. OC-4, R.1.** Osburn-Cushing Die State c/a. Readily available in circulation strike format from a mintage of 173,000 pieces, the 1841 ranks 37th out of 47 Seated dollar issues in terms of its mintage. This is a richly toned Mint State example, with flickers of reflective surfaces beneath the dense patina. Grayish-brown toning transforms to golden-gray when viewed in light. Four die pairs were required for the mintage. This example is sharply struck by the OC-4 dies, with good hair detail at the top of Liberty's head and sharp stars on either side of the portrait. Only a few tiny marks exist on either side. Census: 17 in 61, 32 finer (9/19). NGC ID# 24YB, PCGS# 6927

**1844 Seated Dollar, Bright MS60  
Scarce Date — Only 20,000 Coins Struck**

- 3760 1844 MS60 NGC. OC-1, R.2.** Osburn-Cushing Die State c/c. A Top 30 Variety. There can be no question about the circulation strike die pair, with the remnants of misplaced digits 1 and 8 in Liberty's lower gown, and die doubling on the obverse shield giving the appearance of "quad stripes" for each set of vertical shield lines. This near-brilliant Uncirculated example shows light-gray accents on the high points of Liberty's portrait. A sharp strike weakens only slightly at Liberty's head. Myriad tiny marks and light abrasions occupy the partially reflective fields, with mint luster throughout both sides. NGC ID# 24YE, PCGS# 6930

- 3761 1857 PCGS Genuine. OC-2, R.3.** The PCGS number ending in .95 suggests that Scratches or a Rim Dent is the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an Uncirculated specimen that has been scratched and cleaned. The surfaces have retoned in a thin golden hue but still show fine scratches on each side. Among 94,000 Seated dollars struck in 1857 and about 400 survivors.

- 3762 1859-O MS62 PCGS. OC-1, R.1.** Osburn and Cushing estimate as many as 4,000 survivors for this plentiful die marriage, an excellent choice to represent the No Motto Seated dollar type. The surfaces are lightly toned in antique patina with partial luster remaining. A strong impression is evident. NGC ID# 24YY, PCGS# 6947

- 3763 1859-S — Cleaned — PCGS Genuine. AU Details. OC-1, R.2.** Osburn-Cushing Die State b/b. The 1859-S is the only No Motto Seated dollar struck at the San Francisco Mint, making it essential for type collectors and Seated Liberty dollar specialists. Hairlines are visible in the reflective fields of this important dollar. The surfaces also show subtle signs of tooling to remove abrasions. Each side exhibits light gold toning and strong definition.

**1859-S Seated Dollar, AU53  
Low-Mintage Issue**

- 3764 1859-S AU53 PCGS. OC-1, R.2.** Two die pairs contributed to the production of 20,000 Seated dollars in 1859 at the San Francisco Mint. This is the more plentiful variety with the 1 in the date under the point of the shield. Lapping has removed evidence of repunching that was initially apparent on 18. This lightly toned AU53 dollar features broad, square rims and a hint of unimportant softness on Liberty's head, the stars, and the eagle's feathers. A well-preserved example of a challenging West Coast issue. NGC ID# 24YZ, PCGS# 6948

- 3765** 1860-O MS62 NGC. OC-7, R.2. Osburn-Cushing Die State a/b. A well-struck, semiprooflike Seated Liberty type coin, showing satiny luster on the devices and minimal abrasions for the grade. Golden interior toning cedes to violet and blue borders on both sides. Eye appeal exceeds expectations for the grade. NGC ID# 24Z3, PCGS# 6950

**1871 Seated Liberty Dollar, MS63**  
Lightly Toned and Frosty

- 3766** 1871 MS63 NGC. OC-10, R.2. Date placement and various faint die lines identify the die pair of this plentiful With Motto type coin. Luster is frosty and apparently original, cast in delicate yellow-gold, lilac, and sea-green hues. Well-struck devices show only slight incompleteness on the highest points. Trivial grade-limiting abrasions are hidden by the patina. Eye appeal is excellent for the grade. Census: 39 in 63 (1 in 63+), 48 finer (9/19). NGC ID# 5DNV, PCGS# 6966

**1872-S Silver Dollar, AU53**  
Just 9,000 Pieces Struck

- 3767** 1872-S AU53 NGC. OC-1, Low R.3. Because the 1870-S is non-collectible and the 1873-S is unconfirmed to exist, the 1872-S is the only available San Francisco Motto issue. It is much scarcer than its Philadelphia cousin, as suggested by its mintage of only 9,000 pieces compared to the million-plus production of the 1872. This lightly circulated representative is surprisingly free from reportable marks. Tan-brown toning clings to design recesses. Census: 8 in 53, 36 finer (9/19). NGC ID# 24ZL, PCGS# 6970

**PROOF SEATED DOLLARS**

**1863 Seated Dollar, PR62**  
First Generation Holder, CAC-Approved

- 3768** 1863 PR62 PCGS. CAC. OC-P2, Low R.4. Medium lavender toning adorns the flashy fields of this PR62 dollar. The surfaces are smooth aside from a few ticks in the right obverse field and faint scattered hairlines. The seated Liberty and eagle display a thin layer of mint frost. Just 460 proofs were struck for this Civil War date. Housed in a first generation holder with CAC approval. Ex: Long Beach Signature (Heritage, 2/2016), lot 4071. NGC ID# 23BS, PCGS# 7006

**1863 Seated Dollar, PR63 Cameo**  
Modest Contrast

- 3769** 1863 PR63 Cameo ANACS. OC-P2, Low R.4. Only 460 proof Seated dollars were struck in 1863, marking the lowest proof mintage of the series after 1858. This Select example has satiny devices and deep-mirrored fields. Subtle cameo contrast appears at most angles. Every design elements is fully struck, and only a few trivial hairlines prevent a finer grade. NGC ID# 23BS, PCGS# 7006

**1867 Seated Liberty Dollar, PR63 Cameo**  
Only 625 Examples Struck

- 3770** 1867 PR63 Cameo PCGS. OC-P1, R.3. Osburn-Cushing Die State a/a. A small mintage of 625 proof Seated Liberty dollars was accomplished in 1867, all struck from a single die pair. This impressive Select example exhibits sharply detailed design elements, with enough mint frost to create bold cameo contrast against deeply mirrored fields. Delicate greenish-gold and powder-blue toning visits both sides. Population: 14 in 63 Cameo, 31 finer (9/19). NGC ID# 252N, PCGS# 87015

## TRADE DOLLARS

**3771 1874-CC MS61 NGC.** Tall CC, Period after FINE. This attractive Mint State Trade dollar exhibits sharply detailed design elements and lustrous surfaces that show minor contact marks. Three reeding marks after the date are noted. Traces of sky-blue and champagne-gold toning enhance the eye appeal.  
Ex: *Central States Signature* (Heritage, 4/2014), lot 4596; *ANA Signature* (Heritage, 8/2014), lot 4677. NGC ID# 2532, PCGS# 7035

**3772 1875 Type Two Reverse MS61 PCGS.** Softly struck as usual, but still lustrous with silver interiors and rich orange peripheral color. The reverse shows an encircling die crack through the outer lettering. Two intersecting lines of reed marks occur under Liberty's outstretched arm.  
Ex: *FUN Signature* (Heritage, 1/2012), lot 3850, which realized \$2,070. NGC ID# 2534, PCGS# 40107 Base PCGS# 7037

### 1876 Trade Dollar, MS64+ Full Strike, Smooth Appearance

**3773 1876 Type One Obverse, Type Two Reverse, MS64+ PCGS.** CAC. Period after FINE. A fully struck near-Gem patinated in original and attractive cream-gray and lime-green shades. Cartwheel sheen traverses both sides, and the fields and devices are remarkably void of abrasions. The rims display a few slight knocks, but most are apparent near the date. A desirable type coin. NGC ID# 2539, PCGS# 40111 Base PCGS# 7041

### 1876-CC Trade Dollar, MS60 Rare in Mint State

**3774 1876-CC Type Two Reverse MS60 NGC.** Although more than 500,000 pieces were struck, the 1876-CC either circulated throughout the West, or was shipped to Oriental trade partners. Some returned with Chinese countermarks, but most of the exported pieces were melted. Few Mint State examples were preserved. This Uncirculated coin displays the usual Type One obverse (ribbon points left), paired with the Type Two (no berry below claw) reverse. A medley of pale-blue, reddish-gold, and smoke-gray toning covers both sides, with soft mint luster lurking beneath the mixed toning. A few light marks are well-hidden, and the bold strike weakens only at the highest points. Census: 11 in 60, 44 finer (9/19). NGC ID# 4EML, PCGS# 40113 Base PCGS# 7042

**3775 1876-CC Doubled Die Reverse, FS-801, AU55 PCGS.** Type One Obverse and Reverse, Tall CC. Wide die doubling on most reverse design elements is strongest on the lower-right wreath branch. Deep gunmetal-gray toning blankets each side of this Choice AU Carson City dollar. The design elements are bold with only a brush of friction. Popular *Guide Book* variety. Population: 5 in 55, 17 finer (9/19).

Ex: *Summer FUN Signature* (Heritage, 7/2014), lot 4128, which realized \$2,467.50. NGC ID# 253A, PCGS# 145815 Base PCGS# 97042

**3776 1876-S Type One Obverse, Type Two Reverse, MS64 PCGS.** Ex: Daniel D. Biddle. Small S mintmark. The upper obverse and lower reverse show a bit of characteristic softness. Lustrous surfaces reside beneath splashes of steel and heather toning. Only a few minor marks are present. Nine finer submissions at PCGS (9/19).

Ex: *Long Beach Signature* (Heritage, 9/2005), lot 3801; *Long Beach Signature* (Heritage, 9/2007), lot 1966; *Central States Signature* (Heritage, 4-5/2009), lot 924, which realized \$2,760. NGC ID# 253B, PCGS# 40115 Base PCGS# 7043

## PROOF TRADE DOLLARS

**3777 1874 PR61 PCGS.** Just 700 proofs were distributed in 1874 — most (if not all) in proof sets — although the issue shows a markedly lower survival rate than most other Trade dollar proof issues. Many pieces were simply spent. This well-mirrored example displays a thin veil of translucent gold toning. The strike is notably weak on Liberty's upper torso and the eagle's right (facing) side, although the peripheral elements are sharp. A loupe reveals delicate hairlines and a few light abrasions that account for the assigned grade. NGC ID# 27YK, PCGS# 7054

**3778 1874 PR60 Cameo NGC.** The proof mintage for the issue stands at 700 pieces. This example maintains striking Cameo contrast uninhibited by bluish patina around the obverse border. Both sides are lightly hairlined, limiting the technical grade. A collectible proof Trade dollar from the second year of issue. NGC ID# 27YK, PCGS# 87054

**3779 1875 PR61 Cameo NGC.** Brilliant, highly contrasted centers feature an outer ring of multicolor toning in progressive shades of blue, violet, and gold. The effect is more pronounced on the obverse. Faint hairlines appear on each side, defining the grade for this 1875 proof dollar (one of 700 examples for the year). NGC ID# 27YL, PCGS# 87055

### 1876 Trade Dollar, PR64 Sharp Proof Type Coin

**3780 1876 PR64 NGC.** Type One Obverse, Type Two Reverse. Dusky golden toning covers deeply mirrored fields and sharp, satiny devices on each side of this near-Gem proof. Some hairlines in the fields are hidden by the patina, and eye appeal is pleasing as a result. An excellent proof type coin. Census: 45 in 64, 20 finer (9/19). NGC ID# 27YM, PCGS# 7056

1877 Trade Dollar, Toned PR63  
Low-Mintage Proof Issue

- 3781 1877 PR63 PCGS.** The year 1877 was the final occasion of regular Trade dollar production at Philadelphia, and the last before Morgan dollars (known as Bland dollars at the time) came flowing from the presses. The 1877 proof Trade dollar mintage was thus smaller than it would be in later years, when collectors focused more heavily on the series that was being discontinued. Only 510 pieces were struck. This Select survivor displays a full strike and has deeply mirrored fields. Golden-lilac interiors cede to sea-green borders, producing pleasing visual appeal. Hairlines on both sides limit the grade. NGC ID# 27YN, PCGS# 7057

1878 Trade Dollar, PR63 Cameo  
Well-Contrasted Surfaces

- 3782 1878 PR63 Cameo PCGS.** Upon orders from Secretary of the Treasury John Sherman, Trade dollar coinage ceased as of February 22, 1878. The Philadelphia Mint struck no Trade dollars for circulation, but produced 900 proofs for dealers and collectors. Just the slightest tinge of gold patina graces each side of this silver-white, well-contrasted proof 1878 Trade dollar. The strike is bold, and there are only a few scattered abrasions. A single deep toning dot appears above the date. Population: 39 in 63 (1 in 63+) Cameo, 46 finer (8/19).  
Ex: FUN Signature (Heritage, 1/2012), lot 3874. NGC ID# 27YP, PCGS# 87058

1878 Trade Dollar, PR64 Cameo  
Rainbow Border Toning

- 3783 1878 PR64 Cameo NGC.** A beautiful Cameo, brilliant across the interiors with stark field-device contrast, and framed around the borders with gold and rainbow toning. This is a fully struck near-Gem proof Trade dollar. There are a few microscopic marks in the left obverse field that limit the grade, but the coin is otherwise high-end. Eye appeal abounds. Census: 20 in 64 Cameo (1 in 64+), 36 finer; 1 in 64 Ultra Cameo, 1 finer (9/19). NGC ID# 27YP, PCGS# 87058

1878 Trade Dollar, PR64  
Attractive Cameo Example, CAC

- 3784 1878 PR64 Cameo PCGS. CAC.** The Philadelphia Mint struck only proof Trade dollars for collectors in 1878 — no circulation strikes were issued. Elsewhere, the Carson City and San Francisco mints struck the only 1878 Trade dollars in circulation format to accommodate pending trade, business, and depositor demands. Just 900 proofs were struck. This nearly brilliant Cameo proof displays CAC endorsement, which recognizes the coin's sharp strike and well-mirrored fields. Frosted devices provide bold white-on-black contrast. A hint of golden toning adds an original touch to the Choice surfaces. Population: 31 in 64 (1 in 64+) Cameo, 15 finer. CAC: 12 in 64, 10 finer (9/19). NGC ID# 27YP, PCGS# 87058

- 3785 1879 PR62 PCGS.** Collectors completing a full date run of Trade dollars require an example of this proof-only issue (1,541 pieces). A mix of olive and chestnut tones covers reflective, lightly hairlined surfaces. Coloration becomes more vibrant when the coin is turned at an angle, revealing shades of blue, violet, and golden-orange. NGC ID# 27YR, PCGS# 7059

1879 Trade Dollar, Toned PR64

- 3786 1879 PR64 PCGS.** A fully struck near-Gem proof type coin, showing satiny devices and deeply reflective fields. Both sides have a dusting of lilac-gray toning with golden undertones, which prevents a Cameo designation but also masks any trivial contact marks or hairlines that keep this coin from a PR65 designation. Higher-grade 1879 proof Trade dollars are elusive. NGC ID# 27YR, PCGS# 7059

1881 Trade Dollar, PR64  
Distinctive Toning

- 3787 1881 PR64 PCGS.** A fully struck near-Gem proof with reflective fields that backlight mottled lilac-gray, russet, and golden toning on each side. Any faint hairlines that limit the grade are hidden beneath the patina. A pleasing coin for the grade, especially to a collector who appreciates old-time coloration. The 1881 is a popular type coin year, collectible for a price in most non-Cameo grades. NGC ID# 27YT, PCGS# 7061

**1882 Trade Dollar, PR63+ Cameo  
Stark Contrast, High-End for the Grade**

- 3788** 1882 PR63+ Cameo PCGS. CAC. Ex: Teich Family Collection. High-end Cameo examples of this well-made Trade dollar proof issue are on the scarce side, and they are highly sought for both type and date representation. This Plus-graded Select proof adds CAC endorsement to its credentials, with glittering mirrored fields and a pinpoint-sharp strike. The frosted devices produce strong white-on-black contrast when viewed at an angle, undiminished by a pale-gold sheen throughout the glassy fields. The entire 1882 Trade dollar mintage amounted to just 1,097 proofs, a relic of that short lived and controversial series. NGC ID# 27YU, PCGS# 87062

## MORGAN DOLLARS

**1878 8TF Morgan Dollar  
VAM-6, 'Pierced Eyelid,' MS66**

- 3789** 1878 8TF Pierced Eyelid, VAM-6, MS66 PCGS. This sharply struck Premium Gem features brilliant, semiprooflike surfaces with smooth fields and a faint hint of russet-red toning along the lower rims on each side. An interesting yet fairly common variety, VAM-6 shows die doubling on both sides, most noticeably at PLURIBUS and the wreath leaves. The obverse border has numerous wispy die cracks, while the reverse displays a number of raised die scratches including some lengthy ones beneath the arrow fletchings. Raised spike-like lines below R in DOLLAR accompany the VAM-6 die pair, which is most notable for a disconnected die line that pierces Liberty's eyelid. The 8TF type is scarce in Premium Gem, and PCGS reports just three 8TF examples in MS67 or finer grades, regardless of the variety (8/19). NGC ID# 76LZ, PCGS# 133789 Base PCGS# 7072

**1878 8TF Morgan Dollar, MS66  
VAM-17, Totally Brilliant**

- 3790** 1878 8TF Diagonal In 8, VAM-17, MS66 PCGS. Liberty is lightly die-doubled north. The obverse displays partial field reflectivity and contrast, while the reverse is thickly frosted with cartwheel mint luster. Both sides maintain total brilliance and exhibit strong central devices, though the stars and legends are incomplete. NGC ID# 253H, PCGS# 133818 Base PCGS# 7072
- 3791** 1878 7TF Reverse of 1878 MS65 Prooflike PCGS. CAC. Beautiful rainbow toning in combination with mirrored fields is the hallmark of this Gem 7TF coin. Blue, violet, amber, and orange-gold toning covers much of the obverse and surrounds the reverse periphery. The strike is sharp, and only a few trivial contact marks are apparent. Housed in a first generation holder. Population: 63 in 65 (2 in 65+) Prooflike, 12 finer; 29 in 65 (1 in 65+) Deep Mirror Prooflike, 1 finer. CAC: 8 in 65, 1 finer (9/19). NGC ID# 253K, PCGS# 7075

- 3792** 1878 7TF Reverse of 1879 MS65 ★ NGC. The slanted top arrow feather distinguishes the second-year type from the first-year reverse. Golden-orange patina dominates the obverse with crescents of violet and blue at the upper border. The other side is almost entirely brilliant with colorful rim toning near the denomination. A well-struck and appealing Gem. NGC ID# 253L, PCGS# 7076

- 3793** 1878 7TF Reverse of 1879 MS65+ PCGS. CAC. In higher grades, the 1878 7 Tailfeathers Reverse of 1879 (angled top arrow feather) commands a premium over the 1878 Reverse of 1878 variety (parallel top arrow feather). This brilliant, frost-white Reverse of 1879 dollar displays both the PCGS Plus designation and CAC endorsement — a step above other Gem examples in technical grade as well as in subjective categories such as eye appeal and visual impact. Only a few faint grazes and light contact marks are seen throughout the sharply struck, lustrous surfaces. Population: 42 in 65+, 33 finer. CAC: 53 in 65, 8 finer (9/19). NGC ID# 253L, PCGS# 7076

**1878-CC Morgan, MS64 Deep Prooflike  
Beautiful Originality, Early NGC Slab**

- 3794** 1878-CC MS64 Deep Prooflike NGC. Every minute detail of the design is defined on this near-Gem first-year Carson City Morgan, cast in frosted original mint luster. Deeply reflective fields elevate the devices with a cameo effect on both sides, while also backlighting daubs of gold, lilac, blue, and russet toning in the margins. The preservation is exceptional. Only a few faint grazes on Liberty's cheek limit the grade, and these are only visible at certain angles. Housed in a prior generation holder. NGC ID# 253M, PCGS# 97081

**3795 1878-CC Lines in Wing, VAM-11, MS63+ Deep Mirror Prooflike PCGS. CAC.** A Top 100 Variety. The diagnostic “Z-shaped” series of die gouges is bold on this high-end VAM-11 Select Deep Mirror Prooflike example, visible at the lower portion of the eagle’s left (facing) wing. Random die gouges are seen throughout the right wing as well. This is a sharply struck Carson City dollar with strong field/device contrast on both sides. The coin shows only a few light marks with great eye appeal, as confirmed by the PCGS Plus designation and CAC endorsement. Population: 9 in 63 Deep Mirror Prooflike, 4 finer (8/19). NGC ID# 253M, PCGS# 40438 Base PCGS# 97081

#### 1879-CC Dollar, Brilliant MS62 Normal Large CC Mintmark

**3796 1879-CC MS62 NGC. CAC.** Normal mintmark. Despite its proximity to plentiful sources of silver, the Carson City Mint could not attract sufficient bullion to sustain the large mintages required under terms of the Bland-Allison Act. Just 756,000 1879-CC silver dollars were struck before bullion ran out. This is a pleasing, CAC-endorsed example of the normal mintmark variety — mostly brilliant, with wisps of gold toning at the rims. The frosted silver surfaces are only lightly abraded for the MS 62 level, and the strike is sharp. NGC ID# 253U, PCGS# 7086

**3797 1879-CC Capped Die, VAM-3, AU50 NGC.** A Top 100 Variety. This *Guide Book* variety features the Large CC Over Small CC reverse. Faint high-point rub appears over otherwise well-defined motifs. Stone-gray surfaces show blushes of pale golden color and glints of luster within the hidden areas. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**3798 1879-O MS65 PCGS.** After extensive renovations and restoration, the New Orleans Mint reopened as a coinage facility in February, 1879. Its primary purpose was to mint silver dollars under terms of the Bland-Allison Act of 1878. Six days after opening, the Mint director stopped all silver shipments to the Carson City Mint, with much of the silver redirected to New Orleans. Perhaps this Gem 1879-O was struck in Nevada silver. Bluish-gray and gold toning with russet-red accents cover both sides. Brief central weakness of strike is seen on both sides, although all else is sharp. Liberty’s cheek is smooth and frosted, with only a few tiny marks visible beneath the toning. NGC ID# 253X, PCGS# 7090

#### 1879-O Silver Dollar, MS65+ Conditionally Challenging

**3799 1879-O MS65+ PCGS.** The 1879-O, a common date in most grades, becomes more difficult to locate in MS65. High-end Gems are especially sought-after, because finer examples are rare. This MS65+ coin displays radiant cartwheel luster with no mentionable toning. Only the faintest surface grazes deny full Premium Gem classification. PCGS has seen 36 finer non-Prooflike coins (9/19). NGC ID# 253X, PCGS# 7090

**3800 1879-S MS67+ PCGS. CAC.** More than 9.1 million Morgan dollars were struck at the San Francisco Mint in 1879, making the issue readily available in high grade, and a popular issue with type collectors. This Plus-graded Superb Gem exhibits sharply detailed devices and virtually flawless surfaces that show a mix of vibrant mint luster and prooflike reflectivity in the fields. NGC ID# 253X, PCGS# 7092

#### 1879-S Morgan Dollar, MS68 The Ultimate Type Coin

**3801 1879-S MS68 PCGS.** A perpetual common date, the 1879-S Morgan dollar is chiefly a type coin in the series. As such, the most sought-after examples are the highest-grade pieces. At PCGS, this constitutes coins in the MS68 numeric grade. All but three MS68 PCGS coins are non-Prooflike pieces (9/19). This example demonstrates the sheer quality of luster, strike, and preservation demanded of the lofty MS68 grade. It also showcases the quality of eye appeal for which the 1879-S is famous in high grade. A trace of golden toning covers each side, and there is not a single mentionable flaw. NGC ID# 253X, PCGS# 7092

**3802 1879-S MS67 Prooflike PCGS.** A thick layer of mint frost covers fully struck motifs on each side, surrounded by watery mirrors that contribute to the Prooflike effect. This 1879-S dollar appears pristine. Population: 55 in 67 (6 in 67+) Prooflike, 3 finer (9/19). NGC ID# 253X, PCGS# 7093

**3803 1880 MS66 NGC.** Vivid shades of violet and golden-brown toning visit the well-preserved surfaces of this delightful Premium Gem, with most of the color on the obverse. The design elements are sharply detailed and vibrant mint luster shines through the patina. Census: 46 in 66 (3 in 66+, 1 in 66★), 0 finer (9/19). NGC ID# 253Y, PCGS# 7096

#### 1880 Morgan Dollar, MS66+ Beautifully Toned, High-End Example

**3804 1880 MS66+ NGC.** A hint of reflectivity in the fields flashes through beautiful concentric rainbow toning on this high-end 1880 Morgan dollar. The central devices are sharply struck, and a loupe reveals only trivial signs of surface contact. The 1880 is seldom offered this fine, and the toning of this piece makes it singular exceptional. Census: 44 in 66 (3 in 66+, 1 in 66★), 0 finer; 6 in 66 (1 in 66+) Prooflike, 0 finer; 3 in 66 Deep Prooflike, 0 finer (8/19). NGC ID# 253Y, PCGS# 7096

**1880 Morgan Dollar, MS66+  
Attractive Original Toning**

- 3805 1880 MS66+ PCGS.** PCGS has not certified any 1880 Morgan dollars in Superb Gem condition, making this Plus-graded coin among the finest pieces obtainable. Even Prooflike and Deep Mirror Prooflike pieces in this grade are rare. Frosty cartwheel luster illuminates light golden toning throughout the interiors with lavender and blue borders. An exceptionally well-preserved coin, showing the usual strike softness on the central high points. NGC ID# 253Y, PCGS# 7096

**1880 Morgan Dollar, MS66+  
Clashed Dies**

- 3806 1880 MS66+ PCGS.** Clash marks are visible at the usual places, including Liberty's chin and lips, and on the reverse. This example has frosty luster and untuned surfaces with excellent eye appeal. It is tied for the finest that PCGS has certified (9/19), and it will appeal to Registry collectors. NGC ID# 253Y, PCGS# 7096

**1880 Dollar, MS65 Deep Mirror Prooflike  
Scarce Issue With Such Reflectivity**

- 3807 1880 MS65 Deep Mirror Prooflike PCGS.** Ex: Naples II. Flashy fields, a good strike, and minimal marks confirm the high quality of this impressive 1880 Morgan dollar. Only a hint of gold toning is present. The Naples II set of Morgan dollars was purchased intact by Legend Numismatics in 2000. This coin has only appeared at auction a couple of times since. Population: 34 in 65 (4 in 65+) Deep Mirror Prooflike, 2 finer (2/19).  
Ex: Los Angeles Signature (Heritage, 8/2009), lot 1843, where it sold for \$3,737.50; Dallas Signature (Heritage, 3/2019), lot 3970, which realized \$3,360. NGC ID# 253Y, PCGS# 97097

**1880-CC Morgan Dollar, MS66  
VAM-5, 8 Over High 7**

- 3808 1880-CC 8 Over High 7, VAM-5, MS66 PCGS. CAC.** A Top 100 Variety. The counterpart to VAM-4, showing a strong 80/79 overdate paired with the Reverse of 1879. This Premium Gem example is frosty on the devices and prooflike in the fields. Both sides showcase warm golden toning, although the obverse has additional orange, violet, and ocean-blue toning around the border. Scarce this fine and rare finer. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

- 3809 1880-S MS67+ PCGS. CAC.** The 1880-S Morgan dollar is an available issue, even at the MS67 grade level, making it a favorite choice of type collectors. This Plus-graded Superb Gem is sharply detailed and impeccably preserved, with satiny surfaces that show much prooflike reflectivity in the fields. NGC ID# 2544, PCGS# 7118

**1880-S Dollar, MS68  
Near-Flawless with Cartwheel Frost**

- 3810 1880-S MS68 PCGS.** Medium S. The famous Morgan dollar design is spectacular in nearly flawless MS68 condition with fully brilliant surfaces and glittering cartwheel mint frost. Strike detail is complete, as befits the grade. This mass-minted and well-saved San Francisco issue is one of the few in the series that survives to great extent through this high level. 32 finer examples are certified 68+, and five coins are graded MS69 at PCGS (9/19). NGC ID# 2544, PCGS# 7118

**1880-S Morgan, Registry-Grade MS68  
A Magnificent Type Coin Candidate**

- 3811 1880-S MS68 PCGS.** Semiprooflike fields seem to be a mainstay of almost every Morgan dollar certified in MS68, and this brilliant 1880-S once again displays this attractive feature. The devices are frosty and well-struck, and neither side has discernible abrasions. The cartwheel effect is dazzling. PCGS lists five finer non-Prooflike pieces (9/19). NGC ID# 2544, PCGS# 7118

- 3812 1881 MS66+ NGC.** This Plus-graded Premium Gem exhibits sharply detailed design elements throughout, with virtually pristine lustrous surfaces that show a few subtle highlights of lavender toning. PCGS has graded six numerically finer examples (9/19). NGC ID# 2546, PCGS# 7124

**1881 Dollar, Thickly Frosted MS66+  
Highest Collectible Grade**

- 3813 1881 MS66+ PCGS.** Although the Philadelphia Mint struck more than 9 million pieces, the San Francisco Mint easily exceeded that mintage by 25%. The P-mint coins also lag behind the 1881-S in quality, with few examples exceeding the Premium Gem level. This coin is an exception, with smoothly frosted surfaces, bright mint luster, a sharp strike, and fantastic eye appeal. A hint of gold toning creeps onto the frost-white surfaces. Population: 39 in 66+, 6 finer (9/19). NGC ID# 2546, PCGS# 7124

- 3814 1881 MS65 Prooflike PCGS.** This delightful Gem Morgan dollar displays sharply detailed, frosty design elements and reflective prooflike fields on both sides. The well-preserved surfaces show no mentionable distractions and eye appeal is terrific. Population: 18 in 65 (2 in 65+) Prooflike, 1 finer (9/19). NGC ID# 2546, PCGS# 7125

- 3815 1881-CC MS65 Deep Mirror Prooflike PCGS.** The 1881-CC Morgan dollar is a relatively available branch mint issue in high prooflike grades, but it becomes elusive above the MS65 level. This delightful Gem exhibits sharply detailed, frosty design elements and lightly marked, deeply reflective prooflike fields. PCGS has graded 72 numerically finer prooflike examples (9/19). NGC ID# 2547, PCGS# 97127

- 3816 1881-S MS66+ PCGS. CAC.** The 1881-S is plentiful for type collectors, and it often comes with outstanding eye appeal and luster. This example, however, stands apart from its peers with vivid rainbow toning that forms a crescent throughout the left and upper obverse margins. A golden halo surrounds the reverse, and the remainder of the coin is brilliant. Abrasions are virtually nonexistent, and the strike is sharp. Plus graded and CAC endorsed. NGC ID# 2549, PCGS# 7130

**1881-S Morgan Dollar, MS67+  
Spectacular Rainbow Toning  
Ex: Northern Lights**

- 3817 1881-S MS67+ PCGS. CAC. Ex: Northern Lights Collection.** An appropriately pedigreed Morgan considering the vivid multicolor toning that spans the obverse. Ribbons of blue-green, violet, and gold grace the lower left margin, ceding to lemon-yellow color across Liberty's face and hair, with translucent sky-blue in the upper right quadrant. The reverse is light golden with a splash of pastel rainbow color along the left border. This is a well-struck coin and beautifully preserved. Luster is radiant. NGC ID# 2549, PCGS# 7130

- 3818 1881-S MS67+ PCGS. CAC.** This Plus-graded Super Gem exhibits razor-sharp definition on all design elements and the impeccably preserved brilliant surfaces radiate vibrant satiny mint luster from both sides. Eye appeal is terrific. The 1881-S is one of the premier type issues of the series, thanks to its availability in high grade. NGC ID# 2549, PCGS# 7130

- 3819 1882-O MS66 PCGS.** This spectacular Premium Gem Morgan dollar displays sharply detailed design elements and lightly toned, lustrous surfaces, with no mentionable distractions. Overall visual appeal is outstanding. Population: 92 in 66 (11 in 66+), 8 finer (9/19). NGC ID# 254C, PCGS# 7136

**1882-O Morgan Dollar, MS65  
Brilliant, Deep Mirror Prooflike**

- 3820 1882-O MS65 Deep Mirror Prooflike PCGS.** Conditionally scarce in any format at the Gem grade, the 1882-O is rare with Deep Mirror Prooflike surfaces. This exceptional Gem combines mirrorlike fields with thickly frosted devices for standout contrast. Liberty's cheek is free of marks, while a few wispy field ticks visit both sides to define the assigned grade. Despite its New Orleans origin, the strike is sharp including over the ear, showing only a few light marks in the hair from the original planchet. Population: 29 in 65 Deep Mirror Prooflike, 1 finer (9/19). NGC ID# 254C, PCGS# 97137

- 3821 1882-S MS65 Deep Mirror Prooflike NGC.** Deep Mirror Prooflike 1882-S dollars are scarce in MS65 and rare finer. This issue is often quite eye-appealing, and many collectors choose the date for type representation. Offered here is a lustrous Gem with reflective fields and a sharp strike. Original golden and russet toning emerges in the margins. Housed in a prior generation holder. Census: 71 in 65 (1 in 65+) Deep Mirror Prooflike, 9 finer (9/19). NGC ID# 254E, PCGS# 97141

**1883-CC Morgan Dollar, MS67  
Outstanding Preservation, VAM-5B**

- 3822 1883-CC MS67 NGC. VAM-5B, R.5.** Struck from freshly polished dies, this Superb Gem 1883-CC displays the VAM-5B die stage. A diagnostic die scratch across the eagle's upper-right (facing) wing and a pronounced die gouge through the eagle's mouth identify the reverse, while the mintmark shows minor doubling. A starburst pattern is seen at each wing tip. On the obverse, the date shows doubling that includes a dash below the second 8. Weakening of the dentils is seen below 18. This is a brilliant Superb Gem example, sharply struck with reflective fields and a smoothly frosted cheek on Liberty. NGC ID# 254J, PCGS# 7144

**1883-O Silver Dollar, MS67  
A Registry-Grade Example**

**3823 1883-O MS67 PCGS.** No Superb Gem 1883-O Morgans at PCGS are designated Prooflike or Deep Mirror Prooflike. This frosty, non-Prooflike coin is conditionally scarce in this grade, and only a single numerically finer coin is listed on the *Population Report*. Vibrant bands of cartwheel luster spiral around each side, complementing brilliant surfaces and exceptional preservation. A touch of strike weakness on the hair above Liberty's ear is not bothersome. Population: 99 in 67 (10 in 67+), 1 finer (9/19). NGC ID# 254J, PCGS# 7146

**3824 1883-S MS63 PCGS.** Pastel sun-gold toning visits the margins, but this Select silver dollar is principally brilliant. The prooflike obverse is moderately marked, while the reverse displays cartwheel luster and is well-preserved. The '83-S is intermediate in Mint State rarity between the common '82-S and the rare '84-S. NGC ID# 254K, PCGS# 7148

**3825 1883-S MS63 NGC.** The 1883-S is the first of several scarce S-mint Morgans, despite a mintage of 6.25 million pieces. This is a brilliant Select Uncirculated example, with moderately prooflike fields and lightly frosted devices. Both sides display strong cartwheel luster. Liberty's cheek is smooth and nearly unmarked (save for a few light grazes), and a sharp strike weakens slightly above the ear. NGC ID# 254K, PCGS# 7148

**1884 Silver Dollar, MS67  
Conditionally Scarce**

**3826 1884 MS67 PCGS.** Frosty, brilliant surfaces boast sharp design elements and exceptional preservation on this Superb Gem 1884 Morgan dollar. This issue is scarce in MS67 and prohibitively rare finer. PCGS has seen only a single Prooflike coin in this grade, leaving Registry Set collectors to search for non-Prooflike pieces such as the present. Population: 75 in 67 (16 in 67+), 3 finer; 1 in 67 Prooflike, 0 finer (9/19). NGC ID# 254L, PCGS# 7150

**1884 Dollar, MS66+ Prooflike  
Frosty Motifs Against Reflective Fields**

**3827 1884 MS66+ Prooflike PCGS.** Generally, the 1884 Morgan dollar is nothing short of plentiful in all grades. However, it becomes distinctly elusive with Prooflike surfaces. This is a high-end Premium Gem with sharp, frosty motifs set against reflective, unabraded mirrors. A trace of golden border toning surrounds each side. Population: 10 in 66 (3 in 66+) Prooflike, 1 finer in this category (9/19). NGC ID# 267J, PCGS# 7151

**3828 1884-CC MS66+ NGC. CAC.** Vivid shades of lavender and sea-green toning visit the impeccably preserved surfaces of this Plus-graded Premium Gem, with most of the color on the obverse. The design elements are sharply detailed and vibrant mint luster adds to the outstanding eye appeal. NGC ID# 8BBF, PCGS# 7152

**1884-CC Dollar, MS67  
Colorful Border Toning**

**3829 1884-CC MS67 NGC.** Dappled ice-blue, crimson, gold, and violet encompasses the rims, leaving the centers of this pinpoint-sharp Superb Gem virtually all-brilliant. Vibrant mint frost characteristic of the Carson City facility swirls over the unabraded surfaces. NGC lists 11 in 67+, 8 in 67★, 2 in 67+★, and just 1 finer (9/19). NGC ID# 8BBF, PCGS# 7152

**3830 1884-O MS67 PCGS.** This stunning Superb Gem exhibits a sharp strike for a New Orleans issue, with just the slightest touch of softness on the hair above the ear. The virtually flawless brilliant surfaces radiate vibrant mint luster throughout. PCGS has seen only one coin in higher numeric grade (9/19). NGC ID# 254N, PCGS# 7154

**1884-O Morgan Dollar, MS66+  
Deep Mirror Prooflike Example**

- 3831 1884-O MS66+ Deep Mirror Prooflike NGC.** This Plus-graded Premium Gem Morgan dollar exhibits sharply detailed, richly frosted design elements that contrast boldly with the deeply reflective prooflike fields. The virtually flawless surfaces are essentially brilliant, but a few subtle highlights of lavender and lime-green toning appear when the coin is tilted at the right angle. Census: 14 in 66 (2 in 66+ Deep Mirror Prooflike, 1 in 66★), 4 finer (9/19). NGC ID# 256X, PCGS# 97155

- 3832 1885-CC MS65+ Prooflike PCGS.** This otherwise plentiful issue is decidedly elusive in MS65+ Prooflike condition. Brilliant surfaces showcase blatant contrast between the frosty, well-struck devices and semireflective fields, yet they maintain a partial cartwheel effect that is readily appealing. NGC ID# 254S, PCGS# 7161

**1885-O Morgan Dollar, MS67+  
Elusive CAC Registry Coin**

- 3833 1885-O MS67+ PCGS. CAC.** Plentiful overall, the 1885-O Morgan dollar becomes scarce in the upper reached of Mint State, beginning with coins graded MS67+. Pieces in this grade with CAC endorsement are especially challenging. The present coin displays vibrant, frosty mint luster, brilliant across the interiors with bands of gold around the outer borders. The usual strike weakness above Liberty's ear is present but not bothersome. PCGS has Plus graded only 48 Superb Gem 1885-O dollars (9/19). NGC ID# 254T, PCGS# 7162

- 3834 1886 MS67+ PCGS. CAC.** A beautifully preserved, untoned example of this type coin issue, boasting a Plus designation and CAC endorsement. Central strike sharpness is outstanding. Neither side exhibits mentionable abrasions. PCGS has seen 15 higher-grade non-Prooflike coins (8/19). NGC ID# 254V, PCGS# 7166

- 3835 1886-O MS62+ PCGS.** A sliver of deep, iridescent toning emerges from the upper obverse and lower reverse rims, although the balance of this 1886-O is lightly toned in lustrous, silver-gray shades. The frosted surfaces are free of any distracting marks, and Liberty cheek shows only minor abrasions beneath a loupe. Most of the 1886-O mintage fell victim to the Pittman Act, and is scarce in all Uncirculated grades. This Plus-graded MS62 example is sharply struck for the issue, with strong eye appeal. NGC ID# 254W, PCGS# 7168

**1887/6 VAM-2 Dollar, MS66  
A Top 100 and Guide Book Variety**

- 3836 1887/6 VAM-2, Top 100, MS66 NGC.** A Top 100 Variety. VAM-2 is listed in the *Guide Book* and regularly collected as part of the basic Morgan dollar set. Remnants of the underlying 6 are clear around the lower part of the 7. The fields are lustrous and exceptionally clean, and both sides show thin golden accents while remaining mostly brilliant. Well-struck at the centers with notably strong detail on the eagle's breast feathers. Census: 7 in 66, 2 finer (9/19). NGC ID# 2552, PCGS# 133908 Base PCGS# 7174

**1889-CC Silver Dollar, XF45  
Partially Lustrous Fields**

- 3837 1889-CC XF45 PCGS.** Partial luster remains in the fields on this Choice XF 1889-CC Morgan dollar, complementing well-detailed design elements that show little wear. Both sides are bright with scattered abrasions and a few hairlines, although eye appeal remains strong, especially for the XF grade level. NGC ID# 2559, PCGS# 7190

**1889-CC Dollar, Choice XF  
Problem-Free, Lightly Toned**

- 3838 1889-CC XF45 NGC.** Long regarded as the key to the Carson City Morgan dollar series, the 1889-CC is often encountered cleaned, damaged, or with other problems. But the present Choice XF representative displays light original chestnut-brown toning, and shows only a few minor ticks on each side. An above-average example of this desirable CC-mint stopper. NGC ID# 2559, PCGS# 7190

**1889-O Silver Dollar, MS65  
Brilliant and Well-Preserved**

- 3839 1889-O MS65 PCGS.** In general, the 1889-O has little to recommend it in terms of strike or eye appeal. Nearly 12 million pieces were struck, most of them lacking any attention to quality. Only a few hundred pieces are known at Gem or finer grades. This brilliant-white Gem offers strong eye appeal and nearly mark-free, smooth and attractive surfaces. True to form, the strike is weak above Liberty's ear and at the eagle's legs, but the lack of abrasions and bright cartwheel luster compensate. PCGS has seen only about three dozen finer examples (9/19). NGC ID# 255A, PCGS# 7192

**1890 Dollar, MS65+ Prooflike  
Rarely Offered in This Grade**

- 3840 1890 MS65+ Prooflike PCGS.** The fields of this high-end Prooflike Gem have a glimmering appearance beneath a light, complementing the contrasted devices with their softly frosted luster. A few grazes on Liberty's cheek are not bothersome, and a few small marks in the fields are typical of Gem-graded Prooflike dollars. This 1890 coin is untoned and well-struck with good eye appeal. Population: 27 in 65 (3 in 65+) Prooflike, 1 finer; 11 in 65, 0 finer (8/19). NGC ID# 255C, PCGS# 7197

- 3841 1890-CC MS64 Prooflike PCGS. CAC.** Flashy mirrored fields surround frosted devices of this boldly contrasted near-Gem. A few bits of gold toning exist at the margins, although the coin is essentially brilliant. Prooflike examples of this Carson City issue command a strong premium, richly deserved by this CAC-endorsed, "no question" prooflike example. Only a few tiny marks dot the smooth surfaces. CAC: 21 in 64, 3 finer (9/19). NGC ID# 255D, PCGS# 7199

- 3842 1890-CC Tail Bar, VAM-4, MS63 PCGS. CAC.** A Top 100 Variety. The massive die gouge beneath the arrow fletchings makes the VAM-4 Tail Bar variety a must-have for Morgan dollar specialists. This is a Select Uncirculated example with CAC endorsement, with colorful two-sided toning that features steel-blue and amber-gold shades. Soft mint luster glows beneath the original patina. Finer examples of the Tail Bar are rare. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

- 3843 1890-S MS66 PCGS.** This brilliant, radiantly lustrous Premium Gem showcases tremendous "pop," producing a quick cartwheel effect with the slightest rotation under a light. Almost no visible abrasions are present, and the centers show good definition. Finer coins at PCGS include eight non-Prooflike MS67s, and there are five Prooflike MS66s (one of which is Plus-graded) (9/19). NGC ID# 255F, PCGS# 7202

- 3844 1891-CC MS65 PCGS.** Vivid shades of violet and pale gold toning visit the well-preserved surfaces of this delightful Gem, with vibrant mint luster underneath. The design elements are well-detailed, with just a touch of blending on the hair strands above Liberty's ear. The overall eye appeal is imposing. The 1891-CC is a better Carson City issue, much scarcer in Mint State than the 1882-CC through 1884-CC. NGC ID# 255H, PCGS# 7206

**1891-CC Dollar, MS64 Deep Mirror Prooflike  
Dramatic Contrast**

- 3845 1891-CC MS64 Deep Mirror Prooflike PCGS.** This late-date Carson City dollar enjoys dramatic Deep Mirror Prooflike contrast, a function of reflective fields and thickly frosted relief elements. The surfaces are overwhelmingly brilliant with a trace of golden color around the rims, enhancing the effect. There are minimal marks to distract. Population: 61 in 64 (4 in 64+) Deep Mirror Prooflike, 4 finer (9/19). NGC ID# 255H, PCGS# 97207

**1891-CC Silver Dollar, MS65  
VAM-3 'Spitting Eagle'**

- 3846 1891-CC Spitting Eagle, VAM-3, MS65 PCGS.** A Top 100 Variety. A common variety, but popular with collectors. More important, the 1891-CC is anything but common in Gem Mint State, especially with the Spitting Eagle. This is an attractive Gem with frosted cartwheel luster and an above-average strike. Liberty's cheek shows a single minuscule mark on the chin, and the frosted fields show remarkably few abrasions for the grade. PCGS Population (VAM-3 variety): 30 in 65 (4 in 65+), 4 finer (9/19). NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

- 3847 1891-S MS66 PCGS.** Both sides display modest reflectivity in the fields, but a Cameo designation is just out of reach. This brilliant, satiny Premium Gem boasts reasonably sharp design elements and is free of major abrasions. The 1891-S is a better date in high grade, scarce in MS66, and rare finer. In addition to 20 Plus-graded pieces, PCGS has seen only nine higher-grade submissions (8/19). NGC ID# 255K, PCGS# 7210

- 3848 1892 MS65 NGC.** Nearly impossible to obtain in finer grades, this 1892 is a full-fledged Gem with brilliant-white, frosted surfaces and an above average strike. The strike is one reason why few Premium Gem or finer coins exist. Only a scattering of tiny marks is seen on this sparkling Gem, visible with magnification on the reverse. NGC reports six in 65+ and one in 65★, plus just one numerically finer example (8/19). NGC ID# 255L, PCGS# 7212

**3849 1892 MS65 PCGS.** The 1892 was generally kept out of circulation, explaining its former status as a rarity in the series. Bags were released during the middle part of the 20th century, but the issue remains scarce at the Gem level and is essentially unobtainable in higher grades. Smooth, frosty surfaces are brilliant with a hint of reddish-gold color near the left-hand stars. The centers show minor softness, as often encountered. PCGS reports 10 numerically finer submissions (9/19). NGC ID# 255L, PCGS# 7212

**3850 1892 MS63 Deep Mirror Prooflike PCGS.** Rare in Deep Mirror Prooflike format, the 1892 is also a strike rarity. This Select Uncirculated example clears both of those hurdles. A faint hint of russet-tan toning manifests with a few small obverse toning spots areas. Tiny marks on the deeply mirrored fields are joined by a light scuff on Liberty's upper cheekbone. Population: 15 in 63 Deep Mirror Prooflike, 33 finer (8/19). NGC ID# 255L, PCGS# 97213

**3851 1892-CC MS62 Prooflike PCGS.** The 1892-CC is found with prooflike surfaces more often than most Morgan issues — about 5% of the certified population is prooflike. This MS62 Prooflike has thickly frosted devices set on brilliant, flashy-mirrored fields. The strike is sharp despite die clashing (most visible on the reverse). Shallow marks and luster grazes on Liberty's portrait are grade limiting factors. NGC ID# 255M, PCGS# 7215

**3852 1892-O MS65 PCGS.** A spectacular Gem Morgan dollar, from a branch mint production of 2.7 million pieces, this coin offers sharply detailed design elements and well-preserved, lustrous surfaces, with subtle highlights of lavender toning. PCGS has graded nine numerically finer examples (9/19). NGC ID# 255N, PCGS# 7216

**3853 1892-S AU50 NGC.** The 1892-S Morgan dollar is not difficult to locate in circulated grades, but the issue is one of the most challenging of the series in high grade. This lightly worn, lightly abraded AU specimen retains traces of original mint luster in sheltered areas. NGC ID# 255P, PCGS# 7218

#### 1893 Silver Dollar, MS64+ Elusive CAC-Approved Example

**3854 1893 MS64+ PCGS. CAC.** Vibrant, frosty mint luster cascades across this high-end near-Gem 1893 silver dollar, complementing above-average strike sharpness in the centers. There are a few tiny contact marks, but this coin clearly surpasses expectations for an 1893 Morgan in MS64. The CAC endorsement adds to the appeal. NGC ID# 255R, PCGS# 7220

#### 1893-CC Dollar, Unc Details Lustrous Final-Year Issue

**3855 1893-CC — Questionable Color — PCGS Genuine. Unc Details. VAM-4.** A loupe reveals narrow repunching at the top of 3, and the date is positioned farther to the right than other 1893-CC varieties to confirm the VAM-4 die marriage. The CC mintmark leans left, with the first C partially struck through grease. PCGS notes Questionable Color for translucent, pale bronzelike toning that mingles with sky-blue shades at the upper obverse border. Numerous bag marks and small abrasions on Liberty's cheek and neck are seem more subtle beneath the toning. Softly struck above the ear as often seen, the coin retains its luster and field reflectivity for pleasing eye appeal. The reverse is lightly toned with natural silver-gray patina.

#### 1893-CC Silver Dollar, Unc Details Important Final CC-Mint Dollar

**3856 1893-CC — Cleaning — PCGS Genuine. Unc Details.** A sharp, brilliant, satiny example of the final-year Carson City dollar, showing vibrant cartwheel luster and pleasing eye appeal. Light abrasions appear on Liberty's cheek but are not bothersome. Some faint hairlines in the same area prevent a numeric grade from PCGS but do not detract.

#### 1893-S Dollar, VG10 Attractive and Problem-Free

**3857 1893-S VG10 NGC. CAC.** Regardless of grade, every 1893-S quickly finds a spot in a Morgan dollar enthusiast's collection. This is an ideal example for a circulated set, with smoothly worn silver-gray surfaces that epitomize the look of "old silver." The surfaces are free of any marks needing mention, with a smooth cheek on Liberty and excellent, fully dentilled rims. There are no detractors whatsoever for the VG10 grade, accordingly CAC endorsed. NGC ID# 255U, PCGS# 7226

**3858 1893-S — Graffiti — PCGS Genuine. Fine Details.** The 1893-S dollar is the most renowned business-strike issue in the Morgan dollar series. This well-circulated example with alternating light and deep gray patina shows a couple of engraved marks in the lower-left and lower-right obverse fields. An affordable example of this difficult-to-obtain issue.

**3859 1894-O MS62 NGC.** Despite its substantial mintage of more than 1.7 million pieces, the 1894-O has a certified Mint State population comparable to the 1894 Philadelphia issue, which had a mintage 17 times less. This is a brilliant example with strong cartwheel luster and remarkably few abrasions for the assigned grade. As usual for the issue, the hair definition is weak over the ear, but the vibrant surfaces and lack of bagmarks suggest an even finer grade.

*From The Pelican Collection, Part II.* NGC ID# 255W, PCGS# 7230

#### 1894-O Silver Dollar, MS63 Better O-Mint Issue

**3860 1894-O MS63 PCGS.** Sharply struck for the New Orleans issue and minimally marked for its Select Uncirculated grade, this attractive 1894-O features a narrow ring of vibrant-orange toning at the borders and faint golden patina across bright-silver centers. A few tiny marks on Liberty's cheek and in the adjacent field are the only marks of note. Finer examples are challenging to find, while Gems are rare and expensive. This 1894-O will satisfy many collectors by virtue of its eye appeal and lively, high-quality surfaces. NGC ID# 255W, PCGS# 7230

#### 1894-S Morgan Dollar, MS64+ Borderline Gem, Attractive

**3861 1894-S MS64+ PCGS. VAM-1A, R.5.** High-end near-Gem 1894-S dollars are scarce, with just 60 coins certified MS64+ at PCGS (9/19). This attractive Choice Uncirculated example offers several positive attributes to justify its Plus grade. The fields are partially prooflike, smoothly contrasting with the frosted central devices. A ring of orange-gold toning further enhances the coin's eye appeal. The strike is sharp in most regards, lacking fullness on a few strands above the ear due to die striations, and some of the ridges on the eagle's claws are not brought up. Marks are minimal for the grade level. The VAM-1A variety shows numerous die lines and gouges, including the aptly named Worm Eye die gouge. NGC ID# 255X, PCGS# 7232

**3862 1895-O AU55 NGC.** Moderate luster remains in the fields of this Choice About Uncirculated 1895-O Morgan dollar. Slight friction over the high points of the devices prevents a Mint State designation, although no toning or singular abrasions are worthy of mention. Eye appeal is excellent for the grade. NGC ID# 255Y, PCGS# 7236

#### 1895-O Morgan Dollar, AU58 Elusive Branch Mint Issue

**3863 1895-O AU58 NGC.** With fully Mint State examples scarce and often bagmarked, this still-lustrous, lightly toned near-Mint example will serve quite nicely in an otherwise Uncirculated set. Abrasions or marks are nearly entirely absent on the smooth and frosted surfaces. A hint of rub on the eagle's breast and a touch of flatness over the ear are of little note compared to the lively, silver luster that remains on this exceptional, briefly circulated 1895-O. Just 450,000 pieces were struck.

*From The Pelican Collection, Part II.* NGC ID# 255Y, PCGS# 7236

**3864 1896-O MS62 PCGS.** For an issue that generally lacks technical quality and eye appeal, this MS62 example is head and shoulders above most 1896-O dollars. The strike is sharp, and pleasingly light, silver-gray toning visits the lustrous and frosted surfaces. The hair over the ear is sharp, as are the eagle's breast feathers. The talons show only minor weakness. There are remarkably few abrasions or marks of any kind, most of which require a strong loupe to view. NGC ID# 27ZU, PCGS# 7242

**3865 1896-O MS62 NGC.** Richly frosted and sharply struck, this lustrous 1896-O displays golden-gray patina and a strike that lacks sharpness only above the ear and at the eagle's talons. The '96-O is seldom seen in high Mint State grades from a mintage of more than 4.9 million pieces. The luster on this coin is unusually bold and attractive for an issue that almost always lacks any semblance of eye appeal.

*From The Pelican Collection, Part II.* NGC ID# 27ZU, PCGS# 7242

#### 1896-O Morgan Dollar, MS63 Seldom Seen Finer

**3866 1896-O MS63 PCGS.** Richly toned in pewter-gray shades with underlying mint luster, this sharply struck 1896-O defies most of the shortcomings that plague the issue. The surfaces are surprisingly free of bagmarks and abrasions, with just a solitary contact over Liberty's eye well-hidden in the toning, plus a few tiny ticks at the cheekbone. It is worth noting that PCGS has certified fewer than three dozen coins at the MS64 level or finer (9/19). NGC ID# 27ZU, PCGS# 7242

**1896-S Dollar, Bright and Lustrous MS64**

- 3867 1896-S MS64 PCGS.** The brilliant surfaces display a few light contact marks and a faint trace of toning above Liberty's cap on the obverse. Areas of slight softness are noted in the hair over Liberty's ear and on the eagle's breast. All in all, a fresh Mint State example of this scarce S-mint issue.  
*Ex: Palm Beach Signature (Heritage, 11/2004), lot 9903. NGC ID# 2564, PCGS# 7244*

**1896-S Dollar, MS64  
High-End VAM-2 Example**

- 3868 1896-S MS64 NGC. VAM-2, Repunched Date.** The thin curve of an underdigit 6 is clear above the primary date. Scarce in Choice Uncirculated or finer grades, the 1896-S is one of the well-known condition rarities of the Morgan dollar series. This is a nearly brilliant and frosted example, a bit weakly struck at the centers, but with lustrous and original eye appeal. Faint wisps of golden-gray toning substantiate the natural state of preservation. PCGS reports just 84 pieces in full Gem or finer grades (9/19). NGC ID# 2564, PCGS# 7244

- 3869 1897 MS65 Deep Mirror Prooflike PCGS.** Although the 1897 Morgan dollar issue is plentiful even in the higher Mint State grades, its availability in Deep Mirror Prooflike is quite the opposite. This example is well-struck with deeply reflective fields. A few contact marks appear, primarily on the obverse. Population: 29 in 65 (2 in 65+) Deep Mirror Prooflike, 2 finer (9/19).  
*Ex: FUN Signature (Heritage, 1/2013), lot 6294; Central States Signature (Heritage, 4/2016), lot 5304; FUN Signature (Heritage, 1/2017), lot 5250. NGC ID# 2567, PCGS# 97247*

- 3870 1897-S MS66 Prooflike PCGS.** This carefully produced circulation-strike Morgan dollar was struck from recently polished dies, hence the blatant field reflectivity and resulting Prooflike designation. Both sides maintain their brilliance and show strong strike definition. A few reeding marks appear above the eagle's head. Population: 49 in 66 (5 in 66+) Prooflike, 4 finer in this category (9/19). NGC ID# 267S, PCGS# 7251

- 3871 1898 MS67 PCGS.** This Superb Gem 1898 Morgan dollar is among the highest-graded examples at PCGS, including a handful of pieces in Prooflike and Deep Mirror Prooflike (9/19). Luster abounds on each side, complementing warm golden-orange toning across the interiors with violet and blue around the borders. A well-struck piece, appropriately well-preserved in this grade. NGC ID# 2568, PCGS# 7252

**1898-O Morgan Dollar, MS67★  
Sharp O-Mint Strike, Splendid Color**

- 3872 1898-O MS67★ NGC.** Splendid end-of-the-roll toning in vivid shades of turquoise and burnt-orange adorn the obverse of this nearly mark-free, satiny Superb Gem. Its combination of color and high quality should prove irresistible to the quality conscious Morgan dollar or New Orleans Mint collector. The important NGC Star designation adds an extra level of confirmed quality. Census: 2 in 67+, 3 in 67★, 2 finer (8/19).  
*Ex: Long Beach Signature (Heritage, 6/2005), lot 6948. NGC ID# 2569, PCGS# 7254*

- 3873 1899-O MS67 PCGS.** From a mintage of 12.2 million pieces, the 1899-O Morgan dollar is only somewhat scarce in MS67 condition, but finer coins are virtually unobtainable. This sharply detailed Superb Gem exhibits virtually flawless surfaces with vibrant mint luster throughout. PCGS has graded one numerically finer example (9/19). NGC ID# 256C, PCGS# 7260

**1899-O Micro O Dollar, MS61  
VAM-4, A Top 100 Variety**

- 3874 1899-O Micro O, VAM-4, MS61 PCGS.** A Top 100 Variety, showing the popular Micro O mintmark. Mint State Micro O coins are scarce in all grades, and the variety is prohibitively rare for most collectors finer than MS63. This accessible MS61 coin displays brilliant, satiny luster and only light abrasions for the grade. Trivial strike softness on the hair above Liberty's ear is not bothersome. NGC ID# 256C, PCGS# 133947 Base PCGS# 87260

**1900 Silver Dollar, MS67  
Reflective Fields**

- 3875 1900 MS67 PCGS.** The brilliant fields are partially — if not mostly — prooflike, struck from polished dies. A degree of contrast exists between the reflective fields and lightly frosted devices, and the strike is every bit as sharp as usually seen on a 1900 dollar. The 1900 is not well-known for its eye appeal, which explains a healthy population at MS67, but few Plus-graded coins, and no coins numerically finer. Population: 87 in 67 (8 in 67+), 0 finer (9/19). NGC ID# 256F, PCGS# 7264

**1900 Morgan Dollar, MS67**  
**Vivid Reverse Toning**

- 3876** 1900 MS67 NGC. Vivid shades of lavender and sea-green toning blanket the reverse of this spectacular Superb Gem Morgan dollar, while the obverse remains essentially brilliant. The design elements are well-detailed, with just a touch of blending on the hair strands above the ear. Vibrant mint luster radiates from both sides and eye appeal is outstanding. Census: 57 in 67 (4 in 67+), 0 finer (9/19). NGC ID# 256F, PCGS# 7264

**1900-O Silver Dollar, Brilliant MS67**  
**Among the Finest at PCGS**

- 3877** 1900-O MS67 PCGS. A scarce Superb Gem example of this turn-of-the-century New Orleans issue, showing brilliant, satiny mint luster and above-average strike sharpness. Liberty's cheek is pristine, warranting the high-end grade. PCGS has not certified any 1900-O dollars this fine with a Prooflike or Deep Mirror Prooflike designation. This Superb Gem non-Prooflike coin will appeal to many Registry collectors. NGC ID# 256F, PCGS# 7266

**1900-O Morgan Silver Dollar, MS67**  
**Light Obverse Toning**

- 3878** 1900-O MS67 PCGS. Six decades ago, the 1900-O was available in bag quantity in Mint State. But most Uncirculated survivors have scuffy fields and cheeks, due to indifferent storage and shipment. The present lustrous Superb Gem provides an exception, since the fields are smooth and the portrait shows only delicate contact. The well struck surfaces display light honey-gold obverse toning. The reverse is practically brilliant. NGC ID# 256F, PCGS# 7266

**1901 Morgan Dollar, MS60**  
**Always Challenging in Full Mint State**

- 3879** 1901 MS60 NGC. Any Mint State 1901 Morgan draws attention from collectors, since most of the 6.9 million-piece was melted under terms of the Pittman Act. This is an attractive, fully Uncirculated example, with vibrant mint luster beneath a faint overlay of golden-gray toning. Struck with the C3/C4 "2 olive" reverse, this coin is about as sharp as the new hub dies allowed. Liberty's cheek is smooth and free of marks, while light field abrasions including a thin mark above stars 1 to 3 determine the assigned MS60 grade. NGC ID# 256J, PCGS# 7272

**1901 Morgan Dollar, MS62**  
**Uncirculated Condition Rarity**

- 3880** 1901 MS62 NGC. An example of the well-known, conditionally rare 1901 Philadelphia Mint Morgan dollar is available here in Mint State with totally bright, softly frosted surfaces. An incomplete impression and some minor ticks and hairlines are noted, but there are noticeably few distracting abrasions. A dark toning spot below the eagle's beak serves as a pedigree identifier. NGC ID# 256J, PCGS# 7272

**1901 Dollar, MS62**  
**Brilliant and Lustrous**

- 3881** 1901 MS62 NGC. New collectors to the Morgan dollar series may at first be unimpressed by the 1901, which records a plentiful production of nearly 7 million pieces. However, the issue is even more difficult in Uncirculated grades than the 1894, which had a scant mintage of 110,000 pieces. Perhaps coins not sent directly into circulation became part of the great 1918 Pittman Act melt. This nearly brilliant piece is sharply struck, and has a nearly unabraded reverse. Several small marks are apparent on Liberty's cheek and neck and in the left obverse field. NGC ID# 256J, PCGS# 7272

- 3882 1901-O MS66+ PCGS. CAC.** A minority of 1901-O Morgan dollars in Premium Gem condition are CAC approved. This piece is further Plus-graded, earning it high marks among Registry collectors. Each side is brilliant and vibrantly lustrous. Central strike sharpness is outstanding for a New Orleans product. NGC ID# 256K, PCGS# 7274
- 3883 1901-S MS63 Prooflike PCGS. CAC.** PCGS has graded only 40 Prooflike 1901-S dollars in all grades, compared to 4,641 non-Prooflike examples. This Select Uncirculated representative with CAC approval is mostly silver with golden accents around the borders. Light chatter and central incompleteness are normal. Population: 11 in 63 Prooflike, 19 finer. CAC: 2 in 63, 5 finer (9/19). NGC ID# 256L, PCGS# 7277
- 3884 1903 MS67 PCGS.** A trace of russet tinting appears on each side of this Superb Gem, although the coin presents as brilliant upon a first glance. Luster is satiny and unabraded, while the design elements feature sharper definition than usual for an O-mint Morgan of this period. No finer pieces are listed at PCGS (9/19). NGC ID# 256R, PCGS# 7284
- 3885 1903 MS67 PCGS.** A scarce Superb Gem example of this late-series Philadelphia issue, showing satiny luster and golden-lilac toning. A crescent of peripheral ocean-blue graces the left reverse border. Among the finest 1903 Morgans at PCGS, with no Prooflike coins in this numeric grade (9/19). NGC ID# 256R, PCGS# 7284

#### 1903-O Silver Dollar, MS67 Rich Original Patina

- 3886 1903-O MS67 NGC.** The 1903-O was once a famous rarity within the Morgan dollar series. During the early 1960s, several Uncirculated bags left the Treasury vaults where they had spent the past six decades, and today the issue is easily obtained in Mint State. At the time the present coin was certified within its prior generation holder, it was tied as the finest at either NGC or PCGS, though in recent years a few pieces have been assigned Plus grades at both services. This smooth and lustrous Superb Gem exhibits attractive medium plum-red and butter-gold toning. The strike is good, and the sole imperfection is a mint-made flan flaw between the AR in DOLLAR. NGC ID# 256S, PCGS# 7286
- 3887 1904 MS65+ PCGS. CAC.** Coinage of Morgan dollars was suspended after 1904, until the series made one final bow in 1921. The Philadelphia Mint struck a smallish mintage of 2.7 million Morgan dollars in 1904 and the issue is definitely a better date in the series. This Plus-graded Gem is sharply detailed and lustrous, under attractive shades of lavender, violet, and sea-green toning. PCGS has graded 48 numerically finer examples (9/19). NGC ID# 256U, PCGS# 7290
- 3888 1904-O MS67 NGC.** From a mintage of 3.7 million pieces, the 1904-O Morgan dollar becomes scarce at the MS67 grade level and no numerically finer examples have been certified. This delightful Superb Gem exhibits well-detailed design elements and impeccably preserved lustrous surfaces, with highlights of pink on the centers and a fringe of sea-green at the peripheries. NGC ID# 256V, PCGS# 7292
- 3889 1904-S AU53 NGC.** The 1904-S Morgan dollar is a better date in the series, from a mintage of 2.3 million pieces. This attractive AU53 example displays just a touch of wear on the well-detailed design elements and the lightly abraded surfaces retain significant amounts of original mint luster. NGC ID# 256W, PCGS# 7294

## PROOF MORGAN DOLLARS

### 1878 7TF Morgan Dollar, PR61 Cameo Reverse of 1878 Proof Type Coin

- 3890 1878 7TF Reverse of 1878 PR61 Cameo NGC.** The 7TF Reverse of 1878 proof 1878 Morgan dollar is elusive in all grades, and it is a rarity with cameo contrast. Although graded only PR61, this attractive piece is much more appealing than its grade suggests. Hairlines are masked by light champagne toning over each side, and a thin ribbon of blue and gold graces the upper obverse periphery. Contrast is pleasing on both sides and the devices are sharp. NGC ID# 2573, PCGS# 87312
- 3891 1887 PR62 PCGS.** The 1887 proof Morgan dollar claims a mintage of 710 coins. This predictably pinpoint-sharp example is draped in dusky violet patina over flashy fields. A few hairlines are noted. Encapsulated in a green label holder. NGC ID# 27ZG, PCGS# 7322

### 1892 Morgan Dollar, PR64+ Vivid Multicolor Toning

- 3892 1892 PR64+ PCGS.** An unusually generous mintage of 1,245 proof Morgan dollars was produced in 1892 but examples in Choice condition are scarce today. This impressive PR64 specimen exhibits razor-sharp definition on all the design elements, with deeply reflective fields under vivid shades of magenta and champagne-gold toning. Population: 85 in 64 (3 in 64+), 68 finer (9/19).  
*Ex: Long Beach Signature (Heritage, 6/2013), lot 5162.* NGC ID# 27ZM, PCGS# 7327
- 3893 1894 PR62 ANACS.** The circulation strike mintage of just 110,000 pieces was accompanied by a normal production of 972 proofs. The scarcity of high-grade coins from circulation strikes adds pressure on the proofs, with collectors seeking high-grade alternatives. This chromelike proof is sharp and well-preserved. The strike is sharp as expected for a proof, and moderate contrast exists between the lightly frosted devices and mirrored fields. A faint golden sheen originates from the rims, where a thin band of reddish-gold toning exists. NGC ID# 2577, PCGS# 7329

## PEACE DOLLARS

- 3894 1921 MS65 PCGS. VAM-1G.** David Close discovered VAM-1G, a business issue that shares its obverse die with the rare matte proofs. The 1921 Peace dollar is a favorite among collectors for its status as a one-year High Relief type. This Gem example displays thick, frosty luster with just a hint of light golden obverse toning, and pleasing iridescence on the reverse. The central relief elements exhibit only minor softness, and grade-limiting abrasions are at a minimum.  
*Ex: Dallas PNG Signature (Heritage, 2-3/2015), lot 4079.* PCGS# 7356

**3895 1921 MS65 PCGS. CAC.** A lovely, satiny Gem example of this first-year High Relief type, showing champagne tinted mint luster and exceptionally clean surfaces. Liberty's facial features are notably defined with no contact marks to detract. The usual strike softness affects the hair curls, which are in higher relief, and the centermost point of the eagle's wing. PCGS# 7356

### 1923 Peace Dollar, MS67 Registry Set Quality

**3896 1923 MS67 PCGS.** Ex: Jack Lee 2. A superb, intensely lustrous Registry coin that looks as though it was struck last week. A dazzling cartwheel effect reveals no distinct abrasions and only complements the outstanding sharpness and eye appeal. Both sides have a light champagne hue, but there is no other toning. A prize for the Peace dollar specialist, as even common dates are seldom found this fine. Population: 80 in 67, 0 finer (9/19).  
Ex: *Pittsburgh Signature (Heritage, 8/2004)*, lot 7052, which realized \$4,025. NGC ID# AMPA, PCGS# 7360

**3897 1923-D MS66 PCGS.** The 1923-D Peace dollar is a scarce issue in MS66 condition, and finer coins are virtually unobtainable. This delightful Premium Gem exhibits sharply detailed design elements and well-preserved lustrous surfaces, with subtle highlights of golden-tan toning. PCGS has graded one numerically finer example (9/19). NGC ID# 257G, PCGS# 7361

**3898 1923-S MS65 PCGS.** Dusky shades of lavender-gray, sea-green, and golden-tan toning visit the well-preserved surfaces of this impressive Gem, with well-detailed design elements and vibrant mint luster underneath. PCGS has graded three numerically finer examples (9/19). NGC ID# 257H, PCGS# 7362

**3899 1925 MS67 NGC.** A faint, sideways blush of pale-blue toning sweeps across both sides of this otherwise brilliant Superb Gem Peace dollar for dramatic eye appeal. The strike and surface quality live up to the eye appeal, with a clean cheek on Liberty and fully defined hair strands. The reverse is equally sharp and attractive. NGC has certified just one numerically finer example (9/19). NGC ID# 257L, PCGS# 7365

### 1927-D Peace Dollar, MS65 Few Finer Pieces Are Known

**3900 1927-D MS65 NGC.** The 1927-D is a better date in Gem condition, and finer pieces are rarely seen. This example displays impressively strong central detail, frosty mint luster, and just the faintest trace of light champagne toning. Only a few wispy grazes on each side prevent an even finer designation from NGC. Census: 81 in 65 (4 in 65+), 4 finer (8/19). NGC ID# 257T, PCGS# 7371

**3901 1928-S MS64+ PCGS. CAC.** The 1928-S is the rarest Peace dollar in Gem or finer conditions — more challenging than even the 1928 Philadelphia issue and other conditionally scarce San Francisco dates. This is an attractive, originally toned near-Gem, with dappled golden-gray toning and strong satiny luster beneath the light patina. An above-average strike lacks sharpness only at Liberty's face curls, with a few light ticks and minor marks on each side. The PCGS-Plus and CAC designations speak to its quality. PCGS reports just 69 finer examples. NGC ID# 257W, PCGS# 7374

**3902 1934 MS66 PCGS.** A scarce Premium Gem example of this late-series Philadelphia issue, showing a bold strike and satiny olive-gold luster. There are no mentionable abrasions. PCGS has seen only six numerically finer representatives, NGC just five (9/19). NGC ID# 257Y, PCGS# 7375

### 1934-D Peace Dollar, MS66 Rare in Finer Grades

**3903 1934-D MS66 PCGS.** In high grades, the 1934-D runs a close second in scarcity to its more famous S-mint counterpart. Satin-smooth, high-luster surfaces are sharply struck throughout both sides of this Premium Gem, with a tiny mark on Liberty's jawline and a short bit of mint grease below E in ONE. The eye appeal is excellent. PCGS reports just a few pieces in finer grades — 12 in 66+, and 2 finer (9/19). NGC ID# 257Y, PCGS# 7376

### 1934-S Dollar, MS63 San Francisco Semikey

**3904 1934-S MS63 PCGS.** The obverse remains mostly brilliant, while the reverse displays translucent splashes of gunmetal and gold color. Central strike definition is typically incomplete, however the other areas show good detail on this well-preserved San Francisco semikey. Minimal grazes and shallow bagmarks prove undistracting. NGC ID# 257Z, PCGS# 7377

## End of Session Two

# SESSION THREE

## GOLD DOLLARS

### 1849 Open Wreath Gold Dollar, MS65 D-4, Close Stars, Cracked Reverse

- 3905 1849 Open Wreath MS65 NGC. D-4.** The date numerals are thin and the lower obverse stars are spaced close to the bust truncation. This first-year gold dollar type coin displays satiny yellow-gold mint luster and sharp design elements. A few faint marks are not bothersome. On the reverse, a die crack stretches from the rim through the 1 in UNITED, into DOLLAR. Finer 1849 gold dollars are seldom encountered. Census: 43 in 65 (2 in 65+), 10 finer (9/19). NGC ID# 25BA, PCGS# 7502

- 3906 1849-O Open Wreath MS63 PCGS. Variety 1.** Minted in abundant numbers with 215,000 pieces produced, but surprisingly few examples are known today in all grades. This is a well, but not fully struck example, that has thick, frosted mint luster. A few obvious marks keep this piece in the MS63 category, but it is very pleasing as such. Population: 42 in 63, 33 finer (9/19). NGC ID# 25BE, PCGS# 7508

- 3907 1849-O Open Wreath MS63 NGC. Variety 1.** The R in DOLLAR is doubled and the mintmark is fractionally higher than on Variety 2. This first-year branch mint issue is collectible thanks to a mintage of 215,000 coins. Examples are always sought-after in Mint State. Well-detailed motifs appear over lustrous, light yellow-gold surfaces. Each side shows a number of small abrasions. Census: 49 in 63 (1 in 63+), 45 finer (9/19). NGC ID# 25BE, PCGS# 7508

- 3908 1850-C AU50 NGC. Variety 1.** The scarce 1850-C gold dollar claims a low mintage of 6,966 pieces, of which about 250 coins exist today. Each side of this About Uncirculated representative features attractive olive-green and orange-gold color. The only mentionable marks include a small tick beneath the A in DOLLAR and another on Liberty's cheek. NGC ID# 25BG, PCGS# 7510

### 1852 Gold Dollar, Frosty MS66 Conditionally Elusive Type Coin

- 3909 1852 MS66 PCGS.** The frosty surfaces of this Premium Gem Type One gold dollar are virtually flawless, showing luminous yellow-gold hues and sharp design elements. The 1852 is a plentiful date overall and popular for type collections, although examples grading MS66 and finer are rare. Population: 21 in 66 (1 in 66+), 6 finer (9/19). NGC ID# 25BP, PCGS# 7517

- 3910 1853 MS65+ NGC.** An extraordinary Gem Type One gold dollar with the NGC Plus designation, this piece has satiny yellow-gold surfaces with beautiful wisps of blue and violet toning. Several curious die lines appear on Liberty's nose, cheek, and temple, including one that pierces the eye.  
*Ex: Long Beach Signature (Heritage, 1-2/2015), lot 4162; Long Beach Signature (Heritage, 2/2016), lot 4211. NGC ID# 25BU, PCGS# 7521*

### 1853 Gold Dollar, MS66 Attractive Original Coloration

- 3911 1853 MS66 NGC.** A frosty, well-preserved Type One gold dollar, showing sharp design elements and original mint luster. Rich orange-gold, rose, and lilac hues appear on each side. Eye appeal is exceptional. The 1853 gold dollar is scarce in this grade and rarely offered finer. Census: 45 in 66 (2 in 66+), 10 finer (9/19). NGC ID# 25BU, PCGS# 7521

### 1853-D Gold Dollar, AU58 Popular Dahlonega Issue for Type

- 3912 1853-D AU58 NGC. Variety 1-A.** The 1853-D gold dollar ranks as one of the more available Dahlonega issues despite a limited mintage of 6,583 pieces. Partially reflective surfaces show numerous tiny marks, while the strike is sharp except for the face curls near and above the ear. Greenish-gold color retains considerable brightness from remnant mint luster. Census: 53 in 58 (2 in 58+), 37 finer (9/19). NGC ID# 25BW, PCGS# 7523

- 3913 1853-O MS64 NGC. Variety 1.** Thickly frosted and sharply struck, this Choice Uncirculated O-Mint gold dollar is well-preserved for the issue. Soft mint luster glows beneath the greenish-gold surfaces, and marks are limited to just one or two tiny ticks on each side. No other New Orleans gold dollar is more available, yet it is scarce in the near-Gem grade and seldom seen any finer. Census: 45 in 64 (2 in 64+), 12 finer (9/19). NGC ID# 25BX, PCGS# 7524

**1855 Gold Dollar, MS63  
Satin Type Two Coin**

- 3914 1855 Type 2 MS63 PCGS.** A lightly clashed (as usual) Type Two gold dollar, showing satiny yellow-gold luster and well-preserved surfaces for the grade. There is a touch of weakness on the hair curls at Liberty's temple, but the strike is otherwise pleasing. Type Two gold dollars are elusive well-struck and in high demand among type collectors. NGC ID# 25C4, PCGS# 7532

- 3915 1855-O AU55 PCGS. Variety 2.** From a mintage of 55,000 pieces, the 1855-O gold dollar is a scarce issue in high grade. This attractive Choice AU specimen shows just a touch of wear on the design elements and the upper left wreath and date exhibit some loss of detail due to lapping. The lightly abraded orange-gold surfaces retain significant amounts of original mint luster. NGC ID# 25C7, PCGS# 7535

- 3916 1855-O AU55 NGC. Variety 2.** As the final gold dollar struck at the New Orleans Mint and a representative of the short-lived Type Two design, the 1855-O is highly sought by collectors. This example was struck from lapped dies, with the upper left wreath incomplete, and (as always) the 8 in the date far weaker than the other numerals. Attractive orange-gold surfaces show a number of light, criss crossing abrasions throughout the fields, but the strike is strong for a Type Two with LIBERTY fully readable. Nice luster remains throughout this Choice About Uncirculated example. *From The Pelican Collection, Part II.* NGC ID# 25C7, PCGS# 7535

**1855-O Gold Dollar, Smooth AU58  
Singular Type Two O-Mint Issue**

- 3917 1855-O AU58 PCGS. Variety 1.** The reverse is unclapped on this variety. The 1855-O is the sole Type Two gold dollar from the New Orleans Mint. Although a moderately substantial coinage of 55,000 pieces was accomplished, this issue circulated extensively and is of limited availability today in high grades. Offered here is a near-Mint coin with soft, satiny yellow-gold surfaces. There is one small tick on Liberty's neck that serves as a pedigree identifier, but no other distractions are observed. A touch of the usual strike softness is evident on the highest points of Liberty's hair curls, and the 8 in the date is not as sharp as the other numerals. NGC ID# 25C7, PCGS# 7535

**1855-O Gold Dollar, AU58+  
Essential Type Two Issue**

- 3918 1855-O AU58+ NGC. Variety 2.** The 1855-O is the final gold dollar struck at the New Orleans Mint and the sole O-mint representative of the Type Two design — both intangibles for some collectors, but important to others. This is a borderline Mint State example, Plus-graded by NGC, with softly lustrous greenish-gold surfaces and a sharp strike for the variety. The bow knot shows good definition, but the top of the wreath is weak from die lapping. The surfaces are fine-grained and frosted. Census: 2 in 58+, 67 finer (9/19). NGC ID# 25C7, PCGS# 7535

**1856-S/S Gold Dollar, AU58  
Sole Type Two From This Final Year**

- 3919 1856-S/S FS-501 AU58 PCGS.** This is the final issue in the short-lived Type Two series and the only Type Two struck in 1856 — a combination that makes the 1856-S a popular choice for collectors. About half of the known pieces exhibit a dramatically repunched mintmark, as seen here. The fields on each side are bright and semireflective, with significant traces of luster around the devices. The coin is sharply detailed throughout with only slight abrasions evident. Population: 34 in 58, 25 finer (9/19). NGC ID# 25C8, PCGS# 145703 Base PCGS# 7536

- 3920 1857-C XF45 NGC. Variety 1.** This is a collectible Choice XF example of the 1857-C Gold dollar, which claims a production of 13,280 pieces. The highest points of the headdress, curls, and wreath show minor rub and softness, but overall detail is good. Orange-gold color is attractive. NGC ID# 25CE, PCGS# 7545

- 3921 1862 Doubled Die Obverse, FS-101, MS63 PCGS.** Die doubling is bold at the top of Liberty's cotton bolls and OF. There is also a wide spread on the C in AMERICA. These 1862 FS-101 gold dollars appear to come up for sale infrequently. Collectors ought to take advantage of this well-struck, softly frosted representative. PCGS# 145704 Base PCGS# 7560

**1881 Gold Dollar, MS67+  
Beautiful, Lustrous Surfaces**

- 3922** 1881 MS67+ PCGS. CAC. In the 1881 gold dollar, collectors can obtain a low-mintage type coin that is readily available in high grades. This Superb Gem appears even higher than the grade suggests. Frosty, fully detailed surfaces with peach-gold color lack any reportable imperfections. One of 7,620 pieces struck. CAC: 36 in 67, 25 finer (9/19). NGC ID# 25DK, PCGS# 7582

**CLASSIC QUARTER EAGLES**

**1834 Large Head Two and a Half, MS61+  
Eye-Appealing Olive-Gold Surfaces**

- 3923** 1834 MS61+ NGC. Large Head, Breen-6140, Variety-2, R.3. The prominent hair curls atop Liberty's head and the widely spaced AM on the No Motto reverse help attribute this Classic Head quarter eagle variety. A few light field marks and two or three negligible ticks on Liberty's cheek join minor die crumble on Liberty's coronet, although this coin richly deserves the NGC Plus designation at the MS61 level, which is rarely given. Pleasing pale olive-gold surfaces display deeper accents around the raised elements and retain plenty of the essential eye appeal for a Mint State coin. NGC ID# 25FS, PCGS# 7692

**1834 Classic Head Quarter Eagle, MS62  
No Motto, Semireflective Surfaces**

- 3924** 1834 MS62 NGC. Breen-6138, Variety 1, R.1 This first-year No Motto quarter eagle variety is attributed by the flat leftmost curls and tight back curls arranged in a vertical row. Yellow-gold surfaces are bright with a trace of field reflectivity. Marks are peppered over each side, as expected for this grade level. There is minor softness on the middle curls, but the rest of this Classic Head type coin is bold. Census: 64 in 62 (5 in 62+), 98 finer (9/19). NGC ID# 25FS, PCGS# 7692

**1836 Classic Head Quarter Eagle  
Block 8, MS62**

- 3925** 1836 Block 8 MS62 PCGS. Breen-6142, Variety 8, R.3. Large Head of 1834. The forward most hair curls on the top of Liberty's head are fully divided on this variety. The 1836 quarter eagle is a plentiful issue overall but scarce in Mint State. This piece displays subtle field reflectivity and sharp central devices and border stars. Light, scattered handling marks limit the grade. Population: 20 in 62, 25 finer (9/19). NGC ID# 25FU, PCGS# 97694

**1839-C Two and a Half, AU Details  
Classic Head Charlotte Type Coin**

- 3926** 1839-C — Cleaned — NGC Details. AU. Breen-6150, Winter-2, Variety 22, R.4. The 3 in the date is repunched, and both sides have die cracks on this variety. NGC withholds a numeric grade on account of light cleaning, although this AU-level Classic Head Charlotte type coin nonetheless displays pleasing olive-gold patina. Wear is light and the only mentionable abrasion is a small dig in the reverse field near the E in STATES.  
*From The Pelican Collection, Part II.* NGC ID# 25G4, PCGS# 7699

**1839-O Two and a Half, AU53  
Inaugural New Orleans Issue**

- 3927** 1839-O AU53 NGC. Breen-6152, Variety 27, R.3. A die crack in the lower left reverse margin forms a large retained cud in this die state. The coin is lightly worn but sharply detailed with smooth, olive-gold surfaces. This is the first quarter eagle production from the New Orleans Mint, which became operation in 1838. It is also the sole O-mint Classic Head quarter eagle. Type collectors and Southern gold specialists alike consider this piece to be singularly important in the New Orleans quarter eagle series.  
*From The Pelican Collection, Part II.* NGC ID# 25G7, PCGS# 7701

## LIBERTY QUARTER EAGLES

### 1840-C Two and a Half, AU53 First Year of Gobrecht's Liberty Head

**3928 1840-C AU53 NGC. Variety 1.** Ex: Manhattan Collection. In 1840, the Philadelphia Mint and all three of its Southern branches switched from William Kneass's Classic Head quarter eagle design to the Liberty Head type designed by Christian Gobrecht. The Charlotte Mint struck only 12,822 pieces that year, and AU-level survivors are scarce. This piece displays original olive-gold coloration and well-detailed design elements. Eye appeal is pleasing for the grade. NGC ID# 25GB, PCGS# 7718

**3929 1841-D — Altered Surfaces — PCGS Genuine. XF Details. Variety 2-C.** From a small mintage of 4,164 pieces, the 1841-D Liberty quarter eagle is an elusive issue in all grades and conditions. This lightly worn specimen exhibits lightly abraded orange-gold surfaces with an unnatural sheen and some slight granularity in the fields.

**3930 1842-D — Altered Surfaces — PCGS Genuine. XF Details. Variety 3-F.** Some light wear shows on the well-detailed design elements of this low-mintage branch mint issue and some recutting is evident on the date. The greenish-gold surfaces are lightly abraded and slightly granular, with an unnatural sheen, perhaps from a cleaning long ago. Only 4,643 examples were struck.

**3931 1844-C — Cleaned — PCGS Genuine. XF Details. Variety 1.** From a mintage of 11,622 pieces, the 1844-C Liberty quarter eagle is a scarce issue in all grades. The slightly granular, lightly marked yellow-gold surfaces of this specimen show light wear on the design elements and an unnatural sheen from the noted cleaning.

**3932 1844-D — Altered Surfaces — PCGS Genuine. AU Details. Variety 5-I.** The mintmark is centered over the fraction bar on this variety, the usual die marriage for the 1844-D quarter eagle (17,332 pieces minted). Only a handful exist in Mint State. This coin features lightly worn, razor-sharp devices and yellow-gold color. The obverse cleaning fails to seriously distract. Lightly clashed.

**3933 1845 MS61 NGC.** The 91,051-piece mintage was large for the mid-1840s, making the 1845 among the most-available quarter eagles of the decade. It is scarce (but not rare) in Mint State, although each notch above the MS60 level adds to the challenge of finding a suitable example. This greenish-gold coin is sharp for the issue and type. Semireflective fields surround crisp devices. A small dig on the cheek and a tiny nick below star 1 are the sole individual marks to mention. Census: 29 in 61, 36 finer (8/19). NGC ID# 25GW, PCGS# 7737

### 1845-D Quarter Eagle, AU58 Minimally Marked, Much Luster

**3934 1845-D AU58 NGC. Variety 6-J.** Like other Dahlonega two and a half issues, the 1845-D is a challenging low mintage issue. From the production of 19,460 pieces, there are perhaps 400 survivors, mostly in VF to AU grades. This lemon-gold Borderline Uncirculated representative displays luster across the legends and devices. The surfaces are minimally marked, and show minor inexactness of impression on the eagle's neck and legs. Census: 40 in 58 (1 in 58+), 9 finer (9/19). NGC ID# 25GX, PCGS# 7738

### 1846-O Quarter Eagle, AU58 Early New Orleans Gold Piece

**3935 1846-O AU58 NGC. Variety 3.** The mintmark is separated from the claw and fraction bar on this scarce variety. Yellow-gold color dominates the bright surfaces of this near-Mint quarter eagle (mintage of 62,000 coins for the year). The stars and legends are bold, though the central motifs are much softer — typical of the New Orleans branch mint. NGC reports 29 finer submissions (9/19). NGC ID# 25H4, PCGS# 7743

**3936 1848-D — Cleaned — PCGS Genuine. AU Details. Variety 10-N.** The usual reverse with the D mintmark further from the fraction bar and closer to the stem than on the rarer Variety 10-O. Seldom does an issue with a mintage of 13,771 coins and a survivorship of around 325 pieces have a reputation for being “available,” but such is the case for the 1848-D. In reality, examples only appear at auction a few times a year, usually in XF and AU grades. Mint State representatives prove much scarcer. Although this coin has been cleaned, its bright yellow-gold surfaces display impressively sharp detail. Lightly abraded with a mark over the ear.

**3937 1849 MS61 NGC.** From a mintage of 23,294 pieces, the 1849 Liberty quarter eagle is seldom encountered in Mint State grades. This attractive MS61 specimen is well-detailed, with a touch of softness on the eagle's legs, and the orange-gold surfaces are lightly marked for the grade. Vibrant mint luster adds to the considerable eye appeal. Census: 11 in 61, 8 finer (9/19). NGC ID# 25HD, PCGS# 7752

**1849-D Quarter Eagle, AU53  
Strong Definition**

**3938 1849-D AU53 PCGS. Variety 11-N.** The usual obverse for this Dahlonega issue shows the 1 positioned high and right compared to that of Variety 12-N, where the left foot of the 1 touches the denticles. Only 10,945 1849-D quarter eagles were struck, and few survive in AU condition or higher. This orange-gold representative displays impressively strong definition with overt softness confined to the upper reverse rim. Lightly abraded fields maintain a hint of semiprooflikeness. NGC ID# 25HF, PCGS# 7754

**3939 1853-D — Altered Surfaces — PCGS Genuine. XF Details. Variety 17-N.** The bright greenish-gold surfaces of this low-mintage branch mint issue show some slight granularity and the lightly worn design elements were softly struck on the reverse. From a mintage of 3,178 pieces, the 1853-D is prized by collectors in all grades and conditions.

**1854-C Quarter Eagle, AU50  
Probably Fewer Than 150 Coins Survive**

**3940 1854-C AU50 NGC. Variety 1.** Probably fewer than 150 examples of the 1854-C quarter eagle survive from a mintage of 7,295 coins, and all of them are subject to widespread collector demand. This problem-free AU50 example has complete star radials and bold legends on the reverse, though the middle curls and eagle's feathers are typically struck. Bright yellow-gold surfaces are lightly abraded. NGC ID# 7J2P, PCGS# 7770

**1854-O Quarter Eagle, MS62  
Razor-Sharp New Orleans Coin**

**3941 1854-O MS62 NGC. Variety 2.** The foot of the 1 in the date is slightly above the denticles, and the O mintmark is centered over the space between the 1 in the denomination and the fraction bar. This is a razor-sharp New Orleans quarter eagle from a substantial mintage of 153,000 coins. Only the date is incomplete. Each side features golden-yellow color and bright mint luster around the devices. Struck from a late state of the dies with numerous spindly cracks on each side. Census: 12 in 62, 3 finer (9/19). NGC ID# 25J2, PCGS# 7772

**1858-C Quarter Eagle, AU58  
Strong Strike for the Facility**

**3942 1858-C AU58 NGC. Variety 1.** Although the bright surfaces of this yellow-gold 1858-C quarter eagle show scattered hairlines, a trace of reflectivity remains in the fields — a reflection of the issue's low mintage of 9,056 pieces. Obverse strike definition is excellent. The only trace of softness on either side occurs on the eagle's left (facing) leg. Census: 35 in 58, 36 finer (9/19). NGC ID# 25JH, PCGS# 7787

**3943 1861 Old Reverse, Type One, AU58 NGC.** The Type One, Old Reverse is characterized by large arrowheads and letters. This variety is substantially scarcer for the year 1861 than its New Reverse, Type Two counterpart. Well-detailed devices are just a touch soft at the centers of this near-Mint example. Faint die polish lines appear in the fields. NGC ID# 25JX, PCGS# 97794

**3944 1873-S MS61 PCGS.** From a mintage of 27,000 pieces, the 1873-S Liberty quarter eagle is elusive in all Mint State grades. This attractive MS61 example is lightly marked for the grade, with well-detailed design elements that show a touch of softness on the eagle's left (facing) leg. Population: 6 in 61, 17 finer (9/19). NGC ID# 25KP, PCGS# 7820

**3945 1876-S AU58 PCGS.** The Centennial year mintage was the second-lowest of the entire Liberty Head quarter eagle series for the San Francisco Mint. Just 5,000 pieces were struck. Scarce in any grade, the 1876-S is especially challenging in near-Mint and full Mint State conditions. This is an attractive and scarce AU58 example, still lustrous and attractive despite brief circulation. A few tiny marks exist on the well-struck, orange-gold surfaces. A bar-shaped anomaly on Liberty's jawline is a Mint-made die defect seen on all 1876 and 1876-S quarter eagles. Population: 19 in 58, 24 finer (8/19). NGC ID# 7JS6, PCGS# 7825

- 3946 1877-S MS63 PCGS.** This Select Uncirculated S-mint example displays a sharp strike and vibrant mint luster. Obverse marks are limited to a few pinpoint carbons and some tiny ticks on the chin. The reverse shows scattered orange accents and tiny alloy flecks, plus light field chatter above the eagle's head. A moderate mintage of 35,400 pieces was mostly ignored by collectors; as a result, the 1877-S is scarce-to-rare in mid-to-upper Uncirculated conditions. Population: 22 in 63, 14 finer (8/19). NGC ID# 25KX, PCGS# 7827

---

**1896 Two and a Half, MS66  
Conditionally Challenging Type Coin**

- 3947 1896 MS66 PCGS.** A conditionally scarce Premium Gem example of this 19th century type coin, showing frosted yellow-gold luster and a bold strike. There is one light graze in the field near Liberty's nose, but that is the only imperfection that keeps this coin from a Superb Gem designation. Higher-grade examples of the 1896 quarter eagle are rare. Population: 37 in 66 (3 in 66+), 13 finer (9/19). NGC ID# 25LL, PCGS# 7848

---

**1902 Quarter Eagle, MS67  
Fully Struck and Pristine**

- 3948 1902 MS67 PCGS.** This amazing Superb Gem Liberty quarter eagle features a full strike, pristine surfaces, and softly frosted luster. Faint lemon-yellow accents appear on the reverse, but overall color is a slightly lighter shade of peach-gold. A phenomenal example of the type. Population: 56 in 67 (5 in 67+), 2 finer (9/19). Ex: FUN Signature (Heritage, 1/2016), lot 6382. NGC ID# 25LT, PCGS# 7854

- 3949 1904 MS62 Prooflike PCGS.** The vivid yellow-gold surfaces of this attractive MS62 specimen are lightly marked for the grade, with deeply reflective prooflike fields on both sides. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 25LV, PCGS# 77856

- 3950 1907 MS66+ PCGS.** The 1907 Liberty quarter eagle is an available issue in high grade and a favorite choice of type collectors. The design elements of this Plus-graded Premium Gem exhibit razor-sharp definition throughout and the virtually pristine peach-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 2688, PCGS# 7859

- 3951 1907 MS67 NGC.** The virtually pristine peach-gold surfaces of this spectacular Superb Gem radiate vibrant mint luster and the design elements are sharply detailed throughout. Housed in new NGC holder commemorating the *Guide Book* and signed by Ken Bressett. NGC has graded seven numerically finer examples (9/19). NGC ID# 2688, PCGS# 7859

## INDIAN QUARTER EAGLES

- 3952 1908 MS65 NGC.** A delightful Gem representative from the first year of the design, this coin exhibits well-detailed design elements, with just a trace of softness on the eagle's shoulder. The well-preserved orange-gold surfaces are lustrous and appealing. NGC ID# 288Y, PCGS# 7939

- 3953 1908 MS65 PCGS.** The Mint produced 564,821 first-year Pratt quarter eagles. Few are available in finer condition, although Gems remain collectible. Smooth orange-gold surfaces display razor-sharp definition, the only exception being the eagle's shoulder tip. A curving lint mark appears on the headdress. NGC ID# 288Y, PCGS# 7939

---

**1908 Two and a Half, MS65  
First Year Type Coin**

- 3954 1908 MS65 PCGS. CAC.** Bela Lyon Pratt's recessed relief design was an innovation for the U.S. Mint. Noted dealer Samuel H. Chapman complained that the recesses would accumulate germs, but that criticism was unfounded. Today, Indian quarter eagle Gems are desired for their scarcity and aesthetic beauty. This lustrous peach-gold example has a good strike and only infrequent signs of minor contact. NGC ID# 288Y, PCGS# 7939

---

**1909 Indian Quarter Eagle, MS65  
Marvelous Quality**

- 3955 1909 MS65 PCGS.** The borders possess beautiful orange-gold color, while the interiors transition to lustrous, medium yellow-gold hues with olive-green accents. Although the 1909 often displays many marks, this exceptional Gem has avoided abrasions altogether, and the sharply struck devices offer unhindered eye appeal. Housed in an early generation blue label PCGS holder, with barcode on the back. NGC ID# 288Z, PCGS# 7940

**1910 Indian Quarter Eagle, MS65**  
**Much Better Date in High Grade**

- 3956 1910 MS65 NGC.** Considerably rarer than either the 1908 or 1909 in full Gem Uncirculated condition, the 1910 seldom comes with mark-free surfaces and good luster. This orange-gold example is an exception, with lively frosted luster and unabraded fields. The strike is uniformly sharp, as usually seen on the 1910. Few Gem coins can match this one for color, surface quality, and outstanding eye appeal. NGC ID# 2892, PCGS# 7941

**1911-D Two and a Half, AU55**  
**Collectible Denver Key-Date Coin**

- 3957 1911-D AU55 PCGS.** Strong D. A bright, satiny example of the Indian quarter eagle key, showing yellow-gold surfaces with light high-point wear. The mintmark is worn but clear, and most of the eagle's wing feathers remain sharp. Luster glistens in the recessed portions of the design. The 1911-D is the sole key date in the Indian quarter eagle series in all grades, and it is also the scarcest date in Gem condition. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, Lustrous AU58**

- 3958 1911-D AU58 NGC.** Lustrous lemon-yellow coloration and nearly complete, full mint luster are hallmarks of this key date example. A small tick is noted on the Indian's cheek, along with a hint of rub. The strike is boldly impressed, including a clear mintmark. A popular, low-mintage issue, the 1911-D is always in demand. *From The JTR Collection / Fort Worth Signature (Heritage, 3/2010), lot 2174.* NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, AU58**  
**Sharp Mintmark**

- 3959 1911-D AU58 NGC.** Strong D. A satiny, near-Mint example of this key Denver issue, showing the diagnostic wire rim along the right obverse border. Luster in the recesses is satiny, and light friction appears on the elevated fields. Both sides have deep honey-gold patina. An attractive example for the grade, surpassing the eye appeal of many comparably graded coins. NGC ID# 7KR7, PCGS# 7943

**1913 Quarter Eagle, MS65**  
**Rarely Seen Finer**

- 3960 1913 MS65 PCGS.** While Gem Uncirculated 1913 quarter eagles are clearly scarce, they undeniably rare any finer. This splendid Gem displays smooth and radiant orange-gold color with yellow-gold highlights and lilac overtones. The strike is sharp and eye appeal is spectacular. PCGS and NGC combined report fewer than three dozen finer examples (9/19). NGC ID# 7KR9, PCGS# 7945

**1914 Quarter Eagle, MS64**  
**Popular Semikey Issue**

- 3961 1914 MS64 NGC.** Peach-gold toning adorns this lustrous near-Gem. The strike is fairly sharp, despite a hint of incompleteness on the Indian's headdress and the eagle's shoulder. A tick on the cheekbone is the sole reportable abrasion. The 1914 has the second lowest mintage of the Indian quarter eagle series, and is rarely encountered any finer than the present piece. NGC ID# 7KRA, PCGS# 7946

- 3962 1914-D MS64+ NGC.** The 1914-D Indian quarter eagle claims a mintage of 448,000 pieces, but the issue is elusive in grades above MS64. This Plus-graded Choice example is sharply detailed throughout, with well-preserved orange-gold surfaces that show only minor signs of contact. NGC has graded 49 numerically finer examples (9/19). NGC ID# 2899, PCGS# 7947

**3963 1914-D MS64 NGC. CAC.** Shimmering satin mint luster shines from the high-end peach-gold surfaces. Evidence of die fatigue occurs around the borders and the central obverse is slightly soft, but the eagle's shoulder is bold. Minimal grazes and lovely eye appeal. Scarce any finer. NGC ID# 2899, PCGS# 7947

**3964 1926 MS65+ NGC.** The 1926 Indian quarter eagle is not difficult to locate in MS65 condition, but finer specimens are elusive. This Plus-graded Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster throughout. NGC has graded 25 numerically finer examples (9/19). NGC ID# 7KRE, PCGS# 7950

**1929 Quarter Eagle, MS65  
Final Indian Head Issue  
Spectacular Color**

**3965 1929 MS65 NGC.** This is the rarest quarter eagle of the 1920s in Gem Uncirculated condition or finer, although other dates have lower mintages. This Gem example displays vibrant, orange-gold color and highly lustrous, smoothly frosted surfaces. The strike is needle-sharp. A few tiny abrasions exist in the reverse fields, but they are minor and easily outranked by the exceptional eye appeal. Only a few 1929 pieces are certified finer. NGC ID# 289F, PCGS# 7953

## THREE DOLLAR GOLD PIECES

**3966 1854 MS61 PCGS.** Housed in an old green label holder, this conservatively graded 1854 three dollar gold piece displays a sharp strike and colorful, orange-gold patina that radiates mint luster, with lilac and deep-gold accents. Despite a series-high mintage of 138,618 pieces, the 1854 is less available than the 1878 issue, while the eye appeal and surface quality of this coin suggest an even finer grade. NGC ID# 25M3, PCGS# 7969

**3967 1856-S AU50 PCGS. CAC.** This is an example of the scarce Small S variety (Breen-6356). Although this early S-mint three dollar shows moderate signs of handling, the surfaces retain partial luster within the hidden areas. High-point friction is trivial, and the color is a warm shades of golden-orange with peach accents. NGC ID# 25M9, PCGS# 7975

**3968 1857-S — Surfaces Smoothed — PCGS Genuine. AU Details.** Just a trace of actual wear shows on the well-detailed design elements of this impressive specimen, and almost all interior design detail remains intact. The bright orange-gold surfaces are lightly abraded, but some smoothing is evident in the fields.

**3969 1878 MS62 NGC. Variety 1.** Although readily available compared to other three dollar gold dates, the 1878 maintains its strong demand as a preferred choice for three dollar type. Its mintage of 82,304 pieces was diminished somewhat by undistributed coins, which were melted. This attractive, orange-gold example is lustrous with only a few tiny marks. Liberty's portrait shows just only light abrasions, and the strike is bold in all areas except Liberty's high-point curls and the wreath's bowknot.  
*From The Pelican Collection, Part II.* NGC ID# 25MZ, PCGS# 8000

**3970 1878 MS62 PCGS. Variety 1.** Rich peach-gold toning dominates this lustrous three dollar type coin, though glimpses of lilac and sea-green are also evident. Minor field marks are fewer than customary for the MS62 level. Two circulation strike varieties are known for the 1878 issue. This variety is lightly die doubled on the upper right portion of the wreath, and doubling can also be detected on the ARS in DOLLARS.

*Ex: ANA Signature (Heritage, 8/2012), lot 5804, which brought \$2,585. NGC ID# 25MZ, PCGS# 8000*

**1878 Three Dollar Gold, MS63  
Rich Orange-Gold Color**

**3971 1878 MS63 PCGS.** A pleasing Select example of this popular type coin issue, showing shimmers of orange-gold mint luster and surprisingly few noticeable abrasions. The wreath bowknot — a systemic trouble spot for the strike on three dollar gold pieces, being directly opposite the high point of the obverse headdress — is weak on this coin, but the eye appeal is otherwise so exceptional that this typical softness is hardly noticed. NGC ID# 25MZ, PCGS# 8000

**1879 Three Dollar Gold, MS63  
Attractive Original Luster**

**3972 1879 MS63 PCGS.** Beautiful orange-gold mint luster shimmers in the fields and on the devices of this Select 1879 three dollar gold piece. The strike is sharp, even on the wreath bowknot, which is typically weak. No significant abrasions are apparent. Only 3,000 examples of this issue were struck, and although it is readily collectible due to a number of coins being set aside in the 19th century, the low mintage continues to attract collector demand. NGC ID# 25N2, PCGS# 8001

**3973 1888 — Altered Surfaces — PCGS Genuine. AU Details.** Only 5,000 three dollar gold pieces were struck in 1888 and the denomination was retired after the following year. This impressive specimen shows just the slightest trace of wear on the strongly impressed design elements and the greenish gold surfaces are lightly marked, despite the noted alteration.

## EARLY HALF EAGLES

1798 Half Eagle, XF Sharpness  
BD-2, Heraldic Eagle, Large 8  
Late Die State

- 3974** 1798 Large Eagle, Large 8, 13 Stars Reverse, BD-2, R.5 — Surfaces Smoothed — PCGS Genuine. XF Details. Bass-Dannreuther Die State d/b. Bright-yellow surfaces show myriad tiny marks and slightly granular texture. Numerous die cracks exist on both sides, confirming the late die state. Overall surface smoothing indicates the coin was whizzed, as noted on the holder, yet the bright fields retain some mint luster sharpness of the central devices remains. A popular variety, utilizing the same obverse die as the extremely rare 1798 Small Eagle BD-1 variety.

1802/1 BD-8 Half Eagle, AU Details  
Attractive Problem-Free Reverse

- 3975** 1802/1 BD-8, R.4 — Damaged — NGC Details. AU. Bass-Dannreuther Die State c/b. Clashed around the date and cracked through UNI. With about 150 to 200 examples extant, this 1802/1 half eagle variety is popular for type representation. The coin saw minimal circulation, but the obverse shows signs of having been polished. A scratch occurs in the right field, and there is a small rim ring above star 8. The orange-gold reverse appears problem-free and partly lustrous. Detail on that side is razor-sharp. NGC ID# 25NX, PCGS# 519889 Base PCGS# 8083

1804 Half Eagle, AU Sharpness  
Small Over Large 8, BD-7

- 3976** 1804 Small Over Large 8, BD-7, R.4 — Repaired, Whizzed — NGC Details. AU. Bass-Dannreuther Die State c/c. This sharply detailed early half eagle is microgranular from whizzing, and shows smoothing in the field near the date and bust tip. Nonetheless, a bold example of an infrequently encountered variety. The Small Over Large 8 obverse die was paired with three different reverses. BD-7 was the final die marriage of the date.  
Ex: ANA Signature (Heritage, 8/2015), lot 6149.

## CLASSIC HALF EAGLE

- 3977** 1838 AU53 NGC. Breen-6515, McCloskey 2-B, R.1. A lightly worn example of McCloskey 2-B, with Small Arrows and a Large 5 in the denomination. This attractive AU53 specimen exhibits lightly abraded orange-gold surfaces that retain a few traces of original mint luster. NGC ID# 25S4, PCGS# 8176

## LIBERTY HALF EAGLES

1839 Liberty Five Dollar, AU58  
First Year of Issue

- 3978** 1839 AU58 PCGS. Bright yellow-gold surfaces display nearly full luster and are devoid of significant abrasions. The design features are well-struck, save for some of the centers in the stars along the left border. An important near-Mint example of the first Liberty half eagle issue. Population: 19 in 58, 24 finer (9/19).  
Ex: Long Beach Signature (Heritage, 2/2007), lot 4524. NGC ID# 25S7, PCGS# 8191

1840-O Liberty Half Eagle, AU58  
Narrow Mill, Rotated Reverse

- 3979** 1840-O Narrow Mill AU58 NGC. Variety 2. Known in both a Narrow Mill diameter (21 mm) and a rare Broad Mill diameter (22.5 mm), the 1840-O is seldom offered in full Mint State, making this near-Mint Narrow Mill coin attractive to collectors on either side of the Uncirculated line. Attractive yellow-gold surfaces show a series of four pinpoint marks between stars 5 and 6, and a tiny nick on the jawline. Mint luster remains at the margins, and the reverse is rotated 50° counterclockwise. Census: 29 in 58, 19 finer (9/19). NGC ID# 25SK, PCGS# 8200

**1841-D Small D Half Eagle, AU55  
Sharp for the Grade**

- 3980 1841-D Small D AU55 NGC. Variety 5-D.** The Small D variety is the most frequently encountered. Nonetheless, the 1841-D half eagle as a whole is scarce in the upper AU grades and rare in Mint State. Doug Winter estimates that fewer than 275 pieces survive in all grades. This Choice AU example displays sharp detail, the only sign of wear really being a slight subduing of the luster on each side. A hint of reflectivity remains in the fields, and both sides are smooth with rich lemon-gold patina. NGC ID# 25SR, PCGS# 8204

**1844-D Half Eagle, AU50  
Attractive D-Mint Surfaces**

- 3981 1844-D AU50 PCGS. CAC. Variety 12-G.** The 1844-D usually shows repunching at the peak of 1 in the date, while the second 4 in the date is close to the bust truncation, although this scarce variety shows no recutting at 1 and the second 4 is well-centered between the bust and dentils. Pleasing orange-gold color blends with rich, tan-gold shades at the margins. Sharply struck with only light high-point wear, this About Uncirculated example earns CAC endorsement. The 1844-D is available in lesser grades, but elusive any finer. Population: 30 in 50 (1 in 50+), 83 finer. CAC: 4 in 50, 14 finer (9/19). NGC ID# 25T9, PCGS# 8221

**1844-D Five Dollar, AU58  
Sharp, Partly Lustrous Surfaces**

- 3982 1844-D AU58 NGC. Variety 12-G.** A rare die variety of this otherwise available (moderately) Dahlonga five, showing the usual Small Mintmark reverse paired with an obverse die that shows a perfect 1 in the date (not repunched on the flag). The present example is satiny and partially lustrous with lemon-yellow color. Neither side is severely abraded, and the strike is sharp. Barely any friction is evident on this piece, as it must have just missed a low-end Mint State designation. Census: 37 in 58 (1 in 58★), 18 finer (9/19). NGC ID# 25T9, PCGS# 8221

**1846-D/D Five Dollar, XF45  
Widely Repunched Mintmark, CAC**

- 3983 1846-D/D XF45 PCGS. CAC. Variety 16-J.** Dramatic repunching of the mintmark makes this *Guide Book* variety popular with collectors, who view it as a necessity alongside the normal mintmark 1846-D half eagles. The spectacular overmintmark appears on two variants — one with the date low, the other with the date slightly higher. This is the Low Date variety. Numerous small marks dot the surfaces of this attractive, copper-orange example, with faint luster at the margins. The strike is sharp, with the eagle's legs well-defined. CAC endorsement confirms this Choice XF coin is well above average for its grade. Population: 18 in 45, 78 finer. CAC: 1 in 45, 8 finer (9/19). NGC ID# 25TH, PCGS# 8229

- 3984 1847-C — Cleaned — PCGS Genuine. AU Details. Variety 1.** The 1847-C is among the more plentiful Charlotte half eagles, ideal for collectors seeking a single type coin from this mint. Doug Winter estimates that as many as 400 pieces may be extant. This AU-level coin will appeal to the budget-conscious collector. Detail is bold, and each side retains some satiny luster in the margins. The surfaces are unnaturally bright from being cleaned and scattered abrasions are present.

- 3985 1847-C — Cleaned — NGC Details. AU.** The highest Charlotte mintage of any half eagle (84,151 pieces) makes the 1847-C a logical selection for branch mint gold type. Pleasing orange-gold surfaces of this example are a bit glossy from a past cleaning, but the strike is sharp and considerable eye appeal remains. Scattered small marks do not detract from the overall appeal.  
*From The Pelican Collection, Part II.*

**1849-C Liberty Half Eagle, AU55  
Popular C-Mint Type Coin**

- 3986 1849-C AU55 PCGS. Variety 2.** The 1849-C Liberty Half Eagle claims a more-than-adequate mintage of 64,823 pieces, making it a relatively available issue and a popular choice of branch mint type collectors. This impressive Choice AU specimen exhibits well-detailed design elements, with just a touch of wear, and the coarse vertical die lines behind Liberty's neck that identify the scarce Variety 2. The still-lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. Population: 29 in 55 (1 in 55+), 23 finer (9/19). NGC ID# C5XD, PCGS# 8241

**1849-D Five Dollar, XF45**  
**Original Orange-Gold Coloration, CAC**

- 3987 1849-D XF45 PCGS. CAC.** Outstanding eye appeal and CAC endorsement make this Choice XF 1849-D an ideal collector coin for series specialists, and an excellent candidate for Dahlongega type. Deep orange-gold color speaks to its original surfaces, while the strike is sharp throughout both sides. A loupe reveals only isolated small marks on the finely textured, attractive fields and devices. The 1849-D's scarcity with naturally pleasing surfaces is often overlooked. Population: 33 in 45, 76 finer. CAC: 4 in 45, 6 finer (9/19). NGC ID# C5XE, PCGS# 8242

**1849-D Half Eagle, AU53**  
**Gently Circulated Example**

- 3988 1849-D AU53 NGC. Variety 25-S.** Rare in high About Uncirculated conditions and scarce any finer than XF, the 1849-D is seldom seen with semireflective, minimally abraded surfaces such as this coin displays. Medium green-gold color retains brassy luster that shines around the well-struck devices. Minimal wear exists on the well-detailed hair strands and the eagle's plumage. Census: 15 in 53, 60 finer (8/19).  
*From The Pelican Collection, Part II.* NGC ID# C5XE, PCGS# 8242

**1849-D Liberty Head Five, AU55**  
**Attractive, A Better Date in the D-Mint Set**

- 3989 1849-D AU55 NGC. Variety 25-S.** The 1849-D half eagle is elusive among Dahlongega issues of the 1840s, with fewer than 200 coins believed extant, according to specialist Doug Winter. A majority of the survivorship is in VF and XF grades. This Choice AU coin displays deep honey-gold surfaces with strong yellow-orange undertones. Detail is strong and wear light. Neither side exhibits significant abrasions. Census: 37 in 55, 24 finer (9/19). NGC ID# C5XE, PCGS# 8242

- 3990 1850 AU58 NGC.** Fully Mint State examples of the 1850 half eagle are rare — both PCGS and NGC report single-digit Mint State examples across all Uncirculated grades. This briefly circulated AU58 coin takes on added importance given the scarcity of Mint State coins. Orange-gold accents at the margins frame greenish-gold fields and devices. The date is lightly struck, shallowly entered into the working die. The eagle's head shows brief wear and an incomplete strike. Marks are few and light, and eye appeal is substantial. Census: 31 in 58, 7 finer (8/19). NGC ID# 25TY, PCGS# 8243

**1850-C Half Eagle, AU53**  
**Collectible Charlotte Five**

- 3991 1850-C AU53 NGC. Variety 3.** Some luster remains in the peripheral fields amid the legends, while each side displays pleasing honey-gold and peach-yellow coloration. Wear is light on this piece, a collectible high-end example of this popular Charlotte issue. Scattered abrasions are typical of the issue and grade but are not overly bothersome. Doug Winter estimates that fewer than 350 1850-C half eagles survive in all grades from a mintage in excess of 63,000 coins. Census: 24 in 53, 68 finer (9/19). NGC ID# 25TZ, PCGS# 8244

- 3992 1850-D — Altered Surfaces — PCGS Genuine. AU Details. Variety 1-A.** The 1850-D Liberty half eagle is more elusive than its mintage of 43,934 pieces suggests. This lightly abraded orange-gold specimen exhibits AU sharpness on the design elements, with an extensive network of die cracks through the reverse legend. The surfaces have an unnatural sheen, as noted on the holder.

**1852-C Half Eagle, AU58**  
**Impressively Sharp**

- 3993 1852-C AU58 PCGS. Variety 1.** The date placement and the tip of an errant 1 protruding from the bust confirm the attribution. Half eagle production at the Charlotte Mint reached 72,574 coins in 1852 — a fairly substantial jump over the previous year's output. The 1852-C is generally collectible, although coins at this level are scarce. Strike detail is impressively sharp, save for the eagle's neck feathers. Yellow-gold surfaces show a trace of reflectivity and scattered hairlines. Population: 13 in 58, 30 finer (9/19). NGC ID# 25UB, PCGS# 8251

- 3994 1853-D XF45 NGC. Large D, Variety 35-AA.** The mintmark touches both the feather and branch, identifying Variety 35-AA. This Choice XF example exhibits light wear on the design elements and the orange-gold surfaces are lightly abraded, with a couple of minor rim nicks on the obverse. NGC ID# 25UF, PCGS# 8255

**3995 1855-S AU55 NGC.** The 1855-S five dollar is an issue that has been overlooked and underappreciated for decades. Garrett and Guth point out that Harry Bass had six examples. Undoubtedly, Harry had six pieces because he knew to buy a nice one when he could find one. Typical of the few known survivors, this piece has extensively abraded surfaces. Nevertheless, this bright Choice AU will be challenging to upgrade. Census: 21 in 55, 19 finer (9/19). NGC ID# 25UU, PCGS# 8265

**1856-D Five Dollar, AU55  
Smooth, Lustrous Surfaces**

**3996 1856-D AU55 PCGS. CAC. Variety 39-FF.** Doug Winter considers the 1856-D “one of the scarcest and most undervalued half eagles from this mint.” He estimates a survivorship of only 150-200 coins, or maybe slightly more, in all grades. This Choice AU example displays remarkably smooth, satiny surfaces with substantial luster in the fields. Light wear is seen only on the high points of the eagle and Liberty portrait. Winter writes: “It is extremely difficult to locate an example which is not very heavily abraded.” Population: 12 in 55, 36 finer. CAC: 3 in 55, 2 finer (9/19). NGC ID# 25UX, PCGS# 8268

**1857-C Five Dollar, AU53  
Deep Original Coloration**

**3997 1857-C AU53 PCGS. Variety 1.** Doug Winter considers the 1857-C to be one of the more plentiful Charlotte half eagles, although he still estimates that fewer than 275 pieces are extant in all grades. This AU coin is well-detailed and displays deep original orange-gold and olive patina. Neither side has stand-out abrasions, promoting strong eye appeal for the grade. Population: 18 in 53, 54 finer (8/19). NGC ID# 25V3, PCGS# 8272

**1866 With Motto Five Dollar, AU50  
Important Condition Rarity**

**3998 1866 AU50 PCGS.** The 1866 is important not only as the first year of the With Motto reverse, but it is also a rarity in its own right. Only 6,700 pieces were struck and the usually seen piece is VF-XF. AU examples, such as this one, are decidedly scarce and the handful of Uncirculated coins that have been certified are prohibitively rare. Most AU coins show prooflike fields, and this one has subdued reflectivity from slight handling while in circulation. The strike details are strong throughout and there are small, inoffensive abrasions scattered over each side that are consistent with the grade. Population: 8 in 50, 19 finer (9/19). Ex: *Central States Signature (Heritage, 4-5/2010)*, lot 3637. NGC ID# 25VZ, PCGS# 8311

**1876 Half Eagle, AU Details  
Just 1,432 Pieces Struck**

**3999 1876 — Altered Surfaces — PCGS Genuine. AU Details.** With a mintage of just 1,432 pieces, the 1876 half eagle is always in demand but seldom offered. The PCGS holder notes Altered Surfaces, which appears to include some minor smoothing and cleaning. Pleasing medium-gold color remains. The strike is sharp with only tiny marks on the partially reflective, bright fields and devices. A scarce Centennial issue, of which a few high-grade pieces were saved, but few examples survive overall.

**4000 1878-S MS63 PCGS.** Sharply detailed in most areas, this attractive Select specimen displays the slightest touch of softness on the arrow fletchings. The lightly marked yellow-gold surfaces are awash in vibrant mint luster and eye appeal is outstanding. Population: 13 in 63 (1 in 63+), 4 finer (9/19). NGC ID# 25X6, PCGS# 8347

**1881/0 Five Dollar, MS63+  
FS-301 Overdate, CAC Approval**

- 4001 1881/0 FS-301 MS63+ PCGS. CAC.** A quite prominent overdate, showing remnants of an entire 1880 date beneath all four numerals of the primary 1881 date. The 1/0 feature is especially bold. This high-end Select example boasts CAC endorsement and frosty original luster. Peach-orange interiors cede to greenish-gold borders, and grade-limiting abrasions are trivial. NGC ID# 25XD, PCGS# 145714 Base PCGS# 8355

**1884-S Five Dollar, MS64+  
Frosty Peach-Gold Surfaces**

- 4002 1884-S MS64+ PCGS. CAC.** The San Francisco Mint struck 177,000 half eagles in 1884. Few coins survive this fine. Peach-gold color and thick mint frost cover each side. The reverse is slightly better defined than the obverse. Ticks are trivial for the near-Gem grade. Population: 12 in 64 (2 in 64+), 1 finer. CAC: 8 in 64, 0 finer (9/19). NGC ID# 25XR, PCGS# 8366
- 4003 1886 MS62 Prooflike PCGS.** This attractive MS62 Liberty half eagle exhibits sharply detailed design elements and deeply reflective prooflike fields on both sides. The pleasing yellow-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 25XU, PCGS# 78369
- 4004 1886-S MS65 NGC.** Frosty, crisp mint luster casts this Gem 1886-S half eagle in a bright butter-gold glow, illuminating sharp design elements. Most of each side is pristine, although a small cluster of tiny marks in the lower left obverse field prevents an even finer grade. Census: 55 in 65 (3 in 65+, 1 in 65★), 1 finer (9/19). NGC ID# 25XV, PCGS# 8370
- 4005 1893-O MS62 PCGS. Variety 1.** The 1 in the date is slightly closer to the dentils than the bust, identifying Variety 1. This impressive MS62 specimen exhibits well-detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. Population: 56 in 62, 17 finer (9/19). NGC ID# 25YC, PCGS# 8385
- 4006 1901-S MS65 PCGS.** This orange-gold Gem half eagle enjoys gleaming mint frost and excellent eye appeal. The CAC approval sticker is well-deserved. A sharply struck Liberty five to represent the type, with a few spindly tick cracks on the reverse and minimal ticks. Housed in an old green label holder. NGC ID# 25YX, PCGS# 8404

- 4007 1905 MS65+ PCGS.** Surprisingly scarce in Gem condition or finer, the 1905 half eagle is similar in high-grade rarity to the lower-mintage 1902 and 1903 Philadelphia issues. This Plus-graded Gem displays a thick mantle of mint frost, with on a few tiny pinpricks in the fields and an unabraded portrait of Liberty. The strike is razor-sharp. Population: 5 in 65+, 22 finer (9/19). NGC ID# 25Z6, PCGS# 8411

- 4008 1906-S MS64+ PCGS. CAC.** The low population in near-Gem or finer grades is often overlooked by collectors and gold specialists, even though the scarcity is well-noted in most references. The PCGS Plus designation and CAC endorsement adds to the appeal of this impressive, borderline Gem. Only a few isolated abrasions are visible under a loupe, and the strike is needle-sharp throughout. Pale-olive overtones flicker across frosted, orange-gold surfaces. Population: 5 in 64+, 18 finer. CAC: 11 in 64, 5 finer (9/19). NGC ID# 25ZB, PCGS# 8415

- 4009 1908 MS65+ PCGS.** A Plus-graded Gem from the last year of the design, this coin displays razor-sharp definition on all design elements and the well-preserved peach-gold surfaces radiate vibrant mint luster from both sides. Overall eye appeal is outstanding. NGC ID# 25ZE, PCGS# 8418

## INDIAN HALF EAGLES

- 4010 1908 MS64 PCGS. CAC.** Popular and well-preserved as the first-year Indian five, the 1908 issue attracts type collectors as well as series specialists. This near-Gem example carries CAC endorsement for its vibrant mint luster and minimally abraded surfaces. A sharp strike avoided most of the problems seen on Indian Head first-year issues. Only a few light field marks deter an even finer grade. NGC ID# 28DE, PCGS# 8510

**1908-D Five Dollar, MS64+  
Lustrous and Appealing  
Rarely Encountered in Higher Grades**

- 4011 1908-D MS64+ PCGS.** The Denver issue of 1908 is somewhat scarcer than the Philadelphia coin, being genuinely rare in MS65. This MS64+ coin is nearly that fine, but it will be more accessible for the average collector. Frosty original luster emits peach and rose-gold hues, complementing a lack of major abrasions. The lower headdress feathers exhibit the only mentionable strike softness. PCGS lists 13 finer representatives (8/19). NGC ID# 93KW, PCGS# 8511
- 4012 1908-S AU58 NGC.** The low mintage of just 82,000 pieces draws collectors to the 1908-S, as well as the issue's reputation for a bold strike and high-quality surfaces. This is a briefly circulated example — perhaps a pocket piece of the first-year design — with only a touch of wear and a few light marks. The medium yellow-gold surfaces retain much of the original mint luster. NGC ID# 65K3, PCGS# 8512

1911-D Indian Head Five, AU58  
Attractive Original Patina

**4013 1911-D AU58 NGC.** Collectors assembling the entire Indian half eagle series will appreciate this attractive near-Mint example of the semikey 1911-D. Many high-end AU coins have been dipped or otherwise cleaned/brightened in an attempt to secure a Mint State grade at the services. This piece has thus far been mercifully spared. Olive-gold patina yields evidence of slight friction in the fields, along with handling marks, that prevent an Uncirculated grade opinion from NGC, although the attractiveness for the AU58 level is excellent. NGC ID# 28DR, PCGS# 8521

**4014 1914-D MS63 NGC.** This Denver issue seldom comes with good visual appeal, but the orange-gold color of this Select Uncirculated example pleases the eye. Lilac overtones confirm the natural surfaces. A sharp strike is tempered by a shallow mark within the upper headdress feathers. Bright mint luster shines from the recessed devices.

*From The Pelican Collection, Part II.* NGC ID# 28DV, PCGS# 8528

**4015 1914-S MS61 NGC.** From a mintage of 263,000 pieces, this impressive Mint State example exhibits sharply detailed design elements throughout and the lustrous yellow and orange-gold surfaces are lightly marked for the grade. A few small amber alloy spots are evident below the letters in LIBERTY. NGC ID# 28DW, PCGS# 8529

1914-S Half Eagle, MS62  
Infrequently Offered Finer

**4016 1914-S MS62 NGC.** The 1914-S half eagle's availability declines sharply above the MS62 grade level, such coins being out of reach for the budgets of many collectors. This piece is more accessible. Well-struck devices complement original olive-gold and yellow patina on each side. Scattered abrasions limit the grade but are almost unavoidable on any Mint State example of this issue. NGC ID# 28DW, PCGS# 8529

LIBERTY EAGLES

1838 Liberty Head Ten Dollar, AU Details  
Sought-After First-Year Rarity

**4017 1838 — Scratch — PCGS Genuine. AU Details.** A bright, satiny example of this first-year Liberty Head issue, showing good detail and moderately smooth bronze-gold surfaces. The scratch noted by PCGS is a faint, hair-thin vertical scratch that runs up Liberty's neck, across her cheek, to the eye. It is faint, and from some angles of lighting almost invisible. A pleasing coin despite the Details assessment from PCGS.

1844-O Ten Dollar, AU55  
Khaki and Reddish-Gold Color

**4018 1844-O AU55 NGC. Variety 1.** Attribution markers include the left-leaning mintmark nearly centered over EN and the top of an errant 8 in the dentils below the primary 8. Khaki and reddish-gold surfaces glow softly with partial remaining mint luster. Strike definition is slightly better at the centers than it is around the edges, but detail overall remains good for a relatively early New Orleans gold piece. From a mintage of 188,700 coins. NGC ID# 554G, PCGS# 8591

1846 Ten Dollar, AU53  
Attractive Early Philadelphia Type Coin

**4019 1846 AU53 NGC.** The 1846 eagle is prohibitively rare in Mint State, and AU coins are themselves scarce. This piece displays sharp detail and bright yellow-gold coloration. Hints of prooflike reflectivity remain in the protected portions of the fields, with light rub and handling marks elsewhere that define the grade. Census: 19 in 53, 22 finer (8/19). NGC ID# 262W, PCGS# 8594

**1850 Large Date Liberty Eagle, MS61  
Rarely Offered in Mint State**

- 4020 1850 Large Date MS61 NGC.** The Large Date 1850 eagle is more plentiful than the Small Date variety, although any example of this issue in Mint State is a rarity. Offered here is a lustrous honey-gold example with few noticeable abrasions for the grade. Select stars as well as the eagle's right (facing) talons are weakly struck, and minor incompleteness is seen on the hair curls around Liberty's face. Nonetheless, this is an appealing coin for the grade. Census: 7 in 61, 7 finer (9/19). NGC ID# 2637, PCGS# 8603

**1851 Ten Dollar, MS61  
Lustrous Red-Gold Example**

- 4021 1851 MS61 NGC.** The eagle's feathers display razor-sharp detail on this reddish-gold ten dollar gold piece — one of 176,328 pieces struck in 1851. Definition is slightly softer on the obverse. Lustrous surfaces are lightly abraded with couple of more prominent marks in the upper-left obverse field and above the E in TEN. Census: 12 in 61 (1 in 61+), 4 finer (9/19). NGC ID# 263A, PCGS# 8606

**1853-O Liberty Eagle, AU55  
New Orleans No Motto Type Coin**

- 4022 1853-O AU55 PCGS. Variety 6.** The 1853-O is among the most plentiful No Motto New Orleans tens, ideal for type collectors seeking a single piece from this mint. Offered here is a satiny olive-gold coin with Choice AU surfaces. Hints of luster remain in the peripheral fields, ceding to light wear across the interior plains and the devices. Population: 19 in 55, 27 finer (9/19). NGC ID# 263F, PCGS# 8612

- 4023 1854-S AU53 NGC.** Elements of luster remain in the protected areas of the fields and in the design recesses, emitting a warm yellow-gold glow. The worn areas of the fields have a deeper olive-gold hue. This well-detailed 1854-S eagle is moderately abraded but nonetheless displays good eye appeal.  
*Ex: FUN Signature (Heritage, 1/2010), lot 9301, which realized \$1,265.* NGC ID# 263K, PCGS# 8615

**1854-S Ten Dollar, AU55  
Lustrous, CAC Approved**

- 4024 1854-S AU55 PCGS. CAC.** The 1854-S eagle represents the inaugural coinage of the San Francisco Mint, established during the height of the California Gold Rush. Almost all coins struck this year were released into circulation to serve local commerce. Today, Mint State survivors are rare. This CAC-approved Choice AU example displays remarkably lustrous fields with just the barest trace of friction in the open areas. The surfaces are smooth, emitting pleasant yellow-gold color. NGC ID# 263K, PCGS# 8615

- 4025 1855 AU58+ NGC.** Despite an adequate mintage of 121,701 pieces, the 1855 Liberty eagle is a scarce issue in high grade. This Plus-graded near Mint specimen shows just a trace of wear on the well-detailed design elements and the lightly abraded greenish-gold surfaces retain much original mint luster. NGC has graded 60 numerically finer examples (9/19). NGC ID# 263L, PCGS# 8616

**1855 Ten Dollar, MS61  
Reddish-Gold Surfaces**

- 4026 1855 MS61 NGC.** The italic 5s are always popular with collectors. Each side glistens with vibrant luster around the devices, illuminating reddish-gold surfaces that show relatively minor, undistracting marks for the grade. Slight incompleteness occurs on the lower stars and date, but the overall impression is bold. Census: 32 in 61 (3 in 61+), 7 finer (9/19). NGC ID# 263L, PCGS# 8616

- 4027 1856-S AU55 NGC.** Medium S. This impressive Choice AU specimen displays some light wear on the design elements, but most interior detail remains bold. The vivid yellow and orange-gold surfaces show extensive minor abrasions and chatter in the fields, but retain traces of original mint luster. Census: 63 in 55, 49 finer (9/19). NGC ID# 263S, PCGS# 8621

**1873-S Ten Dollar, AU53**  
Rare Date for All Mints

**4028 1873-S AU53 NGC.** Although only 12,000 tens were struck at San Francisco in 1873, this was actually the highest mintage out of any mint that year for the denomination. Carson City struck barely more than 4,500 coins, and Philadelphia produced just 800 pieces. The 1873-S is rare in AU and nearly uncollectible in Mint State, and yet it is the most available of the three 1873 issues in high grade. PCGS estimates of survivorship of just 80 to 100 coins in all grades, although fewer than 80 Carson City pieces are believed known, and fewer than 35 Philadelphia coins. This AU 1873-S ten displays bright yellow-gold color and satiny surfaces. Detail is sharp. Census: 11 in 53, 16 finer (9/19). NGC ID# 53M7, PCGS# 8668

**4029 1882 MS64 PCGS.** A readily available date in the Indian ten series is a rarity in its own right, considering the number of low-mintage and challenging eagle issues that make up the long series. More than 2.3 million 1882 eagles were struck, and hundreds are graded through the MS63 level. At MS64 and finer grades, the issue becomes scarce. This frosted near-Gem features excellent cartwheel luster over the radiant orange-gold surfaces. Only a few light abrasions limit the grade. Population: 54 in 64 (2 in 64+), 1 finer (9/19). NGC ID# 2662, PCGS# 8695

**4030 1884-S MS61 Prooflike PCGS.** The design elements of this attractive Mint State example are sharply detailed throughout and the fields exhibit much prooflike reflectivity. The pleasing yellow-gold surfaces show the expected number of minor contact marks for the grade. PCGS# 78705

**1888 Liberty Eagle, MS63**  
None Certified Finer at NGC

**4031 1888 MS63 NGC.** From a mintage of 132,996 pieces, this attractive Select specimen is among the finest survivors of the issue. The design elements are sharply detailed throughout and the lustrous orange-gold surfaces show only minor signs of contact. Overall eye appeal is outstanding. Census: 5 in 63, 0 finer (9/19). NGC ID# 266V, PCGS# 8712

**1890-CC Ten Dollar, AU58**  
Just 17,500 Coins Struck

**4032 1890-CC AU58 NGC.** A few light abrasions are scattered here and there, but this sharply struck 1890-CC is far superior to the average About Uncirculated survivor of the 17,500-piece mintage. Frosted rich-gold color retains nearly full luster despite a hint of brief circulation. European imports have increased the number of 1890-CC certifications, but most of those coins show numerous marks from handling. NGC ID# 266S, PCGS# 8718

**4033 1894-O MS62 NGC. Variety 1.** Die lines within LIBERTY, the 1 away from the dentils, and the O mintmark close to the fletching tip confirm the variety for this New Orleans eagle. Luster is vibrant around the borders, and each side exhibits warm yellow-gold color. Well-struck for the facility with peppered minor marks. NGC ID# 2676, PCGS# 8730

**4034 1898-S MS63 PCGS. CAC.** Light field chatter limits the grade for this Select Uncirculated Liberty eagle. Nevertheless, the coin possesses radiant mint frost, and the surfaces are a luminous peach-gold. Crisp stars and feathers. Population: 48 in 63, 11 finer. CAC: 5 in 63, 0 finer (9/19). NGC ID# 267H, PCGS# 8741

**INDIAN EAGLES**

**4035 1907 No Motto MS64 NGC.** An attractive Choice Indian eagle, from the first year of the design, without the motto IN GOD WE TRUST. This coin exhibits well-detailed design elements and lightly marked orange-gold surfaces, with especially vibrant mint luster. *From The Pelican Collection, Part II.* NGC ID# 28GF, PCGS# 8852

**1907 No Motto Indian Eagle, MS64**  
CAC Approved, No Periods Variety

**4036 1907 No Motto MS64 PCGS. CAC.** Beautiful original mint luster engulfs this near-Gem 1907 No Motto Indian eagle, complementing a bold strike and surprisingly clean surfaces. Eye appeal is outstanding. The 1907 No Periods issue is plentiful in Mint State and often chosen for type representation. CAC-approved specimens are elusive. NGC ID# 28GF, PCGS# 8852

**1908 Motto Indian Eagle, MS64+  
Sought-After CAC Endorsement**

- 4037 1908 Motto MS64+ PCGS. CAC.** An exemplary coin for the MS64 grade level, this 1908 With Motto eagle shows lustrous yellow-gold surfaces with only the faintest grazes visible beneath a loupe. The Plus designation is well-earned, and CAC concurs. Every design element is sharp on this attractive first-year With Motto type coin. Finer examples are elusive. CAC: 55 in 64, 31 finer (8/19). NGC ID# 28GJ, PCGS# 8859

**1908 With Motto Indian Eagle, MS64+  
Elusive CAC-Approved Example**

- 4038 1908 Motto MS64+ PCGS. CAC. Ex: The Fairmont Collection.** Finer examples of this first-year With Motto issue are scarce, but this Plus-graded, CAC-approved near-Gem is more accessible and nearly as eye-appealing as many Gems that we have seen. Original peach-gold and orange hues adorn the original mint luster, while the devices exhibit sharp definition. Only a few trivial surface grazes are discernible. CAC: 55 in 64, 31 finer (9/19). NGC ID# 28GJ, PCGS# 8859

**1908-S Ten Dollar, Bright MS61  
Eye-Appealing for the Grade**

- 4039 1908-S MS61 NGC.** For the grade, this low-end Mint State 1908-S Indian eagle is highly appealing. Bright yellow-gold luster is vibrant, and the devices show exceptional sharpness. Only light, scattered abrasions are discernible. The San Francisco Mint only struck 59,850 Indian eagles in 1908, all of the With Motto variety. No S-mint Indian Head tens were struck in 1907. NGC ID# 28GL, PCGS# 8861

- 4040 1909-S MS62 NGC.** In upper Uncirculated grades, the 1909-S is equally as scarce as the more celebrated 1908-S, despite a large discrepancy in their market values. The higher-mintage 1909-S is more available at the MS62 level, yet remains a scarce branch mint issue in all Uncirculated grades. This 1909-S displays rich, orange-gold color with reddish undertones and a sharp strike throughout both sides. Small abrasions and marks determine the assigned grade. Census: 81 in 62, 74 finer (8/19).

*From The Pelican Collection, Part II.* NGC ID# 28GP, PCGS# 8864

- 4041 1911 MS64+ PCGS.** A Plus-graded Choice example of this early series issue, with sharply detailed design elements and lightly marked orange-gold surfaces that are lustrous and appealing. From a mintage of 505,500 pieces, the 1911 Indian eagle is a popular choice with type collectors.

*From The Pelican Collection, Part II.* NGC ID# 28GT, PCGS# 8868

**1914-S Ten Dollar, MS62  
Eye-Appealing for the Grade**

- 4042 1914-S MS62 NGC.** Exceptionally lustrous surfaces display original orange-gold patina and sharp design elements on this Uncirculated 1914-S Indian eagle. Scattered light luster grazes define the grade but none are singular important. The eye appeal of this piece far surpasses expectations for the grade. A better date in Uncirculated condition.

*From The Pelican Collection, Part II.* NGC ID# 28H4, PCGS# 8877

- 4043 1915 MS64 PCGS.** Each side exhibits profound orange-gold color with lighter peach-gold accents and gleaming mint luster. There are a couple of ticks on Liberty's portrait and the eagle, plus a small mark at the lower left obverse, but the fields are clean for the grade. Strongly struck. NGC ID# 28H5, PCGS# 8878

**1915-S Indian Eagle, AU55  
Better Low-Mintage Date**

- 4044 1915-S AU55 NGC.** Brief signs of wear visit the high points of this Choice About Uncirculated 1915-S ten. Most of the small, 59,000-piece mintage circulated on the West Coast, and few pieces were used for export. As a result, the 1915-S is scarce in all grades and challenging in AU or finer grades. This fine-grained example retains most of its original mint luster and shows few marks for the assigned grade. The headdress remains sharply defined, and eye appeal is strong. NGC ID# 28H6, PCGS# 8879

- 4045** 1916-S MS62 NGC. Finely granular yellow-gold fields are lustrous and nearly free of abrasions, while the Indian's portrait and the eagle have gathered a few light marks visible under a loupe. The strike is less than full on the forehead curls and the eagle's shoulder and legs. This attractive, final pre-war San Francisco issue is one of the few S-mint eagles that are readily available to collectors and market priced accordingly. NGC ID# 28H7, PCGS# 8880

## LIBERTY DOUBLE EAGLES

### 1850 Liberty Double Eagle, AU53 First-Year for Type and Denomination

- 4046** 1850 AU53 PCGS. Always in demand as the first year of regular issue for the type and denomination, a large introductory mintage of more than 1.1 million pieces was struck in Philadelphia. This medium-gold About Uncirculated survivor displays orange accents and sharply defined motifs, with light wear on the high points. Minor field chatter is grade-consistent, but there are no individually large or distracting marks on either side. NGC ID# 268F, PCGS# 8902

### 1850 Twenty Dollar, AU53 Scarce Example With CAC Endorsement

- 4047** 1850 AU53 PCGS. CAC. Luster still glistens in the peripheral fields of this About Uncirculated 1850 double eagle, and the design elements show little wear and are well-struck. The coloration is a medium greenish-gold, which is natural for the 1850 Philadelphia issue and earns approval from CAC. Scattered light abrasions on both sides of the coin are typical of the AU grade range. CAC: 38 in 53, 64 finer (8/19). NGC ID# 268F, PCGS# 8902

### 1851-O Double Eagle, AU53 Obtainable O-Mint Twenty

- 4048** 1851-O AU53 NGC. Variety 3. Type collectors and mintmarked gold specialists have an excellent target in the 1851-O double eagle. Contrary to the vast majority of O-mint twenties, the '51-O is readily available in all grades up to near-Mint condition. This is a lightly abraded medium-gold example, with light, high-point wear and pleasing surfaces that retain prooflikeness around the stars and legends. Strong, unmarked rims add to the appeal. *From The Pelican Collection, Part II.* NGC ID# 268J, PCGS# 8905

### 1852/1852 Repunched Date Twenty, AU58 FS-301 Cherrypickers' Variety

- 4049** 1852/1852 FS-301 AU58 PCGS. The first date is visibly punched north of the second punch, so that the tops of each digit poke out above the final date. Adding further to the interest, a lazily looping die crack connects the left obverse field to the bottoms of all four digits and the right field. Only the most minor hint of high-point rub separates this lustrous yellow-gold coin from Mint State. For the variety, Population: 6 in 58 (1 in 58+), 6 finer (9/19). Ex: *Chicago Signature (Heritage, 8/2015), lot 6331.* NGC ID# 268K, PCGS# 145729 Base PCGS# 8906

- 4050** 1853/'2' FS-301 — Cleaning — PCGS Genuine. AU Details. Breen's "overdate" is no longer considered a true overdate, although the *Guide Book* variety remains popular with collectors and is sought as a separate issue from the Normal Date 1853 double eagle. This AU-level coin is sharply detailed and satiny with luster remaining in the fields. Faint hairlines on both sides slightly mute the surfaces, earning a Details assessment from PCGS.

- 4051** 1854 Small Date AU53 NGC. VP-001. The date was initially punched in with an upward slant and then corrected. The remnants of the undertype digits are visible below the primary date. This lightly worn, lightly abraded specimen retains traces of original mint luster in selected areas. NGC ID# 268R, PCGS# 8911

1854 Double Eagle, AU58  
Small Date

- 4052 1854 Small Date AU58 NGC. According to Doug Winter, "The 1854 Small Date is slightly scarcer than the 1852 and 1853 in terms of overall rarity. In higher grades, it is a significantly rarer coin." Probably no more than 25 to 50 examples survive finer than this near-Mint representative with partial luster glowing from rich yellow-gold surfaces. The portrait and eagle are strong, with the marginal elements are softer. NGC ID# 268R, PCGS# 8911

1854 Liberty Twenty, AU58  
Popular Small Date Variant

- 4053 1854 Small Date AU58 PCGS. The majority of 1854 Liberty double eagles are of the Small Date variety. Despite the substantial mintage of 757,899 pieces, the issue is quite elusive in high grade. This attractive near-Mint specimen exhibits just a trace of actual wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain significant original mint luster. Population: 65 in 58 (2 in 58+), 38 finer (9/19). NGC ID# 268R, PCGS# 8911

1854-S Double Eagle, MS60 Details  
Sea Salvaged Inaugural S-Mint Twenty

- 4054 1854-S — Sea Salvaged — ANACS. MS60 Details. Most likely this coin traces to a large group of 1854-S double eagles found in the wreckage of the S.S. *Yankee Blade*. Perhaps as many as 300 1854-S twenties were recovered. This is a softly lustrous, finely granular orange-gold example with a sharp strike and a smooth cheek on Liberty. We note an interesting network of die cracks and some minor traces of residual grime or debris on the reverse. The ANACS Details holder notes "sea salvaged," although in another holder this coin might possibly receive a regular numeric grade.

1855-S Liberty Double Eagle, AU58  
Attractive Type One, Branch Mint Issue

- 4055 1855-S AU58 PCGS. CAC. Medium S mintmark. Before the discovery and salvage of the S.S. *Central America*, the 1855-S Liberty double eagle was virtually unknown in high grade. This attractive near-Mint specimen exhibits lightly abraded surfaces, with vivid orange-gold color and much original mint luster. Only a trace of wear is evident on the well-detailed design elements. Population: 79 in 58 (1 in 58+), 34 finer. CAC: 43 in 58, 8 finer (9/19). NGC ID# 268X, PCGS# 8916

1856-S Double Eagle, AU58  
Strongly Detailed

- 4056 1856-S AU58 PCGS. Recoveries from the S.S. *Central America* vastly increased the availability of the 1856-S double eagle. This lustrous near-Mint example may derive from that source. Luminous yellow-gold surfaces show just a few scattered bagmarks and nearly imperceptible friction over the highest points of the strongly defined motifs. NGC ID# 2692, PCGS# 8919

- 4057 1857-S AU50 NGC. CAC. Medium S. The 1857-S has established itself as the most collectible No Motto double eagle issue in high grades. This example saw brief Western circulation, but its warm orange-gold surfaces retain partial mint luster. Eye appeal and definition are terrific. NGC ID# 2696, PCGS# 8922

- 4058 1861 AU55 PCGS. CAC. A pleasing, partly lustrous CAC coin, high-end for the assigned grade and a choice collector coin. Both sides feature smooth olive-gold patina with peach-orange undertones. The 1861 is among the most popular No Motto issues for type collectors. This piece is especially appealing for the grade. NGC ID# 269G, PCGS# 8932

- 4059 1864-S AU55 PCGS. Despite the substantial mintage of 793,660 pieces and the recovery of a number of examples from shipwrecks, the 1864-S Liberty double eagle remains a scarce issue in high grade. This impressive Choice AU specimen shows just a touch of wear on the well-detailed design elements and the original orange-gold surfaces are only lightly abraded, with a small streak of struck-in grease on the reverse. NGC ID# 269T, PCGS# 8942

**1866 Motto Twenty, AU58**  
**Attractive Surfaces, Great Eye Appeal**

**4060 1866 Motto AU58 NGC.** Orange-gold surfaces display lilac accents, while only a hint of rub and scattered small marks keep this Motto twenty from a full Mint State designation. Nearly 700,000 pieces were struck, although many were melted and others were shipped overseas. This example retains most of its original mint luster and virtually all of its just-minted eye appeal. NGC reports just 49 finer certifications (9/19). NGC ID# 269X, PCGS# 8949

**4061 1866-S Motto — Obverse Cleaned — NGC Details. AU.** Small Bulbous S mintmark. This first-year Motto double eagle from the San Francisco Mint shows a subdued yellow-gold obverse with scattered abrasions and hairlines. A couple of die cracks pass through the date. The natural orange-gold reverse maintains considerable mint luster and good eye appeal. NGC ID# 26B2, PCGS# 8950

**1866-S Motto Twenty, AU50**

**4062 1866-S Motto AU50 PCGS.** Small Bulbous S. Three different San Francisco mintmarks are confirmed on the 1866-S Motto issue. The Small Squat S and the Small Bulbous S are similar in size but the latter has larger serifs. The Motto variety is more available than its No Motto counterpart, and is usually found in XF to AU grades. This apricot-gold example displays substantial luster and pleasing definition. The only reportable mark is a diagonal line on the cheek. NGC ID# 26B2, PCGS# 8950

**4063 1866-S Motto, Misplaced Date, FS-301, XF40 PCGS.** Double eagles struck with the Motto dies made up the lion's share of 1866 San Francisco twenties, with 842,250 pieces struck. Most of the mintage circulated to attrition, or succumbed to the melting pot. This XF40 Motto twenty is a well-circulated survivor, with orange-gold surfaces and plentiful eye appeal. Mint luster clings to the fields and devices, while abrasions are minor for 20 points of wear. The coin is notable for its *Cherrypickers'* variety, with the top of an errant 8 that protrudes from the denticles left of the primary date. The coin is housed in a previous generation green label holder. NGC ID# 269Y, PCGS# 145734 Base PCGS# 8950

**4064 1869-S AU53 PCGS. CAC.** The Small Squat S touches the tailfeathers. This original AU53 double eagle features attractive yellow-gold color with peach and khaki accents. Mint luster glows around the devices. Typically struck but remarkably unabraded for a Type Two twenty dollar gold piece. NGC ID# 26A6, PCGS# 8956

**1873-CC Twenty Dollar, AU Details**  
**Lustrous Carson City Coin**

**4065 1873-CC — Obverse Spot Removed — NGC Details. AU. Variety 2-A.** The mintmark is positioned mostly over the N in TWENTY on this variety, and the obverse has the upper loop of a misplaced digit in the dentils below the 73 of the date. This lustrous yellow-gold Carson City double eagle would easily garner an AU58 grade, although NGC denies such a designation due to the removal of a mint-made grease streak at stars 1 and 2, which leaves an irregular depression in the planchet where the die grease used to reside. Still, the coin is lustrous, sharp, and appealing, with few surface abrasions.

**4066 1874-S MS61 NGC.** Frosty original mint luster engulfs this Mint State 1874-S double eagle, complementing well-struck design elements and natural honey-gold coloration. Scattered abrasions limit the grade, although finer coins are seldom offered. NGC ID# 26AR, PCGS# 8972

**1876-CC Double Eagle, AU55**  
**Lustrous Orange-Gold Surfaces**

**4067 1876-CC AU55 PCGS. Variety 3-A.** The 1876-CC is among the more plentiful Carson City double eagles. Type collectors desiring a single Type Two coin from this mint will find that the 1876-CC is the ideal choice. An attractive reddish hue atop lustrous surfaces gives this piece strong eye appeal for the grade. Only slight wear is evident and abrasions are minimal.

*Ex: FUN Signature (Heritage, 1/2008), lot 4776, which realized \$2,530; FUN Signature (Heritage, 1/2011), lot 7301, which realized \$3,737.50. NGC ID# 26AW, PCGS# 8977*

**1877 Double Eagle, MS62+  
Semiprooflike Type Three Coin**

- 4068 1877 MS62+ NGC.** The 1877 double eagle is the inaugural issue of the Type Three design. The most obvious design change was the denomination being spelled out as TWENTY DOLLARS, rather than the abbreviated TWENTY D. of the Type One and Type Two issues. However, the portrait was also modified — it is reoriented slightly in the field, and Liberty's hair curls are more sharply delineated. This MS62+ coin displays original yellow-gold and peach hues. The fields are semiprooflike, and both sides are well-defined. Grade-limiting abrasions are universally light. NGC lists 17 higher-grade examples (9/19). NGC ID# 2547, PCGS# 8982

**1877 Double Eagle, MS61 Prooflike  
Sole PCGS Prooflike Coin**

- 4069 1877 MS61 Prooflike PCGS.** PCGS recently began recognizing prooflike fields for Liberty double eagles, and this piece is the only 1877 coin thus far designated Prooflike at that service. NGC lists 35 Prooflike pieces and one Deep Prooflike, the latter in AU58. In MS61 Prooflike, this PCGS coin is among the finest Prooflike 1877 twenties certified (8/19). The fields are indeed deeply reflective, providing a glimmering backdrop for the frosted, sharp design elements. Each side has bright yellow-gold color and scattered light abrasions. PCGS# 88982 Base PCGS# 8982
- 4070 1878 Doubled Die Reverse MS61 PCGS. Breen-7270. Variety 1.** The strongest of four Doubled Die Reverse varieties, with bold doubling on TWENTY DOLLARS. Lustrous yellow-gold surfaces showcase strong design detail and natural greenish accents. NGC ID# 26B3, PCGS# 8985

**1878 Twenty Dollar, MS60 Prooflike  
The Only Prooflike Coin at PCGS**

- 4071 1878 MS60 Prooflike PCGS.** As of yet, this is the only 1878 double eagle that PCGS has designated Prooflike. NGC, which has been recognizing prooflike qualities in most series longer than PCGS, records 15 Prooflike submissions in all grades, plus three Deep Prooflike pieces (9/19). This PCGS coin is sharp and eye-catching. Original rose-gold interiors cede to greenish-gold margins. Moderate abrasions on each side determine the grade. NGC ID# 26B3, PCGS# 78985

**1879-S Double Eagle, MS61**

- 4072 1879-S MS61 PCGS.** A nicely struck sun-gold example that has booming luster and the expected number of small to moderate marks. Only a nick on the reverse rim at 7 o'clock is worthy of mention. The obverse dentils are attenuated near 10:30, as made from a lapped die. One small alloy spot is noted near the bust tip. NGC ID# 26B9, PCGS# 8991

**1883-CC Twenty Dollar, AU55  
Lustrous Fields, Original Color**

- 4073 1883-CC AU55 NGC. Variety 2-A.** Well-defined with considerable sun-yellow and gold-orange luster remaining in the fields. A few light abrasions are noted on and near Liberty's cheek and in her upper hair, but only minor wear is visible on the high points. The reverse is smooth save for a shallow abrasion to the right of the tailfeathers. An appealing Type Three Carson City double eagle.  
*Ex: Chicago Signature (Heritage, 8/2011), lot 5841, which realized \$4,025. NGC ID# 26BH, PCGS# 8999*

**1883-CC Liberty Twenty, AU55**  
Vibrant, Unabraded Fields

- 4074 1883-CC AU55 PCGS.** About Uncirculated examples of the low-mintage 1883-CC double eagle (59,962 coins struck) survive in sufficient numbers to satisfy the bulk of collector demand, but anything finer becomes exceedingly scarce. Well-detailed motifs include a touch of wear over the hair curls and cheek, but mint luster remains vibrant over semireflective honey-gold surfaces. Remarkably few abrasions are seen on the Choice, partially prooflike fields.  
Ex: *FUN Signature* (Heritage, 7/2017), lot 3271. NGC ID# 26BH, PCGS# 8999

**1883-S Liberty Double Eagle, MS63★**  
Conditionally Rare Any Finer

- 4075 1883-S MS63★ NGC.** From a mintage of more than 1.1 million pieces, the 1883-S Liberty double eagle can be found with a little patience in grades up to the MS63 level, but finer coins are definitely rare. This impressive Select specimen exhibits sharply detailed design elements throughout and the lightly marked orange-gold surfaces show a mix of vibrant mint luster and prooflike reflectivity. Census: 97 in 63 (2 in 63+, 2 in 63★), 7 finer (9/19). NGC ID# 26BJ, PCGS# 9000

**1883-S Liberty Twenty, MS62**  
Rare Prooflike Example

- 4076 1883-S MS62 Prooflike NGC.** The 1883-S Type Three double eagle claims a substantial mintage of more than 1.1 million pieces, but only a small fraction of that total has survived with prooflike surfaces. This impressive MS62 example displays sharply detailed design elements and deeply reflective fields throughout. The pleasing yellow-gold surfaces show the expected number of minor contact marks for the grade. Census: 4 in 62 Prooflike, 0 finer (9/19). NGC ID# 26BJ, PCGS# 79000

**1884-CC Liberty Twenty, AU58**  
Lustrous, Colorful Example

- 4077 1884-CC AU58 PCGS. Variety 1-A.** The 1884-CC is an available issue in the context of the series and a popular choice with branch mint type collectors. This impressive near-Mint specimen exhibits just the slightest trace of high-point wear on the design elements and the lightly abraded orange-gold surfaces are lustrous and appealing. NGC ID# 26BK, PCGS# 9001

**1885-S Double Eagle, MS63+**  
Elusive in Finer Grades

- 4078 1885-S MS63+ PCGS. CAC.** Radiant luster cartwheel around both sides of this high-end Select 1885-S double eagle. The strike is bold and abrasions are trivial. Much of each side displays yellow-gold color, although warmer rose-gold hues accent the central areas. The 1885-S is plentiful in MS63, but finer pieces are scarce. NGC ID# 26BP, PCGS# 9005

**1888 Double Eagle, High-End MS62**  
Scarce Any Finer

- 4079 1888 MS62 PCGS. CAC.** The certified population of 1888 double eagles at PCGS declines by almost 90% between MS62 and MS63. This is a high-end-for-the-grade example with frosty peach-gold surfaces and trivial grazes. The curls and neck feathers are slightly soft, but the rest of this CAC-endorsed twenty dollar is well-struck. PCGS reports 37 numerically finer submissions. CAC: 17 in 62, 4 finer (9/19). NGC ID# 26BT, PCGS# 9008

**1889-CC Liberty Twenty, AU55  
Type Three Branch Mint Issue**

- 4080 1889-CC AU55 NGC. Variety 1-A.** Luster generously outlines individual obverse stars, and bathes Liberty's hair and much of the reverse. Slight friction is present on the RTY in LIBERTY and over the high points of the curls. Careful rotation beneath a loupe fails to reveal any distractions. A popular low-mintage CC-mint issue. NGC ID# 26BV, PCGS# 9011

**1890-CC Twenty Dollar, Choice AU  
Bright Frost Around the Devices**

- 4081 1890-CC AU55 PCGS. Variety 1-A.** Mintmark centered over the space between (TWENTY) D(OLLARS). The right most tailfeathers are lapped on this late die state example. Bright frost glows around sharp, minimally worn design elements. Yellow-gold surfaces display fine hairlines but few deep abrasions. NGC ID# 26BY, PCGS# 9014

**1894-S Double Eagle, MS64+  
Rare CAC-Endorsed Example**

- 4082 1894-S MS64+ PCGS. CAC.** A mere 25 Choice 1894-S double eagles at PCGS are Plus graded, a number that interestingly equals the 25 MS64 coins awarded CAC recognition. This piece carries both awards. The strike is sharp, and both sides display frosty original luster, peach-gold in the centers, ceding to greenish-gold around the borders. Eye appeal is outstanding. PCGS lists just five higher-grade representatives. CAC: 25 in 64, 1 finer (9/19). NGC ID# 26CC, PCGS# 9026

**1895 Liberty Head Twenty, MS64+  
Few Pieces Are Known Finer**

- 4083 1895 MS64+ PCGS.** The 1895 is generally plentiful through MS64, but PCGS has seen only eight numerically finer examples. This Plus-graded near-Gem balances quality and affordability for the type collector. Each side is sharp and vibrantly lustrous, yielding original coloration of rose-gold interiors and greenish-gold margins. A few light surface abrasions are hardly distracting. NGC ID# 26CD, PCGS# 9027

**1895 Double Eagle, MS62 Prooflike  
Fantastic Eye Appeal**

- 4084 1895 MS62 Prooflike PCGS. CAC.** Eye appeal is fantastic for this Uncirculated 1895 double eagle, as affirmed by the green approval sticker from CAC. Blatant Prooflike contrast exists between the mirrorlike fields and frosty light gold devices. Population: 1 in 62 Prooflike, 1 finer (9/19). PCGS# 89027 Base PCGS# 9027

**1895-S Double Eagle, MS61 Prooflike  
Scarce With Such Contrast**

- 4085 1895-S MS61 Prooflike NGC.** NGC has certified more than 7,700 1895-S double eagles, but among those are only 57 Prooflike submissions plus one Deep Prooflike coin. Crisp, frosty devices showcase light yellow-gold color that contrasts against reflective, deep yellow-gold mirrors, which appear almost black at certain angles. Scattered abrasions limit the grade, not the eye appeal. Census: 31 in 61 Prooflike, 18 finer in this category (9/19). NGC ID# 26CE, PCGS# 79028

---

**1897-S Double Eagle, MS64+  
Frosty Cartwheel Mint Luster**

- 4086 1897-S MS64+ PCGS.** More than 1.4 million double eagles were struck at the S-mint in 1897, but only a few dozen survive in higher grades than this piece, with 17 finer submissions at PCGS (9/19). Frosty luster cartwheels over luminous orange-gold surfaces. The fields show minimal chatter for the grade level, and the only tick of note appears on Liberty's neck. Strike detail is good on the curls and feathers, and the star radials on each side are clear. NGC ID# 26CJ, PCGS# 9032

---

**1897-S Double Eagle, MS62 Prooflike  
Overt Field Reflectivity**

- 4087 1897-S MS62 Prooflike PCGS. CAC.** Boasting the new Prooflike designation from PCGS, this CAC-approved twenty dollar gold piece displays overt field reflectivity and mostly needle-sharp devices. Just a couple of stars are incomplete. There are a few coppery alloy spots on each side, and minimally distracting chatter. PCGS# 89032 Base PCGS# 9032

- 4088 1898-S MS64+ PCGS.** The base the 1 is lightly repunched on this 1898-S twenty dollar gold piece. Stars 1 and 2 are soft, but the rest of the design is strongly impressed. Lively peach-gold surfaces are frosty and eye-catching with scattered minute abrasions that barely prevent a Gem assessment. NGC ID# 26CL, PCGS# 9034

---

**1898-S Liberty Double Eagle, MS65  
Exemplary Surfaces, Few are Finer**

- 4089 1898-S MS65 PCGS.** Aside from two MS65 coins with the PCGS Plus designation and one superb MS67, all of the highest-certified 1898-S twenties are at the MS65 level (9/19). This colorful and well-preserved example is a hands-down Gem, with a needle-sharp strike and precious few marks on the smooth, frosted surfaces. Attractive orange-gold toning shimmers with pale-olive and rose highlights. The eye appeal is exceptional. NGC ID# 26CL, PCGS# 9034

- 4090 1899 MS64+ PCGS.** The availability of the 1899 double eagle tapers off in Gem condition, making this Plus-graded Choice Uncirculated example a collectible alternative. Frosty golden-orange surfaces are carefully preserved and minimally bagmarked. Uniformly well-struck. NGC ID# 26CM, PCGS# 9035

- 4091 1899 MS64+ PCGS.** A Plus-graded Choice specimen of this popular turn-of-the-century issue, with sharply detailed design elements and vivid orange-gold surfaces that show only minor signs of contact. Vibrant mint luster adds to the outstanding eye appeal. PCGS has graded 69 numerically finer examples (9/19). NGC ID# 26CM, PCGS# 9035

---

**1899-S Liberty Twenty, MS64  
Rarely Seen Any Finer**

- 4092 1899-S MS64 PCGS.** The 1899-S Liberty double eagle boasts a large mintage of more than 2 million pieces, making the issue reasonably available in grades up to the MS64 level, but finer coins are rare. This attractive Choice specimen offers sharply detailed design elements and well-preserved orange-gold surfaces on both sides. Vibrant mint luster adds to the outstanding eye appeal. PCGS has only graded four numerically finer examples (9/19). NGC ID# 26CN, PCGS# 9036

---

**1899-S Twenty Dollar, MS64+  
Virtually Unseen in Higher Grades**

- 4093 1899-S MS64+ PCGS.** The 1899-S (2 million coins) is collectible through MS64, but finer PCGS-certified examples are virtually impossible to obtain. There are only four numerically finer submissions at that service (9/19). The fields are impressively clean with few distracting abrasions, and vibrant mint frost glistens across each side. A bold yellow-gold near-Gem. NGC ID# 26CN, PCGS# 9036

- 4094 1900 MS64+ PCGS.** Frosted mint luster blends with rich orange-gold color, delivering terrific eye appeal that matches the high-end preservation. Strike detail is nearly full, and close inspection reveals nothing more than a few tiny ticks on Liberty's cheek and some shallow field grazes. NGC ID# 26CP, PCGS# 9037

**1901 Double Eagle, MS65**  
**None Numerically Finer at NGC**

**4095 1901 MS65 NGC.** Ex: Crockett Collection. The 1901 double eagle, a plentiful date overall, is prohibitively rare finer than the Gem level; in fact, NGC has not even certified such a coin (9/19). This MS65 piece displays radiant yellow-gold and peach luster with sharp design elements. A few faint grazes on Liberty's cheek are all that deny an even finer grade. NGC ID# 26CS, PCGS# 9039

**4096 1903 MS64+ PCGS.** Deep sun-gold color defines this Plus-graded Choice Uncirculated double eagle. Frosty mint luster issues from surfaces that show few major bagmarks. The stars on each side are fully raised, and the curls and feathers exhibit crisp definition. NGC ID# 26CW, PCGS# 9043

**1903 Double Eagle, MS65+**  
**Frosted, Original Color**

**4097 1903 MS65+ NGC.** European hoards have replenished the supply of 1903 double eagles, but few of those coins can match the quality of this high-end Gem. Frosted surfaces radiate orange-gold color, while a sharp strike encompasses both sides. Three tiny marks below L on the coronet join a few light marks on and around the chin, the only abrasions seen beneath a loupe. Census: 15 in 65+, 3 in 65★, 12 finer (9/19). NGC ID# 26CW, PCGS# 9043

**4098 1903-S MS62★ NGC.** Both sides exhibit a bright prooflike finish, which undoubtedly contributes to the Star designation. The strike is uncommonly sharp also. Numerous small, but individually insignificant abrasions are seen on each side. NGC ID# 26CX, PCGS# 9044

**4099 1903-S MS64 PCGS.** Reeding marks on Liberty's portrait and minor chatter in the surrounding fields define the grade, preventing this 1903-S double eagle from achieving a rarified Gem assessment. Indeed, there are only 18 numerically finer pieces at PCGS (9/19). This high-end example offers profound golden-orange color and lively frost with crisp devices. NGC ID# 26CX, PCGS# 9044

**4100 1904 MS65 NGC.** A delightful Gem representative of this popular type issue, with sharply detailed design elements and virtually pristine orange-gold surfaces that radiate vibrant mint luster from both sides. Overall eye appeal is outstanding. NGC ID# 26CY, PCGS# 9045

**4101 1904 MS65 NGC.** A delightful Gem example of this popular type issue, with sharply detailed design elements and well-preserved orange-gold surfaces that show a mix of vibrant mint luster and prooflike reflectivity on both sides. The eye appeal is outstanding. NGC ID# 26CY, PCGS# 9045

**4102 1904 MS62 Prooflike NGC.** A huge mintage of more than 6.2 million pieces makes the 1904 double eagle the most available date in the series. Despite the large production, designated prooflike coins are scarce and represent just a tiny fraction of the mintage. This is a gleaming orange-gold example, sharply struck with mirrored fields throughout each side. A few widely scattered, minor marks are the only grade-limiting factor. PCGS# 89045

**1906-D Double Eagle, MS64**  
**First of the Denver Mint Coinage**

**4103 1906-D MS64 PCGS.** A lustrous, softly frosted near-Gem 1906-D with bold devices and only the slightest signs of surface contact. Rich apricot-gold and peach hues adorn each side. The 1906-D is the inaugural double eagle from the newly opened Denver Mint. Examples are occasionally seen in this grade, but PCGS lists just 19 higher-grade pieces (9/19). Housed in a green label holder. NGC ID# 26D5, PCGS# 9050

**1907-D Twenty Dollar, MS63**  
**Denver Type Coin**

**4104 1907-D MS63 PCGS.** The luster is original on this Select final-year Denver coin, showing yellow-gold and harvest-wheat hues across each side. The design elements are well-struck. Grade-limiting abrasions are apparent but not bothersome. The Denver Mint opened in 1906 and immediately became the workhorse facility for the Midwest. The New Orleans Mint was closed in early 1909, and all central states coinage was shifted to Denver. NGC ID# 26D8, PCGS# 9053

**1907-D Liberty Twenty, MS63**  
**Final-Year Type Coin**

**4105 1907-D MS63 PCGS.** Rich orange-gold and honey coloration adorns the sharp devices and well-preserved fields of this Select Uncirculated 1907-D twenty. A few abrasions determine the grade but are not bothersome. This piece has mainly satin mint luster, although semiprooflike reflectivity glimmers in the central reverse fields. Eye appeal is excellent. NGC ID# 26D8, PCGS# 9053

---

1907-D Twenty Dollar, MS64  
Denver Liberty Head Type Coin

- 4106 1907-D MS64 PCGS.** Frosted surfaces and well-struck motifs bolster the eye appeal of this Choice Uncirculated 1907-D, struck during the final year of the Liberty Head design. Full mint luster glows beneath smooth, nearly unabraded surfaces, with attractive straw-gold color and an unblemished cheek on Liberty. The Denver Mint struck Liberty twenties in just 1906 and 1907, a two-year type for the denomination and Mint. NGC ID# 26D8, PCGS# 9053

---

SAINT-GAUDENS DOUBLE EAGLES

- 4107 1907 MS64 NGC.** Lime-green, lilac, and orange accents embellish the apricot-gold color of this first-year, near-Gem 1907 twenty. Modifications by Charles Barber to the proposed low-relief version of Augustus Saint-Gaudens' original design no doubt improved its viability for mass coinage, at the unfortunate cost of aesthetic nuances that were perhaps needlessly ignored. Still, this Choice Uncirculated piece is well-struck and undeniably attractive. *From The Pelican Collection, Part II.* NGC ID# 26F5, PCGS# 9141
- 4108 1907 MS64+ PCGS.** Considering all the back-and-forth between Mint officials and defenders of the Saint-Gaudens' original design, the reduced-relief Arabic numerals circulation strikes were a considerable technical success, although an aesthetic compromise. The issue was well-produced, as demonstrated by the large number of Gem or finer survivors. This is a vibrantly lustrous orange-gold near-Gem, with lilac and lemon-gold highlights over smooth, minimally marked surfaces. The PCGS Plus designation confirms its high quality for the grade. NGC ID# 26F5, PCGS# 9141
- 4109 1907 MS64 PCGS. CAC.** This is a frosted, lemon-gold near-Gem example of the Arabic numerals 1907, with sparkling mint luster and a sharp strike throughout both sides. Only minor, small marks are seen with magnification to justify the Choice Uncirculated grade. CAC endorsement suggests it is at the high end of that grading level. NGC ID# 26F5, PCGS# 9141
- 4110 1907 MS65 PCGS.** The 1907 Saint-Gaudens double eagle represents a collectible first-year issue that is widely collectible in Gem condition but moderately scarce at the next highest grade level. Frosty mint luster radiates from luminous yellow-gold surfaces. The devices are strong, and marks are undistracting. NGC ID# 26F5, PCGS# 9141
- 4111 1908-D No Motto MS64+ PCGS. CAC.** A Plus-graded Choice example of the short-lived No Motto design, with Short Rays on the obverse from the 1907 hub. This coin exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 26F7, PCGS# 9143

---

1911 Double Eagle, MS64+  
Plus-Graded, Scarce at This Level

- 4112 1911 MS64+ PCGS.** Variegated shades of lilac and fire-orange decorate the orange-gold fields and devices of this high-end, Choice Uncirculated 1911 twenty. The moderate mintage of 197,250 pieces was almost completely shipped to Europe. Relatively few pieces returned over the past several decades, accounting for the scarcity of near-Gem or finer examples. This is a sharply struck, fine-grained example, with minimal marks for the grade. Population: 37 in 64+, 84 finer (9/19). NGC ID# 26FK, PCGS# 9157
- 4113 1911-D MS65 NGC.** A lustrous and frosted example of this Denver issue, with vibrant orange-gold color and minimal obverse marks compared to other Gem-level coins. A few light bagmarks on the reverse are grade-consistent. The 1911-D is a readily available branch mint issue even at the MS65 grade, ideal for type. This sharply struck Gem offers exceptional quality and eye appeal. *From The Pelican Collection, Part II.* NGC ID# 26FK, PCGS# 9158

---

1911-D Twenty Dollar, MS66  
Sharp and Lustrous, Seldom Finer

- 4114 1911-D MS66 PCGS.** When gold import restrictions were lifted in 1972, several unopened Mint bags of 1911-D double eagles were repatriated from South America and Central America. Many of the coins were of Gem quality or finer, providing the majority of high-grade examples known today. This Premium Gem is housed in a Generation 4.0 blue label PCGS holder with barcode on the back, in use from 1998 to 2002, with a high likelihood this impressive MS66 coin came from Central America holdings. Sharply struck surfaces with frosted, orange-gold color and lilac overtones provide excellent eye appeal. NGC ID# 26FK, PCGS# 9158

**1911-D/D Twenty Dollar, MS65+  
FS-501 With CAC Approval**

- 4115 1911-D/D FS-501 MS65+ PCGS. CAC.** The initial mintmark is punched slightly further east, identifying this *Cherrypickers' Guide* variety. A single tick on Liberty's right thigh is undoubtedly the only minor flaw preventing a full Premium Gem assessment for this gorgeous, deep yellow-gold Saint-Gaudens twenty. Liberty's face and torch hand are completely defined. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

**1913-D Saint-Gaudens Twenty, MS65  
A Rarity Any Finer**

- 4116 1913-D MS65 PCGS.** Gem examples of the 1913-D Saint are occasionally available, although any finer and this issue becomes the subject of auction headlines and is out of reach for most collectors. PCGS has seen only eight submissions in grades finer than the present coin (9/19). This piece is boldly rendered on Liberty's face, her fingers, and the top of the torch. Luster displays original yellow-gold and peach-orange hues, and only a few trivial signs of contact are apparent. NGC ID# 26FP, PCGS# 9162

- 4117 1914 MS62 NGC.** Struck to provide backing for Gold Certificates, the 1914 issue had a smallish mintage of 95,250 pieces — most of which were promptly placed in Treasury storage. Mintages of Saint-Gaudens double eagles are seldom an indicator of true rarity, and while the 1914 is one of just six issues in the entire series with a mintage below 100,000 pieces, it only becomes scarce in the high Uncirculated grades. This is a fine-grained, deeply frosted example with medium straw-gold color and scattered small abrasions that dictate the MS62 grade. Strong mint luster adds to the bold eye appeal.

*From The Pelican Collection, Part II.* NGC ID# 26FS, PCGS# 9164

**1920 Double Eagle, MS64+  
Conditionally Rare, Few Are Finer**

- 4118 1920 MS64+ NGC.** Post World War I production of double eagles resumed in 1920, with nearly the entire 228,250-piece Philadelphia mintage held at the Treasury to back gold certificates. Six years later, the coins were put to use in international trade. From the sizeable mintage, nearly no Gem or finer coins were preserved. This is a splendid near-Gem, bolstered by the NGC Plus designation. Frosted orange-gold surfaces are brightly lustrous with olive overtones. A few tiny marks are revealed across the sharply struck surfaces. Census: 19 in 64+, 1 in 64★, 7 finer (9/19). NGC ID# 26FY, PCGS# 9170

**1922 Twenty Dollar, MS65  
Prohibitively Rare Any Finer**

- 4119 1922 MS65 PCGS.** Struck to the extent of more than 1.3 million pieces, the 1922 double eagle did not meet the same catastrophic fate as many later issues with regards to mass melting. The date is plentiful in grades through MS65, but there its availability ceases. In MS66, PCGS reports only nine submissions, and none finer (9/19). This Gem is among the highest-graded pieces typically available to collectors. A bold strike complements frosty peach-gold and orange mint luster, while minor high-point contact marks do little to mar the eye appeal. NGC ID# 26G3, PCGS# 9173

**1922-S Double Eagle, MS60  
Sole CAC Coin for the Grade  
Prior Generation Holder**

- 4120 1922-S MS60 NGC. CAC.** Probably just a couple of thousand 1922-S double eagles survive in all grades from a mintage of more than 2.6 million pieces. This is a better date overall, and it is especially scarce with CAC recognition. This is a remarkably attractive coin for the MS60 grade level, and it is the only 1922-S double eagle so certified with a CAC green label. Well-struck devices complement frosty peach-gold mint luster. Scattered abrasions are generally minor, giving this coin the eye appeal of a higher-grade specimen. Housed in a prior generation holder. CAC: 1 in 60, 91 finer (9/19). NGC ID# 26G4, PCGS# 9174

- 4121 1923 MS64+ PCGS. CAC.** While the 1923 issue avoided the mass meltings of the 1930s Gold Recall, nearly all of the 566,000-piece mintage was used for export to European banks. Few pieces circulated domestically, while others went into the hands of wealthy collectors and dealers. European repatriates make up the bulk of 1923 coins available today, although few of those coins reach the near-Gem or finer levels. This Plus-graded MS64 has CAC endorsement, and displays a sharp strike over smoothly frosted, medium orange-gold surfaces. The date is narrowly doubled south, and the reverse rim above UNITED shows the interesting result of a collapsed working die. CAC: 134 in 64, 8 finer (8/19). NGC ID# 26G5, PCGS# 9175

**1923-D Saint-Gaudens Twenty, MS66  
Vivid Color, Vibrant Mint Luster**

- 4122 1923-D MS66 NGC. CAC.** Silky-smooth surfaces underpin exquisite orange-gold color and radiant cartwheel luster throughout both sides of this CAC-endorsed Premium Gem twenty. The 1923-D issue has a reputation as perhaps the best-produced Saint-Gaudens double eagles of all, and this splendid example is a textbook case in point. The strike is sharp, marks are few, and the eye appeal is beyond compare. NGC ID# 26G6, PCGS# 9176

- 4123 1927 MS66+ NGC.** A Plus-graded Premium Gem specimen of this popular type issue, with sharply detailed design elements and well-preserved orange-gold surfaces that feature radiant mint luster on both sides. NGC has graded 60 numerically finer examples (9/19). NGC ID# 26GG, PCGS# 9186

- 4124 1927 MS66+ PCGS.** The 1927 ranks among the most plentiful Saint-Gaudens double eagles overall, making it popular as a type coin. This high-end Premium Gem is ideal for that purpose. Frosty original mint luster illuminates bold devices with rich shades of peach and orange-gold color. A few trivial contact marks seen beneath a loupe do not detract. PCGS lists 28 Superb Gems finer (9/19). NGC ID# 26GG, PCGS# 9186

**1928 Double Eagle, MS66+  
Outstanding High-Grade Type Coin**

- 4125 1928 MS66+ NGC.** Incredibly, PCGS and NGC combined report more than 115,000 grading events for the 1928 Saint-Gaudens twenty. Only a tiny fraction of those coins are at the MS66+ level or finer. This is a splendid straw-gold example of the issue, with a needle-sharp strike and only a few tiny abrasions. Cartwheel luster gleams from the smoothly frosted, Plus-graded Premium Gem surfaces. NGC ID# 34VK, PCGS# 9189

## COMMEMORATIVE SILVER

- 4126 1893 Isabella Quarter MS66 PCGS. CAC.** Ex: Poteat Collection. We have handled numerous Isabella quarters with originality that is as blatant as that of the present example, but few have been as well-preserved. There is not a single outwardly distracting abrasion to impede one's appreciation of the rich, swirling mint frost. Antique-copper toning overlays both sides with somewhat more vibrant cobalt-blue shadings outlining most of the devices. Sharply struck and worthy of a strong bid.

Ex: *Trane Collection / FUN Signature (Heritage, 1/2003)*, lot 9497. NGC ID# BYJ9, PCGS# 9220

- 4127 1900 Lafayette Dollar MS64 NGC. DuVall 1-B.** The left-leaning second L in DOLLAR and the right most lower leaf pointing between 19 in the date are giveaways for the plentiful DuVall 1-B variety. Frosty silver surfaces showcase gunmetal-blue splashes mainly around the rims, and a daub of golden color appears at the upper right reverse. Clean fields. NGC ID# BYKW, PCGS# 9222

- 4128 1900 Lafayette Dollar MS64 PCGS. DuVall 2-C.** The 1900 Lafayette dollar claims a distribution of 36,026 pieces. This attractive Choice specimen exhibits sharply detailed design elements, with the second S in STATES repunched to the east. The well-preserved, lustrous surfaces show highlights of pale gold and lavender toning. NGC ID# BYKW, PCGS# 9222

- 4129 1921 Alabama 2x2 MS66 NGC.** Original iridescent toning enhances the satiny, Premium Gem surfaces, while amber-orange accents decorate the margins of this sharp and attractive Alabama half. The popular 2x2 imprint in the right obverse field adds scarcity and appeal. The well-struck portraits of Governors Bibb and Kilby grace the obverse, while a formidable eagle (equally well-defined) dominates the reverse. Census: 97 in 66 (4 in 66+, 9 in 66★), 9 finer (8/19). NGC ID# BYEZ, PCGS# 9225

- 4130 1921 Alabama 2x2 MS66 PCGS.** Designed by Laura Gardin Fraser, the Alabama Centennial half dollars were issued on the heels of the popular Missouri Centennial halves, and borrowed the successful marketing gimmick of adding an imprint in the right obverse field to increase collector purchases. This is one of those 2x2 coins, with pale slate-blue accents that embellish satiny golden-gray surfaces. A sharp and attractive Premium Gem, seldom finer at PCGS. NGC ID# BYEZ, PCGS# 9225

- 4131 1935 Arkansas MS67 PCGS.** The design elements of this impressive Super Gem representative are sharply detailed throughout and the virtually pristine surfaces radiate vibrant mint luster, with some delicate highlights of lavender-gray and sea-green toning. Population: 28 in 67 (3 in 67+), 0 finer (9/19). NGC ID# BYF5, PCGS# 9233

- 4132 1938 Arkansas MS67 NGC.** The 1938 Arkansas commemorative half dollar is a rare issue at the MS67 grade level. This spectacular Superb Gem exhibits sharply detailed design elements and vibrant satiny mint luster on both sides. The lightly toned surfaces are impeccably preserved. Census: 7 in 67, 0 finer (9/19). NGC ID# BYFE, PCGS# 9245

**1939-S Arkansas Half Dollar, MS67  
Top-Tier Registry Coin**

- 4133 1939-S Arkansas MS67 PCGS.** This is among the finest 1939-S Arkansas halves at PCGS, and it is a rarity as such. Warm sun-gold toning embraces the familiar satin luster of each side, complementing boldly rendered design elements. Neither side is abraded, the quality being exceptional and worthy of the finest classic commemorative Registry Set. Population: 19 in 67 (1 in 67+), 0 finer (9/19). NGC ID# BYFL, PCGS# 9251

**1939-S Arkansas Half Dollar, MS67  
Tied for the Finest at PCGS**

- 4134 1939-S Arkansas MS67 PCGS. CAC.** Following the first issues of the Arkansas Centennial half dollars in 1935, contemporary collectors probably thought the series would never end, but it concluded its five year run in 1939, with just over 2,000 coins distributed from each of the three mints. Delicate gold toning and peripheral iridescence fail to impede the brilliant, satiny luster of this Superb Gem. Population: 19 in 67 (1 in 67+), 0 finer. CAC: 11 in 67, 0 finer (9/19). NGC ID# BYFL, PCGS# 9251

- 4135 1936 Boone MS67+ PCGS.** This Plus-graded Superb Gem exhibits sharply detailed design elements throughout, with virtually pristine surfaces that show highlights of lavender-gray and lime-green toning. Satiny mint luster adds to the terrific eye appeal. Population: 98 in 67 (5 in 67+), 5 finer (9/19). NGC ID# BYFX, PCGS# 9266

- 4136 1925-S California MS67+ NGC.** From a distribution of 86,394 pieces, the 1925-S California half dollar is seldom encountered in grades above MS67. This Plus-graded Superb Gem exhibits sharply detailed design elements and virtually flawless brilliant surfaces, with vibrant mint luster throughout. NGC has graded 18 numerically finer examples (9/19). NGC ID# BYGA, PCGS# 9281

- 4137 1925-S California MS67 PCGS. CAC.** Ex: Poteat Collection. The obverse has lavender tinged devices competing with variegated green-gray patina, while the reverse has equally original green-blue and charcoal-gray coloration. Lustrous and well-struck, with surfaces that are close to perfection.  
Ex: Tom Valos Collection / FUN Signature (Heritage, 1/2002), lot 8684; Trane Collection / FUN Signature (Heritage, 1/2003), lot 9594. NGC ID# BYGA, PCGS# 9281

**1936 Cincinnati Half Dollar, MS67  
Among the Finest Certified**

- 4138 1936 Cincinnati MS67 PCGS.** A conditionally rare Superb Gem example of the Cincinnati half dollar, among the finest Philadelphia coins certified. Each side is satiny and well-struck with olive-gold toning and a few wisps of mint-green and rose. This commemorative was issued in three-coin sets, including an example from each mint. Just 5,000 sets were distributed. Population: 28 in 67 (3 in 67+), 0 finer (8/19). NGC ID# BYCJ, PCGS# 9283

**1893 Columbian Half Dollar, MS67  
Beautiful Luster and Toning**

- 4139 1893 Columbian MS67 PCGS.** The luster of this Superb Gem is fresh and crisp, undeniably original. A silvery center is framed by old-time rainbow border toning on the obverse, while the reverse illuminates lilac and blue-green color in the center with rose and gold around the border. This is a well-struck Columbian type coin. PCGS has not certified a single numerically finer representative of the 1893 issue. Population: 43 in 67 (6 in 67+), 0 finer (9/19). NGC ID# BYGG, PCGS# 9297

- 4140 1936 Gettysburg MS67 PCGS.** Intermittent almond-gold and tan-brown toning dapples the lilac-silver surfaces of this 1936 Gettysburg Anniversary half. The soldiers' cheekbones and the top of the Union shield are particularly well-defined. Soft luster glows beneath attractive, light toning, while carefully preserved fields and devices show only two or three tiny marks of any kind — none of which detract from the Superb Gem surface quality. PCGS reports just three numerically finer pieces (9/19). NGC ID# BYGM, PCGS# 9305

- 4141 1922 Grant No Star MS67 PCGS.** A few wisps of pale gold and amber toning visit the impeccably preserved surfaces of this delightful Superb Gem, with sharply detailed design elements and vibrant mint luster throughout. Eye appeal is outstanding. Population: 84 in 67 (10 in 67+), 0 finer (9/19). NGC ID# BYGP, PCGS# 9306

- 4142 1922 Grant No Star MS67 PCGS.** A small rim flaw is apparent near the N in IN and the H in HALF. This unimportant mint-made feature has no effect on the eye appeal or the technical grade of this outstanding Superb Gem. Pastel olive-gold, chestnut-tan, slate-gray, and plum patina graces unmarked fields and strong devices. Population: 84 in 67 (10 in 67+), 0 finer (9/19). NGC ID# BYGP, PCGS# 9306

- 4143 1922 Grant No Star MS67 PCGS.** Ex: Poteat Collection. Faint wisps of golden color complement the overwhelmingly brilliant and satiny surfaces of this No Star Superb Gem. The strike is well-impressed with unimportant softness atop Grant's head and on parts of the tree canopy. Void of field marks. Population: 84 in 67 (10 in 67+), 0 finer (9/19). NGC ID# BYGP, PCGS# 9306

- 4144 1922 Grant With Star MS64 NGC.** The With Star variant is far scarcer than the No Star Grant Memorial halves, with a distribution of only 4,256 With Star coins versus 67,405 No Star pieces. This is a Choice Uncirculated example, with gleaming silver luster shining through a speckling of original, russet-brown toning. The strike is sharp for the issue, with visible definition of many hair strands above Grant's ear. Marks are limited to a few anonymous, tiny ticks. NGC ID# BYPP, PCGS# 9307

**1922 Grant With Star Half Dollar, MS65  
The Scarcer Variety of This Type**

- 4145 1922 Grant With Star MS65 PCGS.** A satiny With Star type coin, a certified Gem with light golden toning that welcomes flecks of olive-russet in the sheltered parts of the fields. The usual die striations in the fields are apparent, and a touch of strike weakness is a familiar sight on the high point of Grant's hair. Nonetheless, abrasions are largely absent. Finer With Star coins are seldom offered. NGC ID# BYPP, PCGS# 9307

**1928 Hawaiian Half Dollar, MS65  
Satiny and Mostly Brilliant**

- 4146 1928 Hawaiian MS65 PCGS.** This mostly brilliant Gem example of the key Hawaiian half dollar showcases satiny mint luster and splashes of coppery toning across Captain Cook's bust. A few small ticks under HAWAII and a reeding mark on the left reverse volcano are the only ones seen. Slight softness occurs on the indigenous warrior's hand, but the rest of this coin is strongly defined. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, Sharp MS66  
Gleaming, Lightly Toned Surfaces**

- 4147 1928 Hawaiian MS66 PCGS.** Unlike many of the classic commemorative issues, most of the 1928 Hawaiian halves were purchased by the general public, distributed by the Bank of Hawaii. The sale price of \$2 did not diminish a complete sellout of the popular coin. While many pieces were mishandled as a result, this is a pastel toned Premium Gem survivor with well-blended champagne-lilac and golden colors over smooth, satinlike surfaces. There is a lone abrasion in the reverse field above the chief's outstretched arm. The strike is especially sharp for this well-produced issue.

Ex: *Central States Signature (Heritage, 4/2002)*, lot 8046. NGC ID# BYGR, PCGS# 9309

- 4148 1935 Hudson MS66 PCGS. CAC.** Ex: The Poteat Collection. Delightful yellow-green, peach, and rose toning embraces this lustrous and attractively preserved example. A boldly struck representative of this low-mintage silver commemorative.

Ex: *William Spears Collections (Superior, 10/92)*, lot 829; *FUN Signature (Heritage, 1/2007)*, lot 7760. NGC ID# BYGS, PCGS# 9312

- 4149 1946 Iowa MS68 PCGS. CAC.** Ex: The Poteat Collection. Light pink-champagne patina in the centers melds into light yellow-gold at the rims on both sides of this stunning and equally matched piece. The surfaces approach perfection, as perusal with a high-powered loupe reveals no distractions of even the most minute sort. Population: 97 in 68 (15 in 68+), 0 finer. CAC: 51 in 68, 0 finer (9/19).

From *The Troy Wiseman Collection / Long Beach Signature (Heritage, 9/2006)*, lot 2730. NGC ID# BYGV, PCGS# 9316

- 4150 1918 Lincoln MS67 PCGS.** A spectacular Superb Gem representative of this popular silver commemorative, with sharply detailed design elements and lustrous, well-preserved surfaces, under delicate shades of pale gold, pink, and jade toning. PCGS has graded five numerically finer examples (9/19). NGC ID# BYGU, PCGS# 9320

- 4151 1920 Maine MS67 PCGS.** Pleasing highlights of lavender-gray and sea-green toning visit the impeccably preserved surfaces of this impressive Superb Gem, with vibrant satiny mint luster and well-detailed design elements on both sides. Population: 60 in 67 (8 in 67+), 0 finer (9/19). NGC ID# BYGY, PCGS# 9326

**1920 Maine Centennial Half, MS67**  
**Beautifully Preserved, Tied for Finest at PCGS**

- 4152 1920 Maine MS67 PCGS. CAC.** The Maine Centennial half dollar was a one-year commemorative, issued in 1920 from the Philadelphia Mint to celebrate the 100th anniversary of Maine's statehood. Distribution totaled 50,000 pieces, plus assay coins. This Superb Gem survivor displays softly frosted, golden-toned mint luster and an intricate strike. Eye appeal is spectacular and the originality of the surfaces is undeniable. No numerically finer coins are recognized by PCGS. Population: 60 in 67 (8 in 67+), 0 finer. CAC: 32 in 67, 0 finer (9/19). NGC ID# BYGY, PCGS# 9326

**1921 Missouri Half, MS66**  
**Dazzling Mint Luster**

- 4153 1921 Missouri MS66 PCGS.** The Poteat Collection. A brilliant Gem example with excellent luster and a fully detailed strike. A few die polishing lines (as struck) are present near the date. A couple of tiny ticks on the cheek may be all that separate this coin from an even higher grade. Population: 58 in 66 (4 in 66+), 0 finer (9/19). Ex: Tom Valos Collection / FUN Signature (Heritage, 1/2002), lot 8801. NGC ID# BYH2, PCGS# 9330

**1923-S Monroe Half Dollar, MS66+**  
**Surprisingly Scarce in High Grades**

- 4154 1923-S Monroe MS66+ PCGS. CAC.** The 1923-S Monroe half dollar had the third largest distribution for any commemorative issue to that point after the Columbian halves of 1892 and 1893. In all, 274,077 coins were released into public hands, many at face value. Remarkably few examples are as well-preserved at this Plus-graded Premium Gem, especially considering the high mintage. Frosty surfaces remain mostly brilliant with blushes of golden-orange and ice-blue border toning. There are 11 grading events higher at PCGS (9/19). NGC ID# BYH4, PCGS# 9333

**1938 New Rochelle Half Dollar, MS67**  
**Lively Luster, Spectacular Color, CAC**

- 4155 1938 New Rochelle MS67 NGC. CAC.** Dazzling luster radiates through the medium-intensity, iridescent multicolored toning that graces this Superb Gem New Rochelle commemorative. Impeccably preserved surfaces exhibit well defined motifs, further enhancing the coin's overall eye appeal. Struck to observe the founding of this downstate New York city by French Huguenots in the late 1600s, the New Rochelle is often available in high grades, but seldom with such extravagant coloration. CAC endorsed as much for its surface quality as for its stunning visual appeal. NGC ID# BYDX, PCGS# 9335

- 4156 1936 Norfolk MS68 PCGS. CAC.** Ex: Poteat Collection. This is an impressive Superb Gem with outstanding iridescent toning. An exceptional example and one of the finest certified. The CAC sticker speaks volumes. NGC ID# BYH5, PCGS# 9337

**1926-S Oregon Trail Half Dollar, MS68**  
**Vivid Multicolor Toning**

- 4157 1926-S Oregon MS68 NGC. CAC.** From a distribution of 83,055 pieces, the 1926-S Oregon Trail half dollar is seldom encountered in MS68 condition. This spectacular MS68 specimen exhibits sharply detailed design elements and virtually flawless lustrous surfaces, under attractive shades of lavender, lime-green, and amber toning. Eye appeal is terrific. Census: 22 in 68 (1 in 68+, 3 in 68★, 1 in 68+★), 0 finer (9/19). NGC ID# BYH7, PCGS# 9341

- 4158 1937-D Oregon MS68 PCGS. CAC.** Ice-blue and pale-lavender shades envelop this fully struck Oregon Trail half, with explicit definition from rim-to-rim including the top of the Conestoga wagon and the Indian's outstretched arm, left thumb, and fingers. Satiny mint luster glows from all angles on what is clearly an exceptional 1937-D example, rightfully endorsed by CAC. While 68 coins are granted the MS68 grade (including seven at MS68+), a mere two pieces are certified any finer at PCGS (8/19). NGC ID# BYHG, PCGS# 9347

**1915-S Panama-Pacific Half, MS66  
Scarce Issue in Finer Grades, CAC**

- 4159 1915-S Panama-Pacific MS66 PCGS. CAC.** Ex: The Poteat Collection. Brilliant and highly lustrous, this Premium Gem Panama-Pacific half dollar is remarkably well-preserved for the issue. The eagle's breast feathers are sharper than usually seen, and marks are limited to a few tiny ticks on the otherwise pristine obverse. Pan-Pac halves are typically toned to one extent or another, and abraded. This CAC-endorsed example shows only vague wisps of golden toning on its vibrant, satin-smooth surfaces. NGC ID# BYHP, PCGS# 9357

**1915-S/S Pan-Pac Half Dollar, MS66+  
High-End CAC Coin, Repunched Mintmark**

- 4160 1915-S/S Panama-Pacific, FS-502, MS66+ NGC. CAC.** The upper serif of a misplaced mintmark is seen just above the primary S on this *Cherry-pickers'* variety. This is a well-struck coin, brilliant and satiny with glistening mint luster. Only the faintest surface grazes are visible beneath a loupe. NGC has Plus-graded only seven coins in this grade, and finer pieces are scarce (8/19). NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357

- 4161 1937 Roanoke MS67+ PCGS. CAC.** This Plus-graded Superb Gem exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces radiate vibrant mint luster, under delicate shades of lavender and lime-green toning. PCGS has graded 30 numerically finer examples (9/19). NGC ID# BYHW, PCGS# 9367

- 4162 1926 Sesquicentennial MS65 PCGS. CAC.** Ex: Poteat Collection. The Sesquicentennial half is one of the best-known condition rarities among classic commemoratives, and any Gem commands a hefty sum at auction. The coin offered here is far from a run-of-the-mill MS65. Each side displays surprisingly strong luster beneath rich greenish-gold patina. Aqua accents appear around the reverse periphery. The obverse portraits are surprisingly clean, and the inscription on the bell is more legible than usual. PCGS has certified only 14 finer representatives, as of (9/19).  
Ex: *FUN Signature* (Heritage, 1/2008), lot 2406. NGC ID# BYJ4, PCGS# 9374

- 4163 1926 Sesquicentennial MS65+ PCGS. CAC.** The 1926 Sesquicentennial half dollar enjoyed a substantial distribution of 141,120 pieces, but the issue is definitely rare in grades above the MS65 level. This Plus-graded Gem exhibits well-detailed design elements and well-preserved, lustrous surfaces, under shades of golden-brown and lavender-gray toning. PCGS reports just 14 numerically finer examples. Population: 28 in 65+, 14 finer. CAC: 95 in 65, 6 finer (8/19). NGC ID# BYJ4, PCGS# 9374

- 4164 1926 Sesquicentennial MS65+ PCGS. CAC.** A Plus-graded Gem from a distribution of 141,120 pieces, this coin exhibits well-detailed design elements and well-preserved surfaces, under shades of lavender-gray and sea-green toning. Vibrant mint luster shines through the patina. PCGS has graded 14 numerically finer examples (9/19). NGC ID# BYJ4, PCGS# 9374

**1935 Spanish Trail Half, MS67  
Conditionally Challenging**

- 4165 1935 Spanish Trail MS67 PCGS. CAC.** Ex: The Poteat Collection. The Spanish Trail has always been a collector favorite with its Southwestern design and lore of the Old Spanish Trail. But much of the charm of the coin also leads to the problem inherent with locating a high grade piece, i.e., finding a coin that is not extensively abraded in the wide-open fields of the design. Unlike other commemorative designs, there simply is nowhere for an abrasion to hide on this coin. This piece is remarkably clean overall with no mentionable abrasions on either side. The surfaces are toned an even light golden and this patina does nothing to impede the impact of the coin's satiny mint luster.  
Ex: *Central States Signature* (Heritage, 1/2001), lot 6996. NGC ID# BYJ5, PCGS# 9376

**1935-D Texas Half Dollar, MS68  
Lovely Eye Appeal, Exceptional Preservation**

- 4166 1935-D Texas MS68 NGC.** The design for the Texas Centennial half dollar by Pompeo Coppini is one of the more elaborate ones in the classic commemorative series. Dusky violet and golden patina drapes the obverse of this Superb Gem, with elements of powder-blue interspersed. The reverse is brighter with more pronounced tones around the borders. Census: 17 in 68 (3 in 68★), 0 finer (9/19). NGC ID# BYJC, PCGS# 9383

**1946-D Booker T. Washington Half, MS67★  
Spectacular Color, CAC Endorsed**

- 4167** 1946-D Booker T. Washington MS67★ NGC. CAC. The 1946-D in the MS67★ grade is many times more elusive than the 1946 Philadelphia Mint issue in the same grade — expectedly so, because the net distribution was only one-fifth as many coins. This sharply struck BTW boasts splendid, deep cherry-red, violet, and gold hues over both sides — an astonishing and vivid two-sided color palette, certainly unequalled among other Superb Gems. Census: 4 in 67+, 21 in 67★, 3 in 67+★, 12 finer. CAC: 71 in 67, 6 finer (8/19). Ex: ANA Signature (Heritage, 7-8/2008), lot 2592. NGC ID# BYJT, PCGS# 9405

- 4168** 1946-S Booker T. Washington MS67+ PCGS. CAC. Lemon-gold, green, blue, and violet toning covers the frosty, immaculately preserved surfaces of this Booker T. Washington half dollar. The original patina and vibrant luster deliver terrific visual appeal. PCGS reports five higher grading events (9/19). NGC ID# BYJU, PCGS# 9406

**1950-S Booker T. Washington Half, MS67+  
Among the Finest With CAC Recognition**

- 4169** 1950-S Booker T. Washington MS67+ PCGS. CAC. The 1950-S Booker T. Washington half dollar is scarce in Superb Gem condition. Of particular rarity are Plus-graded coins — there are only nine of them reported at PCGS. Moreover, CAC-approved pieces are highly sought-after. This coin is Plus graded and CAC approved. Pearl-white interiors exhibit satiny mint luster and a bold strike, yielding to lemon-gold and russet-lilac border hues. The peripheral toning is more prominent around the obverse. Population: 80 in 67 (9 in 67+), 0 finer. CAC: 66 in 67, 0 finer (9/19). NGC ID# BYK8, PCGS# 9422

**1952 Washington-Carver Half, MS67  
Remarkable Preservation and Toning**

- 4170** 1952 Washington-Carver MS67 PCGS. Ex: The Poteat Collection. Originally sold in our 2007 FUN Sale, the coin was described at that time as: "Much like the extraordinary Bruce Scher specimen in our February, 2005 Long Beach Sale (which sold for an astounding \$17,250), this Superb Washington-Carver half dollar combines dynamic luster and strong central with breathtakingly beautiful emerald-green, purple-rose, and yellow-golden iridescence. Yes, over 2 million pieces were originally struck, but, in addition to its scarcity at this grade level, the odds of aligning all the ingredients into an aesthetic masterpiece are long indeed." Population: 33 in 67 (8 in 67+), 1 finer (9/19). Ex: FUN Signature (Heritage, 1/2007), lot 1158. NGC ID# BYL3, PCGS# 9434

**1936 Wisconsin Half Dollar, MS68  
Scarce This Fine, None Finer at PCGS**

- 4171** 1936 Wisconsin MS68 PCGS. A conditionally rare MS68 example of the 1936 Wisconsin half dollar, among the finest pieces at PCGS with only one coin graded higher at NGC (8/19). This piece is sharp — an ideal combination of quality and eye appeal for type purposes. Luster is the usual satiny sheen, and there is a veil of light champagne toning over each side that yields iridescent hues when viewed beneath a loupe. Population: 45 in 68 (9 in 68+), 0 finer (8/19). NGC ID# BYKU, PCGS# 9447

## COMMEMORATIVE GOLD

### 1903 Jefferson Gold Dollar, MS67+ A Louisiana Purchase Expo Commemorative Prohibitively Rare Finer

- 4172 1903 Louisiana Purchase, Jefferson Gold Dollar MS67+ NGC.** This coin is one of the highest-graded Louisiana Purchase, Jefferson type gold dollars typically available to collectors. NGC lists four MS68 coins finer (one of which is Star designated), although there may not be a measurable difference in actual quality between some of those coins and this piece. This is one of four MS67+ examples at NGC. The surfaces yield frosted yellow-gold luster and are pristine, at least as far as this cataloger's eye can determine. A sharp strike complements the appearance, creating what is visually as fine as it is technically. An ideal Registry coin. Census: 99 in 67 (4 in 67+, 2 in 67★), 4 finer (9/19). NGC ID# BYLD, PCGS# 7443

- 4173 1915-S Panama-Pacific Gold Dollar MS66 PCGS. CAC.** Soft, satiny luster shimmers when rotated beneath a light on this Premium Gem Pan-Pac gold dollar. The strike is sharp, and neither side exhibits distractions. A minority of MS66 coins are CAC endorsed, and just 20 higher-grade pieces carry the coveted green label (9/19). NGC ID# BYLH, PCGS# 7449

### 1915-S Panama-Pacific Quarter Eagle Satiny Near-Gem Type Coin

- 4174 1915-S Panama-Pacific Quarter Eagle MS64 PCGS.** The usual satin mint luster illuminates this near-Gem Pan-Pac quarter eagle, and the design elements show good definition. A loupe on the fields reveals the expected swirling die polish lines, although post-striking abrasions are few and minor. The Pan-Pac issue is a popular type coin for collectors. In MS64, this piece is pleasing and shoulder interest many classic commemorative enthusiasts. NGC ID# BYLP, PCGS# 7450

- 4175 1917 McKinley Gold Dollar MS66 PCGS. CAC.** Medium yellow-gold luster adorns both sides of this satiny Premium Gem. The details are mostly well-struck, though just a touch of softness is noted in the center of the reverse. The surfaces are largely free of even minor abrasions. A high-end McKinley Memorial dollar.  
*Ex: Central States Signature (Heritage, 4/2014), lot 6037, which realized \$2,350. NGC ID# BYLL, PCGS# 7455*

### 1917 McKinley Gold Dollar, MS67 Gleaming Orange-Gold Example

- 4176 1917 McKinley Gold Dollar MS67 PCGS.** The estimated distribution for the 1917 McKinley gold dollar, per the *Guide Book*, was 5,000 coins compared to an estimated 10,000 pieces for the 1916. To be sure, this is the scarcer issue in high grades. Gleaming orange-gold surfaces show accents of rose. Both sides are impeccably preserved, and just a hint of softness occurs atop McKinley's head. Encapsulated in a green label holder. Population: 96 in 67 (13 in 67+), 0 finer (9/19). NGC ID# BYLL, PCGS# 7455

- 4177 1922 Grant Gold Dollar, No Star, MS66 PCGS. CAC.** A well-struck No Star type coin, showing satiny lemon-gold luster with tendencies toward peach-orange in the centers. No abrasions are seen and eye appeal is pleasing. Higher-grade examples — particularly with CAC recognition — are scarce. NGC ID# BYLN, PCGS# 7458

- 4178 1922 Grant Gold Dollar, No Star, MS66+ PCGS. CAC.** The undisturbed caramel-gold surfaces of this Grant No Star gold dollar teem with luster. Swirling die polish lines appear under a loupe, which also shows no discernible contact. The strike is sharp throughout.

*Ex: Philadelphia Signature (Heritage, 8/2012), lot 4291, which realized \$3,172.50. NGC ID# BYLN, PCGS# 7458*

### 1922 Grant Gold Dollar, MS67 Superb No Star Type Coin

- 4179 1922 Grant Gold Dollar, No Star, MS67 NGC.** A beautifully preserved No Star type coin, worth every one of its 67 grade points from NGC. Satiny apricot-gold and peach-orange luster glows amid impressively well-struck design elements. There is not a single notable abrasion. The 1922 Grant Memorial dollar without the small star in the right obverse field is scarce in this grade, and there are only nine numerically finer pieces reported at NGC (9/19). NGC ID# BYLN, PCGS# 7458

- 4180 1922 Grant Gold Dollar, With Star, MS66 PCGS.** This piece is sharply struck and lustrous, showing rich orange-gold surfaces that are devoid of discernible contact marks. Eye appeal is outstanding for the grade. An excellent With Star type coin, housed in a green label holder. NGC ID# BYPS, PCGS# 7459

- 4181 1922 Grant Gold Dollar, With Star, MS66+ NGC.** This popular gold classic commemorative claims a distribution of 5,016 coins, same as the No Star variant. Frosty wheat-gold surfaces showcase strongly struck devices and minimal microscopic ticks. A small coppery alloy spot occurs at the bridge of Grant's nose. NGC ID# BYPS, PCGS# 7459

**1922 Grant Gold Dollar, MS67  
Gorgeous With Star Variant**

- 4182** 1922 Grant Gold Dollar, With Star, MS67 PCGS. Rich golden-orange color melds with lighter areas of peach and lavender throughout this gorgeous Grant With Star gold dollar. The design is fully impressed without a mark of note. Housed in a green label holder. Five submissions are graded numerically finer at PCGS (9/19). NGC ID# BYPS, PCGS# 7459

**MODERN BULLION COINS**

- 4183** 1991 Quarter-Ounce Gold Eagle MS70 PCGS. An exquisite strike and highly lustrous rich-gold color adorn the flawless surfaces of this perfect Mint State quarter-ounce gold eagle. The Philadelphia Mint struck a mere 36,100 quarter-ounce gold eagles dated MCMXCI, the last year that Roman Numerals appeared on the gold eagles, and less than the number of proofs produced for this date. PCGS has certified just 43 MS70 examples (8/19). NGC ID# 26M7, PCGS# 9850
- 4184** 1995 Silver Eagle MS70 PCGS. This spectacular MS70 Silver Eagle exhibits sharply detailed design elements throughout and the technically perfect surfaces radiate vibrant mint luster from both sides. A few delicate highlights of pale gold toning enhance the outstanding eye appeal. NGC ID# 26JN, PCGS# 9886
- 4185** 2009 Modern "Humbert Commemorative" Octagonal Gold Piece, Gem Proof Ultra Cameo NGC. Struck from two and a half troy ounces of 999.9 Fine "Pure California Gold." This piece is modeled after the famous fifty dollar "slugs" produced by United States Assayer of Gold Augustus Humbert (Kagin-11). Rich yellow-gold surfaces feature pronounced field-device contrast, accounting for the Ultra Cameo designation.

**TERRITORIAL GOLD**

**1849 Norris, Gregg, & Norris Five Dollar  
Reeded Edge, K-4, XF Details**

- 4186** 1849 Norris, Gregg, & Norris Five Dollar, Reeded Edge — Mount Removed — NGC Details. XF. K-4, R.4. The edge is reeded on this variety, although the present coin shows the remnants of a jewelry mount at 12 o'clock. Detail is pleasing for the grade with little wear, although both sides are moderately abraded with evidence of cleaning beneath the otherwise pleasing olive-gold and orange patina. Listed on page 400 of the 2020 Guide Book. NGC ID# ANJE, PCGS# 10282

**S.S.C.A. RELIC GOLD MEDAL**

**'1855' Kellogg & Co. Fifty Dollar, Gem Proof  
S.S. Central America Commemorative Restrike**

- 4187** (2001) SSCA Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Proof PCGS. Struck from Kellogg & Humbert gold recovered from the S.S. Central America shipwreck. Contains 1,309 grains of .887 fine gold. A deeply mirrored proof, struck on September 12, 2001. Each side has bright yellow-gold color and appears almost flawless. There are no copper-colored spots as are seen on some other SSCA relic gold medals. Highly eye-appealing. NGC ID# 32DS, PCGS# 10358

**CALIFORNIA FRACTIONAL GOLD**

- 4188** Undated Liberty Round 25 Cents, BG-222, R.2, MS67 NGC. Die State II. A fairly early die state without an obverse cud at 6:30. BG-222 is among several varieties of undated but early Liberty Head quarters issued by Antoine Louis Nouizillet. This high-grade example has a good strike and pristine butter-gold surfaces. Census: 2 in 67, 0 finer (9/19). NGC ID# 2BHU, PCGS# 10407

**1853 Octagonal Liberty Half Dollar, MS63  
BG-302, 'Peacock' Reverse**

- 4189** 1853 Octagonal Liberty, Peacock Reverse, 50 Cents, BG-302, Low R.4, MS63 PCGS. Breen-Gillio Die State II, with die rust in the fields. The so-called "Peacock" reverse, with rays behind the eagle that give the illusion of peacock feathers. This is a collectible Period One octagonal half dollar struck by Frontier, Deviercy & Co. Each side is well-defined with reflective fields and bright yellow-gold color. NGC ID# 2BJ7, PCGS# 10422

**1853 Octagonal Half Dollar, MS63  
Popular 'Peacock' Variety, BG-302**

- 4190** 1853 Octagonal Liberty, Peacock Reverse, 50 Cents, BG-302, Low R.4, MS63 PCGS. Period One fractional gold (1852-1857) often circulated during the “small change” starved California Gold Rush. A glory of rays behind the peacock-like eagle distinguishes this octagonal half dollar, and F.D. behind Liberty’s broad head confirms the Frontier, Deviercy & Co. issue. BG-302 represents one of the most popular types in the series. This Select Uncirculated piece displays deep-gold color — a scarce middle die state (Breen-Gillio Die State II), with light die rust in the right obverse field, but without a rim cud at 3:30. Population: 29 in 63 (1 in 63+), 16 finer (9/19). NGC ID# 2BJ7, PCGS# 10422

**1856 Liberty Octagonal Half Dollar, MS64  
BG-307, Rare Period One Variety**

- 4191** 1856 Liberty Octagonal 50 Cents, BG-307, High R.5, MS64 NGC. Die State II. A rare Period One octagonal half dollar by Frontier, Deviercy & Co. NGC has only certified 15 examples of this issue in all grades, the finest being a lone Gem. This is one of two NGC coins in MS64. The dies are lapped, most obviously on the obverse, although most details of the portrait remain. Satiny yellow-gold luster includes some reflectivity in the fields, but BG-307 is typically not as prooflike as other, later California fractionals. NGC ID# 2BJE, PCGS# 10427

- 4192** 1872 Washington Octagonal 25 Cents, Baker-503, BG-722, Musante GW-818, Low R.4, MS64 PCGS. A popular Washington Head issue struck by Frontier & Bellemere. This near-Gem is prooflike and well-struck with original honey-gold coloration. Eye appeal is pleasing. Housed in an old green label holder. Population: 38 in 64, 70 finer (9/19). NGC ID# 2BN4, PCGS# 10549

**1872 Washington Octagonal Quarter Dollar  
Baker-503, BG-722, MS67**

- 4193** 1872 Washington Octagonal 25 Cents, Baker-503, BG-722, Low R.4, MS67 PCGS. A popular Period Two Washington Head issue struck by Frontier & Bellemere. This issue is moderately plentiful overall, but it is scarce in Gem and finer condition, and just three pieces are graded MS67 with none higher, all at PCGS (9/19). This piece displays pristine greenish-gold surfaces and a bold strike. Frosty original luster glistens on the portrait and wreath, while the fields are modestly reflective. NGC ID# 2BN4, PCGS# 10549

**1881 Indian Octagonal 25 Cents  
BG-799O, MS67 Deep Prooflike  
Among the Finest Certified**

- 4194** 1881 Indian Octagonal 25 Cents, BG-799O, Low R.4, MS67 Deep Prooflike NGC. A Period Two Christopher Mohrig issue, plentiful overall but conditionally rare at the Superb Gem Deep Prooflike level. This is among the finest pieces certified, with no Deep Mirror Prooflike coins listed yet at PCGS in this grade (8/19). Both sides are well-struck and deeply contrasted with mirrored fields. Eye appeal is outstanding. NGC ID# 2BS3, PCGS# 910641 Base PCGS# 10641

**1880 Indian Octagonal 25 Cents, BG-799X  
MS67 Deep Prooflike  
Sole-Finest Certified**

- 4195** 1880 Indian Octagonal 25 Cents, BG-799X, R.3, MS67 Deep Prooflike NGC. One of the so-called “Aztec Heads,” with the CAL reverse and flat-topped A’s in the denomination. These diminutive quarters are attributed to F. H. Noble of Chicago by Breen-Gillio. Plated in 9k gold, this Superb Gem example shows the wreath bow crudely recut. Deeply mirrored fields are for all purposes devoid of marks or other distractions — the finest example certified by either service. Census: 1 in 67 Deep Mirror Prooflike, 0 finer (9/19). PCGS# 910650

- 4196 1859 Liberty Round 50 Cents, BG-1002, High R.4, MS67 Prooflike PCGS.** A sharply detailed round Liberty half dollar, the 11 stars obverse variety, with the edge reeded after striking, BG-1002. This spectacular Superb Gem offers deeply reflective yellow-gold surfaces with no mentionable distractions. This is the only PCGS-certified example in this numeric grade and the sole-designated Prooflike coin in any grade. No examples are finer at either PCGS or NGC. Population: 1 in 67 Prooflike, 0 finer (8/19).  
*Ex: Central States Signature (Heritage, 4/2014), lot 7185, which realized \$3,818.75. PCGS# 784972 Base PCGS# 10831*

**1871 Round Liberty Head Half Dollar  
BG-1029, MS66 Deep Mirror Prooflike**

- 4197 1871 Liberty Round 50 Cents, BG-1029, High R.4, MS66 Deep Mirror Prooflike PCGS.** A challenging Period Two round half dollar struck by California Jewelry Co. Most examples of this issue grade no finer than MS63 or MS64. Above that level there are just two pieces reported at the grading services: an MS66 Deep Prooflike coin at NGC and an MS66 Deep Mirror Prooflike coin at PCGS. One wonders if these two coins are one and the same. The PCGS piece is the only Deep Mirror Prooflike BG-1029 example thus far designation DMPL at that service (9/19). It shows liquidlike mirroring in the fields and bright yellow-gold color. Well-struck devices show frosty luster. PCGS# 787432

**1874 Indian Round Half Dollar  
BG-1072, MS67 Prooflike**

- 4198 1874 Indian Round Half Dollar, BG-1072, R.6, MS67 Prooflike NGC.** The No CAL reverse and triangular-shaped ribbon confirm the rare BG-1072 attribution. This back-dated Round Indian half dollar by San Francisco maker Christopher Ferdinand Mohrig features pronounced field-device contrast and rich yellow-gold color. The portrait and wreath are strongly detailed, and contact is unseen. PCGS# 680360 Base PCGS# 10901

**1868 Indian Round Half Dollar, MS63 Prooflike  
BG-1073, Well-Preserved Example**

- 4199 1868 Indian Round 50 Cents, BG-1073, High R.7, MS63 Prooflike PCGS.** Dated 1868, but actually issued in the 1881-83 period and backdated by Christopher Ferdinand Mohrig. This Select Uncirculated Prooflike example is weak as usual at the central reverse (see the Breen-Gillio plate coin). Vibrant yellow-gold surfaces display pale-orange accents for excellent eye appeal. This scarce round half Period Two variety was discovered by David or Susan Doering circa 1968-80. NGC ID# 28YV, PCGS# 710902

**1874 Octagonal Liberty Dollar, MS62  
BG-1110, Important Series Rarity**

- 4200 1874 Liberty Octagonal 1 Dollar, BG-1110, High R.7, MS62 PCGS.** A rare octagonal dollar, small head of Liberty, arrowheads flank star below DOLLAR. Attributed in Breen-Gillio to Herman J. Brand, San Francisco. A rare issue, with only six or seven pieces known according to our research. We have seen just one finer example, an MS63 Prooflike NGC coin from the Elbert Henry Gary Collection/FUN Signature (Heritage, 1/2016), lot 6881, which realized \$4,935. This MS62 PCGS example is of comparable quality, housed in an old green label PCGS holder, with original sun-gold prooflike surfaces and sharply struck motifs. NGC ID# 2C39, PCGS# 10921

**1874 BG-1124 Indian Octagonal Dollar  
A California Gold Prooflike Gem**

- 4201 1874 Indian Octagonal 1 Dollar, BG-1124, High R.4, MS65 Prooflike NGC.** The bust point and first star are both repunched, and nearly touch. As usual, the reverse shows 45° counterclockwise rotation when viewed as coin turn, and the surfaces are fully prooflike. Few Gem examples exist of this popular octagonal dollar. Gleaming greenish-gold surfaces show attractive orange accents at the reverse margins. Census: 3 in 65 Prooflike, 1 finer (9/19). NGC ID# 2C3S, PCGS# 710935

**1875 Indian Octagonal Dollar, MS64  
BG-1125, Popular Mohrig Issue**

- 4202 1875 Indian Octagonal 1 Dollar, BG-1125, Low R.5, MS64 PCGS.** Breen-Gillio Die State II. Made by Christopher Ferdinand Mohrig, the renowned San Francisco jeweler. Both sides exhibit clash marks, while the reverse is struck from a shattered die with numerous intersecting die cracks and a pronounced cud above N in CALIFORNIA. The date slides downhill, and the devices are well-frosted against prooflike greenish-gold fields. The reverse is rotated 120° counterclockwise (medal turn). Housed in a previous generation green label holder. Population: 15 in 64, 4 finer (9/19). NGC ID# 2C3T, PCGS# 10936

**1871 Liberty Round Dollar, MS62  
BG-1204, Rare 'Nouizillet Head' Type**

- 4203 1871 Liberty Round Dollar, BG-1204, High R.5, MS62 PCGS.** This is a Robert B. Gray & Co. issue, successors to Antoine Louis Nouizillet. Nouizillet head with single bun, and a double bow on the reverse. The centers, as always, are weakly struck. Glittering prooflike fields surround the devices. This Liberty round dollar is well-struck for the issue, with both bow loops visible. Colorful iridescence gleams from the mirrored fields. Housed in a previous generation green label holder. Population: 12 in 62, 3 finer (9/19). NGC ID# 2C43, PCGS# 10949

**COINS OF HAWAII**

**1883 Hawaii Quarter, MS67  
Remarkable, CAC-Approved Example**

- 4204 1883 Hawaii Quarter MS67 PCGS. CAC.** A razor-sharp, frosty Superb Gem with CAC endorsement. Each side displays golden and sky-blue hues with occasional russet accents. Each side is essentially pristine, aside from a hair-thin scratch in the left obverse field near the second K in KALAKAUA. The 1883 Hawaii quarter is a rarity this fine, and only a single coin is reported numerically finer by either grading service. Population: 26 in 67 (3 in 67+), 1 finer. CAC: 20 in 67, 1 finer (8/19). NGC ID# 2C58, PCGS# 10987

**PATTERNS**

**1838 Gobrecht Half Dollar in Silver  
Judd-73 Restrike, PR61**

- 4205 1838 Half Dollar, Judd-73 Restrike, Pollock-77, R.5, PR61 PCGS.** A draped bust of Liberty faces left on the obverse, with a flying eagle dominating the reverse. Kneass was once believed to designed this pattern, but visual evidence points to Christian Gobrecht, since the face of Liberty bears a strong resemblance to her counterpart on the Liberty eagle, also introduced in 1838. Struck in silver with a reeded edge. Medallion alignment. The reverse is cracked in the usual places. Probably 50 to 60 pieces are known. This an all-brilliant example of this popular, early pattern. NGC ID# 296N, PCGS# 11288

**1854 Reduced Size Cent in Bronze  
Judd-160, PR66 Brown**

- 4206 1854 One Cent, Judd-160, Pollock-187, R.4 PR66 Brown NGC.** These patterns were a part of the Mint's experiments with a smaller diameter cent. The design is similar to the contemporary large cent but omits the stars and shrinks the wreath. Struck in copper or bronze with a plain edge. Very few examples of this pattern have undergone metallurgical testing to determine whether it is copper or bronze composition. The difference is not readily apparent to the unaided eye. The fields are brightly reflective and each side displays rich sea-green patina with faint traces of red intermixed. NGC ID# 5WWB, PCGS# 11659

1856 Copper-Nickel Half Cent  
Judd-177, PR64

- 4207** 1856 Half Cent, Judd-177, Pollock-205, R.5 PR64 PCGS. CAC. Regular dies trial striking for the half cent. Struck in copper-nickel with a plain edge. These trial pieces provided Mint personnel with the opportunity to gain experience striking coins in copper-nickel composition in preparation for the production of the small "white cents" beginning with the 1856 Flying Eagle cents. Quite a number of these are known in circulated grades, so it is probably the case that they were simply released into circulation after production and inspection. This example displays significant red color and only vaguely resembles a copper-nickel cent, the main tip-off is the proof finish. Nicely mirrored in the fields and slightly mellowed. NGC ID# 29AV, PCGS# 11777

1859 Longacre-Designed Half Dollar in Silver  
Judd-237, PR65

- 4208** 1859 Half Dollar, Judd-237, Pollock-293, R.4, PR65 PCGS. The Longacre-designed "French Head of Liberty," facing right with laurel and vine in her hair. A ribbon below the bust is inscribed LIBERTY, with UNITED STATES OF AMERICA around, and the date below. The reverse displays the agricultural wreath of the Seated dime, resized to appropriate scale, around the denomination HALF DOLLAR. Struck in silver with a reeded edge. Pale golden-rose toning is seen over each side with brightly reflective fields. NGC ID# 29CH, PCGS# 11966

1863 With Motto Half Dollar in Silver  
Judd-338, PR63

- 4209** 1863 Half Dollar, Judd-338, Pollock-410, R.5, PR63 NGC. Similar to the adopted design, but the motto reads GOD OUR TRUST set on a scroll above the eagle's head. Struck in silver with a reeded edge. Seven sets are believed to have been originally struck in 1863, with the remaining 18 or so pieces known being restrikes that were sold to collectors. The obverse is heavily toned with breaks in the color over the high points; the reverse displays significant brilliance with irregular splashes of deep patina on that side. NGC ID# 29FR, PCGS# 60500

1866 Washington Five Cents in Bronze  
Judd-472, PR61 Brown

- 4210** 1866 Five Cents, Judd-472, Pollock-563, Low R.7, PR61 Brown PCGS. A bust of George Washington faces right on the obverse, the legend IN GOD WE TRUST above and the date below. A wreath of laurel on the reverse encloses a large broad numeral 5 with the legend UNITED STATES OF AMERICA around. Struck in bronze with a plain edge. USPatterns.com estimates "a dozen or fewer known" of this copper/bronze composition, and we tend to think that is a generous estimate. We can find only a few examples offered over the past 25 years. The surfaces on this piece show even, dark brown patina with essentially no reflectivity evident in the fields. PCGS# 60668

1869 Standard Silver Dime in Copper  
Judd-710, Beautifully Toned PR64 Brown

- 4211** 1869 Standard Silver Ten Cents, Judd-710, Pollock-789, Low R.7, PR64 Brown PCGS. Standard Silver issue with only one star at the front of Liberty's head on the obverse. The reverse has 10 CENTS in the center, surrounded by a wreath of oak and laurel with STANDARD SILVER 1869 around the margin. Struck in copper with a reeded edge. About a dozen pieces are known in this composition and with a reeded edge. Pieces were also produced in silver and aluminum, with both reeded and plain edges. The surfaces display muted reddish-brown color with highly appealing multicolor toning seen on the obverse. NGC ID# 29RR, PCGS# 60935

1869 Standard Silver Half in Aluminum  
Judd-746, PR63

- 4212** 1869 Standard Silver Half Dollar, Judd-746, Pollock-828, Low R.7, PR63 NGC. Standard Silver design with Liberty wearing a cap with two stars and scroll below, the reverse reads STANDARD SILVER 1869 around the rim with 50 CENTS in the center of an oak and laurel wreath. Struck in aluminum with a reeded edge. No more than six of these Judd-746 patterns are extant. Signs of slight oxidation are spread evenly over each side, but more densely concentrated on the obverse. Nicely mirrored fields. NGC ID# 29SW, PCGS# 60974

1870 Standard Silver Dime in Silver  
Judd-825, PR64

- 4213** 1870 Standard Silver Ten Cents, Judd-825, Pollock-915, Low R.7, PR64 PCGS. A left-facing seated Liberty holds a shield at her right side and an olive branch in her left hand. A scroll inscribed with LIBERTY flows across the shield, and a crudely fashioned cap and pole are suspended in the background. UNITED STATES / OF AMERICA occupies the periphery with the date in the exergue. On the reverse 10 / CENTS is within an open wreath of cotton and corn, tied with a bow at the bottom. STANDARD in small letters is centered above the wreath. The reverse rim is unusually wide. Struck in silver with a reeded edge. Crisply struck and essentially brilliant with exemplary field reflectivity. A small spot is noted at 12 o'clock and a dark fleck on the right obverse field is accompanied by trivial hairlines.

Ex: Long Beach Signature (Heritage, 9/2015), lot 5001. NGC ID# 29V2, PCGS# 61069

1870 William Barber Quarter in Copper  
Judd-885, PR65 Red and Brown

- 4214** 1870 Quarter Dollar, Judd-885, Pollock-983, R.6-7, PR65 Red and Brown PCGS. The obverse depicts a William Barber portrait of Liberty seated left with thirteen stars around the periphery and the date 1870 below. The reverse is the same used to produced regular issue 1870 Seated quarters. Struck in copper with a plain edge. Struck in silver, copper, and aluminum. There are fewer than a dozen pieces known in copper and with a plain edge. Significant portions of mint red remain on each side with slight mellowing in the fields. NGC ID# 29WT, PCGS# 71129

1870 Standard Silver Quarter in Copper  
Judd-891, PR64 Brown

- 4215** 1870 Standard Silver Quarter Dollar, Judd-891, Pollock-990, High R.7, PR64 Brown PCGS. A bust of Liberty wears a cap ornamented with three stars and faces right. The legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse reads 25 CENTS 1870 in the center and is surrounded by an agricultural wreath. Struck in copper with a plain edge. USPatterns.com estimates that a half dozen examples are known of this variant, but that estimate may be on the high side. We haven't handled an example of the Judd-891 since 1995. This is a remarkably bright, glossy piece with pronounced blue-green toning over each side and a faint tinge of red surrounding the devices. PCGS# 61135

1870 Standard Silver Half in Silver  
Judd-939, Pollock-1052, PR65

- 4216** 1870 Standard Silver Half Dollar, Judd-939, Pollock-1052, R.5, PR65 PCGS. The obverse displays a bust of Liberty facing right and wearing a cap ornamented with two stars. A ribbon crosses Liberty's shoulder with the word LIBERTY inscribed in incuse letters. The legend UNITED STATES OF AMERICA is around the periphery, and the motto IN GOD WE TRUST is inscribed on a scroll below. The reverse depicts the denomination 50 CENTS and the date 1870 within a wreath of corn and cotton. The word STANDARD is at the top. This is the Pollock subvariety with the cap beneath the second S in STATES and the word LIBERTY in incuse lettering. Struck in silver with a reeded edge. The surfaces are almost untuned with deeply reflective mirrors in the fields. NGC ID# 29YA, PCGS# 61185

1878 Goloid Metric Dollar  
Judd-1563, PR63

- 4217 1878 Goloid Metric Dollar, Judd-1563, Pollock-1754, Low R.6, PR63 PCGS. Liberty faces left, with cap adorned with wheat ears, cotton leaves and bolls, eponymously inscribed in incuse letters. There are 13 stars ringing the rim, with the Latin motto above and date below. On the reverse the center reads GOLOID / METRIC / 1—G. / 16.1—S. / 1.9—C. / GRAMS 14.25. within a circle of 38 stars. UNITED STATES OF AMERICA is above, 100 CENTS below. Allegedly struck in goloid alloy, but possibly silver as metallurgical analysis has not been conducted on these pieces, with a reeded edge. In spite of the reddish-yellow patina seen across each side, the underlying mirrors in the fields remains bright and greatly enhances the vibrancy of this piece. The obverse especially shows numerous tiny (minute) planchet flakes scattered about. NGC ID# 2AFF, PCGS# 61925

1883 Liberty Nickel in Nickel  
Judd-1710, PR65 Cameo

- 4218 1883 Liberty Head Five Cents, Judd-1710, Pollock-1914, R.5, PR65 Cameo PCGS. CAC. The obverse is similar to the regular issue 1883 Liberty nickel, but UNITED STATES OF AMERICA substitutes for 13 stars around the periphery. The reverse reads 50 N. / 50C. within a wreath of corn and cotton, FIVE above and CENTS is below. Struck in nickel with a plain edge. Several compositions of nickel are known, but this remains an understudied area. A total of two or three dozen nickel examples are believed extant. The surfaces initially present as brilliant but closer examination reveals slight ice-blue and rose patina. The fields are deeply mirrored with thick mint frost over the devices, the combination producing the cameo effect. PCGS# 389317

1896 One Cent Pattern in Aluminum  
Judd-1769, PR63

- 4219 1896 One Cent, Judd-1769, Pollock-1985, High R.6, PR63 PCGS. The obverse displays a shield with 13 stripes, with the motto E PLURIBUS UNUM above and the date 1896 below. There are 13 stars at the border arranged seven left and six right, and the border is beaded. On the reverse, the denomination 1 CENT is centered within a curved olive sprig, with the legend UNITED STATES OF AMERICA surrounding both. The reverse also has a beaded border. Struck in one of four different compositions of aluminum, with a plain edge. At least a dozen examples are known in aluminum. The 1896 patterns remain an understudied area of 19th century numismatics. Bright overall with significant portions of oxidation at 7 and 9 o'clock on the obverse rim. Ex: Baltimore Signature (Heritage, 3/2009), lot 2486. NGC ID# 3AVL, PCGS# 62223

1759 (1999) Martha Washington Dollar in Copper-Zinc  
Judd-2185a, MS66  
Experimental Strike for the Blind

- 4220 1759 (1999) Martha Washington Dollar, Judd-2185a, Pollock-Unlisted, MS66 NGC. 7.94 grams. The Martha Washington design, previously used to test clad coinage circa 1965, was revived in 1999 to test "golden" alloys for the pending Sacagawea dollar. The importance of this particular piece is it was part of several experiments for the blind, as seen by six notches on the border of each side. The stated composition for this pattern is 74.19% copper, 23.26% zinc. Plain edge. Each side is bright and lustrous with undiminished golden color that shows a slight hint of rose color intermixed. This is the first example we have seen of this experimental coin for the blind. It is also the plate coin used on USPatterns.com, the images just sent to Saul and Andy for their website in July 2019. We do not know the scarcity yet of this particular pattern.

## PHILIPPINES

### 1905 Philippines Fifty Centavos, PR65 Only 471 Proofs Minted

- 4221** 1905 Philippines 50 Centavos PR65 NGC. The 1905 proof fifty centavos piece is the lowest-mintage proof of this denomination struck from 1903 to 1908: just 471 pieces. Gem examples are scarce. This piece displays intricate sharpness and reflective fields. The devices are satiny and unabraded. Accents of lilac and olive-russet toning appear on each side, mainly in the margins and tucked close to the edge of the central devices. NGC ID# 2C9W, PCGS# 90369

## ERROR

### 1896 Indian Cent, AU53 Three Rotated Strikes In Collar Final Strike Off Center 60%

- 4222** 1896 Indian Cent — Quadruple Struck, Final Strike Off Center — AU53 PCGS. The PCGS holder says “triple struck,” but we count four. The first strike was normal, and the piece rotated a few degrees counterclockwise in the collar, and was struck again, then yet again. The coin was then struck a fourth time, approximately 60% off center toward 10 o’clock and rotated a bit clockwise relative to the first, second, and third strikes. Both sides show evidence of all strikes. A search of our archives fails to show a multiply struck Indian cent with such an impressive and spectacular Mint error. Remarkably, this coin shows signs of circulation before being put aside as something unusual (or perhaps it was a pocket piece).

## COUNTERSTAMPS

- 4223** 1805 O-104, T-10, Low R.5, VG10 PCGS Host Coin. SMITH & GRANT Counterstamp, Brunk S-655, Rulau-E KY-30. High R.7, XF Counterstamp. Tompkins Die State 1/1. The O-104 Draped Bust half dollar is scarce in its own right — an R.5 variety in the early die state. This example shows the SMITH & GRANT counterstamp as a well-made ribbonlike depression with raised letters, done in the style of a silversmith. Richard Ewing Smith and William Grant were Louisville, Kentucky silversmiths and jewelers. Their partnership was short lived, lasting from 1827 to 1831, after which Smith continued the business. It is possible this half dollar was counterstamped when Smith was the sole proprietor of the business.

- 4224** Three Classic Counterstamped Coins, Ex: John J. Ford Jr. Collection. This is an excellent group of three “classic” counterstamps, all in their original NGC holders from the John J. Ford Jr. Collection. (1829-30) H. SCHOONMAKER Bar Punch Rulau E-NY-786, Brunk S-196 on a 1783 Mo Two Reales. Good 4 Host Coin, XF Counterstamp. Misidentified and misattributed in the Ford sale, and in the supporting references. Identified as W.H. SCHOONMAKER, a New York dealer in arms, pistols, rifles, militaria, and silverplated fancy goods, but this is incorrect. The counterstamp is that of H. SCHOONMAKER, a Bergen County, New Jersey silversmith who used the identical bar punch to hallmark his coin silver teaspoons and other silver creations. He is a rare New Jersey maker, and we are aware of just two coins that carry his hallmark — an 1806 quarter, and this 1783 two reales piece. Listed as R.9 in the Rulau reference. (1855-57) ADMIT / TO / WOOD’S / MINSTRELS / 444 BdWAY/ NY, Rulau NY-964b, Brunk W-796 on a 1788 Two Reales. About Good 3 Host Coin, VF Counterstamp. The successor to Christy and Woods Minstrels. Famous for Ethiopian minstrelsy. (1876) PARISIAN / VARIETIES / 16. St & B’WAY. N.Y. Rulau NY-NY-230 on an 1875 Seated Half. XF40 Host Coin, XF Counterstamp. An attractive and originally toned example, well-struck with curved line punches for the countermark. Parisian Varieties was unsuccessful with a traditional repertoire, and soon became a burlesque house. (Total: 3 coins)

- 4225** (1850s) H. MULLIGAN PHILA, PA Counterstamp, Brunk M-973, Rulau M-Pa-370S #17 Variety, R.8, XF45 NGC. Ex: Richard Crosby Collection. H. Mulligan started his business in the 1840s as an importer of watches, jewelry, silverware, and watch cases. The mark on this planed-off one real piece was one of his hallmarks, and the counterstamp is known on just one other coin — a 1774 Spanish American two reales piece, which appeared in the 1985 Van Ormer Bowers & Merena auction, lot 2767. That piece was without a number, making the present coin the only known example with a number imprint (17). H. Mulligan issued other merchant store cards and Civil War store cards, but it is likely the rare counterstamped pieces pre-date the struck store cards. This piece is holed (as is the former Van Ormer coin). The counterstamp reads H. MULLIGAN / 17 / 444 N. 2nd ST / PHILA.

## End of Session Three

# SESSION FOUR

## COLONIALS

- 7001** 1662 Oak Tree Twopence, Small 2, — Edge Damage — PCGS Genuine. VG Details. PCGS Population: (0/0 and 0/0+). NGC Census: (0/0 and 0/0+).

## ERRORS

**7867** 1828 Half Cent, 13 Stars — Double Struck, 2nd Strike Off Center — AU58 NGC.

**7868** 1796 Liberty Cap Cent — Double Struck, Flip Over — Obverse Scratched — NGC Details. Good.

**7869** 1971-D Cent — Reverse Brockage — MS64 Red and Brown NGC.

**7870** Undated Washington Quarter — Struck on Fragment — MS66 NGC.

## GSA DOLLARS

**7871** 1880/79-CC Reverse of 1878, VAM-4, GSA, MS64+ NGC. A Top 100 Variety. The overdate is clear within the second 8 and 0 on this sharply struck near-Gem. Band certified by NGC in its original GSA holder, the coin displays rich, variegated colors on the obverse, while the Choice surfaces are brilliant-white on the reverse. Only coins that were in contact with the original canvas bags acquired such intense, multicolor toning. A few superficial, high-point scuffs suggest jostling within the bag, made more obvious by the toning. Census: 49 in 64+, 4 in 64★, 97 finer (8/19). NGC ID# AP7P, PCGS# 518922 Base PCGS# 407108

**7872** 1880-CC GSA MS65 NGC. NGC Census: (812/126). PCGS Population: (48/17). CDN: \$960 Whsle. Bid for problem-free NGC/PCGS MS65. Mintage 591,000. NGC ID# 2542, PCGS# 518851 Base PCGS# 7100

**7873** 1880-CC GSA MS65 NGC. CAC. NGC Census: (813/129). PCGS Population: (48/18). CDN: \$960 Whsle. Bid for problem-free NGC/PCGS MS65. Mintage 591,000. NGC ID# 2542, PCGS# 518851 Base PCGS# 7100

**7874** 1880-CC 8 Over Low 7, VAM-6, GSA, MS65 NGC. NGC Census: (52/13). PCGS Population: (8/3). MS65. NGC ID# 2542, PCGS# 518857 Base PCGS# 7104

## CERTIFIED MODERN PROOF SETS

**7875** 1939 Five-Piece Proof Set, PR64-PR66 NGC. The set includes: cent PR64 Red, nickel — Reverse of 1938 — PR66, dime PR66, quarter PR64, and half dollar PR66. The coins are individually holdered with consecutive certification numbers. (Total: 5 coins) PCGS# 904753

**7876** 1940 Five-Piece Proof Set, PR64-PR66 NGC. Includes: cent PR66 Red; nickel — Reverse of 1940 — PR65; dime PR64; quarter PR64; and half dollar PR65. The coins are individually holdered with consecutive certification numbers. (Total: 5 coins)

**7877** 1940 Five-Piece Proof Set, PR64-PR67 NGC. The set includes: cent PR64 Red, nickel — Reverse of 1940 — PR66, dime PR66, quarter PR66, and half dollar PR67. The coins are individually holdered with consecutive certification numbers. (Total: 5 coins) PCGS# 904754

**7878** 1940 Five-Piece Proof Set, PR64-PR67 PCGS. Includes: cent PR64 Red; nickel PR66; dime PR67; quarter PR64; and half dollar PR66. The coins are individually holdered with consecutive certification numbers. (Total: 5 coins) PCGS# 904754

**7879** 1941 Five-Piece Proof Set, PR65-PR67 NGC. The set includes: cent PR65 Red, nickel PR66, dime PR67, quarter PR67, and half dollar — No AW — PR66. The coins are individually holdered with consecutive certification numbers. (Total: 5 coins) PCGS# 904755

**7880** 1942 Six-Piece Proof Set, PR64 to PR66 PCGS. Includes: cent PR64 Red; nickel — Type One — PR65; nickel — Type Two — PR66; dime PR66; quarter PR66; and half dollar PR66. (Total: 6 coins)

**7881** 1942 Six-Piece Proof Set, PR64-PR66 NGC. The set includes: cent PR65 Red, nickel — war alloy — PR65, nickel — pre-war alloy — PR66, dime PR66, quarter PR64, and half dollar PR65. The coins are individually holdered with consecutive certification numbers. (Total: 6 coins) NGC ID# 22L9, PCGS# 904756

**7882** 1976-S Three-Piece Silver Proof Set, PR70 Deep Cameo PCGS. The set includes the quarter, half dollar, and dollar, individually housed in modern PCGS holders. (Total: 3 coins)

## EXPOSITIONS AND FAIRS

**7883** 1876 Centennial International Exhibition Medal Two-Piece Presentation Set, Uncertified. 51 mm, white metal. The two medals depict the Art Gallery, Fairmount Park, Philadelphia, and are housed in their original glass-top brown presentation case, patent Sept. 14, 1875. (Total: 2 medals)

## HARD TIMES TOKEN

**7884** 1837 Feuchtwanger Cent, Kenneth Bressett Signature, Low-120, HT-268, Breen 5-G, R.2, MS65 NGC. NGC Census: (0/0). PCGS Population: (11/2). NGC ID# 2CZP, PCGS# 20001

## WESTERN SOUVENIR GOLD

**7885** 1909 Three-Piece Alaska-Yukon-Pacific Expo Gold Piece Set, Alaska Miner Design, MS63-MS64 NGC. Included are: 1/4 DWT, AMRQ-6, MS63; 1/2 DWT, AMRH-1, MS64; 1 DWT, AMRD-3, MS63. Die varieties are described at MEHartGold.com. The coins are individually housed in Kenneth Bressett Signature holders. (Total: 3 coins) PCGS# 525880

*End of Auction*

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., Heritage Auctions, Inc., Heritage Collectibles, Inc., Heritage Luxury Property Auctions, Inc., Heritage Numismatic Auctions, Inc., Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the “Auctioneer”). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
  - For Domain Names & Intellectual Property Auction lots the Buyer's Premium is fifteen percent (15%) subject to a minimum of \$19 per lot;
  - For US Animation Art, Comic, Currency, Movie Posters, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots the Buyer's Premium is twenty percent (20%) subject to a minimum of \$19 per lot, except for Sports Collectibles lots which are subject to a minimum of \$14 per lot;
  - For Wine Auction lots the Buyer's Premium is twenty-three percent (23%) subject to a minimum of \$19 per lot;
  - For European Comic Art Auction lots, the Buyer's Premium is twenty-five percent (25%) subject to a minimum of \$19 per lot;
  - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$300,000 subject to a minimum of \$49 per lot, plus twenty percent (20%) of any amount between \$300,000 and \$3,000,000, plus twelve point five percent (12.5%) of any amount over \$3,000,000.

## Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Jewelry, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction (“Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

8. Bids in Signature® Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled “Choose your bidding method.” For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentation of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, email, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: “How can I lose by less than an increment?” on our website. Bids will be accepted in whole dollar amounts only. No “buy” or “unlimited” bids will be accepted.

The following chart governs current bidding increments during any live auction session or components thereof (e.g. mail/fax bids and LiveProxy bidding) (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid .....	Bid Increment	Current Bid .....	Bid Increment
< \$10 .....	\$1	\$10,000 - \$19,999 .....	\$1,000
\$10 - \$49 .....	\$2	\$20,000 - \$49,999 .....	\$2,000
\$50 - \$99 .....	\$5	\$50,000 - \$99,999 .....	\$5,000
\$100 - \$199 .....	\$10	\$100,000 - \$199,999 .....	\$10,000
\$200 - \$499 .....	\$20	\$200,000 - \$499,999 .....	\$20,000
\$500 - \$999 .....	\$50	\$500,000 - \$999,999 .....	\$25,000
\$1,000 - \$1,999 .....	\$100	\$1,000,000 - \$1,999,999 .....	\$50,000
\$2,000 - \$4,999 .....	\$200	\$2,000,000 - \$9,999,999 .....	\$100,000
\$5,000 - \$9,999 .....	\$500	>= \$10,000,000 .....	\$200,000

Note: Half-increment bidding is available prior to the live auction session.

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment (“Cut Bid”) only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A “Minimum Bid” is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN “Minimum Bids” ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE “Minimum Bid”, THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. “Minimum

Bids” are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the “Minimum Bid” for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in “Good Faith” when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in “Good Faith.” Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes “good funds”: checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentation of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer.
25. Lots you purchase may be subject to taxes or fees imposed by various foreign taxing agencies. You are responsible for paying all foreign imposed taxes whether VAT, GST, etc. prior to delivery unless other arrangements are made in writing. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Should state sales tax become applicable in the state for delivery prior to delivery of the property on the invoice, the bidder agrees to pay all applicable state sales tax as required by the delivery state as of the shipping date. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have

the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

**Delivery, Shipping, and Handling Charges:**

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:

- Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. **NOTICE: Auctioneer is neither an insurance company nor a common carrier of any type.**
- Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for ¼ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
- Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**

35. It shall be the responsibility for the successful Bidder to arrange pick-up or shipping in a timely manner (within 10 days). Held Lots will be subject to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 20% Seller's Commission.

36. A. NOTICE OF CITES COMPLIANCE: The purchase of items made from protected species: Any property made of or incorporating endangered or protected species or wildlife may have import and/or export restrictions established by the Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES) in various countries and domestically. Plant and animal properties include (but are not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, alligator, lizard, or other wildlife. These items may not be available to ship internationally or, in some cases, domestically. Domestic bans and restrictions exist in these states: 1) California state law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California. 2) Fossil Ivory is currently banned or restricted in 5 U.S. states: New York, New Jersey, California, Hawaii, and New Mexico. By placing a bid, the bidder acknowledges that he or she is aware of any restriction in their country or place of residence and takes responsibility for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment or afford them the capacity to void their purchase or payment. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or failure to mark lots containing protected or regulated species. For further assistance, please contact client services at 1-800-872-6467.

36. B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

36. C. Auctioneer shall not be liable for any loss caused by or resulting from:

- Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles.

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

**Cataloging, Warranties, and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

**Release:**

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and

privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

**Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer (which claim you consent to be made a party) (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage agree consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

**Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

**State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

## Additional Terms & Conditions: COINS & CURRENCY

**COINS and CURRENCY TERM A:** Signature® Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. **AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY.** Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

**COINS and CURRENCY TERM B:** Auctions conducted solely on the Internet **THREE (3) DAY RETURN POLICY:** Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

**COINS and CURRENCY TERM C:** Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

**COINS and CURRENCY TERM D:** Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

**COINS and CURRENCY TERM E:** Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency and PMG may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 10470, Peoria, IL 61612-0470. PCGS Gold Shield, PO Box 9458, Newport Beach, CA 92658. Third-party graded notes are not returnable for any reason whatsoever.

**COINS and CURRENCY TERM F:** Notes graded by PCGS Currency between February 4, 2009 and January 30, 2019 were graded and authenticated by K3B, Inc. under license from Collectors Universe, Inc. K3B, Inc., now operating as Legacy Currency Grading, has expressed in writing that notes graded under the license during this time period will still be covered by the full written guaranty of PCGS Currency. Warranties may be available from Collectors Universe, Inc. for all PCGS Currency notes graded prior to February 4, 2009.

**COINS and CURRENCY TERM G:** Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

**COINS and CURRENCY TERM H:** Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

**COINS and CURRENCY TERM I:** Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

**COINS and CURRENCY TERM J:** Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

**COINS and CURRENCY TERM K:** All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the noncertified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

**COINS and CURRENCY TERM L:** Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

**COINS and CURRENCY TERM M:** NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

**COINS and CURRENCY TERM N:** For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

**COINS and CURRENCY TERM O:** Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

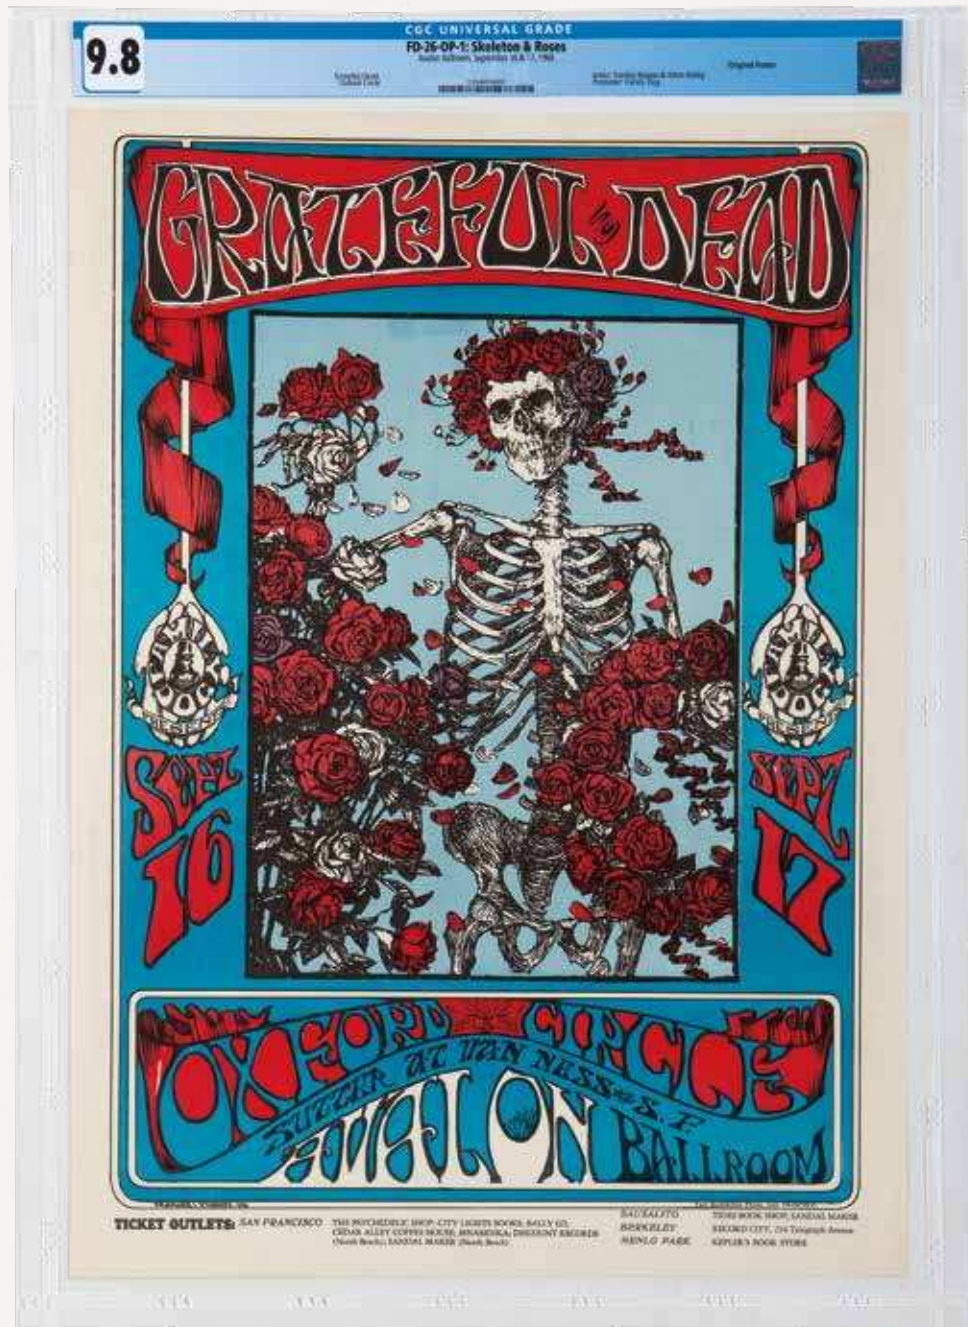

For wiring instructions, call the Credit department at 877-HERITAGE (437-4824) or email: [CreditDept@HA.com](mailto:CreditDept@HA.com).

### Notice as to an Auction in New York City:

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at [HA.com/Licenses](http://HA.com/Licenses) and as posted at the venue site.

All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at [HA.com](http://HA.com) and in the printed catalog, including term #21, which states: The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

## GRATEFUL DEAD 1966 "SKELETON & ROSES" CONCERT POSTER GRADED NEAR-PERFECT 9.8

What a masterpiece, in total investment-grade quality. Known as FD-26, this is the most recognizable, iconic, admired piece of San Francisco psychedelic concert-poster art ever. Graded a spectacular 9.8, and there's never been one graded higher. Photographed with, and signed off by, the co-creator of this gem 53 years ago, the legendary Stanley Mouse. One for the ages.
